Quality Tells
When Henry Disston was asked the question:
"What do you put in your saws?"
He replied:
"Good steel and honest work."
UPON THIS FOUNDATION IS BUILT
DISSTON QUALITY

"If you want a saw it is best to get one with a name on it that has a reputation. A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."
HENRY DISSTON & SONS., Inc.
Established 1840.
PHILADELPHIA, PA.

TRUE TEMPER

The NEW Universal Square

Is proving itself sure to become the standard tool of its kind.

Made in three sizes. No. 6—6 in. No. 10—10 in. No. 13—13 in. The only kick coming on us is that we did not fill orders promptly. We did not expect so heavy a demand. It was not our fault.

If you tried to get this tool from your jobber and became discouraged because he was one who could not get his order for them, we now advise you that this condition has been overcome by our building a large country factory where they are being made by the thousands, and every order whether sample or stock, is shipped promptly. So, Try, Try, again.

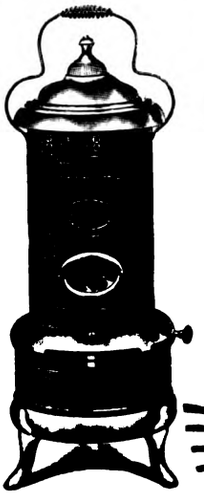
Note Construction of Grand Safety Burner

A—Flame Spreader. B—Air space outside of Wick Tube. C—Air Space inside of Wick Tube. D—Wick. E—Outside Casing to Burner. F—Air Space between Fount and Outer Casing. G—Fount for Oil. H—Feed Pipe conducting oil from Fount to Burner. I—Shield resting on top of Fount with Air Space underneath.



High Above All Others

Our Grand Safety Burner

for the simplest and most conclusive of reasons---**it is the best.**

It is so good that it has sold over **a million**

Aluminum Oil Heaters

for us. And for that very reason it is **certain** to sell heaters for you.

Do you want to handle the heater with the forcible, distinctive selling points that stand out head and shoulders above the common line? The heater that is half sold on being simply shown? That **stays** sold?

Do you think for a moment that your customer won't appreciate such points as

Can't possibly smoke. Can't possibly smell. Can't possibly explode.

Can you afford to waste time and good nature trying to sell any other?

Either we or your jobber will take care of your valued order (you will never regret having sent it).

Send for our instructive booklet—free.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

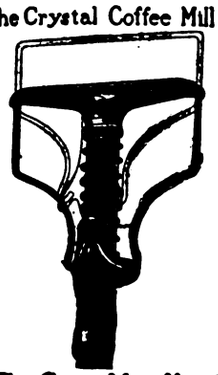
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

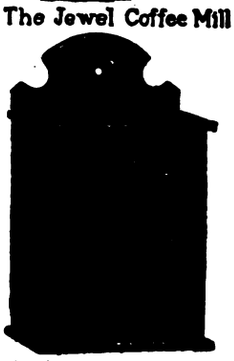
The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

GUARANTEED FOR THREE YEARS.

In the future the Horton Manufacturing Co., Bristol, Conn., have decided to guarantee their "Bristol" Steel Fishing Rods for three years, instead of one year, as heretofore. The three-year guarantee applies to all "Bristol" Rods sold since October 1st, 1906; that is, Rods which were shipped from their factory since that date. This is an excellent proof of their faith in the Rods and should make a good selling argument for the dealers.

THE TURNER BRASS WORKS.

We call attention to the following line of gasoline, kerosene and alcohol blow torches, braziers and special machines, as manufactured by the Turner Brass Works, of Chicago, Ill. Their catalogue is free and they will take pleasure in mailing same upon application. This firm manufactures and markets not only the line above mentioned, but issues catalogues covering the following specialties: Automobile Specialties, Foot and Pressure Pumps, Repair parts for Electric Arc Lamps, Hardware Specialties, Brass Letters and Figures, Gasoline Vapor Lamps, Sidewalk Name Plates, Machinery Name Plates, Gas Arc Lamps. They occupy floor space of 56,000 square feet, and are thoroughly equipped to manufacture for others. They make specialty of automobile screw machine work, spinning, stamping and casting bronze, aluminum, lead and copper. They report a very large gain in business over any previous year. Their stock tools are sold under the maker's guarantee, and advertise "Your money back if not satisfactory."

THE SAVAGE ARMS CO.

Mr. A. W. Connor, sales manager of the Savage Arms Co., advises us that, although the Savage Arms Co. have turned out the greatest number of rifles they have ever manufactured in one year, their capacity was nowhere near large enough to take care of the great volume of business tendered them. This particularly applies to their "Model 1899," which is now made in the "Takedown" and "Featherweight," as well as the regular solid frame pattern that they have had on the market for years. He also states that they have increased their facilities very materially for 1907, and hope to be able to fill orders more promptly next season. Mr. Connor says that he attributes the success of the Savage Arms Co. largely to the strenuous efforts they have made to produce the highest quality arms that can be made, and the hearty co-operation they have always accorded the trade and dealers throughout the country. They market their goods on a sound, solid basis, never entering into any wild schemes or chasing phantoms. "Good goods" for the consumers and "good profits" for the dealers has evidently been the key note of their success.

McKINNEY MFG. CO.'S NEW BOOK.

We have received from the McKinney Mfg. Co., Allegheny, Pa, a very handsome leather-covered memorandum book suitable for the vest pocket, which they are distributing to the trade. As it contains space for jotting down a daily memorandum, postal information, facts about the rural free delivery system, table of weights and measures, brief abstract of business laws, etc., etc., interspersed with a number of maps, it is just the kind of book that will be doubly welcome to the one privileged to receive it.

APPLICATION FOR CHARTER OF AMERICAN BEAUTY STOVE CO.

Notice is hereby given that an application will be made to the Governor of the Commonwealth of Pennsylvania on December 20, 1906, by George W. Blaine, Wesley E. Jordan and Ruth M. Towne, under an Act of Assembly of the said Commonwealth entitled "an Act to provide for the incorporation and regulation of certain corporations," approved April 29, 1874, and the supplements thereto, for a charter for an intended corporation to be called "American Beauty Stove Co.," the character and object of which shall be the manufacture of stoves or of any article of commerce from metal or wood or both and for these purposes to have, possess and enjoy all the rights, benefits and privileges of the said Act of Assembly and its supplements.

CLARK OLDS, Solicitor.

Erie, Pa., November 27, 1906.

WAKE UP! WAKE UP!

G. E. Hall, 211 Centre Street, New York, who is well known as the manufacturer of that superior lubricant "Hall's Mineral Machine Oil," is responsible for some of the most striking ways of addressing the public and calling attention to the excellent qualities of his oil. His latest is headed "Wake Up," and illustrates a full fronted specimen of the *genus homo* fast asleep, to emphasize the fact that "some people go through the world with their eyes shut." To get at the contents of the card a movement has to be made which effectually opens his eyes, and he becomes one of the elect at once. "A faucet can, delivered free with a five gallon order," does the business for him.

H. W. JOHNS-MANVILLE CO. IN NEW ORLEANS.

In order to handle to the best advantage their large and rapidly increasing business in this section, the H. W. Johns-Manville Co., of New York, will open a New Orleans branch on January 1. This will consist of a large retail store, offices and warerooms, located in the three-story building at the corner of Baronne and Perdido Streets. This company is well-known as being the largest manufacturers of asbestos and magnesia products in the United States, if not in the world. They also manufacture a large line of electrical specialties. W. E. Carpenter, formerly well-known as the local manager of the Western Tube Company, has been appointed as manager of the New Orleans branch. The company propose carrying a large stock of their products constantly on hand, so that shipments can ordinarily be made from New Orleans stock. Among the well-known products of the company might be mentioned Asbestos Roofing and Insulating Materials, Steam Pipe and Boiler Covering, Asbestos Packings of all kinds, "Noark" Fuse Devices and other well-known electrical devices manufactured by the company.

AMIOT, LECOURS & LARIVIERE, MONTREAL.

When we gave credit in our last issue to the space occupied by this firm when they enlarged their store premises, it seems we were far from liberal enough. We simply gave the area of the ground occupied. The amount of floor space is exactly 49,560 feet. No wonder that objection was made to this large discount in the premises.

THE WINCHESTER SELF-LOADING RIFLE.

On page 28 of this issue the Winchester Repeating Arms Co. present the claims of their .351 Calibre High Power Model 1907 Self-Loading Rifle, which is referred to as "the gun that shoots through steel." The new rifle is neat and attractive in appearance, having the usual Winchester symmetry, compactness and beauty of outline. It has the Winchester Model 1905 Self-Loading system, which is simple and strong and has demonstrated its absolute positiveness and durability during two years' service in the hands of users. It holds six shots, five of which are loaded into the magazine. This magazine is detachable and can be inserted in the gun when the bolt is closed, making it quick, safe and handy.

The detachable magazine in a rifle of this type has many advantages over the fixed magazine. It permits carrying extra loaded magazines, by means of which rapid and continuous fire can be maintained, and also makes it unnecessary to work the cartridges through the gun in unloading. The empty shells are ejected from the side. The working parts of this gun are few and strong. The barrel is stationary, like that of an ordinary rifle, and the sights are attached directly to the barrel, which is essential for accuracy. The take-down device on the Winchester Model 1907 is simplicity itself. By giving the take-down screw, found at the rear of the receiver, a few turns, the rifle is separated into two parts, the stock and action being in one part and the barrel and receiver in the other. When taken down the exposed working parts are all accessible and can be easily and thoroughly cleaned.

✤

It is a safe bet that the neighbors of that Ohio girl who recently went to jail rather than tell how old she was have all advanced their estimates at least ten years.

DECEMBER 25, 1906

Editorial Trade Review

Now that we are about commencing the new year, it need not be a matter of surprise if the manufacturers that have not already availed themselves of the opportunity, will find it convenient to level up their quotations, with a view of being prepared for a continuance of conditions that make such a course necessary.

The business that will be done this month will bear a superb comparison with the Decembers that have passed along the annals of time. That it has universally been an encouraging month to brag about the volume of sales, is beyond all question. The amount of specially prepared goods selected for the holiday season has been in assortment of a character and volume unknown to the trade of the past, and the profit accruing from such sales, while not especially large, for competition was had in plenty, was amply satisfactory and full of promise for the future, when even a greater field for effort will be made of the opportunity for catering to wants of this description. The trade will be found, when all is over, to take on an added dignity in many homes when pursuing a course that adds to their stock a class of goods so desirable for future sales of any kind, and with the intelligent clerks that invariably are to be found within reach, we may expect the dealers to add to their stocks anything that will make them permanently attractive.

There is every appearance that the stocks to be carried over by the wholesale trade will not be especially large in volume. Good orders for future wants of the jobbers will have to be made up and given succeeding the inventory, to the completion of which the month of January is usually devoted. Slow deliveries on stocks already ordered have had their bearing on the future, and while the goods ordered at old prices will all be called for and absorbed in stock, the feeling is general for the trade of another year they will contribute only a drop in the bucket of their current wants. Already those among the most conservative of buyers are agitating the possibility of an actual scarcity of goods being among the fears of the future. The manufacturers are complaining bitterly about the inability that exists among them of getting the help they could make useful. The field of mechanical labor is in need of many a stalwart mecchanic who has brains enough to earn the good wages he could command; but skilled labor is difficult to find, and it behooves the prudent dealer who desires to be prepared for his own trade to purchase his supplies early and not when he is one of a mob treading on one another's heels.

"A Merry Christmas and a Happy New Year to all" is the feeling with which every Hardware man is inspired when he reflects that the year we have just passed through has been so fruitful in good results, so prolific in profitable projects, that rarely in history has it been equalled by the amount of business possible to be obtained from such favorable conditions. With every heart filled with the thanksgiving inseparable from a generous spirit, and imbued with a firmer belief that we have so deported ourselves during the year as to feel we are worthy of God's bounty, we can safely pray for its continuance under the favorable auspices of 1907.

THE HOLIDAY ATMOSPHERE.

No skillful artist fails to put himself in the atmosphere of his subject either by material association or self created enthusiasm. There is no more fertile time in which to plan the holiday campaign in any business enterprise than during the holidays or while the atmosphere is still fresh at hand.

No other time is so full of holiday suggestions, advertising ideas, window designs, either originating in the enthusiasm of the season or adapted from the window of some other tradesman, or perhaps a happy catch phrase derived from a passing shopper. Where all the holiday idea must be drawn from the good commercial sense of the merchant, as it must be, so far in advance of the season as his plans should be matured, it is difficult for him to put much enthusiasm into the subject. It requires hard raking of his gray matter and the result is very apt to be stilted and commercial. It's when the holiday shoppers are out in force and everything smells Christmasy that real inspirations begin to knock on the average man's skull and prod him into saying, "If I had only thought of that in time what a hit it would have been. Too late now."

It's right here, if it's anywhere at all that the progressive retailer will go into his desk for a blank note-book, print on the outside cover of it in big bright letters, "Holiday Ideas," and then proceed to jot therein the things he ought to have "thought of sooner." Put down a few bright window suggestions as they come to you while your neighbors are all dressed in Christmas furs and Santa Claus is grinning at you from all sides. Add a few advertising hints you should have just been sending out instead of the stiff business talks gotten up purely for commercial reasons. Note down the things that go the best for Christmas gifts; the things most called for that you did not have; the things your neighbors carried that in truth belonged more to the Hardware line. Paste in a few of the most striking advertisements or circulars issued by the city stores who do things on a bigger scale than you can afford to. Record the quaint ideas expressed by the children in their tours. Of course, you won't forget the conversation of the ladies; they talk a good deal, or have the name of doing so, but some way we all like to listen to a good deal that they have to say. Perhaps their ideas, some of them, may suggest designs that would be most attractive framed in the window or the newspaper advertisements.

Don't confine your observations to your own store, or even to business hours. Save a few street-car fares and take a stroll among your neighbors with your eyes open. Even the jeweler or dry goods merchant may have ideas that a little skill would render even more fitting in a Hardware window.

Then watch your children at home. It isn't every season that calls out their comments and enthusiasm on things commercial as the holidays are sure to do. Some of their quaint little sayings may prove no inspiration, or give birth to one.

Jot it down in your special book and finally, when the gay season is all over, file it away among the things you do not often overhaul but know where to find.

Next season, instead of rubbing furrows in your skull in a vain effort to recall what sort of a sensation Christmas is anyway, just turn to your note-book and begin the sifting process. Some lines so popular a year ago are out of date now. You know which ones; some ideas are not obsolete or threadbare. Still there lies before you a big chunk of holiday atmosphere with its inspirations as well as some suggestions ready made.

PROTECT THE CUSTOMER.

"If I was a Hardware dealer," grumbled a disappointed customer, recently, "I would try and keep the commoner repairs for the goods I handled. Last month I purchased an expensive hard coal stove and yesterday by accident got a hole punched through the door. To-day I came in here on purpose for the necessary repairs and was met by the calm assurance that 'we do not keep mica.' For my part I would either keep it or quit selling stoves that require it. It's too much like telling a man to go to thunder as soon as you have made a sale and taken his money."

There is a good deal of justice in the complaint and a good suggestion, for every retailer; keep in stock a reasonable supply of repairs for your own line of goods and do not fail to include in that list the parts most likely to become broken that would most effectively disable the article sold. In the case of stoves the necessary repairs would be a few sheets of mica, an assortment of stove bolts, pipe, including elbows; dampers, knobs and hinges, with a supply of furnace cement; these will give your customers a reasonable protection against unreasonable inconvenience from break-downs, whether caused by defects in the stove or by some accident. Such an outfit will be found to cost little and will render almost any stove usable until the heavier and more expensive repairs can be ordered for it from the factory. Because a fire-pot happens to crack is no reason why the purchaser must suffer for the inconvenience of changing stoves or the chills of inclement weather while a new one is in transit. More than likely a few cents worth of furnace cement will run him until the new piece comes.

Of course the same principle holds in other lines; so far as possible protect the customer against break-downs and when a breakdown does occur protect him as effectually from serious loss and inconvenience by having at hand something to tide him over until the new piece can be obtained. The effort will be appreciated, though you may be told it through continued patronage rather than by words.

WHAT CASH DISCOUNTS REPRESENT.

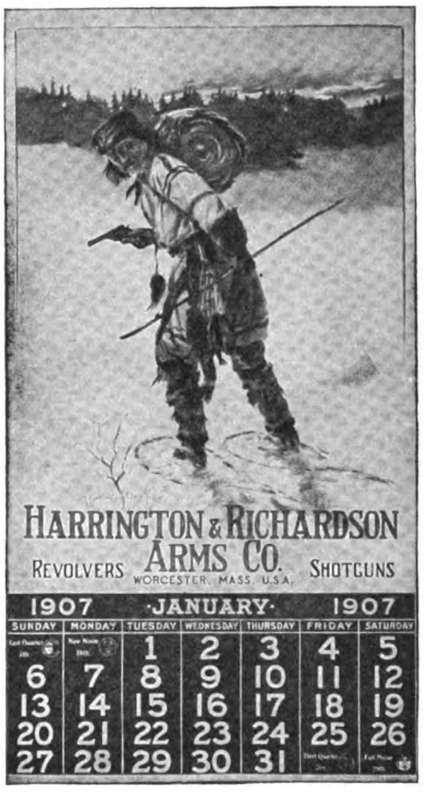
The margin between buying for cash and accepting the full credit terms represents to many a merchant an amount with which he could be well satisfied from figuring on any further net profit from his business. How, in view of this, the importance of cash discounts can be overlooked is amazing. One does not have far to seek to see evidences of their great potency as an element in successful modern merchandising. Take the big departmental stores, for instance, which are taking away by their mail order system a great deal of trade from the country merchants. Cash discounts represent the greater part—and in some cases all—of their net profit. That is how they are able to make prices which attract readily, and emulation of their policy in this respect is the first step that the small dealer must take in placing his business on such a basis that the people of his district will prefer patronizing the home market to sending abroad. Competition at the present day is so keen that the man who would attain success must figure close and hard, and pass by no short cut that presents itself. There is none that will curtail the distance which he must travel more than that to which access is gained by way of cash discounts.

In the majority of cases it will pay the merchant to borrow money from the bank for the purpose of discounting his bills. It is easy for him to figure out how he is going to profit handsomely by doing this.

From merchants at various points we learn that the trend of trade is more and more toward a cash basis. The public has plenty of money and, generally speaking, asks for credit as little as possible. This is a satisfactory condition that should be nursed into greater proportions each year, until the straight cash business is made possible. To reach this goal should be the ambition of every merchant.—*Hardware and Metal.*

A LIFE-SIZE ADVERTISEMENT.

The Pritchard-Strong Co., Rochester, N. Y., who are noted in the trade for the Lantern and Hardware Specialties they are manufacturing, have recently prepared a striking novelty for distribution that is intended as an attraction in window display that will deepen the impression they have already made by their Prisco products. They are sending out a characteristic lithograph in 10 colors which is securely mounted on cardboard nearly one-quarter inch thick, representing "Uncle Obadiah" critically and satisfactorily viewing one of the company's lanterns as being the best he has ever seen for the purpose. The lithograph, being of life size, is made so it can be stood up in a conspicuous spot, and will be found an excellent advertisement of permanent interest. The color scheme was originated by the well-known artist and illustrator, Edward Penfield, of New York City. The Lantern, which is shown in connection, is a



"THAT'S A DANDY SURE ENOUGH."

real one, and fastened to the lithograph by a tack driven into the hand, and is one of the latest Prisco products, their "Copper Fount No. 2 Cold Blast Lantern, nickel-plated." As a striking advertisement for the Hardware store, it will prove a novelty that will accomplish its purpose in a clever manner.

HARRINGTON & RICHARDSON CALENDAR.

The Harrington & Richardson Arms Co., Worcester, Mass., are one of the earliest in the field of the sporting goods people with a handsome calendar. We give a good illustration conveying an idea of this emanation of the art department. The

calendar is a lithograph 14 by 27 inches, in 10 colors, the subject of which is "The Canadian Trapper." The company make the announcement that they will mail to any of our readers desiring a copy of the calendar, while the supply lasts, if they mail a postal card in reference to the same, and mention HARDWARE in their application. We hope this proposition will be availed of largely by our readers.

ADVERTISING TO HELP DEALERS.

An important event that is now claiming the attention of the Hardware trade all over the United States is the extensive advertising campaign just being launched by the American Fork & Hoe Co., of Cleveland, Ohio. Large advertisements pertaining to farm and garden hand-tools are appearing in the leading agricultural publications this month for the first time. The purpose of this advertising is to better acquaint tool users with a line of articles to which scarcely enough attention has been given in the past. The advantages of using correctly shaped, accurately constructed, properly tempered tools of reliable quality are convincingly shown. A feature of special importance is the information which is given in regard to special tools for special purposes in field and garden work. The careful and scientific methods of land culture that are now rapidly coming into general use with the increase of population, and the constant subdivision of farms, are rendering proper tools more and more necessary.

The free distribution of a valuable book, "Tools and Their Uses," will constitute an efficient part of the advertising. It illustrates and describes the purposes of hundreds of desirable hand tools. This is the first time that any information of the kind has been published. With the adoption of advertising, a new standard of manufacturing tools has been put into operation by the American Fork & Hoe Co., and all their first quality brands have been improved wherever possible. Hereafter all tools complying with the new standard will be designated "True Temper" tools and at the various factories this brand will be applied in addition to the labels used on their well-known lines.

This progressive move on the part of the American Fork & Hoe Co. gives the merchandising of farm and garden tools a new importance and it is safe to predict greater interest in this line of goods among dealers. While all tools are sold through jobbers, the retail trade is directly assisted in various ways by the manufacturers, to get the immediate results from their advertising. The idea of the manufacturer helping dealers to sell his goods is not new, but the American Fork & Hoe Co. have some original plans that are unusually promising.

WINNING CUSTOMERS WITH SHOP TALK.

An English contemporary, in an article on shop talk, remarks that "to be interested in one's work, whatever that work may be, is no longer considered unseemly. One may even talk shop at fitting seasons without being a bore." Here is the text for a discussion which the sporting goods dealer should find of the utmost interest. Someone has said that people are never really at their best except when they are talking shop, for it is then that they thoroughly forget all else and lose themselves in their subject. There are other times when the man who handles firearms, fishing tackle and other articles devoted to the sportsman's use should have a complete knowledge of these goods at his tongue's end. And on other occasions he should remain discreetly silent while the customer who is self-satisfied in his own wisdom does all the talking. The merchant who takes an interest in his business will know all, or very nearly all, there is to know about his line. And he will be the merchant who commands a large patronage because people have faith in his opinions. Occasions frequently arise where the customer is better versed in the particular line he contemplates buying than the merchant himself. This does not mean that the sportsman has too much knowledge, but that the man who sells the goods has too little. The great majority of customers in the retail sporting goods establishment are open to conviction and value the advice of an expert who is qualified to direct them intelligently. When a sportsman or athlete has been helped once in the selection of an article and it gives him satisfactory service, it is only natural that he should return to the same dealer when he is again in need of goods which are handled at that store.

OUR INDIA RUBBER IMPORTATIONS.

The popularity of the bicycle and automobile, coupled with the increased use of electricity in the daily affairs of the people, has increased enormously the importation of india rubber. That article shows now a larger value in the import list than almost any other single product. The value of india rubber imported in the crude state in the year about to end will aggregate nearly or quite 50 million dollars, and if to this is added the value of old and scrap rubber intended for remanufacture the total for the calendar year 1906 will considerably exceed 50 million dollars. In the ten months ending with October the imports of crude rubber were valued at 41½ million dollars, and as the imports for the single month of October were valued at 5 millions it seems probable that the total for the entire year will be over 50 million dollars.

The growth in demand for india rubber and the consequent growth in importations—for india rubber is not a product of continental United States—has been more rapid than that of almost any other important article during the past decade. The value of rubber imported in the calendar year 1896 was but 15½ million dollars, or less than one-third of the prospective total for the year 1906, thus indicating that the value of rubber imported has increased more than 200 per cent. in a decade.

This increase in the value of india rubber imported is due in part, however, to the advance in price caused by the great increase in demand in various parts of the world, and especially in the United States, which now consumes more than one-half of the rubber crop of the world. The quantity of rubber imported in the first ten months of 1896 was 26 million pounds and the stated value 11½ million dollars, making the average value per pound 44½ cents, while the quantity imported in the ten months of the present year, for which the Bureau of Statistics of the Department of Commerce and Labor has now a record, is 53½ million pounds, valued at 41⅔ million dollars, or an average of 77 cents per pound. It will be seen from these figures that the average import price of crude rubber has advanced 73 per cent. during the last decade, due chiefly, it may be assumed, to the increased demand for rubber to be used in the manufacture of bicycles, automobiles, and the various appliances required through the greatly increased use of electricity as applied to lighting, transportation, and the manufacturing industries.

These figures of rubber imported include only that brought in in the crude state. In addition to this there were brought into the United States during the ten months ending with October more than 18 million pounds of old and scrap rubber for remanufacturing, and 12½ million pounds of gutta joolatong, an article somewhat similar to rubber, which is mixed with india rubber for use in the various industries. In addition to this there was imported 326,053 pounds of gutta-percha, which is used chiefly in the manufacture of submarine cables.

Brazil is the chief contributor to the india rubber supply of the United States, the quantity imported from that country in the ten months ending October amounting to 26¾ million pounds out of a total of 53½ millions, while the United Kingdom contributed 8½ millions, Germany 3 millions, other European countries 7 millions, Mexico nearly 3 millions, Central America a little over 1 million, and the East Indies over 2 million pounds. All of the rubber sent from the European countries to the United States is, of course, the product of non-European sections of the world, chiefly colonies of the various countries from which it is sent. The United Kingdom draws from its colonies in Africa, India, and the Straits Settlements the bulk of the rubber which it sends to the United States, while Belgium draws large quantities from the Kongo Free State, which it controls. Portugal draws its supply for re-exportation, amounting to several million pounds, from its colonies in Africa, while Germany draws its supplies from its colonies in Africa and the Pacific Islands.

This growing demand for india rubber and the reduction of the natural supply owing to the crude and often reckless manner in which the supplies are gathered from the rubber forests of South America and Africa have resulted in the establishment of rubber plantations in India, Ceylon, the Malayan Peninsula, and Java, and these have already given such assurance of success as to justify the assumption that rubber cultivation is to become an important industry in the tropical world. Experiments made in establishing rubber plantations in Java, the Straits Settlements, and Ceylon have been so successful as to justify the belief that the rubber production of the world will, in the not distant future, come largely from cultivated instead of from the natural rubber trees as at present. Indications seem to justify the belief that the Philippine and Hawaiian Islands are capable of producing large quantities of this article.

Data collected by Philippine botanists and collectors show that the climate, soil, and other conditions of the Philippine Islands are favorable to rubber and gutta-percha, and government nurseries have been already established in the islands for the distribution of rubber plants for use of rubber plantations. The three great rubber-producing sections of the world at the present time are: (1) The East Indies, including British India, Ceylon, Burma, Straits Settlements, Java and Borneo; (2) Africa, including numerous foreign possessions and free States along the coast of Africa and Madagascar; and (3) Mexico and South America. The growing demand of the world for india rubber and the importance of the possible development of this industry in the Philippines and Hawaii are suggested by the fact that the value of rubber imported into the United States alone has grown from less than 16 million dollars in 1896 to over 50 millions in 1906.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

GUARANTY OF COLLECTION.

QUESTION.—B gave a note to C for some goods for $250. At the time the note was given A indorsed on the note, "I hereby guarantee the collection of the within note in consideration of the payee taking the same." The maker has since become insolvent. Can B proceed at once against A to recover the amount of the note?

ANSWER.—This was a guaranty of collection and not a guaranty of payment. One who becomes a guarantor of collection agrees simply that the claim is collectible by due course of law, and only promises to pay in case the note cannot be collected by suit. In other words, before the guarantor can be held, judgment must have been recovered against the principal debtor and the execution issued thereon must have been recovered without unnecessary delay. The fact of insolvency is no excuse for the failure to prosecute. It follows that A cannot be held liable until a judgment has been obtained against B and an execution returned unsatisfied. It would be otherwise if the guaranty were one "of payment" instead "of collection." The guarantor of payment becomes liable as soon as the principal debtor makes default.

SALES OF GOODS IN BULK.

QUESTION.—Is there anything to prevent a retail dealer who is in debt from selling his entire stock in trade to a purchaser, and will the purchaser take the goods free from the claims of the seller's creditors?

ANSWER.—Until the passage of recent statutes there was nothing to prevent a retail dealer from selling his entire stock to a single purchaser; and if the purchaser took the stock in good faith and paid fair value for it, the seller's creditors had no remedy against the purchaser. Recently many of the States, to prevent fraud, have passed statutes to cover this state of facts. The New York Statute passed in 1902, which is a fair sample of such legislation, provides that: "A sale of a portion of a stock of merchandise other than in the ordinary course of trade, in the regular and usual transaction of the seller's business, or the sale of an entire stock of merchandise in bulk, shall be fraudulent and void as against the creditors of the seller," unless the seller and the purchaser shall make an inventory at least five days before the sale, and the purchaser shall, at least five days before the sale, notify each of the seller's creditors, of whom he has knowledge, or can acquire knowledge of the sale and the proposed price to be paid. In New York this statute was held to be unconstitutional on the ground that it invaded the right of personal liberty and private property. Similar statutes have been adopted in upward of twenty states. They have been held valid in Massachusetts, Connecticut, Tennessee, Washington and other jurisdictions, while in a few states such as Ohio and New York, the courts have refused to sustain them. The New York Statute has now been amended so as to provide that such sales shall be only presumptively fraudulent. It is uncertain what view the courts will take of the amended statute. Most of the States upheld such legislation, which is aimed to suppress an evil that is almost universal.

ACCEPTANCE OF CHECK IN FULL.

QUESTION.—We got into a dispute with a customer as to the amount to be paid for a bill of goods sent him. He has mailed us a check for the amount which he claims to be due, on which he has written "in full settlement of account." Can we keep the check and send him a statement showing balance due and collect the difference from him, or will we lose our right to collect the difference if we accept the check?

ANSWER.—You cannot keep the check and recover the difference if there is a genuine dispute as to the amount due. The check mailed for the amount which your customer claimed he owed you was sent you upon condition that it should be received in full payment. You are not obliged to accede to that condition. You can return the check, declining to accept it in full payment. If, however, you accept the check, assuming that there is a genuine dispute as to the amount of the debt, you must accede to the condition imposed by your customer that it shall be accepted in full payment. The rule is different where there is not a bona fide dispute as to the amount due. If the debt is a liquidated one as to amount, the acceptance of a less sum in full will not prevent the recovery of the balance.

THE CHURCH STREET TERMINAL BUILDINGS FOR THE HUDSON TUNNELS.

The proposed terminal of the Hudson tunnels, in course of construction on Church Street between Cortlandt and Fulton Streets, New York City, will occupy nearly two entire blocks. There will be two buildings divided by Dey Street, but with a continuous connection below ground, and speaking of the whole as the terminal, it will constitute the largest office structure in the world. It will be 22 stories high and there will be space for 6000 offices, so the combined structures will also have a larger and more varied representation of business interests than any other building of the kind in the world. It is estimated that 1000 persons will pass through its corridors each minute through the day and the permanent population will be at least 10,000 people. There will be 39 elevators, of which 22 will be express cars to the eleventh floor. The two buildings will occupy 70,000 sq. ft. of ground and the cubic area will be 14,500,000 cu. ft. above ground and 3,650,000 cu. ft. below ground.

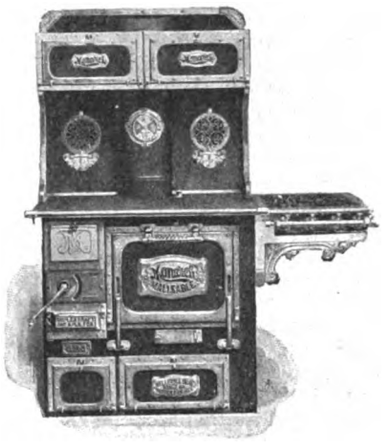
Both buildings will be similar in design and they will be a fine example of Italian renaissance. From the ground floor to the fourth story polished granite and Indiana limestone will be used and the section above will be of brick and terra cotta. The public halls will be of marble and the interior finish will be of hardwood throughout. A feature of the building will be an electric storage battery which will be the largest in the world. This will form a reserve in case of an accident to the generating plant. There will be a complete conduit system arranged for telegraph, telephone and stock ticker systems as well as compressed air and vacuum cleaning apparatus.

To get an idea of the size of the building a comparison with the Broad Exchange Building, now the largest in Manhattan, is interesting. The Broad Exchange contains about 7,000,000 cu. ft. and nearly three Broad Exchange buildings could be put on the space occupied by the terminal building. An interesting section of the building will be an arcade on the ground floor consisting of a great glass enclosed passageway lined with shops and booths. It will be much larger than any of the famous European arcades and an attempt will be made to make it one of the great shopping centers of the world.

The arrangement of the underground part of the buildings which will form the terminal proper is especially interesting. Passengers will enter on the street floor and pass down to the station by way of easy stairways, inclined planes and elevators. The floor surface below the sidewalk will be known as the concourse floor and there will be waiting rooms, retiring rooms, ticket offices, telegraph stands, telephone booths, newspaper stands, restaurants, flower booths and everything that goes to make up a large railroad station. Below the concourse floor will be the train platforms, six in number, with five tracks alternating between them.

The cars are to be of steel and will have openings at the side and ends similar to those in use on the Brooklyn Bridge trains, and alternate platforms will be used for entrance and exit. It is proposed to operate eight-car trains through the tunnels during the rush hours on a headway of 1½ minutes between trains, and the passage under the river will probably average 3 minutes. There will be a foot passageway extending under Dey Street and connecting with the Manhattan Subway and it will be possible to descend from the street to the concourse level and walk under Dey Street to the Fulton station of the Subway.

The Church Street terminal buildings will constitute the hub upon which will be focused all the downtown traffic of the four great railway systems and trolley lines terminating in Jersey City. The tenants of the buildings may, without at any time going from under cover, be landed in the Pennsylvania, Erie and Lackawanna stations in Jersey City and may similarly reach the Subway and be landed in the Grand Central station, New York and Long Island station in Brooklyn. The Sixth and Ninth avenue lines of the elevated railroad system can be reached from the terminal under cover and the surface lines which will pass its several fronts. Any new subways on the west side must necessarily have connection with these buildings.



The work as a whole has been directed by William G. McAdoo, president of the New York & Jersey and the Hudson & Manhattan Railroad Companies, and Walter G. Oakman, formerly president of the Guaranty Trust Company and now president of the Hudson Companies. It was the combined activity of these two men, backed by the great banking house of Harvey Fisk & Sons, that made the enterprise possible. The engineering features are being worked out by Charles M. Jacobs, chief engineer, and J. Vipond Davies, deputy chief engineer. Clinton & Russell are the architects.—*The Iron Age.*

WHAT THE STOVE MANUFACTURERS ARE DOING

THE MALLEABLE IRON RANGE CO.

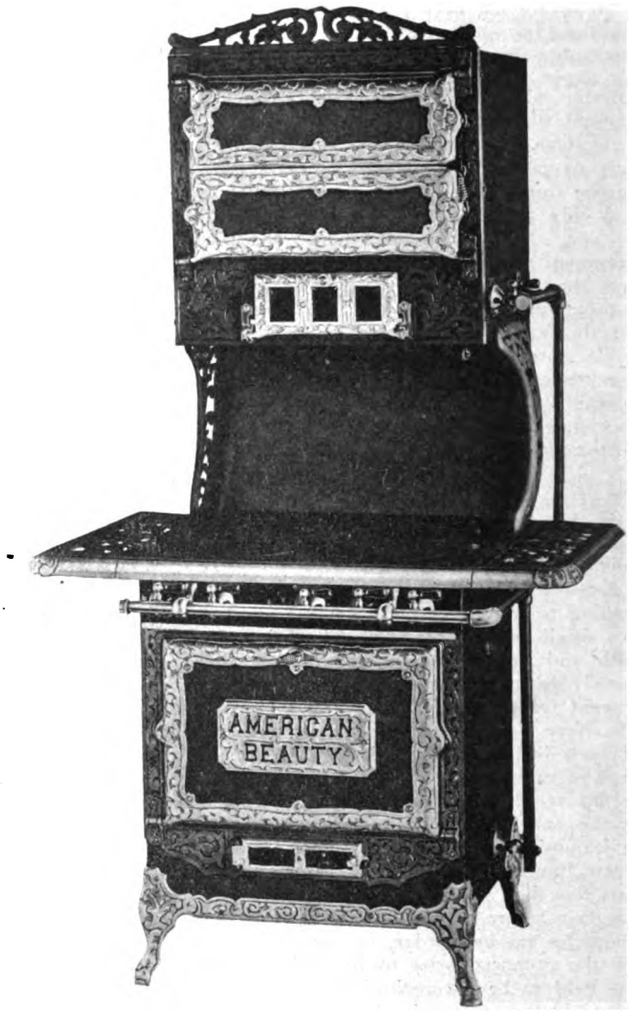
The Malleable Iron Range Co., Beaver Dam, Wis., manufacture the Monarch Gas Attachment No. 42. This attachment is the same as the Gas Section No. 142 of combination less the oven

and broiler, being supported on nickeled brackets instead. These brackets will support the weight of a 200-pound man and can be safely used for any purpose a range top is required. This should

not be confused with the little hot plate extension commonly offered. The triangular arrangement of the burners give a distance of nine inches between centers, allowing ample space for using three cooking vessels at the same time.

THE McRAE & ROBERTS CO.

The McRae & Roberts Co., Detroit, Mich., are large manufacturers of gas stove cocks, handles, etc., and have placed the machinery needed to take care of the class of work for which they consider themselves admirably equipped. It will pay a stove manufacturer to know their facilities thoroughly, secure their prices and see their samples before contracting for supplies of this character.



AMERICAN BEAUTY GAS STOVE WORKS, LTD.

In calling attention to the American Beauty Elevated Oven Gas Range, the American Beauty Gas Stove Works, Ltd., Erie, Pa., make use of the following language, feeling that they cannot say too much in praise of this perfect gas range.

The "alligator doors" on our upper oven must be seen to be properly appreciated—to demonstrate them is to make a sale. They are like no others—no springs to get out of order. We grind them to a perfect fit, and the mechanism, while simple, holds them firmly in place. The lower door when open, makes a convenient shelf on which to draw out pans for inspection. The movement for opening and closing is easy and positive. The broilers are conveniently situated. The housewife does not need to kneel or to stand on tiptoes in order to examine the contents. Owing to the perfect system of separate flues, it is impossible for the upper oven to become contaminated with odors of fish and meats from the broiler, as there is absolutely no connection between the two. For the same reason, sauerkraut, onions, and other odorous foods can be cooked in the lower oven without the smell permeating every room in the house, as is usually the case. In fact, these foods can be cooked, or fish broiled, while custards and angel food are being baked in the upper oven, with no risk whatever. This lower or French oven can also be used as a warming closet. If it is needed for baking, put a solid griddle in the centre of the bottom.

SOME OF THE GOOD POINTS FOUND ON THESE GOODS.

Separate simmering burner, entirely odorless; does not interfere with other burners. Top burners all detachable; patented construction, saving 45 per cent. of the gas. Adjustable mixers.

AMERICAN BEAUTY ELEVATED OVEN GAS RANGE.

Heavy and well made nickel-plated cocks. Rich nickel-plated band on main top, with embossed corners. Heavy castings, roomy top end shelves, well ornamented. Upper oven equipped with direct action burner, giving a steady blue flame all around the front and two ends, making a quick and even baker. Both ovens are full 18 inch size, and will take in Savory roasters. The full size of the ovens is available, as they will bake on the bottom as well as on the rack. Note this point—most gas ranges will not bake evenly except on the rack, and the space below you pay for and cannot use.

THE LATTIMER-WILLIAMS MFG. CO.

The Lattimer-Williams Mfg. Co., Columbus, Ohio, are engaged in making improvements in their plant necessitated by the largely increased business of the past year. The new foundry which is now building will about double their capacity for employment and will cost in the neighborhood of $30,000.

ODIN STOVE MFG. CO., Erie, Pa., have issued their catalogue for 1907 of Gas Heaters, Ranges and Appliances. Illustrations are given of their various lines of heating and cooking appliances for use with natural gas. Since issuing their last catalogue, they have made very material improvements to their factory, a foundry having been added. The contents include Tri-Process Pure Air Gas Heaters, Peerless, Empire, Regal, Bengal and Brilliant Odin Heating Radiators, Fire Fronts, Elevated Oven Gas Ranges, also Single Oven and Broiler Ranges, Water Heaters, Sectional Burners, etc.

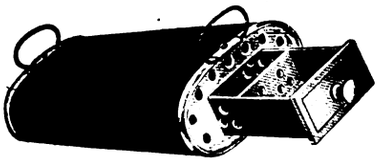
ADVANCED METHODS OF WARM AIR HEARING

UNITED STATES REGISTER CO., LTD., Battle Creek, Mich. Booklet devoted to a description of the Jones Registers, and entitled "Advanced Methods of Warm Air Heating." The company state: "In compiling this booklet we have endeavored to explain wherein the Jones Registers differ from others, and to make clear why their use in connection with furnaces is beneficial, not only to the customer but to the dealer also, and to restrict same so far as practicable to the illustrating and listing of Jones registers and fittings. The Jones Registers are made to be placed in the wall between the studding, utilizing the space from the lath to the outside of the shoe moulding:—where a room on the first floor is to be heated, and they project into the room 1½ inches, where two rooms, one on the first floor and one on the second floor are to be heated from one large basement pipe. The advantages thus gained are: That a few large basement pipes do the work of many small ones, necessitating fewer elbows, angles, etc. Less heat is lost in the cellar, and cool cellars and warm living rooms are the result. All of the heat conveyed through one large basement pipe can be turned into the first floor room, when needed there, as is often the case during the morning hours, or when starting a fire. The heat can all be turned into a second floor room, if it is found necessary to heat a second floor room quickly; or, can be divided, so as to heat both of the rooms at the same time."

BENEFITS OF PUSHING SPECIALTIES.



The tradesman who furnishes all kinds of materials and does all kinds of work might be said to have all kinds of opportunities to make money. In too many instances, however, competition is met wherever his enterprise or his necessities have carried him and he is apt to meet the prices of competition, so that after sustaining the demands on his energies required by such a varied business he has very little return in actual profits for his reward. The man who makes it a point to select some good article, says the *Metal Worker*, and make a specialty in each one of his varied lines is building up for himself a business that will prove more lucrative. If he runs one line of furnaces, one line of boilers, one kind of roofing plate and a high class article in whatever line he acquires he will have very little difficulty in securing from the manufacturing concern the exclusive sale of this particular product in his immediate territory. The man who starts out to establish himself on these lines will find it worth all the energy which he may expend on it and all of the hard competition which he will have to overcome and in fewer years than he anticipates. It is only necessary that he be master of his business and to have all of his work correctly planned and done by skillful workmen in the best manner for him to build that sort of a business reputation alone, at prices which are better than some of his competitors would be glad to accept.

When he has reached this point and has established a demand for his furnaces, his ranges, his heating boilers, his plumbing goods, the manufacturers who sell him will be frequently importuned by tradesmen in his own vicinity to sell the same goods to them. Here is where loyalty and sound business principles may prevail or succumb to the temptations. The manufacturer may realize that now the demand is created in a locality a larger number of goods may be sold if they are sold to all the trade, but if he is wise he will realize that as soon as everybody can buy his goods they will be placed on a competitive and unprofitable basis and soon nobody will want them. If he compares the effect of both systems for a period of years he will find that he will not sell so much to all the trade as if the sales had been confined to one man who made a specialty of them. Severe complaints and harsh remarks are made about the manufacturers who refuse to sell goods to some who would buy them after a fellow tradesman has created the demand and after they are referred to the local tradesman who owns the exclusive sales rights.

After all petty interests are considered there is one important fact that cannot be lost sight of without permanent disadvantage. A customer must be provided with a good article, good workmanship, and all work must be done in accordance with the latest and most approved methods. No tradesman can reach this standard unless he gets a larger profit than can be had from a purely competitive business. His profit must be sufficient to enable him to purchase information where it can be had, to employ consulting engineers when desirable and take such other steps as are necessary to make him thoroughly acquainted with all of the best practices in his special line. The tradesman who is envious of the man who is enjoying the benefit of business foresight can better utilize his energies in profiting by the example and making his selections of special lines and laying the foundation for a similar business. This course has been pursued by successful men in many instances, and while a friendly and lively competition exists both men are making money and all of their customers are getting a higher class of service than when a policy of open competition prevailed.

THE CLARK CARRIAGE HEATER.

The Chicago Flexible Shaft Co., Chicago, Ill., are placing before the trade the new and improved form of Carriage Heater of which we give illustrations, the fuel for which is in the shape of carbon briquettes 7x2x1¼ inches in size, producing a volume of heat for the purpose that can be regulated by means of

THE CLARK CARRIAGE HEATER.

adjustable ventilation. The Heaters are constructed of metal securely riveted throughout, and having an inside packing of asbestos, rendering them incapable of scorching should anything come in contact with them. The Heaters are furnished with covering of carpet, or not, as may be wanted, the heat chamber being so constructed that radiation may be upward and outward.

THE DIFFERENT STYLE.

It is stated that a single briquette will furnish a good and lasting quality of heat running from 12 to 16 hours. For the average ride of three to five hours, a third of a briquette will be found sufficient. The Heaters are so made that the feet rest on them naturally, and easy, and they are made in two shapes, either of which the customer may select.

"THE FORCE PUMP IN EVENT OF FIRE."

The question of fire protection for the farmer is worthy of serious consideration. The farmer of to-day is really a Nabob. He has the telephone, rural delivery, daily papers, and in many cases, electric traction lines near him, and in some cases a current of electricity from the same to light his home. He has an earning power unlike what has ever been known before. The buildings on his farm are usually correspondingly modern, and water close at hand and plenty of it as a safeguard that every farmer should possess. With a reliable double-acting force pump and with a few hundred feet of hose at hand the farmer can successfully cope with fire should it occur; and, in the meantime he is able to enjoy other advantages. He can force water through the hose into his barn, wash out stalls, clean wagons or buggies. He can wash windows, walks, porches, etc., water the lawn and even irrigate his land.

The farmer who has a Myers Double-Acting Force Pump is justified in demanding a lower rate of insurance, because of the decreased liability. A double-acting force pump will throw a steady, solid continuous flow of water; while but little headway can be made against flames by throwing a bucket-full at a time. For this reason a lift pump is not to be considered as a means of fire protection compared with the double-acting force pump, on which we are certainly headquarters. F. E. Myers & Bro. no doubt make more than all other factories combined. They have invented and own more double-acting pump patents than others; they have given the same individual attention, introducing expensive buckets retaining the air: they have constructed the same with larger air chambers, heavier bucket stems, larger water ways and better leverage, bolt and hose connections. They take the position that it is the manufacturer's business to produce even better goods as the country develops and the consumer prospers. Improvements are going on all along the line; a modern house is fitted up with bath fixtures so different from what was used five to ten years ago that they would not bring half price. The placing of an old style pump that will simply lift water (and that is entitled to the name merely because it looks like a pump) is correspondingly impractical.

NEW GOODS AND SPECIALTIES

THE MONTROSS LINE OF HORSE POKES.

Richard W. Montross, Galien, Mich., is the maker of all the salable descriptions of Horse Pokes that are demanded by the trade. We present cuts of the several styles. In Fig. 1 is shown the old-fashioned pattern, in the Galien Safety Animal Poke, which will always be in demand. It is claimed to be the

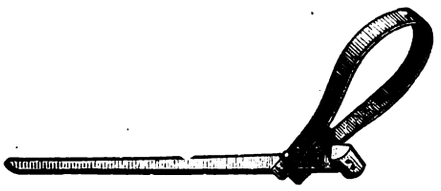

FIG. 1. GALIEN SAFETY HORSE POKE.

best pricker poke distributed to the trade, and although, as before observed, it is old-fashioned, it is still a staple article, which fully sustains its well earned reputation. Fig. 2 shows Camp's Success Poke, which the maker claims is the only one that successfully prevents horses, cattle and mules from jumping

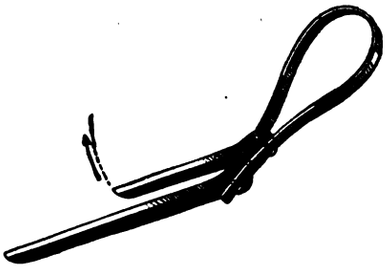

FIG. 2. CAMP S SUCCESS POKE.

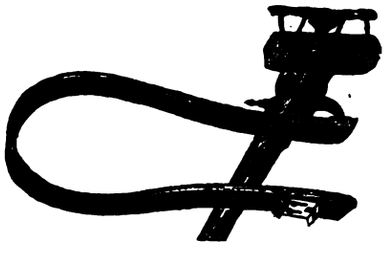
fences, and effectually cures the habit. It has no prickers or spurs to injure the animal. The contact with the free end of the longer bar draws it down, and throws the short upper bar against the nose, causing the animal to back off at once. Fig.



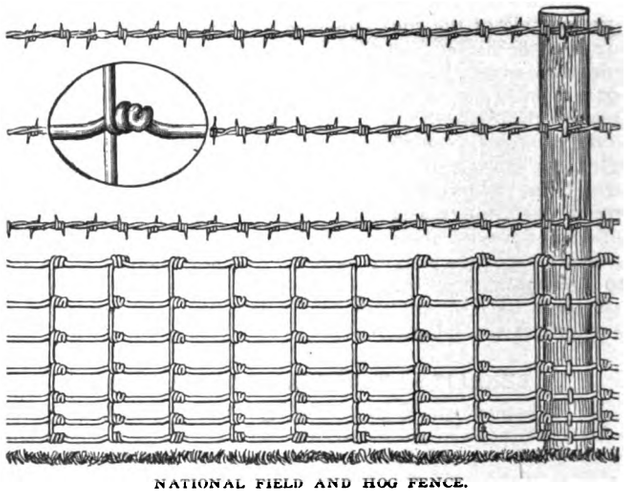


FIG. 3. HARTMAN'S IMPROVED POKE.

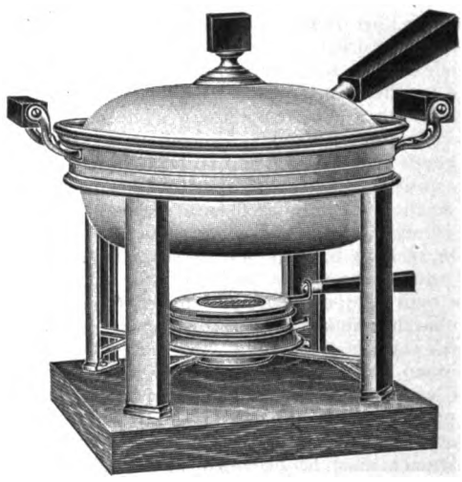
3 shows Hartman's Improved Poke, which is considered as having all the advantages of other pokes and none of the defects. There are no loose parts to become detached or lost, all wearing parts are of malleable iron, and the hinged pivot pin moves in the stale, saving all wear of the bow. When in use, and it is placed on the animal, the stale is swung around and locked with slide key plate on bow.

NATIONAL FIELD AND HOG FENCE.

The De Kalb Fence Co., De Kalb, Ill., have added to their great line of field fencing the National Field and Hog Fence which we show in the illustration herewith. In this Fence all the horizontal bars are made of No. 10 wire, while the pickets are of No. 12 gauge, spaced 8 inches apart, and wrapped around each bar very tightly inside a crimp, which prevents slipping, and at the same time allows for contraction and expansion. The most popular style is the 28-inch Fence, with 8 bars, which has a breaking strength of nearly 6 tons, which with the 23, 26 and 28 inch height, with 3 strands of wire above, is suggested as an ideal fence for all farm purposes. The spacing between bars of the 28-inch fence, beginning at the bottom, is: 2¾, 3, 3½, 4, 4½, 5 and 5½ inch, and of the 26-inch: 3, 3½, 4, 4½, 5 and 5½ inches. The fence can be furnished in the following sizes: 58 inch, 12 bars; 49 inch, 11 bars; 47 and 41 inch, 10 bars; 28

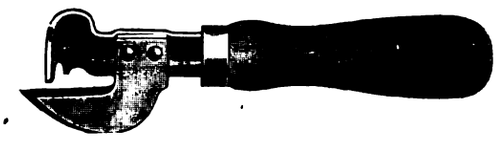


NATIONAL FIELD AND HOG FENCE.

inch,8 bars; 26 inch and 23 inch, 7 bars. This fence is made of the best galvanized wire obtainable, and it can be erected on uneven ground as readily as barb wire.

MISSION DESIGN CHAFING DISH.

Manning, Bowman & Co., Meriden, Conn., and 25 West Broadway, New York, who are the manufacturers of a large assortment of chafing dishes and similar tableware, have brought out especially for the holiday trade the Mission Design Chafing Dish, No. 298, of which we give an illustration herewith. It is mounted on a solid three-piece quartered oak base, Mission finish, 8 x8x1 7-16 inches, the grain of the wood running different ways to counteract any tendency to warp. The ring supporting the pans is upheld by four three-sided rectangular legs secured to the base by screws from underneath, made flush by counterboring. The chafing dish is 9½ inches in diameter, and has a capacity of three pints. The alcohol fuel is burned in the company's Perfection lamp, having two horizontal slide covers op-



MISSION DESIGN CHAFING DISH.

erated by the square tapered wood handle. The cover knob, side and pan handles are also square and ebonized. The metallic portions of the utensil are principally copper, with plain or plated finishes, there being one design brass-trimmed for contrast. The interiors of water and food pans and cover are usually in silver, French finish, a food pan in ivory enamel inside and outside being furnished if so ordered, without extra expense. These chafing dishes can be supplied regularly in brass, copper, nickel plate and silver plate. This same design is also made supported by three instead of four legs, without hardwood base.

ELLIS MFG. CO.'S SPECIALTIES.

The Ellis Manufacturing Co., successors to F. L. Ellis & Son, Milldale, Conn., are the manufacturers of quite a line of popular specialties, including a line of Can Openers and Tack Pullers, which, owing to its comprehensiveness, they are able to fill all the possible requirements of an up-to-date buyer, both in quality and price. We present illustrations of these desirable specialties, which the company state can be furnished packed in display boxes if so desired. The No. 1 Dandy Can Opener is of the wood-handle pattern, with the shank made of a steel stamping, having a handsome steel blade. Its construction is much lighter than the cast iron pattern, and much stronger on account of its rigidity. The Ever Ready Can Opener is one that is known the world over, and is manufactured for a popular demand that is rapidly increasing. This Can Opener is nicely finished, and is made from high-grade steel. The Little Giant Can Opener No. 3 is made from steel wire, and is finely finished in nickel-plate. It is a very strong and rigid article, having a blued blade, which makes it very neat in appearance and quite durable. It compares very favorably with anything in its class.

DANDY CAN OPENER NO. 1.

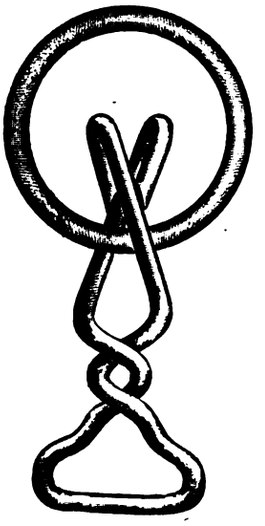
EVER READY CAN OPENER.

LITTLE GIANT CAN OPENER NO. 3.

MONARCH TACK PULLER. NO. 4.

The Monarch Tack Puller No. 4 is a strictly high-grade article, the shank being made of steel stamping, highly polished and nickel-plated, with a blue tempered steel blade securely riveted on same, and finished with a polished handle of hard wood, which makes it an extremely neat article, possessing great strength.

CAN OPENER NO. 10.



The No. 10 Can Opener is of the cast iron type, with japanned handle, having a polished head, and hardened steel nickel-plated blade. The No. 20 is also of cast iron pattern, nicely polished and full nickel-plated with blade of hardened steel. Freight is allowed only when shipments amount to 100 pounds and over.

CAN OPENER NO. 20.

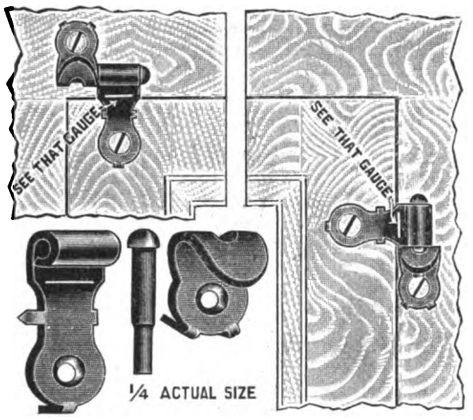
NATIONAL SAFETY SNAP.

National Safety Snap Co., Wilmington, Ohio, are placing upon the market the new Safety Snap of which we give an illustration. It is constructed entirely from spring steel and nickel-plated, is attractive in its appearance and is claimed to be as strong and durable as would be indicated by the name. To attach the snap, place the opening between the ends of the snap on the ring, and push it on. To release the snap, push it up on the ring past the beveled ends as shown in cut, and twist it to the right. They will not freeze up or come off, and are easily operated without removing the glove or mitten.

NATIONAL SAFETY SNAP.

STEVENS ODORLESS GUN OIL.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are putting on the market one and four ounce bottles of Gun Oil, shown herewith. The oil is a lubricant, rust preventive, polishing and cleaning compound. The company guarantee it to be absolutely pure and to contain no acid. It is especially adapted for use in connection with firearms, bicycles, sewing machines and all machines requiring a high-grade of oil. The one ounce bottle is intended to retail at 10 cents, and the four ounce bottle at 25 cents.



STEVENS ODORLESS GUN OIL.

WATROUS COMBINATION STORM SASH HANGER AND SCREEN HINGE.

E. L. Watrous Manufacturing Co., Des Moines, Iowa, manufacturers of stamped steel Hardware, are placing on the market a new Storm Sash Hanger and Screen Hinge. In bringing out this device the company has sought to effect a saving in labor. There are only four screws to set, and the carpenter while on

Digitized by Google

the ground or even at his shop can plan where he wants the hinges, drive in the hinge pins and place the pin-carrying section on the sash. The gauge shows just where the edge of the wood ought to come. The points are pressed in with the thumb,

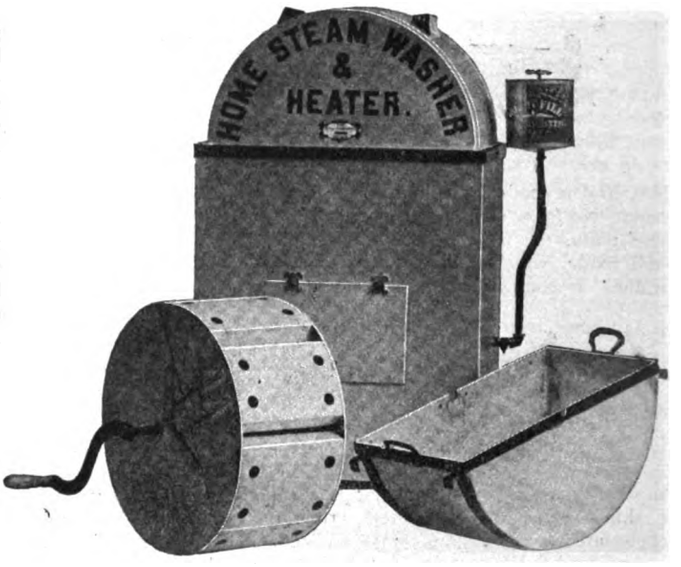
WATROUS COMBINATION STORM SASH HANGER AND SCREEN HINGE.

the hammer drives them home and the setting of one screw finishes the job. From a ladder the screen is set in the window, the hook slips under the pin and one blow of the hammer drives the points home. Both hands are then left free to set in the single screw. The device is tested for a strength up to 300 pounds, and all parts are japanned, even the screws. The hinge can be used on cupboard doors, barn windows or any place where it is convenient to have an easily removable sash.

NEW HOME WASHER, 1907 MODEL.

The Standard Manufacturing Co., of Shelby, Ohio, are offering the trade their 1907 model "New Home" Washer illustrated herewith, which is the latest improved and most practical design. The "New Home" washes on the same principle as the hand washboard, cleansing the clothes by light rubbing, at the same time forcing the water through every fibre, and instantaneously reversing the current absorbing the dirt and removing it from the clothes. This is effected by oscillating the machine, causing the water to change its center of gravity by forming a whirlpool under the corrugated rubber board, sucking it down on the clothes, squeezing and rubbing them, at the same time that they are acted on by the reversing whirlpool and changed with the current so that a new surface is brought into contact with the rubbing board at each stroke of the machine.

NEW HOME WASHER, 1907 MODEL.



The framework is constructed of three detachable steel tubing legs secured to the metal frame by bolts and the center post of the machine extended where the legs meet, forming a clamp which secures them at that point by means of a clamp nut—all of which combines strength, durability, lightness and perfect floor adjustment.

Louisiana cypress is used in the wood construction. The joints are matched and the tub bound with three electric-welded, galvanized spring-steel hoops—patent crimped perfect adjustment to expansion and contraction. Hinged warp-proof steam tight cover, no fumes to escape and be inhaled by the operator or sweat up the walls and windows. The only bearing is a case-hardened ball-race filled with steel balls, nothing to oil and wear-proof. Total weight, 53 pounds.

The manufacturers have applied these improvements to all of their 1907 model and these machines are now so simple and durable that they agree to furnish free for five years all parts broken while in use. Sold only through the legitimate Hardware and housefurnishing trade. Exclusive agency will be given in certain territory. Literature interesting to dealers and further information will be furnished upon request.

HOME STEAM WASHER AND HEATER.

The Home Metallic Refrigerator Co., Albert Lea, Minn., are placing before the Hardware trade the Home Steam Washer and Heater, illustrations of which are given herewith. It is constructed of high grade galvanized steel and contains no wood which might swell, warp or shrink, or absorb or exude any extraneous matter. It has ball bearing casters and consists of a heater, heating plate, boiler, cylinder and top cover, so formed that each fits into the other, making a compact whole. There is an asbestos lining throughout, and it is furnished with gas or gasoline burners complete, having a door in front allowing free access to the burners. The boiler has a round bottom, requiring less water than a flat bottom, and effecting a considerable saving in fuel. The cylinder into which the clothes are placed revolves inside the boiler, being turned by a crank which is riveted to the side of the cylinder and has its bearings on the boiler. A hinged top with strong fastener keeps the clothes within the cylinder when it is revolving. The pockets or cross-

HOME STEAM WASHER AND HEATER.

pieces carry the clothes upward and allow them to fall back rapidly, forcing the steam and water through the folds of the fabric and loosening the dirt. The top cover fits over all the other parts, confining the heat and steam, so that there is no waste in the use of fuel. It can also be used as a tub for clothes when they are taken from the cylinder. The Washer is made with Aluminum and Black finish in three sizes: No. 10, with 10-inch cylinder; No. 12, with 12-inch cylinder, and No. 14 with 14-inch cylinder.

NOTE—WIFE—CREDITOR—BANKRUPTCY.

The Supreme Judicial Court of Massachusetts held, in the case of Widger vs. Baxter, that a note given by a woman to a creditor of her husband whose claim had been discharged in bankruptcy proceedings, not in payment of the debt, but rather as collateral security, was without consideration and unenforceable.

NOTE—SURETY—NOTICE.

The Supreme Court of North Carolina held, in the case of Rouse vs. Wooten, that a surety on a promissory note is not entitled to notice of non-payment under the law merchant, and that the negotiable instruments law does not entitle him to such notice; that he is primarily liable under that law, and that he will not be discharged by a failure to present the note for payment.

RECENT TRADE PUBLICATIONS.

ATLANTIC GRINDSTONE CO., 898 Westminster Street, Providence, R. I., have distributed to the trade a catalogue of Mounted and Loose Grindstones. Several illustrations are given of their product, and of workmen in the quarries, and the company furnishes stones adapted for grinding Axes, Hatchets, Scythes, Section Knives, Dies, Chisels, Machine Knives, Table Cutlery, Scissors, Shears and Edge Tools generally, Saws, Files, Shovels, Hoes, Plows, Springs, Spindles, Sad Irons, Gun Barrels, Cast and Wrought Iron, Dry Grinding, etc., etc., as well as selected grits for machinists', carpenters' and farmers' use. Their quarries are located in Nova Scotia at Lower Cove, Beacon Ledge, Betty's Reef and Bay of Fundy Shore, and the company construct grindstones from five pounds to four tons in weight, their products having been on the market since 1790.

PECK EDGE TOOL CO., Cohoes, N. Y., have just published a catalogue of Hand Forged Hatchets, Axes, Adzes, etc. The illustrations are given in natural colors, printed on a fine quality of calendered paper, showing a large line of Edge Tools, such as Shingling, Lathing, Claw, Bench and Barrel Hatchets; Boy's Handled Axes, Hunter's Axe Pattern Hatchets, Double Bit, Yankee and Michigan Pattern Axes; Firemen's Axes, Ice Hatchets and Axes, Ship Carpenters' Broad Axes, House and Ship Carpenters' and Railroad Adzes. This company manufacture high-grade tools exclusively, and their aim will continue to be to produce Edge Tools "suitable for use by mechanics or other persons who will give a tool proper usage and appreciate a superior article."

ECLIPSE MFG. CO., North Girard, Pa. Catalogue for 1906-1907 of Household Specialties. The assortment of goods found in the contents is an extensive one, comprising Eureka, Eclipse and Acme Clothes Driers, Towel Driers, Dust Collectors, Suit Holders, Broom Holders, Sleeve Boards, etc. The company will be glad to send this catalogue upon application and it will be found to contain a useful line of goods.

NIAGARA FALLS STAMPING WORKS, Niagara Falls, N. Y., are sending to their friends in the trade their Catalogue No. 3 just issued, covering a line of Harness Snaps, Breast, Rein and other Harness Chains, Picket Pins, Curry Combs, Swivels, etc., all made of steel and of the highest quality and finish. The company are also manufacturers of Hardware specialties and novelties for others, and ask: "Are you manufacturing anything requiring the use of parts made of sheet iron, steel, brass, copper, zinc, tin or aluminum, or of wire of any of these metals? By the use of dies in power presses, we cut from sheet metal of any kind pieces of almost any shape. We also cut, form and shape parts from rods and bars. We have good machinery for wire forming. We also do screw machine work, and either hot or cold drop forging. We do enameling, and electroplate in brass, copper and nickel, and also in zinc (cold galvanizing), and do buffing and polishing. We make a specialty of doing this class of work for others, making either complete articles or parts of articles. We make in our own factory all the dies for cutting, punching and forming the goods we make. New inventions are in our line. We make dies and fit them to presses, and put machines in order for inventors to make their own goods."

A. J. REACH CO., Philadelphia, Pa., have just issued a price list for the Spring and Summer of 1007 of their well-known line of Base Ball Players' Goods, which include Ball Players' Mitts and Gloves, Base Balls, Masks, Bats, Body Protectors, Shoe Plates, Score Books, Bat Bags, Supporters, etc. This catalogue should be sent for by the Hardware dealer handling this class of sporting goods, as it is a very comprehensive one.

DRAPER & MAYNARD CO., Plymouth, N. H. Catalogue of the D. & M. Sporting Goods. A great number of illustrations are given of their extensive line of Base Balls, Mitts, Uniform Bags, Rackets, Marking Tape, Tennis Shoes, Caddy Bags, Automobile Gauntlets, Foot Balls, Hockey Goods, Football Clothing, Boxing Gloves, Striking Bags, Indian Clubs and Dumb Bells. Everything that can be mentioned in the sporting goods line will be found within its pages. These goods are always packed in handsome red and black printed cartons.

BELDING- HALL MFG. CO., Belding, Mich., with New York office at 213 Canal Street and Chicago office at 196 Monroe Street, have issued a series of catalogues for 1907 of their "Century," "New Perfection" and "National" Refrigerators. The Century Refrigerators are made of thoroughly seasoned ash lumber, with solid bronze trimmings, galvanized iron shelves and linings, self-retaining casters, removable drip pipe and swinging baseboard. The outside casings are handsomely ornamented, hand carved and finished in golden oak. The "New Century" line includes an assortment of ice chests, grocers' sectional refrigerators, etc. These are also constructed of ash, with golden oak finish, and mineral felt insulation. This catalogue also contains illustrations and descriptions of their White Odorless Enamelled Refrigerators. The "National" Refrigerators are intended for household and grocers' use, and are constructed of the same material as the other kinds mentioned. The company will be pleased to mail these catalogues upon request.

WHITE ENAMEL REFRIGERATOR CO., St. Paul, Minn. Catalogue No. 8, devoted to the merits of Bohn's Patent Dry Air Syphon System as applied to refrigerators. Many illustrations are given of their entire line of products, showing the refrigerators to be of the most artistic patterns. Full descriptions are given of the method of circulation employed, lining of the provision chamber, water cooler, material, construction and workmanship. Several fac-simile testimonials are reproduced, and instructions for the proper care of these refrigerators. A price list is included in the contents. Regarding the matter of the choice of a refrigerator the manufacturers state: "Intelligent housekeepers and others who are interested in preserving perishable food and other articles in a fresh and uncontaminated condition, realize the importance of securing the best means for accomplishing this. This is partly due to the fact that many epidemics have recently been traced to damp and foul refrigerators. At times when typhoid fever, diphtheria or other contagious diseases are prevalent, people are led to examine and ascertain from whence come the meats, milk, butter, vegetables and other articles of food supplied to their tables. Such an investigation often proves a revelation, and forcibly convinces the investigators that disease might have been avoided had the necessary attention been given to the best method of preserving the food. A perfect refrigerator is not only indispensable for this purpose, but is a labor-saving device, as all admit who are obliged to use cellars and other underground contrivances for the storage of perishable foods, flowers, etc. In view of these considerations, science, experience and skill have been applied to the construction of a refrigerator which is unconditionally the best in every respect hitherto produced. The Bohn Air Syphon White Enamel-Lined Refrigerator is constructed on scientific principles and is the latest product of advanced experiment in this direction."

CHALLENGE CO., Batavia, Ill., have presented us with two catalogues, one entitled "Just Pumps" being devoted to pumps and accessories, and showing the most complete assortment of goods in that line they have ever offered to the trade. The contents include both Hand and Wind Mill Pumps, Cylinder Leathers, Well Valves, Points, etc. The other catalogue contains the Challenge line of Wind Mills. This company also manufacture Feed Grinders, Shellers, Wood Saws, Lawn Swings, etc., and their catalogues will prove very interesting to those engaged in selling the above lines of goods.

SESSIONS CLOCK CO., Forestville, Conn. Catalogue No. 62 for 1906-1907 of Sessions Clocks. Their line is so extensive a one as to preclude an adequate enumeration of the various kinds manufactured by them, but it may be said all varieties will be found within the pages of this catalogue, from the expensive Cathedral Bell Parlor Mantel Clock with Egyptian green columns, to the oak and walnut variety. Their Hanging Wall Clocks deserve special mention, being quite unique in design, as well as their Dutch Hall Clocks. Office and Mission Clocks are also illustrated, making it a catalogue that will appeal to every one who peruses its pages.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED DECEMBER 10, 1906.

416,748. Saw Sharpening Machine. E. B. Rich, Chicago, Ill.
416,758. Pneumatic Door Check. DeWitt C. Smiley, Jr., and T. A. Shea, Newark, N. J.
416,792. Pipe Wrench. J. A. Maloney, Leavenworth, Kan.
416,799. Signal Lantern. W. P. Myer, Indianapolis, Ind.
416,805. File or Rasp. J. Ridge, Nashua, N. H.
416,874. Door Check. V. C. Trabold, Newark, N. J.
416,917. Hay Fork. J. Horn, Canal Dover, Ohio.

PATENTS ISSUED DECEMBER 11, 1906.

837,922. Saw File. H. B. Foley, Seattle, Wash.
838,086. Nut Wrench. R. R. Crouse, Bellaire, Ohio.
838,099. Wrench. F. A. Garland, Hoboken, N. J.
838,109. Ratchet Wrench. F. A. Hanes and William Staples, Huntsville, Ontario, Canada.
838,118. Ratchet Drill. J. H. Karlson, Chicago, Ill.
838,173. Wrench. W. H. Dennison, Alaska, W. Va.
838,307. Caster. A. B. Diss, Newark, N. J.

INCREASE OF $120,000 PER YEAR.

Henry R. Towne, president of The Yale & Towne Manufacturing Co., at a meeting of its superintendents and foremen, held recently, made announcement of an increase of wages and piece-rates which is of interest not only to the employees directly concerned, but also to the whole of this community, in which nearly all of the large amount of money involved will be distributed. The facts are substantially as follows:

Although the average rate of wages and the average rate of piece work earnings, in the Yale & Towne works, are both higher to-day than at any previous period, the company recognizes that under present industrial conditions a review of these rates is expedient and that in some cases a reasonable advance may be justified. Accordingly, the company is now engaged in a careful revision of wages and piece-rates in all departments of the works. As soon as this can be completed, a readjustment of these rates will be made, on a basis which, assuming the number of employees to remain as at present, will probably involve an addition to its annual payroll of upwards of $75,000, additional to increases recently made which aggregate more than $45,000.

In the distribution of this voluntary addition to the earnings of its employees in the works, the company will give special consideration to length and quality of service, and to individual efficiency. All piece-rates, as well as all day-rates, will be reviewed, and, where necessary, will be readjusted. In each case the rates in effect December 1, 1905, will be taken as the base, and changes since that date will be considered in connection with those now contemplated. The new day-rates will take effect as of December 1, 1906. The revision of piece-rates, upwards of 20,000 in number, will necessarily require more time, but it is expected that all of this work also will be completed on or before January 1, 1907.

The company's intention in making this revision of rates is to readjust and equalize both day-rates and piece-rates, in every department, and for all classes of work, in such manner as to place them on a basis which shall be just and fair to all concerned. In return, the company will expect to receive from each and all of its employees honest, loyal and efficient service. The company hopes that the record of the coming year, in quality and quantity of production and in all departments, will show that its action in making this advance of rates has been appreciated and reciprocated.

This revision of rates will apply to all employees in the works except those paid by salary. The salary list will be considered separately, and individual cases will be acted on currently in the usual manner.—*Stamford (Conn.) Daily Advocate.*

✤

A Western paper interviewed a Texas man tne other day who had a six hundred acre onion farm. Before a produce man finished figuring out the number of men who would break their backs each year weeding those onions, the next edition of the paper came out and cut the farm down to twenty-three acres.

Trade Meetings

NEW YORK STATE RETAIL HARDWARE ASSOCIATION.

From the chairman of the Reception Committee, C. P. Sherwood, we have received the most encouraging announcement that "the New York State Association with its Hardware Exposition in connection with the Convention at Syracuse, commencing with the week of February 19, are receiving very flattering results from their new project, and almost the entire space of the Alhambra has been taken by those who will make exhibits at the Exposition. We are to have an extensive programme, and hope to arouse great interest among members and the Hardware trade in general throughout the State. With the co-operation of the traveling men, we shall hope for a large and enthusiastic attendance."

CONNECTICUT HARDWARE ASSOCIATION.

The Executive Committee of the Connecticut Hardware Association met at New Haven, Conn., December 11, to make preliminary arrangements for their annual convention. It was decided to hold it at Hartford, Conn., February 20 and 21, 1907. A committee was appointed with power to appoint sub-committees to represent this Association at the National Convention, held in Boston.

SOUTH DAKOTA RETAIL HARDWARE ASSOCIATION.

Owing to the recent disastrous fire in Aberdeen, S. D., it will not be possible for the South Dakota Retail Hardware Association to hold its second annual convention in that city, as intended. Accommodations have consequently been secured in Mitchell, where the meeting will be held on February 12, 13 and 14. Hardware exhibits by manufacturers and jobbers will be a feature of the convention, and those desiring to engage space should communicate with Noah Keller, Woonsocket, secretary of the Association. A gazette will also be published in connection with this meeting, arrangements for securing advertising space in which should be made with E. D. Hawkins, Vermilion.

PENNSYLVANIA RETAIL HARDWARE ASSOCIATION.

The Executive Committee of the Pennsylvania Retail Hardware Association held a meeting at the Seventh Avenue Hotel, Pittsburgh, on November 27. Plans for the annual convention were thoroughly discussed and the date of the meeting was fixed for February 12, 13 and 14. The following Committee of Arrangements was appointed by the president: W. V. Taylor, Jno. F. Howe, J. H. Bowers, George J. Rudolph and Secretary-Treasurer J. E. Digby. The convention will be held at Pittsburgh, which city was chosen at the last annual convention.

A. TREDWAY & SONS HARDWARE CO.'S NEW CATALOGUE.

A. Tredway & Sons Hardware Co., Dubuque, Iowa, are now distributing to the trade copies of their new catalogue of General Hardware and Blacksmiths' Supplies. Following is a department index, which shows the class of goods covered:

		Pages
No. 1.	Mechanics' and Edge Tools	1 to 176
No. 2.	Farming Tools, Implements, etc.	193 to 274
No. 3.	Builders' Hardware, Nails, Screws, Tacks, etc.	291 to 500
No. 4.	Miscellaneous Hardware	517 to 642
No. 5.	Iron, Steel, Bolts, Nuts, Washers and Blacksmiths' Hardware	659 to 712
No. 6.	House Furnishing Goods, etc.	729 to 830
No. 7.	Enameled Ware, Tinware, Tinners' Trimmings, etc.	847 to 914
No. 8.	Tin Plate; Sheet Steel, Steel Roofing and Siding, Tinners' Machines, Tools, etc.	931 to 958
No. 9.	Cutlery, Silverware, Watches and Lead Pencils	975 to 1056
No. 10.	Guns, Rifles, Revolvers, Ammunition, Sporting Goods, Fishing Tackle, Bicycle Supplies, Express Wagons, Sleds and Skates	1073 to 1136
No. 11.	Paint, Colors, Varnishes, Paint Brushes, etc.	1153 to 1171

OUR BRITISH LETTER.

(From Our Special Correspondent.)

LONDON, December 12, 1906.

VISITING THE COUNTRY DISTRICTS.

In my last letter I referred to the movement going on in connection with the Ironmongers' Federated Association banding together small outlying districts, and forming associations of groups of towns and counties which had hitherto been isolated. The General Secretary of the I. F. A. has now been visiting more of the smaller associations, both with a view of effecting some of these schemes of combination, and also with the object of strengthening the weaker associations by inspiring them by the results achieved in other places, and bringing the members to realize the advantages they are losing by showing so little interest in the work which is now so universally recognized as the only plan of concerted action and benefitting the Hardware trade at large. R. H. Smith, the General Secretary, has made several excursions during the month, delivering addresses and explaining the present position of trading, showing the difficulties which are at the moment telling adversely against ironmongers, referring to legislation shortly to become operative, and giving his opinion upon commercial bills now before Parliament. He has made special reference to the Weights and Measures Act, and to the Draft Regulations for Stamping Weights and Measures, which has been circulated, some of the clauses of which the makers of weighing instruments take exception to. Thus, by showing tradesmen the advantages and disadvantages of such measures, they will be in a better position to influence local opinion, and so indirectly, if not directly, bring their influence to bear upon members of Parliament and others in authority. The Prevention or Corruption Act, which will come into operation on the first of January next, also aims a blow at illicit commissions, and the fees and tips which are given to secure contracts. It also goes somewhat further, and appears to make illegal the time-honored custom of giving Christmas gifts to employes or customers. It will thus have some considerable effect upon ironmongers, and may enable them to break from this pernicious custom, which system of buying trade has long been felt to be bad, and one which should, as far as possible, be discountenanced. This is one of the measures, the working of which, Secretary R. H. Smith has been explaining in his recent visits. He has just visited a comparatively small association in Wiltshire, situated in the centre of a very wide district, an association which comprises ironmongers whose businesses depends almost entirely upon local industry, which is two-fold, manufacturing and agricultural. The works in the district are associated with the cloth trade, a large number of mills dotted all over the district, finding employment for quite a number of operatives, living in country cottages, and, therefore, associated with the agricultural laborers who reside in the same localities; sheep farming and corn growing being carried on on the downs and plains of Wiltshire. The ironmongers in that locality are, of course, largely engaged in the sale of agricultural implements and numerous tools used in farming operations; they also find some sale for wind-motors and wind-mills for pumping water. Some of these are made locally, others are of American manufacture. The trade of an ironmonger in the country is very varied, and combines not only manufacturing and agricultural industries, but is oftentimes a mixture of wholesale and retail. Indeed in the west of England there are many wholesale and retail ironmongers who employ travelers covering wide areas, stretching from Bristol through Somerset, Wiltshire, Dorset, Devonshire, and even reaching into Cornwall, the extreme southwestern country of England. These ironmongers supply the small country shop-keepers with the greater portion of the goods they handle, and frequently, at the same time, trade retail direct with the larger householders, land gentry, and mill owners as well as agriculturists in the same district. It is a peculiar combination, and curious to relate, the village shopkeepers, who buy from the semi-wholesale ironmongers, do not appear to take any exception to it; possibly the cry of direct trading has not reached them, and they appear to be content to buy from the same firms who sell in larger quantities and at better profits to many, whom in the ordinary course of things might be regarded as their own customers. Indeed, it would seem that the village shopkeepers of the west of England are still in the same position and have the same contented minds as those ironmongers who formerly were satisfied to buy from a wholesale firm who were also direct traders. The time may come when these village shopkeepers will band themselves together in associations, and then there may be trouble for the wholesale ironmongers, as there is now for the manufacturers who persist in carrying on duplex methods of trading.

METHODS OF PAST AND PRESENT DAY TRADING.

"Methods of Past and Present Day Trading" was the subject of the interesting address delivered by Secretary R. H. Smith at a meeting of the Nottingham Ironmongers' Association a few weeks ago. "It has been by privilege," said Mr. Smith, "for the last seven years to watch the developments, alterations, advancements, and even the decadence of the retail ironmongery trade." The speaker referred to the slow yet gradual emancipation of what was a very old industry. He expressed the opinion that there were many ironmongers who had not travelled as fast as some other shopkeepers had done, and consequently some had been left out in the cold. He reviewed Hardware trading and methods of buying, commencing with the traveler who came in olden times on horseback with his saddle-bags as sample cases, and compared him with the present mode of trading in which the man in the motor car hurriedly made his calls, scarcely giving himself time to book his orders. The speed of to-day is marvelously fast when compared with that of a few decades ago, and, unfortunately, it appears to be quickening; what it will be in the future it is difficult to say! Secretary R. H. Smith asked the pertinent question, "Are our shops kept bright and up-to-date as those of other traders?" He willingly admitted great improvement, but feared that the ironmonger was still behind some of his competitors.

THE BOOM IN TRADE.

Much has been said in the columns of the daily press of this country about the great boom in trade, and the reports from manufacturing centers, as well as statistics show that as far as manufacturers of raw materials are concerned, trade has been going up by leaps and bounds. Manufacturers both in this country and abroad, are buying materials, especially metals, very largely, and, as might be expected, there has been a remarkable advance in the prices of iron, copper, zinc and tin plates. The influence this will have on the general trade of the country has been good, although, so far, the retail shopkeeper does not appear to have experienced the benefit from this increased business which he naturally was led to expect from the glowing accounts given of manufacturing prosperity. It is hoped, however, that next year will be a record one for Hardwaremen, and that their returns will be greater than has been recorded for some years past. Doubtless they will do more business, and even if the actual sales in volume are no more than those of recent years, the higher prices, at the same ratio of profit, must boom up the figures and increase the total amount of profit made.

CHRISTMAS TRADING.

London shopkeepers and retailers in the larger towns and cities are looking forward hopefully to the business Christmas presents, fancy goods and special articles required at this season of the year in order to promote the happiness, comfort and convenience of domestic arrangements during the Christmas festivities, which are generally regarded as being indispensable in every well-ordered home during the holiday time in Christmas week, and during the first few days of the New Year. Ironmongers are perhaps less inclined to take advantage of this special business than any other body of traders, but even Hardwaremen pay more attention to the selection of suitable goods for such purposes, and exercise special care in their display, the greater portion of the most go-ahead falling in line with the spirit of the times, and by advertising schemes, circular letters and other methods, advise their clients and bring under their notice the special goods they have prepared in readiness for the boom in Christmas trade which the more hopeful anticipate.

THE END OF THE SOAP BUBBLE.

Since my last letter was dispatched the attempt at a combination of soap manufacturers has proved a failure. The British public, backed up by the efforts of the daily press as well as trade journals, has declared so strongly against the attempt to form such a combination, that the promoters, who had entered into an agreement, decided to abandon the scheme.

WINCHESTER

Model 1907 Self-Loading Rifle

.351 CALIBER HIGH POWER

"The Gun That Shoots Through Steel"

Standard rifle, 20 inch round nickel steel barrel, pistol grip stock of plain walnut, not checked, weight about 7¾ pounds, number of shots six, LIST Price, ...$28.00

Cartridges, Full Metal Patched 

or Soft Point 

LIST Price per 1,000.....$32 00

PUT YOUR ORDER IN NOW

This new rifle is going to be a big seller, as indicated by the large number of inquiries already made about it. It is bound to be a popular gun as it is built on a safe, sane and simple system and shoots a cartridge powerful enough for the largest game. It is a strong, handsome, serviceable gun from muzzle to butt. You can stock this rifle with confidence of your ability not to carry any of them over. We will be glad to send advertising matter upon request.

WINCHESTER REPEATING ARMS CO., New Haven, Conn.

BARGAINS IN SPORTING GOODS.

In almost every line of business it has been found to be both profitable and good policy to hold low-priced sales, or bargain days, at certain times when conditions and circumstances seem to justify them. This method is an excellent one, says the *Sporting Goods Dealer,* for clearing out old stock and making room for new models. Sporting goods dealers have for some time been followers of the practice and these sales are being held with increasing frequency. A bargain department as a permanent fixture of the store where sporting goods are retailed is hardly a wise policy, because it inevitably results in a general reputation for cheapness which naturally produces a slight distrust in the quality of goods. However, there are certain classes of goods, such as fishing tackle, that can be offered at reduced prices without affecting the reputation of the store while at the same time serving as a bait for other business. The bargain department in the sporting goods trade is seldom a source of profit and its purpose is mainly to rid the shelves of superfluous goods; the profit is always incidental and indirect rather than primary. In disposing of "stale" goods at low-priced sales, it is a good plan to mix in some articles of higher grade and established prices in order to present a showing that is not entirely marked by cheapness. In pricing bargains it should be with the idea of getting rid of them at any cost and not with the idea that a profit of any amount is to be forthcoming. Out-of-date goods should have no place on the shelves of a first-class store and the money they will bring is much better invested in new goods. The retailer of sporting goods really has many opportunities to present goods at bargain prices. New models in guns, changed styles in sportsmen's clothing, fresh tackle and other goods are constantly being received. Some of this material finds a ready sale at its appointed prices during the season of its usefulness, and much of it does not "take" but remains behind to accumulate dust and occupy space that can be ill afforded. It is not only as a means of removing stale goods that the bargain sale is convenient and beneficial to the retail merchant. A few choice articles that will insure a fair profit can be placed prominently in the store and advertised at stated periods. They will help to draw customers to the place and in every way call attention to the fact that there is a store where sporting goods are sold and whose manager is wide awake and after business.

THAT RECIPE FOR SUCCESS.

By B. A. Chambeau.

Several merchants have recently told the writer that in their opinion location means everything to the success of a store; that given their choice between the possession of great business ability or money enough to fit out an ordinary establishment in a good location, they would choose the latter.

But location does not mean everything to the success of a store. Some of the most successful stores are more poorly located than competitors not enjoying one-half so large or lucrative a trade. Location helps, of course. Sometimes unlimited capital applied to location will do the trick, whether ability is prominent or not; but, in the main, it is ability that counts.

Methods of business men are not all alike, nor are the business principles they follow always given the same order of precedence in practice. But these differences are in themselves evidences of ability—the ability to shape one's self to local conditions, shaping methods to make the most of those conditions. If you ask one of these men who has proven his ability and measured up to the standard of success how he did it, his answer will be simple enough and will approximate to the explanation given by every other successful man from whom you ask like information. But the strange part of it is that the explanation of the successful man will be identical with what the unsuccessful man will tell you if you ask him how one should become successful.

Why is it, if the unsuccessful man can as glibly and readily point out the road to success that all men are not successful? And the answer is, that it is easier to possess knowledge in the abstract than to make actual and intelligent application of it—that and the gross shiftlessness, carelessness and lack of continual endeavor in the majority of mankind.

So then, it comes down to an exemplification of the old Biblical parable of the ten talents, and it's what is in the man and not what's around him that decides whether or not he is to be a success.

REVIEW OF THE MARKETS.

WIRE NAILS: There is still quite an effort being made to obtain sufficient Wire Nails with which to fill orders. The trade is responding very strongly, but with new business and specifications on orders already contracted for. The jobbers have no stocks accumulated on which they can rely, and there are some that are prophesying if this keeps up, it will take another advance in price to check it. The output is still without the steel that would help deliveries and the shortage in cars keeps the trade guessing when they will not have that handicap. The market is quite firm. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers $2.00
Carload lots to Retailers 2.05

New York.—Local demand has been up to standard, and the weather has been of a character that made the completion of work problematical. Prices are firm in the market. Quotations are as follows: To retailers carloads on dock, $2.19; less than carloads on dock, $2.33; small lots at store, $2.30.

CUT NAILS: In the absence of any meeting of the Cut Nail Association this month, prices have moved along in harmony with quotations on Wire Nails. The mills are reported pretty well sold up for a month ahead, while specifications on contracts and new business keep them well occupied. Quotations are as follows: f.o.b. Pittsburgh:

Carload lots to Jobbers $2.05
Less than carloads to Jobbers 2.10
Less than carloads to Retailers 2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—Deliveries to jobbers are not as complete as they could wish, as they are still short on sizes, and manufacturers are reported behind their orders. The demand, however, has fortunately for their stock, been only a light one. New York quotations are kept on the basis of $2.30 for small lots from store.

BARB WIRE: Fearing the delays that would result from a continuation of the car shortage, and to be able to supply an early Spring demand, the jobbers are placing their orders early. Specifications on contracts, the mills report, are being received in fair volume. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: New tonnage is quite moderate, larger requirements being already covered by contract orders that have been placed previously. Mills are behind orders from 30 to 60 days. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carloads $1.85
Retailers, carloads 1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

TROY NICKEL WORKS: Troy Nickel Works, Albany, N. Y., announce that owing to the advance in the cost of labor and raw material entering into the construction of Alaska Stove Trimmings and Hardware specialties present prices will be withdrawn December 20. New prices will be furnished on application.

WOOD PLANES: New base discounts have been announced on Wood Bench Planes, representing considerable advances on these lines. The new base discounts, on which an additional 10 per cent. may readily be obtained by good retail trade, are as follows:

Wood Bench Planes, first quality 30%
Wood Bench Planes, second quality 40%
Fancy or Molding Planes 25%

BENCH AND HAND SCREWS: The leading manufacturers of Wood Bench and Hand Screws have advanced their quotations, making the base discount 20 per cent. instead of 25 per cent. The new level of the market may be fairly represented by a discount to retail trade of 20 to 20 and 10 per cent.

WOOD BENCH SCREWS: Under date of December 12 the following revised list on Wood Bench Screws is announced. It is subject, as was the old list, to a discount of 20 per cent.:

	Price per dozen.
Wood Bench Screw, V Thread, 2-in.	$4.50
Wood Bench Screw, V Thread, 2¼-in.	4.75
Wood Bench Screw, V Thread, 2½-in.	5.00
Wood Bench Screw, V Thread, 2½-in., with patent groove and patent metallic vise flange	5.00
Wood Tail Screws.	
Wood Tail Screw, V Thread, 2-in.	12.00
Wood Tail Screw, V Thread, 2½-in.	12.00
Wood Tail Screw, V Thread, 2½-in., with patent groove and patent metallic vise flange	12.00
Boilers' Pattern Bevel Thread Bench Screws.	
Wood Bench Screw, 2½-in.	7.00
Wood Bench Screw, 2½-in., with patent groove and patent metallic vise flange	7.00
Square Thread Bench Screws.	
Wood Bench Screw, 2½-in.	7.00

PLANE IRONS: The manufacturers of Plane Irons have adopted a new and higher list, which is subject to the same discounts as the old list. The revised list, which bears date, December 12, is as follows, subject to the general discount of 25 per cent.:

No. 253. *Plane Irons, Single or Cut, Without Caps.*

Size, inches	1½	1⅝	1¾	1⅞	2	2⅛	2¼	2⅜	2½
Per dozen	$2.50	2.75	2.75	2.95	3.15	3.35	3.70	4.10	4.50

Size, inches	2⅝	2¾	3	Assorted 2 to 2½-in.
Per dozen	$4.90	5.50	7.00	3.75

No. 254. *Plane Irons, Double.*

Size, inches	1½	1⅝	1¾	1⅞	2	2⅛	2¼	2⅜	2½
Per dozen	$5.50	6.00	6.00	6.25	6.45	6.65	7.00	7.40	8.20

Size, inches	2⅝	2¾	3	Assorted 2 to 2½-in.
Per dozen	$9.00	10.15	11.70	7.15

No. 262. *Tooth Plane Irons.*

Size, inches	1⅞	2	2⅛	2¼
Per dozen	$4.95	$5.15	$5.35	$5.70

SOLDERING COPPERS: Owing to the continued advance of Ingot Copper the base on Soldering Coppers have been advanced to 28 cents per pound on December 15, in lots of 300 pounds and over, with the customary extras for lots smaller than 300 pounds.

HOLLOW WARE, ENAMELED WARE, ETC.: A further advance in Hollow Ware, Enameled Ware, etc., has taken place, and which is given herewith:

	Per cent.
Stove Hollow Ware:	
Plain or Unground	55@60
Ground Ware	50@50 and 5
Enameled Ware	45@45 and 10
Country Hollow Ware, per hundred pounds	$2.75
White Enameled Ware:	
Maslin Kettles	65@65 and 10
Covered Ware:	
Tinned and Turned	35 and 10
Enameled	45 and 10
Glue Pots:	
Tinned	30 and 10
Enameled	35 and 10
Sugar Kettles and English Pots	12½ per cent. advance.

GALVANIZED PAILS AND TUBS: We give below the lists on Galvanized Pails and Tubs now in general use, although net prices are still being made to the retail trade in many sections. From these lists a discount of 10 and 5 per cent. is readily obtainable, with some further concession to larger buyers:

Buckets, Galvanized.

Quart	10	12	14	16
Water, Regular, per gross	$25.35	$28.00	$32.00	$40.00
Water, Heavy, per gross	43.35	48.00	52.00	60.00
Fire, Rd. Bottom, per gross	32.00	34.65	38.65	.....
Well, per gross	37.35	41.35	45.35	.....

Tubs, Galvanized.

No.	0	1	2	3
Per gross	$64.00	$76.00	$84.00	$96.00

MANUFACTURED — BY — **NICHOLSON FILE CO., - Providence, R. I.**

COAL HODS: We give below the list on Coal Hods. The market for these goods is fairly covered by the discount of 10 and 5 per cent. and the concessions referred to may be similarly applied to the following list:

Coal Hods.

Inch	15	16	17	18
Galvanized, Open, per gross	$35.00	$39.00	$42.00	$46.00
Japanned, Open, per gross	26.00	28.00	31.00	35.00
Galvanized, Funnel, per gross	43.00	48.00	53.00	56.00
Japanned, Funnel, per gross	33.00	36.00	39.00	43.00

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12¾ to 13½
B Quality Manila	11½ to 12
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8 to 8¼
No. 1 Jute, ¼ and larger	8¼ to 8½
No. 2 Jute, ¼ and larger	7¾ to 8

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil.....70 cents per gallon.

THE PITTSBURGH TRADE.

If the people of the United States do not have a Merry Christmas and a Happy New Year it will not be the fault of business conditions. The year now closing has never been exceeded in the amount of business done nor in general prosperity. While material things are so bright and propitious it may be difficult for some to turn to the ideal and spiritual which should engage our thoughts on this Christmas day. While we exchange our gifts, we should not forget the greatest of all gifts to man, nor the message which came with His annunciation, "Peace on earth, good will to men." LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

Retailers and jobbers are alike interested in the question that has recently been discussed between the manufacturers and jobbers. In the opinion of many manufacturers a change should be made in the terms of the sale of Hardware and several of them had announced the change before the convention met, making their terms thirty days or one per cent. off ten days. While the jobbers could not deny that two per cent. off cash was a liberal premium for prompt payment, yet custom had established it so long that it would seem like a radical change if jobbers are compelled to adopt it. The manufacturers finally consented to continue the present terms upon condition that the jobbers should strictly comply with them, and where they fail to forfeit the discount. The jobbers have never had a combination on either price or terms, but as they can only get this extra discount by prompt payment, they are compelled to ask the co-operation of their customers. None of us can afford to lose such a percentage and we should work together for its retention. The dividends of a good many houses would be absent if this was lost to them. The discussion will be profitable if it results in prompter payments, as this will tend to prevent over trading and it will be much more difficult to start a financial panic if the credit of the country is on this basis. It is an opportune time to make such reform and we should all aid in securing it. THE LOCKWOOD-TAYLOR HARDWARE CO.
C. B. LOCKWOOD, *President.*

THE ST. PAUL TRADE.

Surely we ought to be happy. With continued prosperity and no signs of clouds in the financial and business world, we certainly have reason to be satisfied. The splendid amount of goods consumed makes a record of which we can all be proud. With an advancing market all dealers should make money by marking up their prices. The retailer should take advantage of increased values and insist upon getting more for his goods. Following the plan of manufacturers we should all make short contracts and when prices advance make our prices to equal the advances. The scarcity of goods during the Spring months will be a great factor in the business world. We advise our trade to get their contracts for Spring goods placed with some good jobber and do it at once. The business done by us in holiday goods is very large. Our line is gradually increasing until we have many articles which a short time ago would not be considered Hardware, and we, as well as our customers, find these new lines very salable. We tell our trade that everything, except whiskey, fits in a Hardware stock. Let's all be thankful for the prosperous year of 1906. HACKETT, WALTHER, GATES HARDWARE CO.

Digitized by Google

THE MINNEAPOLIS TRADE.

All local dealers at this time are exceedingly busy with holiday trade, other than this general business would naturally be rather quiet at the closing of the year. Collections, we are sorry to say, have not been quite up to the mark. We hope for improvement shortly. Volume of business with us, as we think it is true with the trade generally, has shown quite a marked increase this year, with good prospects for the future.

W. K. MORISON & Co.

THE SAN FRANCISCO TRADE.

It is generally thought here that our country's good Santa Claus friend, whom Californians esteem as a jolly good fellow and most excellent president, Theodore Roosevelt, has been imposed upon by under-medium advisors. Vice-President A. A. Watkins, of the W. W. Montague Hardware Co., a front man in California, believes President Roosevelt was wrongly advised concerning educational affairs in San Francisco. "The tenor of his message would indicate," said Mr. Watkins, "that he is not fully acquainted with the Japanese problem in San Francisco. Apart from this, however, it would appear that the question is a State rather than a Federal one. No one wants to criticise President Roosevelt, but I think the opinion of the average business man here is that California is quite competent to solve this matter for itself and will make every effort to do so."

A wind and rain storm of unprecedented severity caused an estimated million-dollar loss in San Francisco's center of temporarily built shacks during all the night of December 9 and throughout the entire succeeding day; and all along the peninsula trees and buildings were blown over. The trade was not overlooked by the wild flight of the hundred-miles-an-hour storm, many being damaged more or less, particularly the Joost Brothers Hardware Co., whose store was blown into the middle of the street, the damage by rain being several thousand dollars.

Convict-made goods in the Hardware line is deemed the all-important matter that is now claiming the attention and consideration of the local Labor Council and their proposed measures to prevent convict-made goods entering California is going on apace. The legal aspect of the case is being looked into by competent authority, and the law and legislative committee will do a good service if a law can be placed on the statute books preventing the importation of prison-made products. The council has given its committee full power to seek the best legal advice in the premises, and as the committee is composed of workers something tangible will result. For years large consignments of stoves made by prison labor in Oregon have been brought into this State, and while the Molders' Union has been fighting this iniquity it has been a very discouraging fight. This convict labor is farmed out to contractors, who pay the State from 40 to 60 cents a day per man. The output then comes in competition with free labor. To abolish this the Labor Council has undertaken a most worthy task, and if the legislative committee can prevent further importations of these prison-made products it will deserve well of the entire community.

The biggest thing ever attempted in the name of San Francisco, and in the personnel of the group of fifteen propagators I find the name of Henry T. Scott, of the Great Pacific Iron & Steel Company, formerly Miller, Sloss & Scott, was put into incorporation form this week under the title of The Pacific Ocean Exposition Company. The articles of incorporation, with a stated capital stock of $5,000,000, divided into 500,000 shares at $10 each, set forth the purposes of the company, chief among which is the holding of an international world's fair in San Francisco in 1913, to assist in which Congress has been asked to appropriate $5,000,000. The fifteen incorporators, all known as go-ahead-a-tive sort of men, and credited with assets considerably over an average of one million dollars each, are Henry T. Scott, R. B. Hale, I. W. Hellman, Jr.; W. F. Herrin, Rufus P. Jennings, Homer S. King, Hartland Law, William A. Magee, John Martin, W. H. Metson, Percy T. Morgan, Harry L. Tevis, Frederick W. Sharon, F. Tillman, Jr., and Charles R. Beitler. President, Homer S. King; vice-presidents, Henry T. Scott, John Martin and F. Tillman, Jr.; treasurer, I. W. Hellman, Jr.; executive committee, R. B. Hale, I. W. Hellman, Jr., W. F. Herrin, Rufus P. Jennings and Percy T. Morgan; temporary secretary, Norman F. d'Evelyn.

Bradstreets' and R. G. Dun & Co.'s Trade Review this week say exactly what I was about to say with immaterial variation, as follows: Holiday trade is now in full swing and monopolizing attention, although there is a steady gain in distribution of Winter Hardware goods. This Christmas season business, now in these midway days of December of the foremost proportions, bids fair to eclipse previous records, a significant feature being the demand for high-grade goods. Industrial lines also were never more active, and the labor situation, as far as grievances are concerned, seems to have improved. Wages are still being advanced, and the supply of help still continues scarce and car shortage still prevails. Indications are that the next crop of Winter wheat will be a high record production.

INDUSTRIAL PRESS ASSOCIATION.

HUMOROUS LOGIC.

The judge told the tenor that it would cost him a tener.

Boarders will be pained to hear that the California prune crop is exceptionally large this year.

The Rockefeller family seems still to have its luck in the courts. We see where William has just been awarded damages of 18 cents against a man caught fishing on his premises.

The San Francisco earthquake was considered a calamity, but possibly it was really a blessing. It seems things are going to keep on shaking out there until the grafters are forced to stop shaking down the common people.

The loss of a few million dollars worth of diamonds formerly brought free newspaper advertising to the people of the stage, but nothing short of an arrest and prosecution now seems to bring success in this direction.

It seems Representative Longworth must contemplate swearing off smoking. Or, possibly it is Mrs. Longworth who is doing the contemplating. At any rate, according to a recent news item, she is carrying the key to his cigar case.

It is now announced that President Castro of Venezuela, has not been ill. This comes just at the time people who have been watching his actions for the past few years had about decided his illness was of a mental character.

A jeweler was unpacking some pottery the other day, and after carefully examining one piece, set it down with the remark that it was a baby jar. When pressed for a reason for his decision, as it was one of the largest, he pointed to the decoration, which was four storks.

It takes a diplomat to be a soldier. When a private, he must tell more than he knows, and when an officer he must tell much less than he knows, and even by following this rule it seems hard to keep from being courtmartialed.

The trouble with our pure food legislation seems to be that each manufacture wants an extremely severe ruling to affect all other lines, and an extremely lenient ruling covering his own business.

It seems very appropriate that Hearst voted in an election booth over an undertaking shop. When Hearses and undertaking establishments become active there is usually something around in the way of a funeral.

Those who may be interested in knowing a Philadelphia postoffice clerk's idea of Heaven will please take notice that a letter addressed by little tots to "Mamma, in Heaven," was sent from Philadelphia direct to Atlantic City.

The newspapers now declare the Pullman Company is burdened with millions of dollars. Some philanthropic Congressman can now come to the front with a law compelling this company to include the regulation Pullman porter tip with each berth ticket sold.

Henry Griffith, of Warrensburg, Mo., probably has the largest jug of cider in the United States. On acount of being unable to buy any more barrels, he cleaned the water out of his cistern, and is using it for a cider jug.

CATALOGUE OF THE INDIANA MFG. CO.

INDIANA MFG. CO., Peru, Ind. Illustrated catalogue and price-list for 1907 of "North Star" and "Indiana" Refrigerators. These catalogues are handsomely gotten up, printed on an excellent quality of calendered paper, with fine half-tone illustrations, showing an extensive assortment, including Hardwood Nursery Refrigerators, Family Refrigerators, with porcelain-lined Water Coolers and Fancy Nickel-Plated Faucet and Grocers' Roll Top Refrigerators. The company desire to call special attention to their Opalite line, regarding which they state: "In compliance with a demand from many of our customers, we present to the trade the newest idea in Refrigerator Lining to secure beauty and added cleanliness. Opalite is a snow-white sheet of glass with a china finish, and will not absorb moisture or stains any more than chinaware. By placing the Opalite lining in our famous North Star Refrigerators we add to its reputation of superior insulation and economical consumption of ice a thing of beauty and attractiveness that appeals strongly to the careful housekeeper." The company are now prepared to furnish on application plans and specifications for special refrigerators of any size or description, as they build them for residences, clubs, hotels, caterers, florists, grocers, butchers, apartment houses, etc.

EFFECT OF INVENTIONS UPON SPORT AND THE TRADE.

While contemplating the efforts of our modern inventors to place on the market an article that contains so-called improvements over the old styles, the thought occurs that possibly those interested in the manufacture of these goods do not realize what changes they are bringing about in the sport or pastime in which they are used. In fact, writers on certain branches of sport are protesting that their games are already in danger of being spoiled even now by the introduction of utensils that have a too revolutionary effect. Take golf, for example, which was made the subject of an article by an ingenious writer in a periodical publication. The contention is that the constant improvement in the construction of golf balls and clubs is rapidly changing the game from a pleasant contest of skill to mere cross country pedestrianism. Whether or not the game of golf is being "spoiled," it certainly is being noticeably changed. The genius of the American is leaving its mark upon the tools of all sports in which any interest is shown. When golf came across the Atlantic to us, the ball was made of gutta percha. With it a strong and expert player could get a distance on the drive from the tee of possibly 200 yards. Now, with the present day golf balls, balls whose interior contains cords of little rubber bands tightly wound, balls of wound silk, pneumatic balls, and even balls with a drop of mercury in the center so that they will run true on the putting green, a vast change is effected in the general play. Using these new inventions the modern player is often able to drive 250 yards while the more expert not infrequently get a full 300 yards. In the same way the clubs have undergone alterations that affect the game. Clubs with steel centers, drivers with rubber cores and drivers with steel tubes filled with mercury are some of the innovations that have been introduced into golf club manufacture. These new balls and clubs have caused no end of changes in the conduct of the game. When players began to make increased distances in their drives and balls moved more lightly on the green, it was found necessary for greenkeepers to lay out courses anew to suit changed conditions. Links that were mowed and rolled to receive the gutta percha ball were not adapted to the faster balls and distances made by more resilient clubs.

Now the question may be asked: Is there really any danger that these improvements will change the game to such an extent that the persons interested in the manufacture and sale of golf requisites will be unpleasantly affected? Needless to say, if any sport or game is altered so that its popularity lapses, the trade in that particular line of goods will be correspondingly influenced. In regard to golf we may say that there is little likelihood of either the game itself or the trade suffering seriously from the introduction of these new styles of tools, the game is too old and well established, and besides, statistics show that it is becoming more popular in the United States with each succeeding year. It is a fact that much of the fine playing that has been done under the new conditions is the work of experts and first-class players. The great majority of middle-class golfers are still slicing drives and dubbing around in the tall grass, making the same old scores and ambitiously trying to duplicate the records of the more experienced. No matter how many new implements of questionable value may be put on the market, there always will be some one who will give them a trial, and if they possess true merit and really are the improvement that is claimed, they will endure. If the game is changed slightly by the use of these goods it must be put down as the result of a natural evolution that comes to all things. One needs only to refer to the hundreds of different styles of artificial baits, reels and other fishing tackle to show that a sport is not menaced because someone is constantly striving to make an "improvement" in the tools used. The articles that meet with success and live longer than the time-limit of the big advertising boom with which they are introduced, can not be said to be disadvantageous to the sport. A poor article can not be forced upon the public for any length of time, and when it does meet a popular demand, then it is something for which there was a need and its presence on the market is justified.—*The Sporting Goods Dealer.*

ALCOHOL MOTOR FOR PLOW.

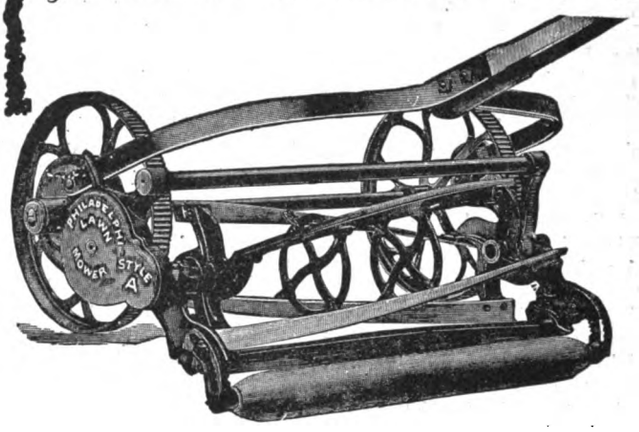
It is probable that the use of alcohol motors on the farm will become quite common as soon as the technique of construction is practically complete and the price of alcohol is sufficiently low. Alcohol can be used for all purposes for which gasoline is employed, namely, the driving of wagons, carriages, stationary motors, water pumps, mowing machines, plows, etc. Very little changes need be made in the engine of a motor car designed to use gasoline to fit it for the use of alcohol. Gasoline becomes volatile at a temperature of blood heat (98.5 degrees Fahrenheit), while a much greater degree of heat (158 to 176 degrees Fahrenheit) is necessary to volatilize alcohol rapidly enough for motor purposes.

An ordinary plow, suitable for attaching to a heavy motor apparatus, can be driven by alcohol. In regard to these heavy machines it may be said that they probably would come into use only on large farms where the surface of the soil is practically level. They would not be suitable for small farms nor those in hilly sections.

Genuine Philadelphia Lawn Mowers are only made by The Philadelphia Lawn Mower Co.

All Others Are Imitations!

Our Style A Is the Only



ALL STEEL MOWER MADE

It has 10 inch wheel, 4-blade cylinder, train of 3 gears, double ratchet, making both wheels drivers.

The revolving cutters are without bar in center as we make no mowers with rod thru center of revolving cutter for bearings, all have large, long bearings, and are the most satisfactory Lawn Mowers made. We have others shown in 1906 Catalogue. You ought to have a copy and see our complete line.

The Philadelphia Lawn Mower Co.

3101-09 Chestnut St., Philadelphia, Pa., U.S.A.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Brooklyn, N. Y.—Burns-Brittain Co. has been incorporated for the purpose of manufacturing cameras, lenses, films, etc.; capital, $50,000. Incorporators: S. H. Burns, Brooklyn; H. L. Brittain, M. G. Bender, New York City.

Detroit, Mich.—The Detroit Spring Wheel Co. has been incorporated to manufacture a new automobile wheel in addition to automobiles, automobile supplies etc. The capital stock of the company is $100,000, and the incorporators are: Walter Parker, William T. McGraw, Frank G. Smith, Jr., Harry Bennett and Benjamin S. Warren. A new factory will probably be built.

Homestead, Pa.—Homestead Sporting Goods Company has been incorporated with a capital of $5,000.

Rochester, N. Y.—Daylight Photo Specialty Co. has been incorporated to manufacture photographic supplies, develop a patent for photo plates; capital, $1,500,000. Incorporators: F. C. Bradburn, J. H. Tyler, J. B. Low, C. A. Bruff, Rochester.

Springfield, Mo.—The C. A. Bogardus Cartridge and Powder Co., located on St. Louis Street, is now ready to manufacture shells and cartridges of all kinds. The company has put in machinery at a cost of $10,000. The factory will have a capacity of about 25,000 shells and cartridges daily. The celebrated Bogardus smokeless powder also will be manufactured. The company is capitalized for $50,000. The officers and directors are: Captain C. A. Bogardus, president and general manager; Alice Bogardus, secretary; Thomas R. Gibson, treasurer.

Trenton, N. J.—National Rifle Supply Co. has been incorporated to manufacture targets, rifle range appliances, firearms, etc.; capital, $100,000. Incorporators: A. S. Jones, Passaic; H. C. Wilson, New York City; E. J. Dimmick, Washington, D. C.

Changes and Improvements.

Brockville, Ont.—Canadians soon will be able to procure first grade drop forgings of home manufacture, the Canadian Billings & Spencer Co., with $200,000 capital, having been formed for that purpose. The enterprise is, of course, an outgrowth of the well-known Hartford, Conn., company of the same name; F. C. Billings is its president. The actual manager of the Canadian business, however, will be J. Gill Gardner, of Brockville, Ont., who will assume the duties on January 1st, when he will relinquish the management of the tool, steel and forge department of a Brockville concern. The exact location of the B. & S. plant has not been decided on but Brockville and several towns are making efforts to secure it.

Buffalo, N. Y.—John R. Keim, who so long has been engaged in the production of cycle components, has disposed of his interests to a corporation styled the John R. Keim Mills, Inc., the transfer already having been effected. Although Mr. Keim himself retires, the former managers and working organization will remain.

Little Falls, Minn.—Charles Guernon has removed to larger quarters on First Avenue, Southeast.

Miami, Fla.—Lofton & Einige have been succeeded by McIntosh & Richardson.

Shelby, Ohio.—R. R. Harris, eastern sales manager of the Shelby Steel Tube Company, has resigned that office to accept a similar position with the Seamless Tube Company of America, Pittsburgh, Pa. The latter company has a big mill in Monessen, Pa., and will include bicycle tubing in its production.

Syracuse, N. Y.—George A. Mosher, formerly connected with the Syracuse Arms Co., and also the Lefever Arms Co., has recently allied himself with the A. H. Fox Gun Co., Wayne and Bristol Streets, Philadelphia, Pa. Mr. Mosher has assumed the duties of general manager and among other things will look after the sales department.

Traverse City, Mich.—Houghton & Manning have sold out to Mrs. Harriet Robey.

Yonkers, N. Y.—W. F. Mann, who has handled Indian and Yale motorcycles locally for several years, is next year going into the business on a more extensive scale. His first move in that direction has been to secure the Indian agency for all of Westchester County, the town of Port Chester excepted.

Fires.

New York, N. Y.—About $7,500 worth of sporting goods were destroyed in a fire in the five-story office building in Nos. 124, 126 and 128 Nassau Street. The fire was confined to the basement, where the goods were stored.

Miscellaneous.

Swanton, Vt.—At a meeting of the stockholders of the Robin Hood Ammunition Co., which was recently incorporated and organized to purchase the Robin Hood Powder Co., the following were elected: Sir William C. Van Horne, of Montreal; Edward C. Smith, Charles E. Schoff, W. Beecher Fonda, Edwin H. Richardson, of St. Albans. The directors elected these officers: President, Edward C. Smith; vice-president, Edwin H. Richardson; treasurer, Charles E. Schoff; secretary, Edwin H. Richardson; general manager, Charles E. Schoff. The new organization has taken over the property of the old company and will continue the business as heretofore with more or less important increase of manufacturing facilities and extension of variety and amount of product to meet the requirements of a steadily growing trade.

Utica, N. Y.—A meeting of the stockholders of the Utica Drop Forge & Tool Company was held recently at the office of the company, 75 Genesee Street. The following were elected as a board of directors: William Pierrepont White, H. Lawrence White, Henry F. Kellemen, John P. Campbell and Hugh White. William Pierrepont White was chosen president, H. F. Kellemen vice-president and Hugh White secretary and treasurer.

♣

Marseilles, France, has formed a corps of cycling firemen, six cyclists being attached to each brigade in the city. The cyclists carry two boxes, a folding ladder, two lamps, six axes, a shovel, and a ram, to say nothing of a box of small tools, and a case containing remedies for asphyxiation. It is stated that they are usually first at conflagrations and that it takes them less than one minute to begin operations.

♣

More than 200 bicycles are owned by the Sultan of Turkey, some of which have gold and silver mountings. It is said that he could earn a good salary as a trick rider.

♣

Vineland boasts of the youngest old woman in that section of New Jersey. She is Mrs. Caroline Bache Barnes, a great-grand-daughter of Benjamin Franklin. Although 71 years old, having been born in 1834, she still rides the bicycle daily and thinks nothing of a jaunt of twenty miles. Her longest ride of late was from Vineland to Atlantic City. Mrs. Barnes is a professional nurse and uses the bicycle as a means of getting quickly from place to place.

♣

The month of October added to the impressively increased total of Great Britain's cycle exportations. There were shipped abroad 7,202 completed bicycles valued at £37,351 and parts to the value of £51,257, a total of £88,608 as against £82,905 in October, 1905. For the ten months of the year the number of completed bicycles exported was 64,493, valued at £356,679 and parts worth £595,744, an aggregate of £951,823 as compared with only £768,651 for the corresponding period of last year—a prodigious increase. During the same period, Great Britain imported but 1,213 finished bicycles, valued at £7,240, and parts to the value of £126,930, the total, £134,170, being an increase of £23,037.

IN SYMPATHY.

Fond Mother—Ethel, did you kiss young Mr. Jones again last night?

Ethel—Yes, mamma; he has just lost an uncle, and I was so sorry for him.

Fond Mother—Well, Ethel, let this be the last. I'm afraid if you keep on encouraging him with your sympathy, he won't have a relative left in the world.

IN THE ABSENCE OF A TIP.

"Excuse me, madam, would you mind walking the other way and not passing the horse?" said an English cabman with exaggerated politeness to the fat lady who had just paid a minimum fare, with no fee.

"Why?" she inquired.

"Because of 'e sees wot 'e's been carrying for a shilling 'e'll 'ave a fit," was the freezing answer.

We Are the First!

Yes, we are the first of the manufacturers of Terne Plates to suggest and adopt the plan of stamping the amount of coating carried by our brands of Roofing Tin, and of stamping all wasters as such.

This is the "square deal" which all Jobbers, Architects, Roofers and Property Owners have needed for so long—and already the move has shown a good effect.

In future, don't merely specify American Ternes, American Extra, American Special, American Old Style A, 2A, 3A, 4A, 5A, MF, or U. S. Eagle New Method—but examine the boxes when these arrive and see that the contents indicate exactly what you purchased. If the sheet isn't stamped with the coating, look along the edge for the mark "Waster."

If you'll use these precautions you'll find Roofing Tin to be the most satisfactory roof covering you can use—but you can't expect an 8-lb. Terne to do the work of the old time or present day 30 to 40-lb. coated plates.

Send for our booklet "From Underfoot to Overhead" if you would know how a high grade Terne Plate is made, and use MF ROOFING TIN, "The Terne which turns the elements," if you want the best Roofing Tin that can be had.

AMERICAN SHEET & TIN PLATE COMPANY,

FRICK BUILDING PITTSBURGH, PA.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Augusta, Me.—Elgin Safety Razor Co. has been incorporated to manufacture cutlery of all kinds; capital, $500,000. President and treasurer, J. Berry; clerk, L. A. Burleigh, Augusta.

Bliss, Okla.—The Myers Pump & Mfg. Co. has been incorporated with a capital of $50,000 by W. M. Myers, St. Joseph, Mo.; G. L. Miller and L. Marks, Bliss.

Boston, Mass.—The Disappearing Window Screen Co. has been incorporated to manufacture window screens; capital, $50,000. President, J. S. McNamara, Easton; treasurer, J. A. Phelan, Boston.

Bradford, Ont.—The Marvel Acetylene Generator Co., Ltd., has been incorporated with a capital of $10,000; provisional directors, Albert J. Moore, Frederick W. Moore, Albert E. Scanlon, Charles W. Ellis, Peter Holt, H. S. Broughton and John Elliott.

Brooklyn, N. Y.—Reilly & Guy has been incorporated to manufacture Hardware and supplies; capital, $11,000. Incorporators: P. F. Reilly, A. G. Burgtorf, J. M. Lennon, Brooklyn.

Cincinnati, Ohio.—The Central Foundry Co. has been organized with a capitalization of $25,000 by John T. Gardner, W. L. Huber, C. E. Morgedant, A. W. Morgedant and W. C. Morgedant.

Crawfordsville, Ind.—The Crawfordsville Tank Co. has been incorporated with a capital stock of $20,000 by M. B. Binford and C. O. McFarland.

Erie, Pa.—A Pennsylvania charter will shortly be asked by the Erie Tool Co., composed of M. W. Bacon, Frank Bacon, G. H. Clows and others of Erie, Pa.

Freeport, Ill.—D. C. Stover & Co. have been incorporated with a capital of $50,000 by D. C. Stover, J. P. Stover, Fred R. E. Dawson, J. F. Smith, W. A. Hance, Paul F. Schryer and P. S. Stover.

Hamilton, Ont.—The Consolidated Hardware Manufacturing Co., Limited, has been incorporated. It has a capital of $40,000, and is formed for the purpose of manufacturing tacks, nails and other Hardware. The provisional directors are: Thomas H. Wynn, Frank Forsyth and Charles H. Briggar, all of Hamilton. The concern is now in operation on Park Street South, and as soon as business warrants it a bigger factory will be utilized.

Holland, Mich.—The new Holland Furnace Factory has been put in operation. The plant will be run by electric power and its capacity will be eight furnaces daily. About fifteen hands will be employed at the start, which number will be increased to forty within a few months. The product of the factory will be called "The Holland."

Jersey City, N. J.—Ivel Agricultural Motor Co. of America has been incorporated to manufacture motors, motor tractors and portable motors for agricultural and other purposes; capital, $1,000,000. Incorporators: H. O. Coughlan, B. S. Mantz, G. L. Rotzel, Jersey City, N. J.

Kokomo, Ind.—Superior Machine Tool Company has been incorporated; capital, $20,000. Directors: Albert P. Wiegel, S. H. Robinson, L. Wiegel and A. Robinson.

Lansing, Mich.—The Michigan Screw Co. organized only a few weeks ago, has erected a small addition to the pure food building on the Improvement Company addition and is rapidly getting its plant in shape.

Le Roy, N. Y.—Ground has been broken for a two-story factory building, 84 by 34 feet, for the new lamp burner company in Le Roy, which has bought a quarter of an acre of land adjoining the Buffalo, Rochester & Pittsburgh railroad, on Lent Street from Mrs. H. R. L. Bissell. The building is to be completed by February 1, 1907. All of the machinery for the plant has been ordered.

Lowell, Mass.—Lowell Scale Co. has been incorporated to manufacture scales, etc.; capital, $25,000. President, G. A. Fowle; treasurer, J. A. Stott, Lowell.

New York, N. Y.—Brown Rope Fastener Co. has been incorporated to manufacture Hardware novelties and Hardware supplies; capital, $20,000. Incorporators: Gustav Brown, Peekskill, N. Y.; M. Douglass Cole and Sidney B. Wood, No. 60 Wall Street, New York.

New York, N. Y.—The M. C. Clamp Co. has been incorporated with a capital of $25,000 to manufacture clamps, tools, etc. The incorporators are: Le Roy Clark, 56 West Seventy-first Street, New York; Alfred H. Meech, Chatham, N. Y., and Henry Scofut White, 95 Mercer Street, Plainfield, N. J.

Plainfield, N. J.—Ackroyd True Radiator Co., No. 171 East Front Street, has been incorporated to manufacture appliances for burning illuminating gas; capital, $100,000. Incorporators: William H. Aspinwall, Floyd T. Woodhull, Edson C. Martin, Plainfield, N. J.

Portland, Ore.—Articles of incorporation of the Portland Tool Works have been filed by W. Irving Spencer, Charles F. Machen and Patrick Dowe. They will engage in the manufacture and sale of steel and iron tools. Capital stock, $4,200.

Reading, Pa.—The American Die & Tool Co. has been organized by H. M. Sternbergh, J. H. Sternbergh, Edwin S. Smith and C. S. Dundore.

Roanoke, Va.—The Roanoke Foundry & Machine Co. has been incorporated to operate a foundry and machine shop. The capital stock is $30,000, and the incorporators are: A. J. Kennard, J. E. Reichhardt, J. W. Winston, H. E. Obenschain, A. D. Pettyjohn, J. L. Richev and others.

Rochester, N. Y.—Weaver Hardware Co. has been incorporated to manufacture Hardware and Hardware supplies; capital, $50,000. Incorporators: C. F. Weaver, B. P. Weaver, E. W. Perry, Rochester, N. Y.

Sioux Falls, S. D.—The Kahn Gas Stove Company has been incorporated; capital, $500,000, of which $25,000 is represented by business and property in Wisconsin; E. C. Nordyke, Milwaukee, representative in Wisconsin.

Terre Haute, Ind.—The Crown Machine Works has been incorporated with a capitalization of $25,000 by A. L. Pfau, N. W. Kirkpatrick and M. Henry.

Lindsey, Neb.—The Monitor Specialty Co. has been incorporated for the manufacture and sale of Hardware articles. The amount of paid-up capital stock is $20,000. Daniel G. Walker, Peter Welin and other citizens of the place are interested in the undertaking.

Trenton, N. J.—The Corbett-Taylor Co., principal office 143 North Warren Street, has been incorporated and will manufacture and deal in shaftings, hangers, couplings, pulleys and other devices. The capital stock is $100,000, and the incorporators are: Leslie C. Pierson, Ellsworth A. Corbett and James Taylor.

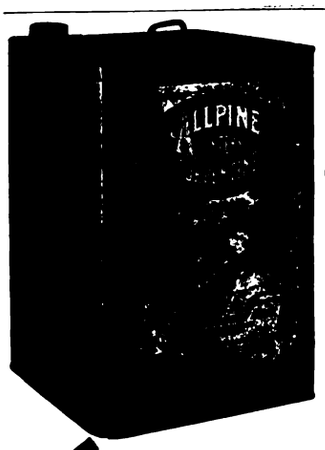
Waterbury, Conn.—The Equipoise Rivet Co. has been incorporated to take up the business of Hotchkiss Bros., of Wallingford, and will manufacture large and small iron rivets. The capital stock of the company is $3,000, and the incorporators are: G. G. Riggs and A. E. Babin.

Changes and Improvements.

Belleville, Ont.—About $9,000 was expended by the Belleville Hardware Co. in additions and improvements to their works on Pinnacle Street, including a large amount of new machinery. This company have purchased the lot at the north of their present site and next year it is the intention to erect another large building which will about double their capacity.

Beloit, Wis.—The machine knife factory of R. J. Dowd & Sons, which was partially destroyed by fire six weeks ago, has been rebuilt and work resumed in all branches.

Bristol, Conn.—Clayton Bros., manufacturers of scissors, have sold their factory and business to W. M. Bowes and S. L. Butler, New York. Mr. Bowes has been the sole agent for Clayton Bros., at No. 127 Duane Street, New York, and will continue to sell the product of the plant, which will be run under the same name as heretofore.



Brooklyn, N. Y.—The firm of Charles E. Ring & Co., manufacturers of machinists' and factory supplies and Hardware and tools, on Kent Avenue, was dissolved on December 1. William O. Fitch, Mr. Ring's partner will devote himself exclusively to the Hardware end of the business and Mr. Ring will look after the manufacture of iron. Both branches will be carried on at the Kent Avenue factory.

Chicago, Ill.—The Republic Metalware Co. will erect an eight-story warehouse on Wabash Avenue 170 by 63 feet, of mill construction, to cost $150,000.

Huntsville, Ala.—The Southern Handle Company is fitting up its building in West Huntsville and will resume operations in the next few days with a force of fifty skilled operatives. New machinery for the manufacture of handles and spokes is being installed. The Southern Handle Company moved to Memphis a few years ago and carried all local operatives with it.

Meadville, Pa.—The stockholders of the Uwanta Wrench Company held a meeting at the office of W. S. Smith, recently, it being in the nature of a reorganization after the increase of the capital stock from $10,000 to $25,000. The amount of increase has been all subscribed. Directors were elected as follows: B. L. Singley, T. F. Charlton, J. S. Charlton, J. A. Speitler, E. C. Smith, W. S. McGunnegle, S. L. Hart, W. W. Kincaid, and George D. Trawin.

"Allpine" Painter's Turpentine---

Wherever sold and used in small or large quantities, has taken the paint trade by storm.

Why? Because the **PINENE** in "Allpine"—an unsaturated compound—gives positively the best results in all kinds of painting, changing from a thin liquid to a thicker liquid, and finally to a smooth, resinous, glossy substance.

Any form of petroleum used in 90% of ordinary Turpentine, or its substitutes, does not do this—"Allpine" does.

"Allpine" fulfils every requirement of Pure Turpentine exacted by the Navy Department, the highest standard. Sealed at our own stills. Five gal. cans.

IF you want protection for your business reputation—your paint trade, and are after bigger profits, stock up with the purest and Best Turpentine—"Allpine."

HARDWARE DEALERS' AND MANUFACTURERS' RECORDS

(Concluded).

HARDWARE DEALERS.

Changes.

Taylor, Tex.—Albert Sallstrom of Taylor has purchased the entire stock and business of the Elgin Hardware Company of Elgin, Tex., and with his brother, J. E. Sallstrom of Manor, will assume charge of the business at once.

Tekoa, Wash.—Hillard & Alexander have sold their Hardware business to Henkle & Schulerud.

Valley Falls, Kan.—Getty & Yeager have sold their Hardware store to Hundsley Bros.

Valley, Neb.—L. P. Ryars has purchased the Hardware store of C. Parsons.

Van Buren, Ind.—Judson & Miller have about completed the shelving and are putting in an elevator preparatory to moving their Hardware stock from their present location to the Camblin block, where they will have much better quarters.

Walla Walla, Wash.—Andrews & Lefeaty have purchased the Hardware store of J. E. Fargo & Co.

Waurika, Okla.—Eckles Bros. & Co. have sold their business to the Ford Hardware Co.

Fires.

Argenta, Ark.—The W. H. Ellis Hardware Co., has suffered a loss by fire.

Kansas City, Mo.—Fire has destroyed the building occupied by E. N. Draper & Son Hardware Company, at No. 2610 East Thirty-first Street.

Prescott, Ark—The store of the McDaniel Hardware Company and the immense stock has been destroyed by fire. The origin of the fire is unknown, but there are suspicions of incendiarism. The loss is estimated at about $23,000, while the insurance amounts to only $12,000.

Salt Lake, Utah.—A fire was discovered in the basement of the Hardware store of J. W. Connell at 77 West First South street recently. The fire spread through some combustible material stored in the basement, its origin being unknown, and damaged the floor of the building to the extent of about $100.

St. Louis, Mo.—Fire destroyed $5,775 worth of property in William S. Rengel's Hardware store, 111 Lamey Ferry Road, St. Louis County.

Walker, Mo.—The Hardware store of S. D. Buck, has been damaged by fire.

Waterville, Wash.—W. J. Stanley has sustained a fire loss in his Hardware store.

Waterloo, Iowa.—Fire in the basement of the C. M. Berkley Hardware store resulted in a loss of about $500 to Hardware stock stored therein and damage to the building of between $50 and $100. The fire resulted from an overheated furnace pipe which was situated near the joists of the first floor.

MANUFACTURERS

Changes and Improvements.

Pittsburgh, Pa.—The Graham Nut Co., whose general offices are in this city and works on Neville Island in the Ohio River, has made arrangements to enlarge its plant so as to practically double the output. Two new buildings will be constructed, one 60 by 200 and the other 95 by 100 feet in area, in which will be installed entirely new equipment. Officials of the company said that trade conditions have made this move necessary and the company expects to have the additions in operation by next April.

Reading, Pa.—The Penn Hardware Company, at the foot of Spruce Street, is making additions, which, when completed, will give it a block of buildings and will make the plant one of the largest Hardware manufacturing concerns in the United States. The new structure, which will be used for plating exclusively, except the first floor, which will be a store room, is receiving the finishing touches and will be ready for occupancy by January 1. The building is four stories high, 60 by 100 feet in dimensions. It is modern in every detail.

Reading, Pa.—The Reading Radiator Company, Front Street and Lebanon Valley railroad, is making an extension to its plant. It purchased six buildings on Pear Street, Nos. 418 to 428, on which the extension will be built. The buildings themselves will remain as they are, only the land in the rear being used. The new extension will be 90 by 60 feet in dimensions and will be one story in height. The side of the old foundry is being torn down, to which the new addition will be built. The plant now employs forty-five men, but when the improvements have been completed 25 to 30 additional men will be required.

South Pittsburgh, Tenn.—The H. Wetter Mfg. Co. are now building a big addition to their already large stove foundry. The building will be 58 by 138 feet, and will cost $5,000. The building will be equipped and used for making soil pipe and fittings. It will be located on the east or railroad side of the lower foundry. The other shops of this company will be used exclusively for stove plates.

St. Paul, Minn.—The new works of the Northern Malleable Iron Co., located on the southwest corner of Forest and Wells Streets, will be ready for occupancy by January 1. The main building will be 110 by 900 feet, of concrete and steel construction, the pattern shop and fireproof pattern vault, each of concrete, will be 60 by 80 feet and 20 feet high. The company at present employs 325 men, but after the new plant is completed it will increase its force to about 500. The total cost of the buildings will be approximately $150,000.

Vassar, Mich.—William Hammont, of this place, and Clinton Shoop, of Greenville, have purchased the plant of the Parker Plow Co., which will be fitted up for a first-class foundry and machine shop. It will give employment to a number of mechanics.

Greenfield, Mass.—The Rugg Manufacturing Company seems likely to branch out in the near future. They are negotiating with a factory near Sherbrooke, P. Q., to manufacture their steel-bowed rakes for the Canadian trade. They have Canadian patents on this rake, and to protect this patent, it is necessary to have the rakes for Canadian trade made in Canada. It is possible that later the two firms may combine in some way. Mr. Rugg desires to expand his business, and may sometime build a new factory near the railroad. His old factory is not very suitable for enlargement, and meanwhile he may establish some branches elsewhere or arrange to have his competitors make such of his goods as he cannot make in his present crowded quarters. He has recently ordered 1,000 dozen rakes from a competitor in Vermont.

New Haven, Conn.—The W. S. Burn Manufacturing Co., manufacturers of metal goods, announces that it will retire from business.

Worcester, Mass.—The Norton Grinding Company has begun putting in the foundations for a large addition to its machine shop at Barbers Crossing. The new building will be 264 by 82 feet, two and three stories. It will mean the employment of a large number of additional men and will constitute one of the largest machine tool industries of Worcester. A new brick building is already under construction at the company's shops, at the north end of the main shop, and at right angles to it. It is 40 by 72 feet, and three stories. It will serve as a connecting wing between the present shop and the new shop building, which will be a duplicate of the present great building. It will have a monitor roof with broad galleries surrounding the crane bay on three sides.

New York, N. Y.—The Niles-Bement-Pond Company has made arrangements to purchase the plant of the Ridgway Machine Tool Company of Ridgway, Pa.

Reading, Pa.—Noll & Althouse, manufacturers of the Queen washing machines, are making preparations to occupy their new building on Hudson Street near Green. Nearly all the machinery and shafting has been installed.

Richmond, Ind.—A deal has been completed whereby all the stock in the Border Bolt and Lock Nut Company has been transferred to a syndicate of Cincinnati and Philadelphia capitalists. The plant is to be retained in this city and its capacity greatly increased. The capital stock of the concern, which is $30,000, will also be greatly increased and the company will be placed on a sound business basis. The majority of stock in the old company was owned by George Kemper, George Deuker and Gus Knollenberg. William H. Alford, who was formerly president of the concern, disposed of all his stock some time ago.

Sharon, Pa.—The Penn Shovel Co. of Warren, Ohio, and the Hanna & Young Co. of Poplar Bluffs, Mo., have been consolidated. The parent company will have a capital stock of $350,000 and will build a skelp mill in Warren. A factory for the manufacture of shovel handles will also be built. Aside from rolling enough steel for the present shovel factory, the new company's mill is expected to roll a considerable tonnage for the trade. The Penn Shovel Co. output will be increased 80,000 dozen shovels a year.

Steubenville, Ohio.—The Tin Specialty Works at Follansbee, owned by Follansbee Brothers, of Pittsburgh, have been destroyed by fire. It started in the storage room where the paint and oil were kept. The "bungalow," a frame building near by in which finished specialties were stored, was also burned. The loss is about $28,000, partly insured.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

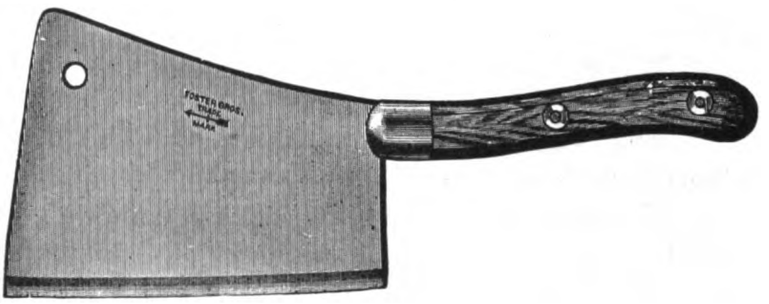
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York.

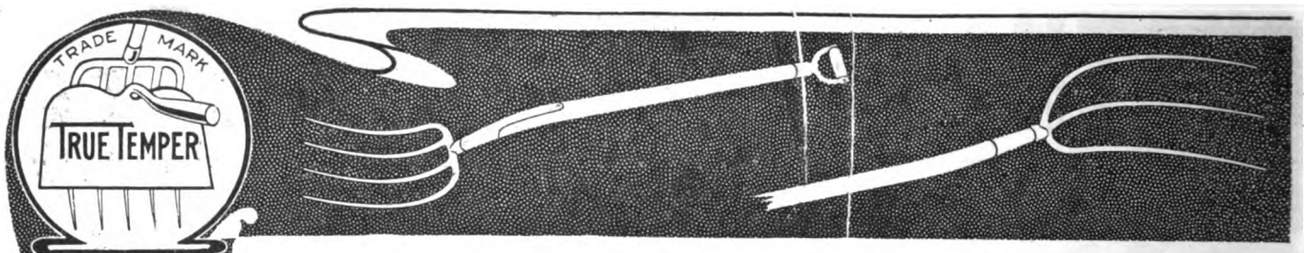
and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

85 to 93 CLIFF STREET and 12 JACOB STREET.

Get Your Share of Profit

Big Advertising Campaign on True Temper Farm and Garden Hand Tools.

Mr. Retail Dealer:—One of the biggest advertising campaigns of the year is being conducted on *True Temper* Hand-Tools.

They are being advertised for the purpose of *helping you to sell them.*

Thousands of dollars are being spent and millions of people are being appealed to.

Every leading farm and garden paper read in your territory is carrying large advertisements of this line.

Not only large advertisements but forceful advertisements—the kind that sells goods.

They deal with the merits of True Temper Forks, Hoes, Rakes, Hand Cultivators, Weeders, Corn Hooks, Sugar Beet Tools—*every Hand Tool the Farmer and the Gardener needs.*

We are making a personal talk to your customers through these advertisements.

And we shall keep everlastingly at it and make *every* one of them thoroughly familiar with True Temper tools.

Moreover, they shall become convinced that there are *no tools so good*—no others so economical.

And they will be asking you for True Temper tools—that's certain.

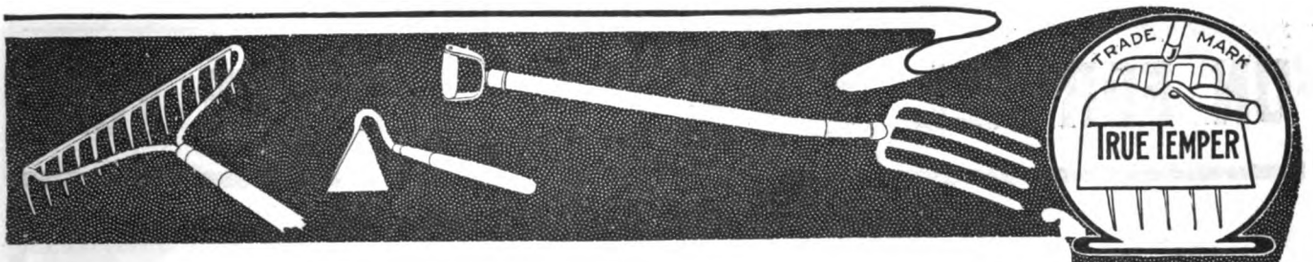
Our advertising campaign is big enough, strong enough and persistent enough to guarantee this.

It means easy sales, more sales, and—

A handsome profit in Steel Goods for you.

Understand, this is not a line of fancy tools at fancy prices.

They are simply the best tools made and sell at the same prices you are accustomed to paying.



If you are now handling one of our first quality brands you need not change your line.

You can procure the True Temper quality of that brand, and thus supply two demands—the old and the new—with the one line of tools.

Here is a great opportunity for you to meet mail order competition on its own ground. The mail order houses try to take your business away from you by advertising. Our big advertising campaign is for the one purpose of sending buyers to you. It doesn't cost you a cent. Will you use it?

Digitized by Google

Your Patrons Will Ask for More Kinds of Tools

Farmers and Gardeners are no longer satisfied to use a few tools for doing all kinds of work

It is now generally realized that *real economy* is in having the proper tool for each kind of work.

Where formerly two or three hand-tools sufficed, they are now buying a dozen—each adapted to its special purpose. With such a supply *more* work and better work can be done, and in the end the cost is less.

Present day scientific and intensive methods of agriculture and the need of less expense and more profit in crop production make them necessary.

All these tools are included in the True Temper line. And our advertising campaign tells all about them. We are creating a bigger demand than ever for the Special Purpose tools.

This means a large increase in your tool trade if you take advantage of it.

IT IS NEW TRADE FOR YOU.

As True Temper Tools are sold only through Dealers, you get the *Direct Results* from this great outlay for advertising.

But *how much* of this new business you will get *depends entirely upon you.*

The Retailer that tells the people — and tells them early and often — that *he* is the *man* to call on for True Temper Tools will reap the harvest.

Of course, you must have a complete line, and often display the tools in your windows and on your floor up in front where your customers can look them over.

And if you are ready to meet the *first* inquiries, you have the best opportunity to get and hold True Temper Tool trade.

You should be familiar with the advantages of the different tools. These are all interestingly related in our attractive, illustrated book "Tools and Their Uses," which we will send you free on request.

OUR FREE SALES AIDS FOR YOU.

When our convincing advertisements in Farm papers have worked the people up to the buying point, the next step is for you to get them into your store.

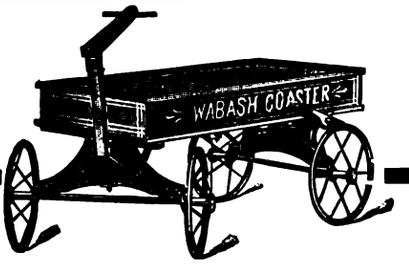
AID No. 1.—You can do this with the *advertisements* we will supply **free,** for you to run in your local papers.

AID No. 2.—And our "Delighted Farmer" Poster, which we will also supply **free,** is another *persistent business getter.*

AID No. 3.—Then there is our book of "Selling Pointers" for clerks that will make them better salesmen and show them how to *increase your sales.*

AID No. 4.—We also have a plan whereby you can supply your customers with free copies of our book "Tools and Their Uses."

Write for these *Free Sales Aids* to-day and let us tell you more about how our True Temper plan indorses your brand of tools and helps you to sell more of them.



Then write your Jobber and ask him to supply you with the True Temper quality of your line. Remember there is no difference in price.

ALL LEADING HARDWARE JOBBERS SELL THEM.

A NEW MONEY MAKING LINE FOR

Mr. Hardware Dealer:—We have a proposition to offer you on which you can build up an excellent trade—one there's good money in.

It isn't one of the worn-out, thread-bare kind, but a new, live, line that will fit in with your regular business just fine.

It's one that pertains to the poultry industry and if you have given any attention to this field you will realize something of its great money making possibilities. Over $1,000,000 is spent every year for incubators, brooders, supplies, etc.

Why not get your share?

Never thought of it, have you? Well, the wide-awake hardware men are going to put in this line of goods and those who "get busy" first will get the best cinch on the trade.

HARDWARE DEALERS

When we say to you there's money in our proposition—that it's no trouble to interest buyers we know it to be a fact.

Over eighteen thousand people interested in them last year alone.

Just drop us a line saying you want full information and we'll tell you how to start a profitable side line there's money in.

Don't pass this by—it's worth hundreds of dollars to you and only costs a 2c stamp to get in touch with this new branch of trade.

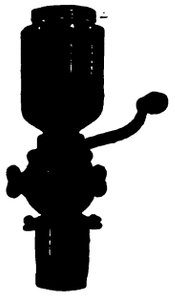
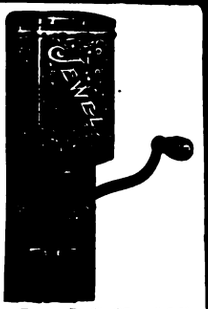
GET BUSY



That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

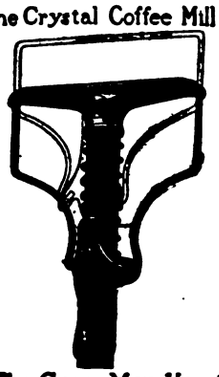
will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.



To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

The Jewel Coffee Mill

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

Eight Space Spice Cabinet

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

TROUT HARDWARE COMPANY.

Trout Hardware Company, 174, 176, 178 Lake Street, Chicago, Ill., are impressing this fact upon their trade: "On builders' Hardware, it will pay the trade well to write us before buying. We are sole Western agents for the most salable jobbing line being marketed to-day and make lowest factory prices. This is a class of goods that runs into money very fast, and when a dealer can save from ten to twenty-five per cent. right through and get the best standard goods, it is certainly worth investigating. In view of the strong upward tendency on nearly everything in the Hardware line, it will be to your interest to write us at once. Get your orders in and be protected. We also carry a most complete line of general Hardware, cutlery, sporting goods, ammunition, baseball goods, etc."

NICHOLSON FILE COMPANY SOUVENIR.

Nicholson File Co., Providence, R. I., commemorate the holiday season in good old-fashioned style. Mounted in good taste is an illustration of two old cronies dressed in the costume of one hundred years ago clasping right hands in a fraternal grip, and their left hand engaged in holding the long-stemmed "church warden" pipes are wishing each other "Health! Happiness! Good Luck! May these be yours through the coming year," while an old-fashioned clock indicates the psychological moment of midnight on December 31.

THE WEAVER HARDWARE COMPANY.

The Weaver Hardware Company, Rochester, N. Y., announce that having recently organized the company above, by April 1, 1907, they plan to occupy the stores Nos. 31, 33 and 35 Main Street, East, with which location their name has been identified since 1866; where they intend to conduct a wholesale and retail business in general Hardware, agricultural tools and implements and house furnishing goods, for which purpose they desire the catalogues of manufacturers of the above lines of goods and request a call, when in that city, of their representatives. They plan to use as temporary warehouse and office after January 1, 1907, the store at No. 1 Aqueduct Street, while awaiting the occupancy of stores as above.

AMERICAN LOGGING TOOL COMPANY.

Surpless, Dunn & Co., 74 and 76 Murray Street, New York, and 68 and 70 South Canal Street, Chicago, Ill., manufacturers' agents, have been appointed selling representatives for all domestic territory, except the Pacific Coast, and for all export territory, of the American Logging Tool Company, Chicago, Ill. It will be remembered that the latter company, the organization of which was reported some weeks ago, handles the output of several of the large manufacturers of these goods, which places Surpless, Dunn & Co. in a position to give the trade assurance of prompt execution of all orders entrusted to them.

WHAT IS "GOOD WILL?"

United States Circuit Court of Appeals Judge E. Henry Lacombe, in a decision, discusses the question of good will in the following language:

"Good will has been defined as 'all that good disposition which customers entertain towards the house or business identified by the particular name or firm, and which may induce them to continue giving their custom to it.' There is nothing marvelous or mysterious about it. When an individual, or a firm, or a corporation, has gone on for an unbroken series of years conducting a particular business, and has been so scrupulous in fulfilling every obligation, so careful of maintaining the standard of the goods dealt in, so absolutely honest and fair in all business dealings, that customers of the concern have become convinced that their experience in the future will be as satisfactory as it has been in the past, while such customers' good report of their own experiences tends continually to bring new customers to the same concern, there has been produced an element of value quite as important as—in some cases, perhaps, far more important than—the plant or machinery with which the business is carried on. That it is property is abundantly settled by authority, and, indeed, is not disputed. That in some cases it may be very valuable property is manifest. The individual who has created it by years of hard work and fair business dealing usually experiences no difficulty in finding men willing to pay him for it, if he be willing to sell it to them."

PROFIT-SHARING CHRISTMAS PRESENT.

Another New York manufacturing institution has joined the profit-sharing movement. The Three In One Oil Company of 141 Broadway, whose factories are located at Rahway, N. J., distributed a healthy sized bunch of Christmas plums to their various employees as Christmas presents; the same being a percentage of the employees' wages for the year. This co-operative sharing of profits is growing every year and ought to cement more closely the mutual interests of worker and employer. Particularly at the holiday season of the year should a profit-sharing plan appeal to the employees, as they not only get a share of their earnings of the Three In One Co., for the past year, but get the money at a time when it can be made to do a lot of useful and pleasure-producing things. The prosperous condition of the G. W. Cole Co., who are the original and sole manufacturers of Three In One Oil, is not at all surprising, as the volume of their business has been increasing wonderfully the past year. In fact it has severely taxed the capacity of their factory at different times. But Mr. Slee, president of the company, has always insisted on being in a position to make prompt and immediate shipments to jobbers no matter where they are located and how large their order for this famous oil may be.

THE RELIANCE EDGE TOOL COMPANY.

The readers of this magazine will be interested in learning that the new plant recently erected by the Reliance Edge Tool Company at Youngstown, Ohio, is now fully equipped for the production of their product. Under the management of C. H. McCarty, this company has been thoroughly organized for the production of the finest grades of Chisels, Gauges and Drawing Knives. The factory plans have been so carefully constructed and all departments equipped with the most modern machinery and appliances as to represent a model institution in this industry. For the marketing of their product, arrangements have been made with Surpless, Dunn & Company of New York and Chicago, who will act as exclusive sales agents. This firm, so well and favorably known among the Hardware trade, affords an Eastern and export office at 74 and 76 Murray Street, New York City, and a Western office at 68 and 70 South Canal Street, Chicago, Ill. An attractive and very useful price-list showing the variety of tools manufactured will be distributed early in January. Officers—E. L. Brown, President; C. H. McCarty, Vice-President and General Manager; G. E. Dudley, Secretary and Treasurer. Directors—E. L. Brown, C. H. McCarty, G. E. Dudley, Robert Bentley and W. A. Beecher.

MORLEY BROS.' MANUFACTURING DEPARTMENT PARTIALLY DESTROYED.

A fire started early in the afternoon of January 2nd in the manufacturing department of Morley Brothers, Saginaw, Mich., located in the Empire Block on Tilden Street. The blaze lasted over four hours. The loss was given by R. C. Morley as $40,000, of which $30,000 is on stock, $5,000 on machinery and $5,000 on the building. The loss is covered by an insurance of $42,500. The stock consisted of lumbering tools and raw material.

◆

Matthan Harbster has been elected president of the Reading Hardware Co., Reading, Pa., to succeed his son John E. Harbster.

◆

Over one thousand hands of the employes of the Gillette Safety Razor Co., New York, were most agreeably surprised when the manager of the company announced that as a special Christmas gift they were to receive Monday off with full pay. The best of feeling has always existed between the management and the employes of the famous safety razor company, and the appropriate gift came both as an expression of existing good will and a desire to gladden the hearts of the men and women who faithfully serve them.

JANUARY 10, 1907

Editorial Trade Review

The year 1906 was noted for its unparalleled demand for goods of every description, the supplying of which was the one aim of the Hardwareman whose efforts to accomplish it were not tinged with the slightest feeling of speculation, but he was abundantly satisfied to accomplish his end could he only make certain that every opportunity of the year could be made a glowing certainty and success crown his every effort.

This was not in every case possible of a perfect achievement; there were too many obstacles to advancement to overcome which the manufacturers as well as dealers found to impede their progress, in addition to a lack of the necessary labor without which the manufacturers could not furnish the extra goods demanded; the greatest want being the necessary raw material, which was essential to its fulfillment. Then a shortage of cars was felt to transport the products either finished or in the shape of material to the waiting customer. The incalculable consumption of goods by our rapidly growing population was one of the reasons why this insistent state of our commercial growth found a natural outlet that made this unparalleled distribution a controlling factor.

The foundation of all this progress and successful achievement in all the coigns of vantage possessed by the Hardware trade especially, was to be found in the teeming crops of the recent years when increased acreage being redeemed from the wilderness, and some thousands of acres made possible by irrigation assisted by the government. Every workman, agricultural as well as mechanical, was employed at good wages to help bring about this state of affairs in which the work of the participant was well paid and contentment generally reigned supreme.

The absence of the speculative impulses so noted in other stages of successful "boom' years of Hardware was due almost entirely to the way the markets of our products were managed and controlled. The manufacturers made every effort to limit and restrain advances on their goods. Instead of taking advantage of every opportunity to make radical changes in the prices of their commodities, and thus start the wheels of speculation, they held down to a few five or ten per cent. advances, those changes in price that seemingly couldn't be avoided. They preferred as wide a distribution as possible and avoided any move that savored of a disposition to encourage buyers to enter up orders for large amounts.

The end of the year is seeing the record made still more manifest for the immediate future, advancing prices on the staple commodities as well as special brands of goods. Mark the assurance felt by so many that for six months of 1907 trade may be regarded as in the safest channels for continued success, and especially as nearly every one will commence the season with a stock abnormally light compared with the quantities wanted to supply the demand the trade requires.

Caution has become the watchword of the dealer and that will prove as a guiding star in the Spring trade approaching. Stocks will be moderately supplied, being held down steadily to a conservative demand at the augmented prices. The fear exists that the quotations next Fall will have to be of a character that will hold in check the immense quantity of goods that will mark the consumption of the country. The confidence engendered by the continued prosperity which surrounds us will not have the effect of making us lose sight of the landmarks of business, and plunge into the mysteries of the future that in six months may put a new aspect on things that this Spring seem so tinged with the appearance of perennial success. The large quantities of goods which are ordered for delivery this Spring will make the movements through every trade channel present the prospects of a season that in bulk of goods and avidity of buyers will bring with it every harbinger of success looked for by a sanguine trade. But what the future holds in store for us with all our increasing facilities for manufacturing, which may fail to make good, and the fear of overproduction which the older heads in the trade know something about advises the element of caution so that in event of light crops this year, the view of taking excellent care of our export trade, can be fostered largely.

The letters from our correspondents which on the average are of greater length than usual, more optimistic and even more philosophical, will repay perusal, portraying the conditions of the various parts of the continent from which they emanate.

The view of the few manufacturers from whom we solicited a few words of importance bearing directly on the conditions under which they were necessitated to form plans for the future, will all be read with a degree of interest that only increases the good judgment and common sense with which they are severally regarded.

A large part of the conservative and sound judgment advising them, that has welded the brightest members of the retail trade of the country into what seems like one harmonious body, will be found to be owing to the large controlling feeling that has organized them in the several State organizations which will hold conventions during the early months of this year. Many wise counsels prevail at all the gatherings, and the papers read and discussed, filled with lessons taught by their individual experiences, will be filled with the precepts of a successful business that gives evidence of the wide-reaching elements of energetic efforts that have made our trade the brainiest in the land.

A TRADE FOR THE CHRISTMAS AFTERMATH.

Right after the recoil occasioned by the strenuous commercial life of the holidays is a good time to talk necessary tools for the coming season. Supplies are not so much in demand then until people get their industrial breath and settle down to business, but when the laborer begins to think about picking up his old kit and going to work for another year is the best time in the world to interest him in a new one.

For this particular purpose the mail order Hardware dealer has not in the past been quite an unmixed evil, although, no doubt, he has attracted a good many customers from the home retailer. A good many men who have been content to get along with the purchase of a single tool as needed, have become interested in the subject to the coveting stage by the skillfully advertised sets of tool offered by these patrons of the press. If the home retailer is then alert to his opportunities, he may by personal effort increase that interest to the purchasing stage.

It pays the retailer to keep close watch of these advertised offers and, during every slack season, as after the holidays, begin an active campaign supplementing the work already done by the advertisers in the magazines. Whenever these mail order advertisements are long continued it is pretty certain that there are trade possibilities. Instead of combating the idea, supplement it to the very best of your ability, not by a combination set of tools exactly like those being advertised, but made up as good business sense and past experience convinces you would be most likely to be locally popular.

It is true that the man who buys one of these sets is usually one who would have purchased several of the articles contained in it in the course of the year anyway. Still you are ahead the articles in the set he would not otherwise have purchased and his sales have all come in a bunch and earlier in the season than would have otherwise been the case. Then there is something especially attractive to the average mind in a collection of articles that is complete in itself and brings with it a convenient place for the keeping of each tool. The carpenter might prefer to choose his own set, piece by piece, as his necessities or breakage renders necessary; the farmer, a professional man, or tinkerer who does not really know what a set of carpenters' tools consists of but wants something that would be available in a variety of pastime work or home repairing, is pleased with the idea of having them ready selected for him and listed together for his purchase at one full swoop. Almost any man would rather buy a house and lot complete than to have afterwards to purchase poultry-house (if he mants one), horse barn, carriage house and every requirement separate. It is the same way in buying tools, but even more so. Sets mean completeness, expert selection, to the average man, and it is especially easy to interest them when he is not just then busy purchasing anything else in particular but is getting his forces together to hurl himself into one more year's campaign.

THE OLD SCORE.

Wipe out old scores with the New Year. Most of them originated in occasions of haste or temper or other indiscretion that does not deserve to be longer perpetuated; anyway they have all served their purpose in the year now closed, so just erase them from your mental ledger.

It is surprising, when we think of it, what tribute business men will pay to hatred, anger, jealousy and spite and other bitter little passions that were never meant to furnish the higher stories of the human intellect; and, when we think of it again, 'tis astonishing how many of these unworthy little passions we ourselves are harboring. Let's carry them all down cellar for this once and see how much more room we have to move about in, with all of this rubbish put away. If we can't quite believe it, we can lay it all up carefully in the moral rust and mold, where we may get it again if we find after trial that we really need it.

If our competitors have taken advantage of us in the past, we may of course decline to enter into associations with them that would only lead to future trouble, not as a spiteful memory of the past, but a safeguard for the future. If a customer whom we have trusted has been faithless to our trust, we need not tempt him in that way again, though we forgive the grudge that we have felt. There is a difference between business precautions based upon what we know of men and personal resentment against them.

Not any of us, if none but a commercial reason prevails, has time and room for all these grudges. Anger, malice, hatred all use up a goodly bit of nerve force that we all need in our own business. What right, then, has our enemy to take this out of its legitimate field? What fools we mortals be who let him.

WHEN TO CLEAN UP.

It's a poor sort of stick who cannot learn something from the experiences of others and there's a big lesson in the meat trust ventilation for every business man; clean up before compelled to by public opinion and save credit. The cleaning up will have to come anyway, so why not do it as a free will offering to public approval rather than an enforced concession to public condemnation.

Clean up the business methods that are a little antiquated or questionable. Don't wait for the irate customer to come along and say that he will never enter the store again until this or that objectionable method has been removed. It costs too much to win irate customers back again.

Clean up the shelf-worn antiquated stock. Get next to modern business demands. There is nothing easier than getting a reputation for never having anything that is wanted unless it is getting one for having things that will not fit into modern life. Don't wait for public pressure to compel the keeping of some much needed line or the substitution for an antiquated one of something that surpasses it in every way. Be the man to create the new demand and thereby gradually win the reputation of keeping the best place in town to go for the very latest improvements in all lines.

Clean up the disordered and dusty window. Replace the confusion with the cleanest stock, the latest attractions, the best thought. Clean up the newspaper advertising, that old battered cut has served its purpose, as a filler, years ago. Get busy now and say something that is fresh, attractive and up-to-date. Clean up the old, fly-specked stationery with its eighteen-hundred date line; then pay a visit to some printing office that has cleaned up also. Come out in a 1907 dress to receive your business visitors and be sure that dress is modeled after present fashions.

Clean up the old accounts. Go over disputed claims with creditors or debtors and once for all determine upon some line of action, then follow up that line until the old account is either wiped out or else put upon a new and indisputable basis. It is surprising how many old sores will begin to heal up soon as this is done. There is much to be lost and nothing gained by letting matters run until some one else throws the case into court to compel settlement. Be ready to meet every business associate a little more than half way and insist on putting things upon a business basis, not necessarily to enforce collection if that is not deemed necessary, but for the purpose of eliminating the worn out and battered up accounts of last century and replacing them with new ones which may be regarded as genuine assets (for some one) instead of heavy junk to clutter up the business.

Clean up the clerks and office force. Don't wait for people to become disgusted with the ignorant, slip-shod or discourteous treatment they receive; take enough personal interest in the customer to regard him as a guest of honor from the moment he enters the store until he leaves it. See that he is given true business hospitality without having to ask for it. It's the man who keeps a little ahead of the demands who makes a success where others fail. Let the clerks understand this and convince them by personal example that they will have to clean up their dusty, musty, cob-webbed brains or else make way for others who have undergone the renovating process.

Clean up the whole establishment, wherever it needs cleaning, before compelled to do so. So long as a man keeps in advance of what his customers have reason to expect, it is an easy matter to escape criticism; so soon as he lets them get ahead, the innovations they will demand are more than he can keep in line. It's the one who keeps ahead that is the master of his business; he who falls behind is the constant slave of all his customers' whims.

A MODERN WILLIAM TELL.

The Hopkins & Allen Arms Co., Norwich, Conn., are distributing to the trade a very taking imitation of a water-color sketch by that clever artist, Fletcher Ransom, which is denominated "A Modern William Tell," and depicts two boys, one of whom has a Hopkins & Allen Rifle which he is aiming at his dog, who sits unconcernedly upon his haunches adorned with a ripe, red apple on his head, in which he is supposed to act the part of the younger Tell according to the well accredited story. The boy with the rifle is created in a very natural pose, to which the dog lends a comic interest. A hat is placed upon a pole near by to serve as Gesler's and complete the story. The sketch is well worthy of a frame in which the single line that gives the title has in addition on the same line, the manufacturer's name and address, only with no advertising.

THE MANUFACTURING OUTLOOK FOR 1907

THE OPTIMISTIC VIEWS OF THE LEADING MANUFACTURERS.

With the wish of knowing how the manufacturers in special lines of goods were enjoying such prosperous conditions on every hand, and whether they thought the future was destined to foster a continuance of such prosperity during the present year, we took the liberty of addressing an invitation to several of them to state their views on the trade they represented, and the sanguine hopes of these busy individuals based on the business of 1906, is given in the following letters:

GOODELL-PRATT CO.

THE SALE OF HIGH GRADE GOODS IN 1906.

On the sale of high-grade tools, we have received the following exceedingly suggestive letter from W. M. Pratt, of the Goodell-Pratt Co., Greenfield, Mass., in which our readers will find many suggestions they can profit by, bearing upon the demands of the future. What Mr. Pratt has to say in regard to a possible shortage in stock in the near future will be read with interest, knowing how scarce skilled labor is, and how difficult of obtainment. This and the inability of obtaining the proper material promptly, are matters that enter into the problems of the future.

Editor HARDWARE:

I wish it were possible for me to reply to your esteemed favor in a manner at all satisfactory to myself. The facts in the case are: We are up against it good and hard, the cost of everything which is consumed in our factory is continually advancing and the goods we are producing, we are selling at exactly the same prices that were in effect two years or more ago.

You ask us why we do it. I will answer you frankly: Because we believe that the purchasing power of the consuming mechanic is already strained; he is earning a large wage, that we will admit, but he has many uses for his earnings; tools he has to have, to be sure, specialties are always looked upon by many mechanics in the nature of a luxury.

We do not believe they are a luxury, we believe they are a necessity, that a mechanic's efficiency is enhanced because of the implements or tools he possesses and knows how to use. On the other hand we should not be guardians of his interest did we not exhaust every endeavor in an effort to increase the purchasing power of his dollar by keeping our prices at the lowest possible notch, consistent if you please with the same high standards of quality we have always maintained; and while we are still hoping that it will be possible for us to pull through these strenuous times without advancing our selling prices, the narrow margin between the need and the absolute necessity may soon be wiped away.

Unless all signs fail, the new year, which is about to be ushered in, will show the largest volume of business in manufactured goods that was ever known, and those thoughtful and far-seeing members of the Hardware fraternity who have in their wisdom anticipated their requirements and fortified themselves against serious shortages that are bound to exist as the season progresses, will have many opportunities to congratulate themselves, for they will have builded better than they knew.

Can there be such a thing as too much prosperity? We are inclined at times to think so; under ordinary conditions the demand for labor-saving devices will naturally increase as their field of usefulness widens, and an understanding of their capabilities becomes more general. We can naturally expect a continued increase in the demand for mechanical tools and specialties, because this is truly a mechanical age and they are required not only in the development of our own country but among other civilized nations as well; this alone would suffice to keep us fully employed, but added to it is an unprecedented demand and a scarcity of material that makes it very nearly impossible to supply the requirements of our customers with even reasonable promptness.

We can only add that we are making every effort to take care of our customers, and shall continue to do so. The large increase which we made in 1905 has helped us during the present year, unfortunately the changes and improvements which we have now under contemplation will avail little during the coming year, and it is difficult for us to see how we can increase our production for next year; and if we could increase our productive capacity, we doubt our ability to get material, and there you are.

W. M. PRATT.

THE H. D. SMITH & CO.

The views of Louis H. Schmitt, of The H. D. Smith & Co., Plantsville, Conn., are optimistic as to the future in an eminent degree. He speaks in high terms of the policy pursued during the year by the leading producers of material in giving such careful control to their manufactured product that the speculative feeling was kept in the background, and few changes were necessary of the "boom" kind to mar the prosperity of the trade or keep the trade guessing as to the future.

Editor HARDWARE:

The situation with us on tools, especially our "Perfect Handle" tools, is excellent; our trade on the same has nearly doubled in the past year. With the present splendid conditions it is not very difficult to sell high grade goods, especially if their value is easily discernible to the consumer.

We continually offer up thanks for the two great elements of prosperity that conduce to our welfare, and by the same token the welfare of the whole country, namely, good crops and the sensible, well managed, thinking for the future, large corporations, that to a certain extent control the price of the raw and semi-raw material that enters into the manufacture of our goods.

It speaks well for the longevity of the country's present prosperity, that it is so politician proof; it speaks well for the people of our country that they set up their images not to be worshipped.

Wishing you the compliments of the season and all prosperity and contentment, I am,

LOUIS H. SCHMITT, *Sec'y.*

CRONK & CARRIER MFG. CO.

The Cronk & Carrier Mfg. Co., Elmira, N. Y., in the letter which follows, believe our trade prosperity is long and well sustained from our constantly increasing immigration, which by that means alone adds one million souls yearly to our steady overflow. This, combined with our crops, which are of record character, is to be held responsible for our great prosperity, and will cause "the year 1907 to be the most prosperous year this country has ever seen."

Editor HARDWARE:

We have been asked repeatedly how long these prosperous times would continue. This is a difficult question to answer. To us it appears that the present phenomenal business is not a boom, but is the actual increased growth of our country which is causing a demand for goods far beyond anything we ever had. When we take into account the fact that there are over 1,000,000 people landing in this country each year, and even if they are most of them poor, they are obliged to have something to eat, wear and work with, we certainly can see no reason for any let-up in the present prosperous times for the whole of 1907, unless the next year's crops should prove a failure. Of course, with the failure of crops there would be some dropping off in business the last half of the year. We cannot find that dealers are speculating by putting in a stock large enough to last a year or two, the demand for goods being for actual needs, and as the prosperous times appear to have struck all parts of the United States, it is not likely that there will be any general failure of crops throughout the entire United States to affect the whole country. We, therefore, believe that we are safe in expecting the year 1907 to be the most prosperous year this country has ever seen. 1906 we thought was a wonderful year, but present indications, with us at least, lead us to look for better things the coming year.

THE CRONK & CARRIER MFG. CO.

THE CONTINENTAL COMPANY.

From W. B. Phillips, president of the A. J. Phillips Co., we have received a review of the screen door and window screen industry, which covers the whole field. He refers to several reforms in the trade that will advance the dealers' interests and enable them to obtain a better supply more promptly.

Editor HARDWADE:

Replying to your recent favor asking for a statement in regard to the present condition of the Screen Door and Window

Digitized by Google

Screen industry, we are pleased to say that the outlook is quite satisfactory. Last season we sold our product to the Continental Co. of Detroit, and that company is handling our product this year. Notwithstanding the extreme advance in the cost of wire cloth, the Continental Co. thought best to refrain from advancing its prices. This seems to have met with the approval of the trade generally, especially so as this was done in the face of advances on all kinds of goods, as well as a universal shortage of goods from manufacturers.

There seems to be an idea abroad that wire cloth will be advanced again soon, and that in consequence manufacturers of Screen Doors and Window Screens will have to advance their prices, therefore specifications from jobbers are coming in in immense quantities. The chances are that there will be some shortage in the supply of Screen Doors and Window Screens for early shipment, but the Continental Co., no doubt, will be able to supply the trade comfortably as the goods are actually needed by the consumers. The different manufacturers that supply the Continental Co. are making their lines more uniform, thus making it impossible to ship one line from any of the factories, and making the entire product of all the factories available in case any factory should be oversold. In view of the fact that the Continental Co. factories represent a normal capacity of 18 big furniture carloads per day, it is expected that the service will be satisfactory notwithstanding the increased demand.

There was some prospect that there would be several new Screen factories the coming season, but most of these apparently have failed to materialize, no doubt because at the present prices there is no inducement for intelligent business people to go into the business. Aside from this, it is now coming to be quite well understood that buyers hesitate to leave a *certain* source of supply and an established standard of quality, for an *uncertain* source of supply and the inferior product of a factory during its experimental years. It is very well recognized, indeed, in the Screen industry that goods which are not standard must be sold for a good deal less than the prices of standard goods. Stocks of Screen Doors and Window Screens are apparently well cleaned out and there should be an increased and satisfactory business the coming season.

THE A. J. PHILLIPS CO.

THE OLIVER IRON AND STEEL CO.

We have received from H. B. Lupton, vice-president of the Oliver Iron and Steel Co., the following letter in which he refers to the present prosperity in his especial line, in a manner as characteristic as philosophical.

Editor HARDWARE:

We note in yours of recent date that you want a few lines from us, showing the high-grade hopes of the iron and steel industry.

A correspondent from one of the trade journals has referred to the possibility of the present prosperity getting "over-ripe." We think we understand just what our friend meant, but, when demand is in excess of production, and the buyers paying above the market prices for prompt delivery of material, it establishes new market prices and makes the sellers very independent. When we consider that the Western farmer a few years ago was loaded down with debt, and his account with his store-keeper only settled once a year, and that the change in conditions caused by abundant crops has put this farmer out of debt, and, to an extent, made him a capitalist, we can better appreciate the wonderful change in economic conditions throughout the entire country. The great consumer of iron and steel product, in fact, it is estimated that the consumer of 40 per cent of steel and iron made, is the railroad interests. They are now securing full rates for their freight and reasonably fair rates for passenger traffic, and, with passes and rebates entirely eliminated, it makes them free buyers of all their commodity. They are laying heavier rails, building stronger bridges and heavier cars than ever before, and, there really is not enough freight cars to-day to handle the immense traffic of the country. When a change comes in railroad earnings and they curtail their purchases, then will be the time for us to consider new conditions in iron and steel, but, as far as we can hear, that will not occur during 1907. Of course, if there should be a serious failure of crops next summer, it would, to an extent, affect business; that is, the farmer would curtail his living expenses and the railroads would not have so much material to haul. Our business extends to all sections of the country, and from every section comes but the one report, that business was never better.

OLIVER IRON & STEEL COMPANY,
HENRY B. LUPTON.
Vice President.

FIREARMS—PRESENT AND FUTURE.

From a prominent manufacturer of Firearms we have received the following letter:

The year just past has taxed to the utmost the capacity of all the leading firearms factories, and many have been three and four months behind their orders since the season opened, and the prospect for even an increased trade for 1907 is apparent to all. Nearly all makers of popular goods are preparing for this increased demand, so there will probably be less back ordering in 1907 than there was in 1906.

American-made firearms have practically driven foreign makes out of this market, but if Congress decides to "doctor" the tariff and reduce the duty, it would cripple this growing industry, and free trade would reduce the home output by at least one-half.

Wise (?) State legislation has had much to do with reducing the sale of firearms in many States, and I doubt if the public realize how many bills are introduced in many State legislatures that the originator expects will be bought off, and firearms bills especially are attractive for the "leeches."

Some of the jobbers are feeling very bad, because manufacturers allow their wares to be used for premium purposes, and firearms are as attractive as anything in the Hardware line, but the jobbers who are "howling" the loudest have been in the past the most persistent in selling *all classes* of premium concerns, and are even now so doing "on the quiet."

As the jobbers supply by far the greater amount of Hardware for premium purposes, it is absurd for them to criticise others for doing the same as they do. I am safe in stating two-thirds of the jobbers are *ready to-day* to sell goods for premium purposes in one way or another, and some are cutting prices to get this business. This I know.

When jobbers resolve against manufacturers selling their goods to be used as premiums, and are themselves getting the lion's share of this business, they hurt themselves, for by preaching sophistry they are shown up in their true light.

Firearms manufacturers are enjoying their share of prosperity with no cloud in the horizon, but are not able to advance their prices as do makers of other goods, and gun goods taken as a whole are sold very low indeed.

Single gun makers have at last seen the folly of selling at a loss, and have made a slight advance, but only about a quarter of what it should have been, but if this proves a wise move as I believe it will, there will be "more to follow."

All in all, the present and prospective condition of the firearms market for manufacturer, jobber and retailer, was never in as healthy a condition as it is to-day. We do not expect to reach Utopia—always expect petty annoyances, for it spurs us on to greater activity, but we can never hope for better conditions all along the line than they are to-day. C. F. M.

THE STANDARD CHAIN COMPANY.

From John C. Schmidt, president of the Standard Chain Company, we have received a letter which shows the healthy condition of the Chain industry throughout, under present circumstances. The manufacturers evidently have very encouraging orders on their books for several months ahead, and the conservative manner in which this industry has been handled in 1906 should insure a steady demand for their production during 1907, provided the necessary raw material is forthcoming.

Editor HARDWARE:

Replying to your esteemed inquiry in regard to the prospects in the chain industry during the year 1907, would say that we are now, as the year is going out, with order books crowded, having an insistent and persistent demand for more goods. It has been said that many laws can be changed and circumvented except the law of supply and demand, and it is this rigorous law which affects the market now. It is well nigh impossible to get a sufficient supply of raw material and the troubles of the manufacturer are still further aggravated by the car shortage which is being experienced throughout the entire country. All of these things have their effect upon the business for 1907.

All manufacturers are starting out with overcrowded order books and with absolutely no stocks of finished material and but little stock of raw material. Judging by the persistent demands of the jobbers, their stocks also are depleted to an extraordinary extent. During 1907 therefore when the dull season comes on next summer, it will require this time to make up normal stocks, and consequently I look for a good demand throughout the entire year.

We have been blessed with magnificent crops for a succession of years and the purchasing power of the entire community is thereby greatly increased. This is noticeable in the specifica-

Digitized by Google

tions of dealers for an increased proportion of higher grades of chain as they recognize the additional purchasing power and the ultimate economy by reason of their use.

The necessary extensions required of the railroads to handle the traffic offered promises to keep up a strong demand from that great source throughout the year.

When one considers the increased cost of raw material, labor, fuel and all supplies, prices in the chain industry have been remarkably conservative and relatively cheap, and this promises to be the case during the coming year.

JOHN C. SCHMIDT, Pres.

THE L. S. STARRETT CO.

From the L. S. Starrett Co., Athol, Mass., we have received the following, showing how a series of improvements are contemplated in order to keep abreast of their trade:

Editor HARDWARE:

We have your favor of the 3rd, asking for a few lines in regard to the business situation from our point of view. We beg leave to state that the volume of our business has been steadily increasing, and in fact, it has increased more rapidly than we have been able to keep up with. We are consequently behind on a number of lines, the shortage being due in some measure to the delay in getting material with which to make goods. The increase in facilities which we are trying to make is badly retarded by the long time it takes to get anything in the machinery line. We have an addition to our factory 288 feet long, just roofed over, which will be completed within a few weeks, and if we can get machinery, material and employees, we hope to be able soon to fill our orders with the promptness which our friends in the trade have a right to expect, and which we are very anxious to give them. In addition to the slow deliveries on material and machinery, we find it hard work to get as many employees of the kind we require, as we would like to. We feel very grateful to our friends, the dealers, for their great loyalty to our tools and for their forbearance in putting up with unavoidable delays in getting some of the goods ordered of us.

The present prosperity seems to extend in every direction and through every industry that we come in contact with. We hope it will not increase to such an extent that everybody will want everybody else to work for him. We wish HARDWARE a very prosperous New Year, and beg leave to remain,

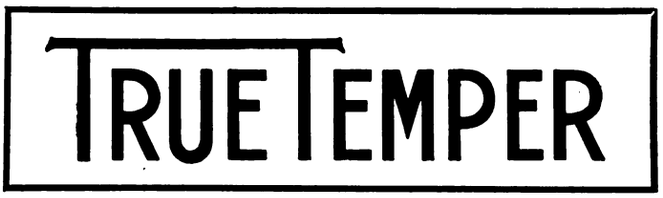
THE L. S. STARRETT CO.

L. & I. J. WHITE COMPANY.

From the L. & I. J. White Co., the veteran tool manufacturers, we have received the following, who speak very optimistically regarding the immediate future:

Editor HARDWARE:

We are pleased to state that the year just closed has been one of unusual activity and prosperity in nearly all lines of business, and we believe that the year 1907 bids fair to even surpass that of 1906. There is a constant growing demand for high-class grade of goods in nearly all lines, as many jobbers are finding it to their advantage to cut out the cheaper class of goods, as far as possible, and handle only the better quality. The greatest trouble with manufacturers is in being able to keep a supply of raw material on hand for their use, and to get their orders out promptly. Many of them are very much behind in making shipments, owing to the large number of orders which have been received. Many of these orders come unsolicited, except on the reputation already established. Unless something unforeseen occurs we believe that the year 1907 will capture the banner for all successful years.



THE L. & I. J. WHITE CO.,
JOHN G. H. MARVIN, *Pres. and Treas.*

A NEW TRADE MARK.

Rarely do we see a trade-mark in which is combined artistic design, peculiar appropriateness, commercial value and attractiveness to such a high degree as is demonstrated by the new "True Temper" name and trade-mark of the American Fork & Hoe Company, Cleveland, Ohio. It represents the new standard of tool production recently adopted by this concern, and in accordance with which its first quality brands are now manufactured. In addition to the labels used by the various American Fork & Hoe Company factories, this new brand will be placed on tools which meet with the requirements of the standard it represents. It endorses the first quality brands, and stamps them as the best that are produced.

The process by which this new trade-mark was devised is interesting. An appropriate name was sought in order that it might be the more easily associated with the goods it represented; an euphonious name that had an agreeable ring to it, and which the tongue could nicely handle was desired. After much study, the name "True Temper" was accepted, because it complies with those two requirements, and also expresses two highly important features of a good tool; which must be true in quality, construction and temper.

By the observer, "True Temper" is directly and instantly associated with steel goods, and therefore is easily remembered.

In devising the trade-mark design, appropriateness was also of prime importance, and how well the American Fork & Hoe Company succeeded in their efforts is plainly demonstrated by a mere glance at the illustration which accompanies this article. The fork and hoe not only herald the nature of the business, and inform the observer what are the products, but in this case embodies a suggestion of the name of the manufacturers.

DEATH OF ANDREW CORBIN.

Andrew Corbin, brother of Philip Corbin, president of the American Hardware Corporation, and one of the brothers who builded the magnificent industry of the house of P. & F. Corbin, died January 4 at Dr. E. L. Styles's sanitarium on Court Street, New Britain, Conn. Mr. Corbin had been in ill health for three years and a half. The strain of his large responsibilities at the concern finally proved too strong for him, and he had to give up, greatly to the sorrow of his fellow factory managers, who recognized his signal ability and whose winning and affable manner had endeared him to their hearts from years of close fellowship. By none was it felt more keenly than by his brother, Philip, as the two had the most kindly feeling for each other. Mr. Corbin had to be placed in a sanitarium owing to his unfortunate condition. He had been at Dr. Styles's sanitarium since December 15, 1903. He has had constant attendance under the care of a trained nurse and sometimes two or more attendants.

In 1858, Andrew Corbin became identified with the company, and he took an active part in the conduct of its affairs up to the time of his illness. In 1860 Frank Corbin, one of the founders, gave up his connection with the company to embark in the plumbers' supply business and Andrew went to New York to take charge of the store. Mr. Corbin remained in New York until 1872, when he came back to the factory to become general manager, a post he held throughout the remainder of his active business life.

He was a man of rare mechanical ability with a quick, accurate judgment of the relative value of the process of manufacture and the Corbin faculty of planning upon broad lines for future needs. It would be difficult to overstate the influence he exerted upon the business. He and his brother Philip, working and planning together, made the factory what it is to-day, as homogeneous and convenient as though planned and built as a whole instead of being erected piecemeal and at intervals of years between building.

With his return from New York, a new and more vigorous spirit seemed to animate the concern. It was at about this time that local competitors came to look upon the business as a permanent one and ceased to oppose it except in the market, and the last superficial aspect of anything like a life and death struggle for existence and local recognition disappeared. Andrew Corbin managed the production with the late John M. Spring, the superintendent, to carry out the details. Quiet and unassuring to the verge of self effacement, the quickening and masterful impulse of Andrew Corbin's factory management has been felt and seen, but never exploited, and will continue to do so, as long as the present line is made in the building now occupied. Andrew's place in New York was left to the youngest brother, George S. Corbin.

Mr. Corbin married Mary Moore November 8, 1854. His wife died a year ago last September. He leaves a daughter, Mrs. Charles E. Wetmore, two brothers, Philip Corbin, president of the American Hardware Corporation, and E. Albert Corbin of Philadelphia, and two sisters, the Misses Lois and Ann Corbin of West Hartford. He is also survived by the following nephews and nieces: George W. Corbin, president of the Cabinet Lock Company; Albert E. Corbin, vice-president of the Union Works; William H. Corbin, a foreman at the Corbin plant; Miss Dell Corbin, Frank E. Corbin of Santa Barbara, Cal.; Willis P. Corbin, manager of H. H. Corbin & Son; Mrs. Mary Rogers of Meriden, Charles Corbin of Martha's Vineyard, Mrs. Clara Corbin Wilson, Albert Corbin of Philadelphia, and Arthur Corbin of Springfield.

WITH OUR CORRESPONDENTS

THE PHILADELPHIA TRADE.

In pondering over the past year of 1906, we Philadelphians, as well as the country at large, have a great deal for which to be thankful. There has not been a time in recent years when the demand for manufactured articles of all kinds has been as heavy, and the words "Record Breaker" will be allied with it by many. As far as our individual business is concerned, it has been one of the largest in its history.

Everyone has been compelled to devote a greater number of hours each day in the effort to keep apace with the business offered them. Factories in many places have been running night and day in order to supply material by the time it was needed, but in spite of all the extra amount of energy applied, it has been impossible to secure deliveries when desired unless specified for months in advance, and even then only after a series of urging letters have been written. The great beauty of all this, as far as the welfare of the business of the country is concerned, is that until within the last month or so, the orders in the hands of the factories were for immediate requirements. Of course, since that time, owing to advances all along the line, especially noticeable in anything in which cooper, brass and wood played important parts, there has no doubt been some speculative buying, and it is altogether likely manufacturers to-day have a great deal of business covering their customers' needs for the early part of this year, although quite a number of the larger ones, with whom we have come in contact recently, claim to have com-

D. H. REDDIE.

paratively little business of this order in proportion to that on which immediate shipment is requested. This goes to show that the demand continues without any sign of abatement, and if one looks around and takes into consideration the enormous enterprises in process of construction, they cannot help but be imbued with the fact that prosperity reigns supreme at the present time.

Now, as far as Hardware prospects for the year 1907 are concerned, we are exceedingly hopeful, and have laid our plans for a large volume in the Spring months.

We find, upon going over replies received from a letter written the leading manufacturers of Hardware and similar lines with whom we have dealings, that the general consensus of opinion is that a volume equal, if not greater than that of 1906, is practically assured for the first half of the year, and if crops are as bounteous this year as last, there is no reason why there should be any falling off, unless there should be trouble in the financial situation.

Everyone in the business world to-day is traveling at a rapid pace—competition is very keen, and it is only the alert who can expect to win. But as to how long this can last, no one can definitely foretell—if they could, their fortunes would be made.

In an article published in a recent issue of the Philadelphia *Press* entitled "America Triumphant," in which the natural wonders and artificial triumphs of this country were enumerated, it was stated "that in the United States the most gigantic commercial enterprises are undertaken, the greatest fortunes accumulated and the biggest deals in every line of business made; also that this country produces a greater quantity of raw material than any other." With these facts before us, the question arises as to what is the best method to control this condition for the good of all—we cannot stand still, each one naturally looks at their own business—scans existing evils and tries to devise some plan for their elimination, and in doing so, one thing comes to the writer's mind and that is the "Direct Shipment" business, or in other words, the shipping of merchandise direct from the mill to the jobbers' customers. This has grown considerably of late years, and the jobber has been forced to it on account of having to make freight allowances. How much better it would be for all concerned if this policy could be abolished. Let the jobber who has the ability to buy and store large quantities of goods distribute them to his trade direct from his stock, and not be compelled to ship from the factory, often to points within a few miles of his own city, simply because it is necessary to make a freight allowance.

We are sure this will appeal to many of the leading manufacturers who are now asked to handle business of this kind, and some of them seem to be working toward this end by charging an extra 2½ or 5 per cent. on such business. The retail dealer would also be benefited, as he would be enabled to secure much more prompt deliveries.

We wish the readers of HARDWARE as prosperous a New Year as everyone seems to predict.

BIDDLE HARDWARE CO.
D. H. Reddie.

THE CLEVELAND TRADE.

There has been a marked improvement in business methods the past year, much of which is due to organization among manufacturers, jobbers and retailers. The rights of each are considered by the others. Competition that has no regard or consideration for its effect upon business, is less rife. Manufacturers are more carefully considering the effects of their selling

HON. C. B. LOCKWOOD.

plans on the trade. Jobbers were never more anxious to profitably serve their customers and there is a greatly increased interest and effort among retailers to make themselves useful to their customers, and among their customers pride in local prosperity is increasing. There is no doubt that organization among retailers has improved their business and increased their ability

Digitized by Google

to serve the community. They have better stocks and up-to-date service. They have learned that poor goods at low prices are not wanted. Cheap racket stores are not popular. The people have money to pay and want the best goods the country affords. Not the cheapest but the best wins as never before. Buying Christmas presents this season has emphasized this fact. Cheap trash is left over, even in toys. Are they durable and will they work, has been the question more than the price. The tools a man buys, the clothes he wears, the kitchen utensils he furnishes and what his family wears, gauges his citizenship. It is a great gain to be freed from the waste that the desire for cheapness has cost. It has been the stock in trade that has built up the catalog houses. We are not yet done in eliminating all faults. There are some things that need correcting.

The manufacturer who makes an extra discount to one house because the order is for a large quantity is creating a competition in his own price. The extra discount is likely to become general. In trying to get the friendship of one house he does an injustice to all his other customers. This is one of the most potent elements of demoralization. It is aiding in building up one customer at the expense of all the others, and it makes unfair competition. Price fixed on quantity tends to over-purchasing to reach the larger quantity, and then unloading the surplus at a cut price in a competitor's territory. The manufacturer who makes his prices giving himself a fair profit and sells his goods through legitimate channels, giving his customers an even chance for business, is doing as he would like to be done by, and that old rule commands respect. Rebating is becoming unpopular. The old year leaves us on the topmost wave of prosperity. 1907 will find a luxurious welcome. Our house is swept and garnished. If the manly moral and ethical spirit keeps pace with material prosperity we shall be a great nation. Edward Everett Hale has recently said: "We are finding out that we can *if we wish to* be partakers of the Divine Nature." With big crops, big banks, big corporations, big exports, we need big men, and this is the way they can be furnished. Indifference along these lines is our present danger. Mistakes of over-enthusiasm for right we can overlook. Plotting for deviltry is the danger. Light being let into dark places is essential in housecleaning. Conviction and punishment of men in high places strengthens respect for government, and kindles patriotism. It is the undiscovered official corruption that disgraces. Uprightness exalteth a nation. Activity in uncovering rascality encourages integrity.

Experience has shown that competition uncontrolled by law is the death of itself, as it ends in monopoly. A large accumulation of wealth in the hands of a few, makes it necessary to protect business by restraining competition, which under other conditions has been regarded as the life of trade. To prevent wealth from effacing manhood is a legitimate government function, because the rights of men are more sacred than the rights of property. In a government of the people we must make, if necessary, a new precedent, making competition where it tends to monopoly illegal, modifying it by the moral law. Capital must be content with a fair deal and must not encroach on the rights of others. Habit has so confirmed the right to do with one's own as he chooses, that it will require the aid of law to enforce the new principle. The rich need it, to protect their capital, and the poor need it to protect their rights. Associations in business have done much to prepare the way for such a reform. It needed a brave leader to suggest it in the face of custom that had obtained such universal usage, that it was regarded as a private right, to do as one chose with his own, but civilization is steadily improving in ethical principles. This is what civilization means and it has gone a long way, but has not yet reached perfection.

THE LOCKWOOD-TAYLOR HARDWARE CO.

C. B. LOCKWOOD, *President.*

THE PITTSBURGH TRADE.

Another year completed and a new year begun. There is a good deal of tameness in these years but enough of variety to make each an interesting study, both in forecast and retrospect. The past year made a record in the amount of business done, exceeding the high mark set in 1902. Manufacturers have been pushed to their extreme capacity and merchants have had difficulty in getting enough goods to supply the demand. Singular as it may seem, much of this business has been done by the wholesaler at little or no profit, while their force was pushed to the utmost to keep up with orders; the salesmen were permitted to take orders for many staple items below the average cost of doing business. This habit of making leaders of certain items has become so ingrained into the jobbing trade that it will be hard to change, yet there is no real necessity for it. The writer remembers when the retail merchant came in to buy and made the tour of the various houses, asking the price of axes. The house giving the lowest price on axes got his entire order without further question. He did not know the value of any other goods. At present, however, the retailer knows prices all through the line, and requires each and every item to be made right in price. This being the case the excuse for leaders is done away with and a fair average profit should be asked on all goods handled. Manufacturers are beginning to realize that while the jobber must handle staple goods, even if sold without profit. Yet he takes no interest in the sale of such goods, will not push them and only sells them because he must. Some have succeeded in getting their goods out of the class of leaders with the result of increasing sales and making the relations of manufacturers and jobbers more agreeable.

Prices advanced very considerably during the latter half of 1906. The advance is based upon the increased price of iron, lumber, cotton and copper, in the raw material, and also upon the increase in labor cost. Back of these is of course the heavy demand, and back of this the general prosperity of the country caused by continued years of large crops. There has never been a term of better times in this country than we are experi-

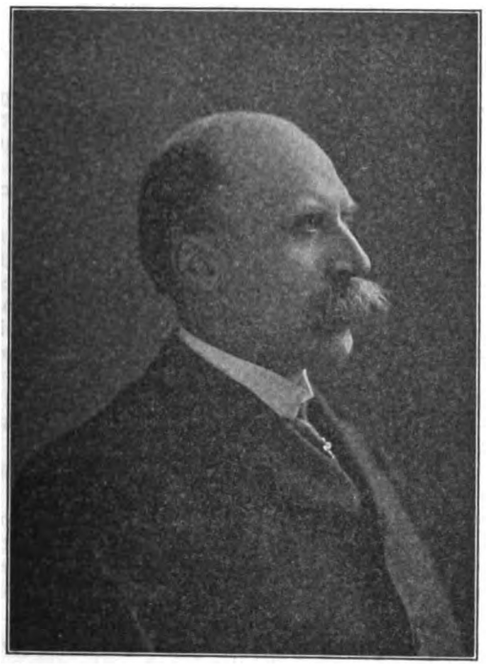
GEORGE B. LOGAN.

encing at present, and so far as we can see 1907 will be the equal or better than 1906. There has been greater steadiness to prices since the advent of the large corporation. Ten years ago such a demand as we now have for iron and steel would have sent values sky high for six months or a year, to be followed by a big drop, when the profit of the previous year would be swallowed up. As things are now managed by the great concerns prices are advanced slowly, even under a heavy demand, and recede in the same way. This makes it better for those carrying stocks, giving time to adjust to the changed conditions.

As intimated above the general expectation is for a big business in 1907. Orders for the output of the mills and furnaces have been placed, running well through the year at present prices. Railroads and other large consumers have confidence that they will need large supplies and must enter orders now to make sure of getting them. Car companies have orders that will keep them busy all year. Of course, a failure of crops would cause a halt, but this would not be felt until the latter part of the year, and in a country with such diversified crops and climate there is not much probability of entire failure.

As to the future of the jobbing trade as such, compared with other methods of distribution, we believe the jobber will stay. It would be interesting to know the statistics of the past ten or fifteen years in this distribution. Probably it would show a greater increase by other methods, but as these started from nothing, this is natural. The second or third decade of competition will give a better idea of the staying qualities of each. A parcels post law would be a sad blow to both wholesale and retail merchant. If Uncle Sam carries goods from manufacturer

Digitized by Google



to consumer at one-tenth of the cost for such service, merchants would be at great disadvantage and might have to go out of business. We hardly believe our legislators are ready to go to such lengths as to revolutionize business and slap in the face so large a class of good citizens.

Retail merchants will do well to get in orders for Spring goods early. We know of a shortage in some items and that jobbers have not been able to secure their full stocks.

LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

Another year is added to the past, and opportunities are gone so far as 1906 is concerned. We may realize where we made mistakes and, like Happy Hank, know better the next time. If we do, there is a chance to make good where we failed in 1906. The past year has been the most trying and worrying year in my entire business experience. It has also been the biggest year in our history for business. Had it been possible to get goods promptly a very much larger volume of business would have been done. When it takes three to six months to get goods and then have them come in dray loads instead of car loads as

J. H. SMITH.

ordered, it is discouraging; and every jobber knows that was the history of 1906. Managers took orders for delivery in August that were not filled complete until in November. Slow deliveries made extra clerical work on account of constant explanations to your customers' inquiries about shipments. It was wearing on your nerves and Christianity.

The continual and varied advances have made irregular prices among jobbers. Some with good contracts on certain articles have not added the full advance. One jobber may think he is long on one article, while another jobber is long on a different article and so on through the line. The result is uneven prices, and the retailer is enabled to buy many goods for less than the jobber can replace them. I have in mind an article that we paid $675.00 more for one car for 1907 than we bought the same article and same make for in 1906. Were we to buy it to-day, it would cost us $1050.00 more than in 1906; and we are booking orders at $10.00 per ton less than we could replace the goods for, and strange to say we have had to meet a price of $5.00 per ton lower than orders were booked at, which means $15.00 per ton less than the goods can be replaced for. Some jobbers get an idea that they are the only one that is covered at a low price. They had better "wake up," the other fellow has not been sleeping. The only safe and correct way to sell goods is to keep with the market. If an article advances 5 per cent., add the advance. If it declines 5 per cent, reduce your selling price. No reasonable buyer expects to buy goods below market price. The market must be based on the producer's price, not on some jobber's price. If corn is morth 50 cents to-day, you would class a farmer as a fool if he should sell it for 48 cents. The rule is just as applicable to merchants. Prices are not always going to be on the up grade. Figure what an average decline of 5 per cent would lose you on your stock. It would mean any place from ten to twenty five thousand dollars to any large jobber, and that might be repeated more than once in a single year.

We start out this year with more goods sold for Spring delivery than ever before, and we congratulate our customers on having many goods bought at a less price than they could now buy them for. If retailers are up to date, they should make good money this year. They can play safer than the jobber, when goods are high, as they can replenish their stock the same day they order or within one or two days. The jobber must anticipate his wants months before the goods are actually needed. While an advancing market is desired on goods that our judgment leads to believe are too low, I confess that I am getting tired of advances. Our salesmen have to sit up nights making changes, and strange to say, salesmen as a rule are better pleased with a decline than an advance if he can beat the other fellow to it. If an article advances, the change is made reluctantly: but if a decline, they seem happy. They seem to forget that it is much easier to sell goods on an advancing market than on a declining market. When goods advance, it means there is a brisk demand. It means that everybody is making money and everybody has money to spend for what they need and a good many things they don't need.

The outlook for this year is certainly bright. If we get another year of good crops, it will be a record breaker for business. Wise legislation will help materially. If some of our representatives in Congress would devote more time to the things the country needs instead of squandering time on such things as the Brownsville episode, they would serve the country more profitably. A wise and conservative re-adjustment of the tariff and some reciprocal treaties would be more profitable. There is entirely too much spite work injected in legislative matters that should be beneath the dignity of a representative in Congress. Valuable time is wasted investigating why a woman was put out of the White House or on some other matters of as little importance. It is too bad members of Congress are not satisfied with their salaries. The country would be better off if about 50 per cent. of them were left at home. There is no danger of the office-seeking crop being short. If we were as sure of a good wheat and corn crop, we could well feel happy.

I am waiting for the Parcels Post bill to pass so I can send a dog to Denver. It would now cost about $5.00, but by Parcels Post it would only cost 20 cents. When that bill passes, everybody will have to go out of the transportation business but Uncle Sam, and Congress will have to appropriate a good many millions each year to cover the loss: but then just think how it would help Catalogue Houses, Quack Doctors and other unnecessary evils. I may have to send the dog by express, as it is hard to guess what Congress will do, especially when they are getting such measly salaries. Too many Congressmen are like the boy who asked the groceryman for an egg's worth of mustard, saying, the hen is on. I will bring the egg over in a minute. It is safer to have the egg before you spend it. Hens fool you sometimes.

The hen is on all right for 1907 and here's wishing her "lay" may be all we anticipate. I wish all a Happy and Prosperous Year.

SMITH BROS. HARDWARE CO.,
J. H. SMITH.

THE BIRMINGHAM TRADE.

The year 1906 has passed into history with its lessons of mistakes and successes, and 1907 is in prospect holding out hopes of activity inviting us to greater conquests. We have been kept so busy with active transpiring events that we have not taken much time for reflection and speculation. The South is developing very rapidly in many ways, and the chief complaints from all points of the compass in and outside of the South seem to be a congestion of prosperity. The railroads do not seem to get the efficiency out of what equipments they have. The best information obtainable reports that fifteen to twenty miles per day is the distance traveled by freight cars—less than one mile per hour. It does appear to a man on the outside to one who does not know all the difficulties in the way, that with half the present equipment they should get this much service, or average travel of forty miles per day. Does this not suggest that there is a lack of competent help? It may be that during these times when there is so much to do that much of the work has to be left to apprentices. We all know that everywhere and in all departments of work there is difficulty in securing plenty of desirable help. Labor on the farm is scarce, in the contractors' camps, in the builders of factories and other structures, with the lumber mills and, in fact, in all lines of work. We would just now welcome good people from the congested centres of population, feeling that the move to them and to us would be mutually

Digitized by Google

beneficial. Our problems now are not the difficulties of getting orders so much as the impossibility of making the deliveries. If one was so disposed and short-sighted enough, they could often obtain a premium for quick deliveries. While contracts for future delivery can be made for pig iron at $17.00 to $18.00 per ton, spot deliveries are bringing $22.00 to $23.00 per ton. The temptation of the seller is great to make the contract customer wait while the customer who offers the premium gets deliveries. This may not be exactly the fair thing, but the temptation is great since there is not much danger of having contract cancelled. When all the railroads now under construction are completed

J. D. MOORE.

we will have splendid facilities for distribution, and the same are not equalled by but few cities in the South. The fact that our mines, furnaces and other industries have so much tonnage to give to the railroads it is not a difficult matter to induce them to come. While they are building they create a good market for contractors' supplies and help business in a general way. The architects have enough work in prospect to make 1907 a good year. It is too early to forecast the crops; but we can in the meantime enjoy the fruits of the crops of 1906, which are such as to encourage the farmers to plan for a good crop this year, and in doing so they will want supplies. To sum up the situation, then, everything prophesies a good year to come, and this raises our hopes and strengthens our courage while we press forward for the prizes that await those who labor diligently. The American citizen soon adapts himself to new conditions and with the experiences we have, we should better use the advantages that await us, having learned how to use them. Wishing you a happy and prosperous year, we remain,

MOORE & HANDLEY HARDWARE CO.

THE ST. PAUL TRADE.

The year of 1906 is past and the record is closed. All the good done has been credited to our account and we hope no evil has been charged to us.

In the business world the past year has, without doubt, exceeded our expectations. Values of all kinds have been held firm or increased. All men who have desired it, have found work at good prices. All is finished so we now look toward the year of 1907 and guess what it has in store for us. Surely never has a more prosperous looking condition confronted us. It is truly said that steel is a thermometer of conditions, and, if so, then surely the thermometer says that the prosperous times must continue. Believing the reports then the entire possible output is sold and oversold. We know that sheet mills report being three months behind on black and four months on galvanized. We know that very many goods are hard to get, within a reasonable time. This is not a time when you can send an order and get immediate shipment. If this condition continues to exist, then we must believe that higher prices will rule.

When prices of building material is high then it is that much building is done because everybody has money. There is use for buildings. Rents are higher and capital dares to invest. Such are the conditions now and we see the result in our own city. The city of St. Paul stands highest for building permits in percentage increase over last year than any city over 100,000 inhabitants. In some places in our city there is hardly room on the streets to put building material. Our jobbing house is expanding and must do so to keep up with the country. The country is experiencing an influx of new people, new farms are being opened up and all this calls for Hardware.

We had a splendid Fall. Just the kind which the farmer likes. Plenty of the right kind of weather that he could do the necessary getting work done for Spring seeding. The snow is covering the ground beautifully, which insures water for Spring, and insures a good crop. The only draw-back we have is the car shortage and this we hope will be remedied. The railroads did not expect such bountiful crops and so were caught short. We believe that the man who buys early and gets his goods in will have an advantage over the one who does not. So, follow us, buy early and don't neglect to take the goods in several weeks before you actually need them.

HACKETT, WALTHER, GATES HARDWARE CO.,
T. G. WALTHER, *Vice-Pres.*

THE MINNEAPOLIS TRADE.

The year 1907 is an established fact and we in the Northwest feel that it has something good in store for us.

The country tributary to Minneapolis is unusually prosperous, farmers to a very large extent have been paying off their mortgages and have money in the banks. Very large amount of railroad building has been done in our territory and considerable more is planned for the coming year. All the principal roads extending their main lines and building branches into new territory. There will probably be more miles built in 1907 that will be of interest to Minneapolis, than has been built for a great many years previous, if ever before. There has been such a congestion and car shortage that has caused large financial loss to farmers, from the fact that they could not get their grain to market and loss of business to the railroads because of the utter impossibility of being able to handle all the business that was offered them. Undoubtedly great efforts will be made to remedy this to a very large extent, but with the long lines of single track with the many branches or feeders leading to them, we hardly see how it is possible for the main lines to handle much more traffic than they have been able to this past season.

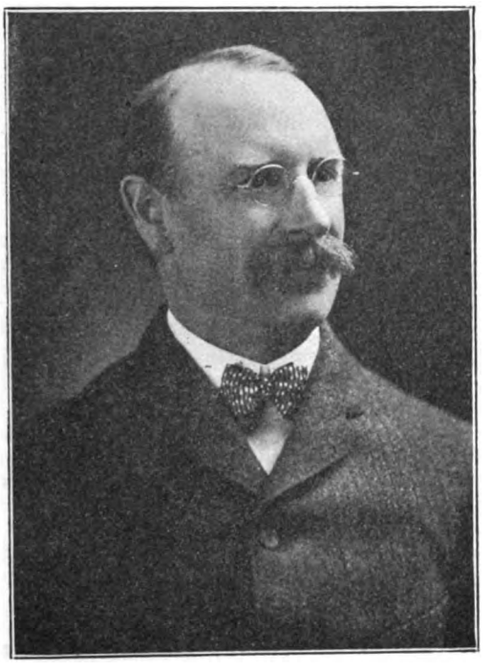
At dozens of stations grain elevators have been crowded to their utmost capacity and grain has been dumped on the ground, there being not enough storage capacity to take care of it and the shortage of fuel in many of these places has been very serious and has caused great suffering.

The prices the farmers have sold at have been fairly good, and the crops generally good. Collections have been somewhat slow the past three months and interest rates gradually advanced, but business in all lines remarkably good, and we think generally wholesale merchants have advanced their prices as they were advanced to them.

A determined effort has been made on nails and wire to prevent the dealers giving away a portion of the advances as they have taken place, as has been customary and we think these efforts have been quite successful.

The city of Minneapolis has had her share of the prosperous conditions in the country, as bank clearings have reached the enormous total of almost a billion dollars. Real estate has been receiving more attention; this is particularly true of the down town retail district, and new standards of values have been established that a few years ago would never have been dreamed of. We think more business property has changed hands this past year and at constantly increasing value than ever before.

One concern who had a long lease on a prominent retail corner sublet it for twenty years at an annual profit of $20,000 per year. Butler Bros. have just located here an enormous eight-story brick warehouse costing over $500,000, having been erected for them, they are about ready to commence business. The Hurty-Simmons Hardware Co. are building a seven-story brick building for their requirements, costing about $200,000. Janney, Semple, Hill & Co., are building a large warehouse on trackage. The Warner Hardware Co. are erecting a new building. It is reinforced concrete construction, five stories and basement, and when completed will undoubtedly be one of the best equipped stores in the Northwest.



Two large malting companies have been organized and will be ready to do business early in the year, while another with large capital are doubling their capital and capacity. The Board of Education has built three new school houses and have built large additions to three others, and have the foundation in

Digitized by Google

for another large high school, which is being built now. The University of Minnesota are building a new four story Main building at an expense of $400,000, and have built two women's buildings costing $75,000. Several of the linseed oil companies have increased their capacity, and one of the largest eastern concerns have just located here and are erecting a large mill, several furniture, sash and door, and wagon companies have located here during the past year. New refrigerator plant, butter tub factory and many of the old concerns have added very materially to their capacity.

One of the large things that was started last year tnat is in process now is a branch of the Armour Packing plant, expected to be completed this year. The Armours have acquired about 900 acres and it is stated besides erecting their packing plant, which will require about half of the land, that they are to erect car shops for the construction and repairs of cars used in their various car lines and wagon shops for building their wagons.

The railroads have found that it is necessary to increase their facilities for handling freight. The Great Northern freight terminals, now under construction, are simply enormous. The Northern Pacific and Soo Railways are also making extensive additions to their terminals. While a new Union Station is assured, we having outgrown our present accommodations years ago, it is hoped that something will be built that will be a credit to this city and of ample capacity to handle all the business.

W. K. MORISON.

One of our most prominent banks have moved into their new headquarters, the Security Building, a new ten-story office building, the exterior of which is of white enamel brick, $150,000 being spent by the bank on their banking rooms alone. While the First National Bank are erecting a new building at an expenditure of nearly $200,000. Banks generally have added a larger amount than usual to their surplus, one of our banks having a capital of two million with present surplus of one million seven hundred thousand; another, million dollar capital, have increased their surplus to a million.

A new hotel, and by the way another one is needed, new grain elevator costing over $200,000, with large additions to a number of others; a new fire insurance company has been organized with capital of $750,000, and another company have increased their capital fifty per cent. While our local life insurance company that was in difficulties a year or so ago has been taken hold of by a committee of our prominent bankers, who have succeeded under judicious and careful management in converting this into a first-class paying institution, doing a profitable business. Confidence in its success under its present management being shown by the fact that already about seventy-five of our prominent business men have taken out policies to the limit authorized by the company, viz.: $10,000 each, thus inspiring confidence and making the company a success beyond all question.

The Minneapolis Club has bought a quarter block of land and have plans completed for a new $350,000 club house, which will be completed this year.

Minneapolis has just claim to be the largest manufacturers of flour in the world, her annual production having reached nearly 17,000,000 barrels, although the last two years, on account of shortage of choice wheat that our millers insist upon using, they have not manufactured quite this amount. We are the largest wheat market in the world, we have recently acquired the same title in flax seed, the largest manufacturers of linseed oil and now have established ourselves as the largest primary barley market; this having been recognized by the transfer of the main offices of the largest barley operators in Chicago and Milwaukee markets to this point and on account of so many new grain concerns and country millers establishing their offices here. The new ten-story addition to the Chamber of Commerce has been found to be quite inadequate and already steps are being taken towards duplicating this building on an adjoining site. One of the large country millers operating flour mills at several points in Minnesota and the Dakotas have purchased ground and are soon to commence the erection of a large mill.

The lumber business has been prominent from a profit standpoint, but gradually our lumber cut is decreasing, as logs are getting scarce and manufacturers have found it more profitable to build mills closer to the timber, but the lumber business with headquarters here is growing constantly and undoubtedly a greater volume is transacted here in this line than ever before, it being the headquarters for the line yards radiating out from here over the different railroads northwest, west and southwest over thousands of miles.

The government is about to purchase a site for a new post-office and have apparently awakened to the fact that Minneapolis is destined to be a big city by requiring at least as many square feet of land as they expected to utilize in Pittsburgh, the center of that enormous manufacturing population; in fact Secretary of the Treasury rather insists upon a whole block of land, which is about fifty per cent. larger than the Pittsburgh piece. We feel that we are entitled to proper consideration from the government, for our post office business is pretty well up to the one and a half million mark and shows an annual profit to the government above expenses of over three quarter million.

You can judge from the above that Minneapolis is growing. We have no doubt the next time the census is taken that we will be well over the 300,000 mark. A large and beautiful city, one of the most attractive we have ever been in, noted for its attractive homes, so many of them built with a little piece of land around them, twelve beautiful lakes in park, and boulevard system and a new river drive on both sides of the Mississippi, having been opened up this past year, connecting the main boulevards via Minnehaha with the river and University on the East Side, and, by the way, our State University is worth mentioning. One of the largest in the country, having a membership of over four thousand; young men who go from here sing the praises of Beautiful Minneapolis as long as they live.

W. K. MORISON & Co.

THE OMAHA TRADE.

All the conditions that are visible at the present time for 1907 would tend to stimulate and encourage the rankest pessimist that ever wore shoe leather; everything points to a continuation

W. S. WRIGHT.

NEW GOODS AND SPECIALTIES

HUMPHREY OVAL GAS HEATER.

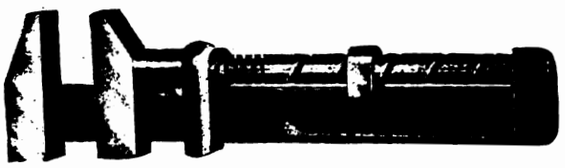
Humphrey Co., Kalamazoo, Mich., manufacturers of water heaters, etc., are putting on the market the Gas Heater here shown, which differs in many respects from other articles of its kind. The feature of the stove is that it can be used either for heating or cooking, as the oval top can be lifted off, exposing the flat plate close to the burner, on which to set a kettle or dish.

HUMPHREY OVAL GAS HEATER.

Although made without nuts, bolts or screws, it can be taken entirely apart and put away so as to occupy very little room. A sectional view of the stove, with the top in place, is shown in Fig. 2, from which the method of putting it together and its design for diffusing heat will be understood. Air is taken in through the perforations in the bottom, heated and forced out at the sides instead of directly upward, thus tending to spread the warm air through the room instead of allowing it to rise directly to the ceiling. The heating efficiency is greatly increased by the air chamber in the top, into which the air enters through other perforation near the top. The device is finished in polished nickel, stands 16 inches high and weighs 4½ pounds. Its retailing price is $2.50.

The manufacturers state they are selling thousands of these Ovals all over the United States, at the same time importing them in large quantities to Canada, China, Japan, Australia and nearly all South American and European countries. They have met with wonderful success and they have yet to hear from a user of a Humphrey Oval that has not been pleased with it.

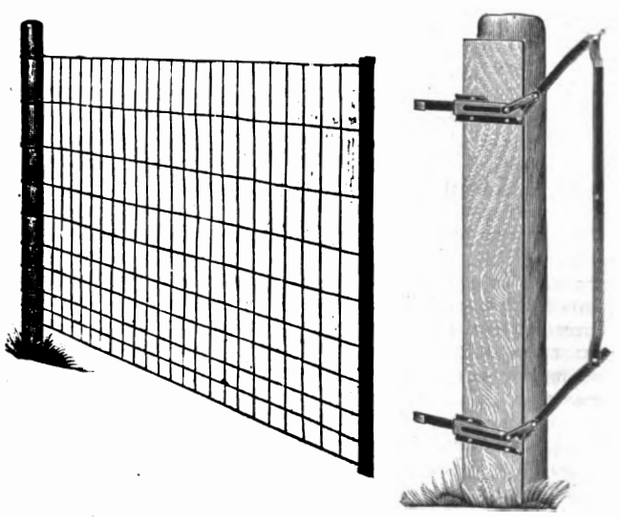
THE LEADER WRENCH.



The Ripley Pipe Wrench Co., Ripley, N. Y., are the manufacturers of The Leader Wrench, of which we give an illustration. The hooks and jaws are made of the best quality drop-forged carbon steel, highly polished, and so arranged that the Wrench will grip the pipe with equal force no matter how large the pipe may be. Any pipe within the range of the jaws may be operated upon with equal power. The handles are made of malleable iron, especially prepared for strength and durability. The stock or handle is formed with shoulders and furnishes a support for the swinging jaw, pivoted between them by a rivet. By this means the swinging jaw is held firmly, and all side movements are efficiently resisted. Within the aperture the operating nut is supported and engages the threaded extension, and is disposed by this arrangement to be employed to the full capacity of the jaw distention. The Leader Wrench, it is claimed, will not "stick" to the pipe after use, no matter how hard the "pull" may be, as the peculiar arrangement of the jaw member causes an immediate release of the wrench when the pressure is removed. It is made in six sizes, being especially adapted to the use of automobilists, and for general purposes. The 14-inch size is recommended as having a capacity from ¼ inch to 2-inch pipe.

THE LEADER WRENCH.

THE NOYES AUTOMATIC WRENCH.

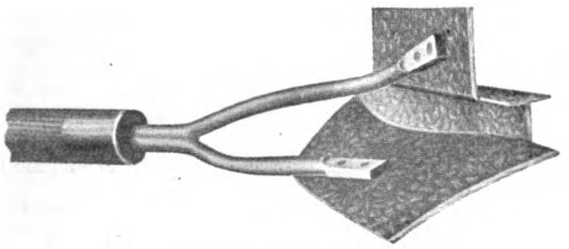


In presenting the Noyes Automatic All Steel Wrench to the trade the Mason Wrench & Tool Company, First National Bank Building, Chicago, Ill., directs special attention to the ease and rapidity of the jaw adjustment. As shown in the accompanying illustration, the movement of the double threaded reversible screw controlling the sliding jaw is accomplished by means of a threaded slide, the downward and upward movement of which opens and closes the jaws. The wrench is also self-locking, although its release is almost instantaneous by the removal of the pressure on the handle and the downward movement of the slide. It is substantially constructed, the end piece being fitted into the handle, and is made up of only five parts. It is furnished in four sizes, 6, 8, 10 and 12 in.

THE NOYES AUTOMATIC WRENCH.

CHARLES WIRE STRETCHER AND LOCKING DEVICE.

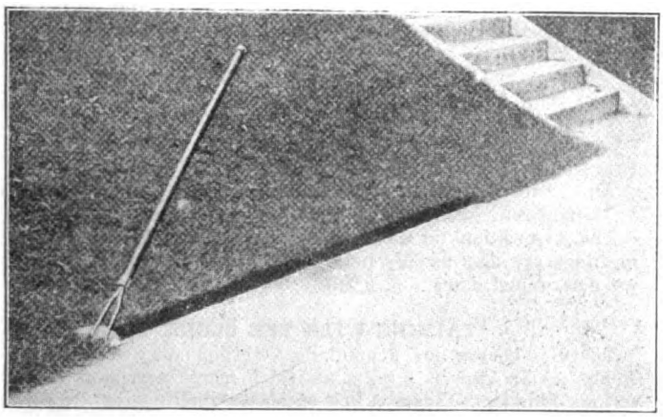
The Charles Wire Stretcher and Locking Device shown herewith, and manufactured by the C. F. Smith Co., De Kalb, Ill., is designed as a fastening for a field-fence gate. It is often desirable to make an opening in a fence between fields for moving stock or machinery from one field to another, and to obviate



CHARLES WIRE STRETCHER AND LOCKING DEVICE

Digitized by Google

the installation of a more expensive gate this attachment can be speedily adjusted, and when locked will prevent this section sagging. The horizontal wires are fastened to either a strip of wood or a steel bar, and the stretcher is secured to an 8-inch board nailed to a post. Two hooked arms operated by a lever engage the grip or bar to which the fence wires are fastened, and with a downward movement of the lever the wires are stretched taut and the gate is locked. The cast parts are malleable, and the arms and lever are constructed of steel bars.

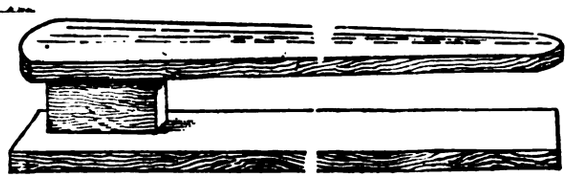


WESTERN LAWN EDGER.

Quimby Mfg. Co., Minneapolis, Minn., are offering the Lawn Edger shown in the accompanying illustrations. It is con-

WESTERN LAWN EDGER.

structed on the plow principle, and throws the turf outward on to the edge of the sidewalk, where it can be readily swept up, and not backward into the furrow, from which it would be re-

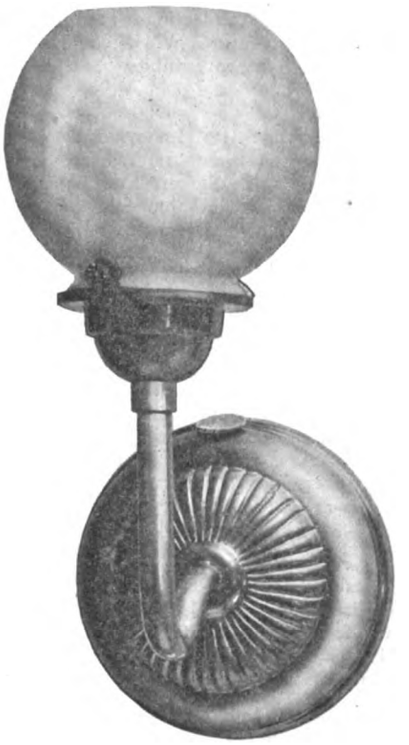


MODE OF OPERATION.

moved with more or less difficulty. The Edger is light and strong, made of one piece of steel, and can be operated as easily as a lawn mower. With the handle complete the Edger weighs two pounds.

THE ECLIPSE SLEEVE BOARD NO. I.

The Eclipse Mfg. Co., North Girard, Pa., are placing before the Hardware and Housefurnishing Goods trade the Eclipse Sleeve Board No. 1, which we illustrate herewith. The Board is nicely gotten up and in a neat, strong and durable style, be-



THE ECLIPSE SLEEVE BOARD NO. I.

ing made from selected material with all moulded edges sandpapered and polished smooth, so there is nothing for even the finest fabric to catch on. They make also a No. 2, which is the same as No. 1, only padded and covered with extra-fine muslin, ready for use. The size of board of either number is 2 by 4½ by 20 inches. Base 4 by 20 inches, and height 4½ inches.

SMALL GLOW "ELECTRIC" LIGHT.

The Glow Light Co., 73-75 Pearl Street, Boston, Mass., are placing before the Hardware trade their line of Glow Night Lights, Fixtures and Candles, one of which we illustrate herewith. This fixture is made of brass and is designed to hang up on the wall. It occupies but little space and presents the appearance of a small electric fixture. With a single filling it will burn several nights, and requires little or no attention. It is finished in nickel or dull brass, and is provided with an opal glass shade. All Glow Lights made by this company have a patented glass

SMALL GLOW "ELECTRIC" LIGHT.

burner, which automatically vaporizes kerosene, feeding its own flame with the resulting gas. The oil is lifted through the wick by capillary attraction and vaporized in the bulb by the heat of the flame. The vapor in excess of that required to feed the flame condenses and flows back down the tube, thus making perfect combustion and absolutely odorless.

HORTON'S BRISTOL ROD CALENDAR.

The Horton Mfg. Co., Bristol, Conn., are distributing an exceedingly attractive calendar this year, on which two disciples of Isaak Walton are in a canoe of modern construction and appearance engaged in the piscatorial sport of all ages, while one

of them is engaged in paddling to keep the equilibrium of the canoe steady, the other has all he can do, having hooked a fine specimen that will weigh six or eight pounds before he gets home, and the far-famed Bristol Steel Rod is depended upon to land it safely. Altogether it makes a fine calendar for the embellishment of the fishing tackle department of the store, or would look well ornamenting the window of any store. The characteristic poses of those engaged in the sport are most natural. The manufacturers state this calendar will be furnished free of charge to all dealers in fishing tackle who may ask for it, and to others on receipt of ten cents in silver.

RETAIL HARDWARE CONVENTIONS.

ANNUAL MEETINGS IN JANUARY AND FEBRUARY.

The State Retail Hardware Associations, which have so far selected dates for their 1907 meetings, are given below in the order in which their conventions will be held. As noted many of the Associations will make exhibits of Hardware manufacturers and jobbers.

INLAND EMPIRE IMPLEMENT AND HARDWARE DEALERS' ASSN.:
President, E. E. Lucas, Davenport, Wash.
First Vice-President, R. L. Spiker, Nez Perce, Idaho.
Second Vice-President, A. Urbahn, Spokane, Wash.
Secretary-Treasurer, E. W. Evenson, Spokane, Wash.
Annual meeting at Spokane, Wash., January 16 and 17.

MISSOURI RETAIL HARDWARE ASSOCIATION:
President, W. H. Hahn, St. Louis.
Vice-President, M. A. Wengert, Kansas City.
Secretary-Treasurer, Frederick Neudorff, St. Joseph.
Annual meeting at Kansas City, January 17 and 18.

TEXAS RETAIL DEALERS' HARDWARE AND IMPLEMENT ASSN.:
President, R. L. Penick, Stamford.
Vice-President, W. A. Spangler, Bonham.
Secretary-Treasurer, J. W. McManus, Waxahachie.
Annual meeting at Dallas, January 22, 23 and 24.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION:
President, H. F. Emery, Fargo.
First Vice-President, J. S. Cole, Lisbon.
Second Vice-President, J. H. McCollom, Hope.
Secretary, C. N. Barnes, Grand Forks.
Treasurer, H. T. Helgesen, Milton.
Annual meeting at Minot, February 5, 6 and 7.

NEBRASKA RETAIL HARDWARE ASSOCIATION:
President, Nathan Roberts, Omaha.
First Vice-President, H. T. Moore, Alma.
Second Vice-President, C. L. Kelly, North Bend.
Third Vice-President, S. C. Oaks, Seward.
Secretary, J. Frank Barr, Lincoln.
Treasurer, H. J. Hall, Lincoln.
Annual meeting at Omaha, February 5, 6 and 7. Hardware Exhibition.

WISCONSIN RETAIL HARDWARE ASSOCIATION:
President, Emil Teitgen, Manitowoc.
Vice-President, J. Kornely, Milwaukee.
Secretary-Treasurer, C. A. Peck, Berlin.
Annual meeting at Milwaukee, February 6, 7 and 8. Hardware Exhibition.

WEST VIRGINIA RETAIL HARDWARE ASSOCIATION:
President, F. R. Cleland, Fairmont.
First Vice-President, C. D. Kyle, Wellsburg.
Second Vice-President, C. P. Moore, Ravenswood.
Secretary, J. H. Krepps, Morgantown.
Treasurer, J. H. Morgan, Morgantown.
Annual meeting at Clarksburg, February 12 and 13.

PENNSYLVANIA RETAIL HARDWARE ASSOCIATION:
President, William Mendenhall, Montoursville.
Vice-President, A. H. Kaufman, Lock Haven.
Secretary-Treasurer, J. E. Digby, McKees Rocks.
Annual meeting at Pittsburgh, February 12, 13 and 14.

SOUTH DAKOTA RETAIL HARDWARE ASSOCIATION:
President, E. D. Hawkins, Vermilion.
First Vice-President, Otto E. Mueller, Aberdeen.
Second Vice-President, F. J. Pixley, Montrose.
Secretary, Noah Keller, Woonsocket.
Treasurer, B. G. Wattson, Chamberlain.
Annual meeting at Mitchell, February 12, 13 and 14. Hardware Exhibition.

ILLINOIS RETAIL HARDWARE ASSOCIATION:
President, Frank B. McKenney, Rockford.
Vice-President, Fred. Geissing, East St. Louis.
Secretary, Leon D. Nish, Elgin.
Treasurer, H. E. Gnadt, Chicago.
Annual meeting at Chicago, February 14, 15 and 16. Hardware Exhibition.

NEW YORK STATE RETAIL HARDWARE ASSOCIATION:
President, Louis J. Ernst, Rochester.
First Vice-President, L. G. Mattison, Newark.
Second Vice-President, John H. Bradish, Batavia.
Secretary, John B. Foley, Syracuse.
Treasurer, F. E. Pelton, Herkimer.
Annual meeting at Syracuse, February 19, 20, 21 and 22. Hardware Exhibition.

IOWA RETAIL HARDWARE ASSOCIATION:
President, H. S. Vincent, Fort Dodge.
Vice-President, C. E. Haas, Le Mars.
Secretary-Treasurer, A. R. Sale, Mason City.
Annual meeting at Des Moines, February 19, 20, 21 and 22. Hardware Exhibition.

CONNECTICUT HARDWARE ASSOCIATION:
President, George J. Bassett, New Haven.
First Vice-President, Irving C. Treat, Hartford.
Second Vice-President, Eli C. Birdsey, Meriden.
Secretary, James DeF. Phelps, Windsor Locks.
Financial Secretary, F. H. Farrar, South Manchester.
Treasurer, Lewis B. Crosby, New London.
Annual meeting at Hartford, February 20 and 21.

INDIANA RETAIL HARDWARE ASSOCIATION:
President, C. B. Frame, North Manchester.
Vice-President, W. B. Creed, New Albany.
Secretary-Treasurer, M. L. Corey, Argos.
Annual meeting at Indianapolis, February 20, 21 and 22. Hardware Exhibition.

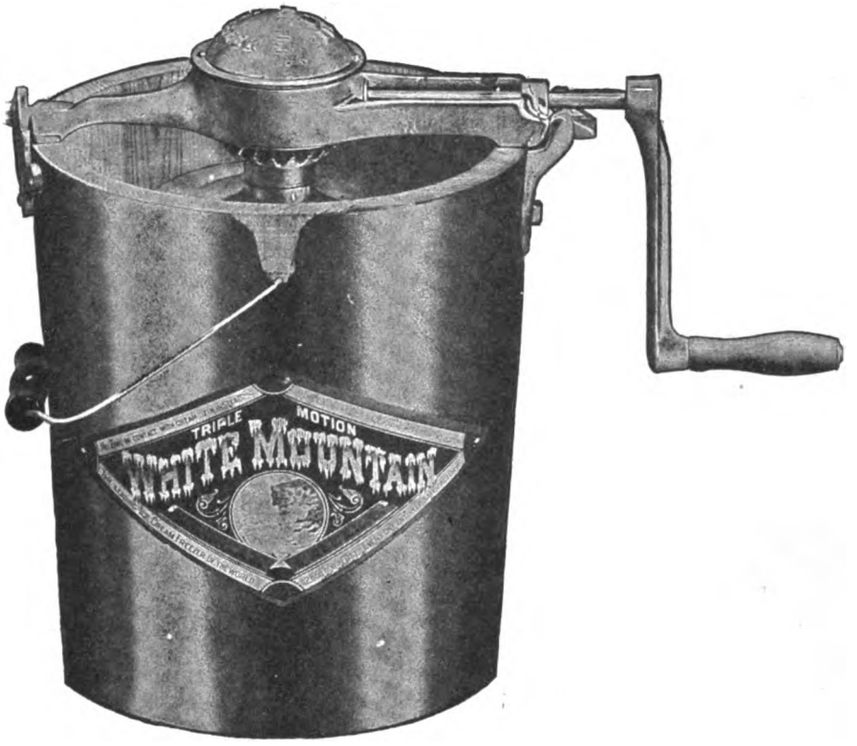
OHIO RETAIL HARDWARE ASSOCIATION:
President, C. S. Johnson, Barberton.
Vice-President, Frank W. Ingalls, Bryan.
Secretary, Frank A. Bare, Mansfield.
Financial Secretary, A. L. Shearer, Dayton.
Treasurer, C. C. Fouts, Middletown.
Annual meeting at Columbus, February 26, 27 and 28. Hardware Exhibition.

MINNESOTA RETAIL HARDWARE ASSOCIATION:
President, Julius Schmidt, Wabasha.
Vice-President, Amos Marckel, Perham.
Secretary, M. S. Mathews, Minneapolis.
Treasurer, George F. Duerre, Plainview.
Annual meeting at St. Paul, February 26, 27, 28 and March 1. Hardware Exhibition.

The Associations in California, Colorado and Kentucky, whose meetings are also usually held in February or March, have not yet determined dates.

TALKING WITH THE CLERK.

There is chance for a good deal of diplomacy in talking to employees and this is a point at which many merchants commit serious blunders. Some never speak to their clerks except to give an order. They gain thereby the dislike of their employees and lose about all semblance of personal sympathy from them. Others talk too much and set an example of verbosity that will be many times duplicated throughout the day in various parts of the store. Another man regards all of life, including himself, too seriously to see the humor in any comment or accident of even the most laughable nature; he is seldom in close touch with his employees. Another hardly sees the serious side until he faces the situation of finding his establishment a centre of tomfoolery. Some men seemingly would not care whether their employees were living or dead so long as their work was done. Such people may feel pretty sure their clerks care little whether they sink, swim or bust, so long as they have a job. Occasionally a merchant finds time to become too inquisitive, so much so that he becomes nosey. Be assured that such a man will have the tables turned upon him at times he little expects and least appreciates.



It would be a difficult matter to lay down a hard and fast rule for the treatment of hired help, for the simple reason that there are all sorts of employers and all sorts of help. Usually where there is serious reasons for complaints it will be found that some rule does exist either as a part of the business policy or as a personal characteristic, and that it has been too inflexibly applied. It pays to be on some degree of intimacy with employees but the cordiality that will be necessary to win the confidence of one will cause another to become far too familiar; treat him with a little more reserve. Thaw out the solemn, gloomy clerk with a vein of levity before he freezes a customer, but don't forget to tone his fellow's cheap wit down a trifle before it disgusts some other customer. Be curious about the affairs of your employees only so far as you hope thereby to do them some real good; be just enough indifferent to them to discourage gossip but always sufficiently receptive to invite their confidence when any real trouble is upon them.

In short it is the province of the wise merchant to keep his employees as nearly normal as he can and, if this may be accomplished with the greatest ease in conversation, that is certainly the form a portion of his personal influence should be given out in.

THE WHITE MOUNTAIN ICE CREAM FREEZER.

If there's one thing we lead the world in manufacturing, it is in Ice Cream Freezers, in which almost every family can claim the honor of having one make or another, or else desiring the same. For the Hardware store they are recognized as being rapid sellers, especially in the season when they are indispensable, although that season is being lengthened in each succeeding year until now it may be truly said of the product of the Freezer "all seasons are thine own."

THE WHITE MOUNTAIN ICE CREAM FREEZER.

They can be sold readily—those that are in popular demand—from a line of samples occupying but little space on the store floor to call proper attention to them. When once you have decided on the line you intend to handle you should become familiar with the essential features that make the line popular sellers. The essential features in which the claimed superiority of the White Mountain Freezer lies are the principle, mechanism, material and construction.

The principle of theWhite Mountain Freezer is the effective Triple Motion. It has been demonstrated that the use of the Triple Motion produces the finest quality of cream in the quickest time, and to the ingenious application of this principle is due the remarkable success of the White Mountain Freezer. With the can moving in one direction, the outside beater moving in the opposite direction, and the inside beater moving in a direction opposite to that of the outside beater, the cream is kept in constant motion. It is thrown from the center to the sides of the can and back continually, thoroughly beating every particle, and making the grain fine and smooth.

The mechanism of the White Mountain Freezer is simple, yet efficient. A combination of three clog wheels produces the triple action, imparts to the can and the two beaters their separate motions, and makes the operation of the freezer a very easy matter. This triple motion is found only in the White Mountain Freezer.

The material used in the White Mountain Freezer is the best obtainable, and while passing through their factories receives additional treatment that makes it still better.

The tub is made of carefully selected second growth white pine, absolutely free from imperfections, and every tub is impregnated with a chemical preparation that renders it waterproof and water-tight. They will never get soggy, never lose their shape, and never smell unpleasantly, as will cedar tubs.

The can is made of the best charcoal tin plate, and every part of the freezer that comes in contact with the cream is plated with pure block tin, thus positively eliminating all possibility of poisonous influences. The inside castings, or the beaters, are of malleable iron, and tin plated. All outside castings are cast iron well galvanized to prevent rust.

The construction of the White Mountain Freezer is as perfect as experience can make it. It is of uniform strength in every part, while each part contributes to the strength of the whole, and helps to make the machine exceptionally durable. All White Mountain Freezers represent the latest mechanical improvements. They are built by experienced workmen from the best grade of material, and they are designed for the satisfaction of both the dealer and the public.

The Company helps dealers to sell White Mountain Freezers by supplying them with all kinds of advertising matter free of charge. Special booklets, circulars, folders and electrotypes of newspaper advertisements will be furnished if wanted, and everything they can possibly do to push sales is promptly and thoroughly done.

A WORD TO AMATEUR MACHINISTS.

Don't tighten up the bolts and change the adjustments of the machinery you sell unnecessarily. The manufacturer with his expert knowledge and special machines put it in far better shape than it will ever be again after being overhauled by some tyro with a monkey-wrench. Then, too, the matter of appearance is an important one in dealing with some people. Most heavy machinery comes from the shops nicely painted and every break of the smooth, glossy surface hurts the looks in the eyes of fastidious people. Few things can put bruises upon a painted surface faster than a monkey-wrench. Every bolt turned means a breaking of the paint around both ends. A slip of the hand will leave any number of extra marks; and what is the use of it, anyway?

Taking machinery apart to show the interior workings is very rarely necessary, as when some unique and specially ingenious contrivance is first being put upon the market. The ordinary lines are better explained from the outside and from the charts furnished by the manufacturer. An expert in the use of the machine will require nothing more, and well understands that it is no improvement to machinery to loosen and tighten it on all sorts of occasions; in fact you will see that he will select some machine you have not been tampering with if he buys. Those who do not understand it in advance fairly well will probably not understand it any better after seeing it apart and will in addition have acquired something of a mania for "monkeying" with their purchase, taking it apart to show their friends and then getting it together wrong or not at all. Instead of furthering this twist of human nature it is the dealer's duty to rather impress upon his customer the fact that factory set-up metal work is in better shape than it will be if taken apart and put together by hand. Tell them as emphatically as prudence will permit and tell your clerks and yourself still more forcibly, to keep wrenches, hammers, screw-drivers and all similar weapons away from any machine you sell or have for sale whenever they are not going upon it for some more legitimate reason than mere curiosity.

WITH OUR CORRESPONDENTS.

of the conditions that have prevailed during the past year and it has been in every respect one of the most satisfactory that this locality has ever enjoyed. Not only the jobber but the retailer, the mechanic, the laborer and the farmer, and in fact everybody who has the disposition and ability to work have had plenty to do and the returns have been thoroughly satisfactory. Even money, which on account of its abundance has been the cheapest commodity on the market for several years, has (thanks to the needs of our Eastern friends) been employed and on a more remunerative basis than has existed for years past.

There seems to be nothing to interfere with the continuation of these conditions and at the present time the only suggestion we could make would be that everybody take advantage of the present conditions as far as it is possible for them to do. Less talk and more work; less complaint in regard to present conditions and more effort to better them for the future will, in our judgment, be the most profitable basis on which to work for the coming year. WRIGHT & WILHELMY CO.

THE DAVENPORT TRADE.

Editor HARDWARE:

We cannot see any reason why the present prosperity of the country should not continue through the year 1907. The crops of 1906 were bountiful indeed and they are bringing fair to high prices. Of course, there are many untried conditions to confront, which may not be of advantage to the people generally.

COL. J. R. NUTTING.

The recently enacted railroad rate bill will, of course, add untold millions of dollars to the wealth of railway corporations, which must be paid by the masses. There is a growing tendency on the part of the middle classes—among whom are wage earners—to ignore their own class and give their patronage to the already wealthy. It is to us unexplainable why these good people take such delight in passing the little stores and shops, owned by their own class, to go and spend their money in the largest and most wealthy stores that they can find; and quite often, if there is not a store large enough and wealthy enough in their home village, town or city, to send their orders and hard-earned money to some larger store in a distant city. To what extent this feeling exists and how it does or how it will affect the future of the regular dealer in town and country cannot be conjectured. Of course, whatever is to be will be and it may possibly be true that whatever is, is right. We cannot foretell what the future will develop, but prosperity of the past and present is assured, and with this we are content.

The recent frequent and sharp advances practically all along the line seem to be firmly maintained and it is difficult getting goods at the advanced prices. Jobbers are evidently realizing the additional profit incident to change in these prices.

The fact of being compelled to pay for many staple goods in advance of the selling season for them, such as Screen Wire, Poultry Netting, etc., necessitates the use of more capital in business; this, together with the scarcity of money and slow collections, makes it a little hard sledding financially just now.

SICKELS, PRESTON & NUTTING CO.

THE SAGINAW TRADE.

Business for 1906 in this section of the country was fully up to expectations. The retail dealers were conservative in their buying and bought from hand to mouth, as their necessities required, and in consequence their stocks are not very heavy at the close of the year. The crops in this section were good, especially the sugar beet crop and the sugar campanies have had a prosperous year. The machine shops, boiler shops, plate glass works, harness factories, horse collar factories, lumbering tool factories, furniture factories, etc., have all run to their full capacity and have been behind with their orders most of the time. The merchants now are busy taking inventories, but market conditions are such that we all look for 1907 being a very prosperous year. MORLEY BROTHERS,

EDWARD W. MORLEY.

COMMEMORATING THEIR "DIAMOND" ANNIVERSARY.

On Saturday, Deccember 29, 1906, the Logan-Gregg Hardware Co. commemorated their "Diamond" jubilee, this being the seventy-fifth year of their existence, by giving a banquet to their employes, of which the following was the menu:

MENU.

"Marvel" Soup

"Wire" Rolls "Domestic" Olives

Rabbit Croquettes a la Cook

Drop Shot

"Sterling" Turkey

"Venetian Red" Sauce Hammered Potatoes.

"Crescent" Celery

Bread and Butter

"Winner" Salad

"Out O' Sight" Cheese Rogers "1847" Crackers

"White Mountain" Ice Cream

Small Cakes, "Sterling" Assortment "Rome" Coffee

"Nagol" Cigars "Duquesne" Candy

The custom of giving a dinner at the end of inventory originated many years ago when it was known as a "stock supper." At that time the members of the firm and employes used to guess the amount of goods in stock, and the one making the poorest guess gave a dinner to his associates. As the number of employes increased, this obligation was assumed by the firm, and for many years past these dinners have been a regular event. For several years past the dinner has been served in the sample room of their warehouse, which is partially cleared for this purpose. This year about 100 people were present, and the employes took occasion to express their esteem for the president, George B. Logan, who has been associated with the concern for more than forty years, by presenting him with a very handsome watch and fob. The year just closed has been the most prosperous and busy one in the history of the firm, who are looking forward to an even busier and more prosperous one during 1907.

A historical record of changes made necessary during their existence:

1831 Logan & Kennedy,
Established by John T. Logan and Robert T. Kennedy.

1848 Logan-Wilson & Co.,
John T. Logan, Edward Gregg, Philip Wilson.

1857 Logan & Gregg,
John T. Logan, Edward Gregg.

1867 Logan-Gregg & Co.,
John T. Logan, Edward Gregg, Geo. B. Logan, Thomas A Parke, Joseph E. Johnson, George Park.

1896 Incorporated as Logan-Gregg Hdwe. Co.,
Geo. B. Logan, President and Treasurer,
P. L. Logan, Vice-President.
W. H. Parke, Secretary.
R. M. Repp, General Manager.

John T. Logan died 1871.
Edward Gregg died 1890.
Thomas A. Parke died 1895.

OUR CANADIAN LETTER, Continued.

the upward movement in wire nail prices, which during the past season have been selling as low as $1.90 base in comparison with prices of $2.45 two years ago and $2.30 to-day.

The H. R. Ives Co., Montreal, have opened large sample rooms in Toronto in which to show their hot water boilers and iron and brass beds. A year ago the Ives Company sold all their Hardware patterns to the Taylor-Forbes Company, Guelph, the largest Hardware manufacturers in Canada.

The Shirreff Manufacturing Co., Brockville, who manufacture food choppers, bread makers, step ladders and other Hardware lines, have been doing a large business and their new factory is kept running to its full capacity to fill orders.

OUR CANADIAN LETTER

Special Correspondence, TORONTO, JAN. 5, 1907.

TRADE REVIEW AND OUTLOOK.

Hardware jobbers from all parts of Canada report that 1906 was the best year in the history of the trade in Canada. Figures are not available to show the increased volume of business done, but the general unanimity in giving to 1906 the banner position in the list of big business years makes it unnecessary to go into statistics. The only complaint that is made is the inability of manufacturers to supply goods to jobbers fast enough to keep pace with retailers' demands. This condition is likely to continue throughout 1907, and manufacturers are urging jobbers to book orders early and jobbers are in turn advising their retail customers along the same lines. Prospects for 1907 are even brighter than the outlook for 1906 was, stocks being much lighter, collections having been well made, and prices being considerably advanced. Orders are being booked earlier and the cold wintry weather and the large holiday trade done have all tended to make the trade feel that there are several more fat seasons ahead of them before a vacation takes place.

Winter doesn't stop building in Canada as is instanced by the issuance of building permits in Toronto amounting to $132,000 during the first half week in 1907, all of these permits being for buildings costing less than $10,000 each. Toronto headed the list of Canadian cities in the amount of building permits issued in 1906, the figures amounting to $13,100,000 against $10,370,000 in 1905. Winnipeg's total was $12,800,000 against $10,840,000 in 1905 and Montreal's $7,745,000 and $4,780,000 in the years referred to. Other cities which showed large increases included: Calgary, 1906, $2,243,000; 1905, $1,000,000. Edmonton, 1906, $1,866,000; 1905, $702,000. Vancouver, 1906, $4,250,000; 1905, $2,650,000. Victoria, 1906, $636,000; 1905, $480,000. Ottawa, 1906, $1,641,000; Regina, 1906, $2,100,000; 1905, $950,000. Brantford, 1906, $408,000; 1905, $197,000. Sydney, 1906, $125,000. These are just a few of the most active cities. Hamilton, London, St. John, Halifax, Quebec, Peterboro, Welland, Guelph, Galt, Port Arthur, Saskatoon and numerous other places have experienced substantial building booms caused by the steady influx of population resulting from the expansion of Canada's manufacturing industry and the settlement of the farm lands of Western Canada. In this latter movement farmers from various parts of the United States are taking a very active part. For instance, of the 3,388 homesteaders locating in the Western Provinces in August last 940 were from the States against 687 from Eastern Canada and 259 Westerners. These settlers, being familiar with American-made Hardware, stoves and implements, will help to augment the already large trade United States manufacturers enjoy in the Canadian West.

ATTEMPT TO EXTEND PARCELS POST.

Canadian Hardwaremen up to the present time have not experienced very keen competition from the mail-order houses, but a proposal has been made that the parcels post system in Canada be extended to include a C. O. D. collection feature and the postmaster-general has promised to introduce legislation along this line. The Ontario Retail Hardware Association and *Hardware and Metal*, along with other trade associations and papers, have lost no time in taking up the issue and the postmaster-general and members of Parliament are being bombarded with letters and petitions signed by merchants in all parts of Canada.

The Executive Committee of the Ontario Retail Hardware Association met in Toronto on December 31 and arranged to carry on the fight actively. Different trade matters were also acted upon and arrangements were made to hold the annual meeting of the association in Toronto on March 28 and 29, the latter date being Good Friday, a public holiday in Canada.

OBNOXIOUS LEGISLATION.

Canadian retailers are now facing a danger which has confronted the retail trade in the United States for some years—the extension of the Parcels Post system. The postmaster-general, at the opening of the Dominion Parliament about December 1, announced that he would bring down legislation providing for a C. O. D. collection system in connection with the Parcels Post. The Ontario Retail Hardware Association lost no time in urging other retail associations to take up an agitation against the proposed law. The association also sent letters to every Hardware dealer in Ontario urging the writing of letters to the local representatives in Parliament, to the postmaster-general, as well as seeing the editors of the country newspapers. A strong agitation is now under way in all branches of trade, and it is expected that the postmaster-general will be forced to reconsider his proposed action.

Another piece of legislation which is to be withdrawn as a result of protests from all branches of mercantile industry is the tax on commercial travelers imposed by the Province of Quebec a year ago. Premier Gouin has announced his intention to repeal the measure this Winter.

BUSINESS TRANSFERS.

J. H. Lyons & Company, Humboldt, Sask., have sold their business to the O. G. King Company.

Magladery Bros., who recently sold their business at Parkhill, Ont., to A. W. Humphries and Brewer & Harrison, of the same town, have bought out a store at New Liskeard, Ont.

The Western Hardware Company, Regina, Sask., whose store was recently burned, have bought the business of Smith & Ferguson and the two will be continued under the name of Peart Bros., Limited.

C. Warden & Company, Weyburn, Sask., have bought out Thompson & Axworthy of that place.

George Storey, Milton, Ont., has sold to J. T. Hannatt.

HARDWARE TRADE HAPPENINGS.

J. H. Ashdown, wholesale Hardware merchant, has been elected Mayor of Winnipeg, Man., by a majority of upwards of 5,000. He has also been chosen as president of the Winnipeg Wholesalers' Association.

The Hobbs Manufacturing Co., London, and the Metal Shingle & Siding Co., Preston, have opened branches at Toronto, while the H. R. Ives Company, Montreal, have taken larger premises for sample and warerooms.

The Hanbury Hardware Company has been incorporated with a capitalization of $300,000, to do a wholesale and retail Hardware business at Brandon, Man.

The Philip Carey Mfg. Co., manufacturers of roofing papers, Cincinnati, Ohio, will establish a Canadian factory at Hamilton, Ont.

The Walkerville Hardware Co., Walkerville, Ont., are erecting a new building and will go into the jobbing trade.

J. H. Still & Co., St. Thomas, Ont., manufacturers of axe handles, hockey sticks, etc., have purchased hickory timber limits in Kentucky and have commenced to brand their goods. The demand for hockey sticks this year has been remarkable and instead of stopping the manufacture of them about November 1, the usual date, makers will continue producing until February 1, in order to supply the demand.

J. W. Smith, Regina, Sask., has been chosen mayor of his town and W. M. Gordon, of Watt & Gordon, has been elected to the Winnipeg Board of Education.

The Safety Door Hanger Company, Hamilton, Ont., has been incorporated to manufacture door hangers and Hardware specialties. The company will have a share capital of $40,000, and the provisional directors will be: W. Topping, E. W. Topping, Ashland, Ohio; J. W. Nesbitt, J. G. Gould and James Dickson of Hamilton.

The Canadian Hardware and Manufacturing Co., Toronto, has been incorporated with a capital of $50,000, to carry on business as machinists, foundrymen, etc. The provisional directors will be: W. S. Harrison, W. H. Alderson, S. M. Linn and W. J. McManus, of Toronto.

The Saunderson Manufacturing Co. has been established at Sydney, N. S., with a capital of $45,000, to manufacture roofing paper.

George H. Clarke & Co., Niagara Falls, Ont., are making extensive additions to their Hardware store.

Max Morell, Toronto manager for Lewis Bros., Ltd., Montreal, has become sales manager for Rice, Lewis & Son, Toronto, and W. R. Tait, one of Lewis' Bros.' Western Ontario travelers is now the Toronto representative of this rapidly growing Montreal jobbing house.

William C. Perry, assistant manager for George D. Wood & Co., Winnipeg, died suddenly in Winnipeg Christmas week. Mr. Perry was an old traveler and well-known to the trade in all parts of Canada.

An important change is pending whereby the Canada Screw Co., Hamilton, will amalgamate with the Ontario Tack Co., Hamilton, which also controls the Western Wire Nail Works, London. This amalgamation of wire nail interests will help in

RECENT TRADE PUBLICATIONS.

PIKE MFG. CO., Pike, N. H., with New York office at 151 Chambers Street, have just issued a catalogue of Corundum Wheels. In regard to their product the company say: "To obtain the highest possible degree of excellence in all goods of our manufacture, to establish our standard so high that competitors cannot reach it, and our customers can unfalteringly rely upon it, has ever been and is our constant aim. The best thought and effort of three generations of the name of Pike have gone to give that name its present position in the abrasive world. Not one jot or tittle of that effort will be abated in our attempt to keep the product of our Corundum Wheel Department up to the high standard of our general abrasive line. We are concentrating our efforts upon Corundum Wheels, because after several years of thorough investigation and experiment, we are convinced that pure Corundum is the best existing abrasive for Grinding Wheels." A number of pages are given to an explanation of the nature of corundum, the vitrified process used by the company in the production of pure corundum wheels, how to select, mount, use and care for them. A table of grinding wheel speeds is given; also suggestions for selecting grain and grade of wheel; price lists, illustrations, etc. The Pike Mfg. Co. are also distributing their new price list of India Oil Stones, which should be asked for as well.

MONROE REFRIGERATOR CO., Lockland, Ohio, have issued a very handsome catalogue of their Monroe Porcelain Refrigerators, it being their Catalogue No. 15. The quality of the paper used is of the best, and the illustrations are the finest kind of half-tones, showing a large assortment of goods. There are also illustrations of apartment hotels, hospitals, etc., where these refrigerators are installed, including the Ansonia and Osborne Apartments, Hotel St. Regis, Astor Court and the Madison Square Hotels in New York City, as well as the Mount Sinai and St. Luke's Hospitals. A full description of these refrigerators will be found within the contents, and a number of testimonials; also a list of prominent people using the same in their homes, and the leading institutions equipped therewith. This catalogue will be gladly sent upon application, and is one that will be perused with interest by all those into whose hands a copy is given.

MAINE MFG. CO., Nashua, N. H., have issued a catalogue of their "White Mountain" Refrigerators and Ice Chests for 1907. The company are entering their thirty-third year, and in the opening pages make mention of their development "from the tiny one-room shop of mere local scope," so that to-day "the name 'White Mountain' has grown to international fame for sterling worth." Numerous illustrations are given of their different styles used for domestic purposes and by butchers and grocers. A portion of the catalogue is given over to a description of their "Stone White" Refrigerators, the linings for which are obtained from their own quarries, and which present a glistening, smooth, white surface, being made a part of the stone by their own special process. The illustrations are given in natural colors. The shelves of this line of refrigerators are of woven steel wire, heavily plated with pure block tin, easily taken out to clean; light, strong and sanitary. The cases are of solid oak, thoroughly kiln-dried, highly polished, and finished in a dark golden oak, with plain raised panels. The trimmings are unusually heavy and ornamental, because made of polished solid brass, their own design. A line of Ice Chests is also shown, both pine and hard wood, and the company also manufacture a hard wood chest designed exclusively for the keeping of fish and game. This catalogue, which is a complete one, should certainly interest every dealer carrying refrigerators in stock, or contemplating so doing.

GOLD MEDAL CAMP FURNITURE CO., Racine Junction, Wis., have recently published two catalogues, one devoted to Camp Beds, Chairs, Cots, Stools, Tables, Folding Bath Tubs and Complete Camp Outfits. Special attention is called to their Gold Medal Camp, Lawn and House Folding Furniture and Camp Outfits, which the company claim are far superior to anything of the kind ever offered to the public for comfort, strength, portability, compactness, simplicity and utility. For tourists, travelers and sportsmen; for the home in the city, country or seaside, these goods are especially advantageous. Their other catalogue is devoted to Hospital Cots, Litters and Invalid Back Rests and Chairs.

ROCKWELL MFG. CO., Malvern, Ark. Catalogue of High-Quality Screen Goods, including Screen Doors, Adjustable Window Screens, K. D. Frames and Made-to-order Work. In a prefatory note the company say: "We offer to the trade in this catalogue a line of high-quality screen goods. We are offering you this line as the result of twenty years of actual practical experience. All lumber used in these doors is thoroughly kiln-dried, soft yellow pine. All wire cloth is purchased from leading mills, and only the best quality is used. Light, durable coach varnish is used in finishing instead of cheap gloss oil. Our construction of the door renders the corner as strong as the wood itself. Our doors cannot sag. We offer designs that are new—something your customer wants and your competitor wishes he had. Our adjustable screen is adjustable in every sense of the word. Is not subject to climatic changes, and cannot stick or bind. To the trade who handle K. D. Frames, we offer positively the best article on the market. Above all, prompt shipments are necessary in the rush season. To this end we guarantee immediate shipment on receipt of order for all stock goods. Every door and screen will be thoroughly inspected before being crated."

PATTERSON, GOTTFRIED & HUNTER, LTD., manufacturers, importers and jobbers of machinery, metal, Hardware, tools and supplies, at 146-150 Centre Street and 115-117 Walker Street, New York, are sending to their friends in the trade their new Dealers' and Jobbers' Catalogue, bound in cloth. This catalogue they intend to be a permanent reference book, which they will always keep up to date by sending pages descriptive of such new goods as they may be handling, to be inserted between the covers. The blank pages contained in the catalogue are for notes and comments, which the dealer may wish to make. Besides the machinery, tools and supplies shown in this catalogue they have also a well-selected stock of Metals, Screws, Polishing Materials, Blacksmiths' Tools, Fine Tools, Carpenters' Tools, Machinists' Tools, Engineer's Supplies and Contractors' Tools. They will cheerfully submit prices on all mill and factory supplies, whether catalogued or not.

THE PERFECTION FURNACE PIPE CO., Toledo, Ohio, have favored us with a copy of their Price List No. 16, pertaining to Perfection Furnace Pipe and Fittings, Special Wall Register Boxes, Wall Pipe, Round Pipe and Fittings, Registers, Borders, Asbestos Furnace Cement, Paper, etc. The booklet is filled with illustrations of their entire line, and several testimonials are given from insurance men and boards of fire underwriters strongly recommending the Perfection Furnace Pipe.

H. BEALMEAR & CO., 25 West Baltimore Street, Baltimore, Md. Catalogue of Art Metal Goods, Sterling Silver Novelties, etc. These goods are strictly high grade, and are made especially for the best trade. Only the finest quality of genuine buck horn and boar tusk is used. Gold plated and French gray articles are heavily plated and warranted to wear. Their line includes an assortment of Sterling Silver Mounted Corkscrews, Patent Bottle Openers, Peppers and Salts, Child's Cups, Pen Dips, Shaving Cups and Brushes, Cigar Box Openers, Paper Cutters, Jewel Cases, Inkstands, Candelabra, Bronze Statuettes, Mirrors, Frames, etc.

HERO FRUIT JAR CO., Gaul and Adams Streets, Philadelphia, Pa. Catalogue and price list of Oilers, including Chace's Machine, Paragon and Automatic Oilers, Engineer Sets, Sewing Machine and Phonograph Oilers, Tin Spouts, Indestructible Steel Oilers, Fillers and Lamps, Brass and Steel Nozzles, Copper-Plated Steel Oilers, Tallow Pots, Railroad Oilers, Alcohol Lamps, Inspectors' and Locomotive Torches, Mowing Machine Oilers, Miners' Lamps, etc.

NEW CASTLE STAMPING CO., New Castle, Pa., are sending out their Catalogue No. 4 of "New Castle" Enameled Ware, in which they show the different lines of Enamel Ware made by this company. The enamel used on the different lines which they make is guaranteed to be absolutely pure and free from any poisonous substance. The lists in this catalogue apply to all the different lines. The company have gotten out a line of Manhattan Blue Ware, not shown in the catalogue under consideration, as it is a new departure since the publication of the same, and on which they have had a very extensive business.

REVIEW OF THE MARKETS.

WIRE NAILS: The demand for Wire Nails keeps up remarkably well, which, together with specifications on contracts, keeps the mills busy. Mill bookings for December exceeded the amount of business of that kind a year ago. Broken assortments only are to be found in the jobbers' hands and the mill deliveries are several weeks behind. The shortage on cars still continues, when nails are ready for delivery. The market is a very firm one. Quotations are as follows, fo.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$2.00
Carload lots to Retailers	2.05

New York.—The market for Wire Nails locally is not quite as good as prevailed during the first ten days in December. Still there has been a good business doing. Prices are well maintained. New York quotations are on the following basis:

To retailers, carloads on dock	$2.19
Less than carloads on dock	2.33
Small lots at store	2.30

CUT NAILS: There is as much irregularity in the supply of Cut Nails as ever. Jobbers' stocks and the assortments at the mill are of a broken character, and as the product in many instances has been sold up for months ahead, there are many unfilled orders reported. Quotations are as follows: f.o.b. Pittsburgh:

Carload lots to Jobbers	$2.05
Less than carloads to Jobbers	2.10
Less than carloads to Retailers	2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—A few carload lots of Cut Nails are reported arrived in the local market, unsettling prices until the market learns whether the nails are to be held for Spring sales. The mills are still behind on regular deliveries. Jobbers' quotations are on the basis of $2.30 for small lots at store.

BARB WIRE: The mills had a large volume of business placed during December. The purchasers are reported as accumulating Spring stocks. The market is a firm one, while the mills are constantly importuned to ship promptly, distributers fearing a scarcity later. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: Contract orders continue to be received by the mills in volume. As many large consumers placed orders some time ago, there is but little new business. Prices are held firmly. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.85
Retailers, carloads	1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

CABINET LOCKS: Leading manufacturers of Cabinet Locks have made a concerted advance in several lines of goods which sell at net prices. On listed goods the old discount of 33⅓ per cent., with concessions on quantity orders, still remains in force.

PREPARED GLUE: One or more manufacturers of Prepared Glue have adopted new price lists to go into effect January 1. Discounts to the retail trade remain unchanged.

WRENCHES: An advance has just been announced by leading manufacturers of Agricultural and Knife Handle Wrenches amounting to about 10 per cent. on the former and 5 per cent. on the latter line. On the new basis the market to the retail trade may be fairly represented by a discount on Agricultural Wrenches of 75 to 75 and 10 per cent., and on Knife Handle Wrenches, 50 to 50 and 10 per cent.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12¾ to 13½
B Quality Manila	11¾ to 12½
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8½ to 8¾
No. 1 Jute, ¼ and larger	8½ to 9
No. 2 Jute, ¼ and larger	8 to 8½

Less ¼ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels	43 cents per gallon.
In lots of 5 barrels or more	42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.

Calcutta Oil.....70 cents per gallon.

THE SAN FRANCISCO TRADE.

As a Hardware trade item, in and of itself, it was only a little Christmas incident, but the writer is feeling ever so much better for the part he took in the little affair. The preluding feature of it, of secondary pleasure, occupied us from daylight on the morning of December 24 till the middle of the forenoon. Jesse Henderson was my companion. For several years just preceding the earthquake Jesse became personally acquainted with every Hardware dealer in the coast territory as traveling salesman for Philpott's Gun, Cutlery and Tackle Depot. Where Jesse and the writer were concerned on the morning before Christmas was at the nearby famous Duck Pond near Ingleside, shooting mallards, and good luck was with us amazingly. The most pleasing feature of it all occurred while returning to the city, at the noon hour. Our way in led us past Jefferson Park, one of the city's principal refugee camps where the writer found tent shelter for a week immediately after the 18th of April, and marched in the "bread line." Here at a tent where there were three dependent children and their bright-faced cheerful mother who now runs a sewing machine in a shoe factory, but before the city's disaster was cashier at the gun and cutlery store named, we dumped a brace of mallards for her family dinner on Christmas, and a quart of cranberries and two bunches of celery. A pleasant discovery we made at this refugee tent was a donation of a fine Christmas turkey and a fine assortment of utility culinary utensils, with the compliments of the cashier's and bookkeeper's department of the Pacific Iron & Steel Company, which was always a large supply source for the Philpott gun and tackle store.

California made more progress during the last month of 1906, which closed two days ago, than during any previous month of the year, a year that will never be forgotten by Californians and others, especially all such that were here at the dawn of day on the 18th of April. From all parts of the State the December reports are in from the 165 bodies affiliated with the California Promotion Committee, and they are most favorable. They tell of a rainfall that has been general and fallen in sufficient quantities to insure good crops the coming season. Hardware merchants in this city, and all other commercial traffic men, report the holiday season which has just closed to have been the heaviest and most profitable in their experience, and that the general average of goods purchased were of a far better class than those sold in previous years. A Hardwareman said: A year ago the new year promised to be one of activity and prosperity and the first quarter was fully up to all expectations. Then came the never-to-be-forgotten April 18, with its horrors and uncertainties. Then came the struggle for re-establishment, a time that brought to the surface real manhood and caused the weak to sink to that level where events would ultimately have forced them. The Hardware trade did not wait for events, the fire took the stores and the stocks, but it left the man fully armed with the courage and ambition that has built our nation to that of

the grandest on earth. Then came the struggle of San Francisco, from the ruins she must rise and become one of the grandest cities of the world, she must rebuild and to rebuild she must have iron and steel, the mechanics must have tools and our merchants must furnish them. Eight months have passed and to day San Francisco is the busiest city in the world; she is rebuilding; the old walls are rapidly disappearing, making way for new and modern buildings, the temporary city has reached its limit, the permanent city is beginning to rise.

A dispatch just to hand from Spokane, Wash., says: Elaborate plans are being worked out for the second annual convention of the Inland Empire Implement and Hardware Dealers' Association in Spokane, January 16 to 19, when it is expected 500 members from Eastern Washington, Northern Idaho, Northwestern Oregon and Southern British Columbia, will be in attendance. A banquet will be given the evening of January 17, and other evenings will be devoted to theatre parties and skating in the roller and artificial ice rinks. The program has not been prepared in detail, but several Eastern dealers and manufacturers will be among the speakers and an anti-peddling measure will be drafted to be submitted to the incoming legislatures of Washington, Idaho and Oregon. The present officers of the Association are: President, E. E. Lucas, Davenport, Wash.; Vice-Presidents, R. L. Spiker, Nez Perce, Idaho, and A. Urbahn, Spokane; Treasurer, J. A. Fredaker, Spokane; Secretary, E. W. Evenson, Spokane; Directors, L. C. Fisher, Sprague, Wash.; J. Baur, Ritzville, Wash.; John Raymer, Reardon, Wash.; A. Z. Wells, Wenatchee, Wash.; F. J. Guth, Odessa, Wash.; E. L. Scott, Oaksdale, Wash.; A. B. Salmon, Wilbur, Wash.; I. C. Hattabaugh, Grangeville, Idaho; E. E. Plough, Spokane; F. T. Larrabee, Edwall, Wash.; E. P. Dorris, Lewiston, Idaho; W. F. Chalenor, Palouse, Wash.; E. M. Heifner, Colville, Wash., and C. L. Butterfield, Moscow, Idaho.

INDUSTRIAL PRESS ASSOCIATION.

STAR ENAMELING & STAMPING CO.

Star Enameling & Stamping Co., Pittsburgh, Pa., are making important additions to their line of Sheet Metal Wares, consisting of Pieced, Stamped and Japanned Tin Ware, Specialties in Galvanized Ware, Gray Mottled and Blue and White Enameled Ware, and White and White Specialties in Enameled Ware. Their Gray Mottled Ware has been continually improved until it is now very durable and of superior finish equal to any such ware on the market. The line of Blue and White Ware is of a high grade white finish inside and a pleasing blue turquoise outside. Their White and White with blue border is very tenacious and desirable, and is meeting with a gratifying demand in the following items, all of which they are making a specialty: Tea and Coffee Strainers, Seamless Cups and Mugs, Cups, Saucers and Plates, Soap Dishes, Ladles, etc. The recent additions to their plant which consist of Muffle and Annealing Furnace, heavy drawing presses and dies for all sizes of Berlin Kettles, Dish Pans, Chambers, Rice Boilers, Seamless Stock Pots, Strainers, Seamless Cups and Mugs, Cups and Saucers, Ladles, etc., will double the capacity of their plant, which is operating night and day without being able to supply the demand for their products.

They will be represented by the following salesmen during 1907: J. A. Dorshimer, Pittsburgh; J. S. Andrews, Western Pennsylvania, Eastern Ohio, West Virginia; A. Schlesinger, Ohio, Indiana and Michigan; A. Watts, Chicago, Illinois and Wisconsin; C. P. Fitch, Minnesota, Iowa, Nebraska, Kansas and Missouri; Chas. Golding, Louisiana, Texas and Oklahoma; J. P. Dornrimple, Tennessee, Alabama, Georgia and South Carolina; W. L. Stansbury, Maryland, Virginia and North Carolina; W. H. Dobson, Central and Eastern Pennsylvania; S. Stengel, New York State and Connecticut; H. O. Stansbury, Philadelphia, New Jersey and New York City; F. A. McMann, Massachusetts, Rhode Island, New Hampshire and Maine; J. A. Wallace, Pacific Coast; and G. M. Fitch is Special Salesman and Sales Manager for this Company.

NEW EXPANSION BOLT CATALOGUE.

We have just received a catalogue which should prove of more than passing interest to the Hardware and supply trade. The catalogue fully illustrates and describes the complete lines of Expansion Bolts, Screw Anchors, Drills, Toggles, etc., manufactured by the Star Expansion Bolt Company of 147 Cedar Street, New York City. In this progressive day of modern up-to-date construction, wood and frame work is becoming more and more uncommon. We build nowadays with brick, stone, concrete and steel, and for making quick, labor-saving fastenings, which may be relied upon to hold, in these materials, the Star Expansion Bolt is said to be unequalled. Their use among contractors, builders and plumbers is very general and steadily increasing, and dealers covering these lines may do well to investigate their advantageous merits.

The lag screw type of the Star Expansion Bolt is the simplest made—expansion parts consisting of two malleable iron shields so constructed that they operate, immediately upon entrance of Bolt, to form a positive inside lateral expansion. Fastenings thus effected, possess wonderful tenacity, and are absolutely dependable.

Star Single and Double Machine Expansion Bolts for heavier constructional purposes are very generally used throughout the country in connection with government, municipal and other important contract work. These are made up in brass, bronze or any other metal specified. A copy of this catalogue will be sent upon request to those interested.

EXISTING EVILS IN THE RELATIONS OF MANUFACTURER TO JOBBER.

The various representative associations of jobbers have been agitating the question as to the relations between manufacturers and jobbers. There has been particularly a discussion as to the evils in the trade resulting from the discrimination on the part of some manufacturers in favor of the woodenware jobbers as compared with other jobbing trade. Mr. John M. Hart, of the John M. Hart Co., Ashland Block, Chicago, Ill., who has been in direct contact with this situation for the past seventeen years, has been asked by many of his jobbing friends his views as to the cause of these conditions with a desire to learn of a feasible remedy. So he has prepared a pamphlet which explains the situation, and which he will gladly forward to any dealer interested on request.

EXPORTS OF MANUFACTURES FROM THE UNITED STATES

Exports of manufactures from the United States in the year just ended aggregated more than 700 million dollars. The Bureau of Statistics of the Department of Commerce and Labor has completed the figures for the eleven months ending with November, and adding to these a conservative estimate for December finds that the total exports of manufactures for the full year will, beyond question, exceed 700 million dollars. Ten years ago, in the fiscal year 1896, they amounted to but 258 millions; in 1886, but 145 millions, and in 1876, 105 millions. The share which manufactures formed of the total exports was, in 1906, 42 per cent.; in 1896, but 30 per cent.; in 1886, but 22 per cent., and in 1876, 20 per cent. Thus the exports of manufactures in 1906 are three and one-half times as great as a decade ago, and the share which manufactures form of the total exports about one-third greater than at that time.

This is the first time that exports of manufactures have crossed or even approximated the 700 million dollar line. Even in the fiscal year 1906, which is only six months away, the total exports of manufactures were but 686 millions; in 1905, 612 millions; in 1904, 523 millions; in 1903, 468 millions; in 1902, 454 millions; in 1901, 466 millions; in 1900, 484 millions; in 1899, 380 millions, and in 1898, 325 millions. Thus the exports of manufactures in the calendar year 1906 are actually twice as great in value as in the fiscal year 1898, having thus doubled in eight years.

Practically one-half of the manufactures exported from the United States goes to Europe, the great manufacturing section of the world. Of the 686 million dollars' worth of manufactures exported in the fiscal year 1906, 218 million dollars' worth went to Europe, 182 millions to North America, 30 millions to Oceania, and 13 millions to Africa. Of the 318 million dollars' worth of manufactures sent to Europe, 73 millions was manufactures of copper, 46 millions mineral oil, 44 millions manufactures of iron and steel, 32 millions manufactures of wood, 27 millions leather and manufactures thereof, 16 millions naval stores, 13 millions agricultural implements, and the remainder miscellaneous manufactures. Of the 182 million dollars' worth of manufactures sent to the various countries of North America, 72 millions was iron and steel manufactures, 18 millions wood manufactures, 10 millions cotton goods, 8 millions leather and manufactures thereof, and 7½ millions cars and carriages.

The United States now holds third rank among nations as an exporter of manufactures. The total exports of manufactures from the United Kingdom in the latest year for which statistics are available were 1,333 million dollars; from Germany, 910 millions; from the United States, 700 millions; from France, 661 millions; from Netherlands, 347 millions; from Austria-Hungary, 215 millions; from Belgium, 204 millions; from Italy, 200 millions; from Switzerland, 141 millions, and from Russia, 117 millions. It will thus be seen that in this grouping of the world's great exporters of manufactures the United States now stands third in the list, though it is proper to add that the figures for the United States are for the calendar year 1906, while those for practically all the other nations quoted are for the year 1905.

Manufactures form, however, a much larger percentage of the exports of the great manufacturing countries of Europe than they do of the exports of the United States. The share which manufactures form of the exports of the United Kingdom is 83 per cent.; Switzerland, 76 per cent.; France, 70 per cent.; Germany, 67 per cent.; Italy, 60 per cent., and of the United States, as above indicated, 43 per cent. in the calendar year just ended.

The value of manufactures now entering the world's international commerce now aggregates about 5 billion dollars, and the United States thus supplies nearly 15 per cent. of that total.

In the table which follows, showing the value of manufactures exported from the principal manufacturing countries of the world, the figures for the fiscal year 1906 have been used in the case of the United States, since the exact figures for the calendar year are not yet available, though the Bureau of Statistics has already approximated that the total exports of manufactures in the calendar year 1906 will, as above indicated, exceed 700 million dollars. All figures quoted regarding the United States are those of the new classification, adopted by the Bureau of Statistics, July 1, 1906, but applied also to the commerce of earlier years.

TOTAL DOMESTIC EXPORTS AND EXPORTS OF DOMESTIC MANUFACTURES FROM THE PRINCIPAL MANUFACTURING COUNTRIES IN THE LATEST AVAILABLE YEAR.

	Total domestic exports.	Exports of manufactures.	Per cent. of total exports.
	Dollars.	*Dollars.*

*Fiscal year 1906.

F. E. MYERS & BRO.

From F. E. Myers & Bro., Ashland, Ohio, the authority on pumps, we have received the following. We see they have found 1906 the banner year in their history:

Editor HARDWARE:

We have high hopes of a very satisfactory pump trade in 1907, especially on the Myers Double-Acting Force Pump, which is really what a pump should be in light of the buying power of the consumer and the corresponding efforts that the dealer should make for the further introduction of the pump that possess the advantages of fire protection, washing of buggies, sprinkling of lawns, irrigating, etc., in addition to being a water-lifter.

From the standpoint of our individual experience, we cannot help but feel that your numerous readers are and will continue to enjoy a full share of prosperity looked for in 1907. Our judgment is that this will be a decidedly favorable year for manufacturers, especially so if we have good crops. We are running full time and full capacity, and have just closed the banner year of our history, and have conditions for another decidedly favorable and encouraging year. We hope that your business and that of your clientage will be correspondingly favorable, and remain,

F. E. MYERS & BRO.

CHICAGO FLEXIBLE SHAFT CO., La Salle Avenue and Ontario Street, Chicago, Ill., have published some very entertaining and unique literature regarding their Clark Carriage Heaters. One booklet is entitled "If you ride in Winter," and is designed to show all who ride on cold days how to keep warm of feet and comfortable of body on the longest trip. A circular accompanies the booklet and is entitled "An Ounce of Prevention," showing how by the use of the Clark Heater heavy colds and pneumonia are prevented. The company refer to these Heaters in their usual characteristic way: "If you ride in Winter the misery and discomfort of every drive may be entirely done away with through the use of a Clark Carriage Heater. These miniature metal stoves fit in snugly at the feet in any style of conveyance, whether it be carriage, wagon, sleigh or automobile. They radiate a strong, healthful heat that keeps the occupant warm and comfortable all over throughout the longest drive. About every ill resulting from Winter drives is directly traceable to cold feet. If the feet be kept warm, there is a feeling of warmth all over. Clark Heaters are so shaped that the feet rest right on them in a natural and easy manner, thereby securing the direct heat as it comes from the heater. The degree of heat radiated can be controlled perfectly by the ventilators so that one may have as much or as little as is needed, depending on the coldness of the day."

HE GETS IT IN THE NECK.

Goodman—Did yo uever learn t ocarve a turkey?

Selfish—Never! I could never see the wisdom of putting yourself in a position when you must offer everybody his choice and content yourself with whatever happens to be left.

Trade Meetings

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

The following letter has been sent by Secretary Webber to the members of the Association under date of December 27, 1906:

THE MEETING PLACE FOR 1907.

To the Members of the Southern Hardware Jobbers' Assn.:

GENTLEMEN:

The Southern Hardware Jobbers' Association will meet June 11-14, inclusive, 1907, at The Jefferson Hotel, Richmond, Va. Below I give the rates. Single rooms, without bath, $4.00; with bath, $5.00 per day. Double rooms, one person, without bath, $5.00; with bath, $6.00; two persons, without bath, $7.00; with bath, $8.00 per day.

The American plan only will prevail. I will ask each one who attends to make reservations direct with the hotel management, and not through this office. I have forwarded a list of our members to the management and will ask that those who ask for reservations state the firm represented and that the reservation is for this occasion. In this connection I do not think it amiss to urge our members to make strenuous efforts to be in attendance. Richmond presents some points of rare interest, and being associated with some of the dearest traditions of the South, is peculiarly fitted to call forth the largest number of our members ever assembled. Unless we attend on these meetings, give our best thought and talent to the deliberations there had we can never hope to assume that commanding position to which we are entitled. The Jamestown Exposition is near, and doubtless an arrangement for a trip there can be perfected.

W. W. WEBBER, *Secretary-Treasurer.*

AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION.

DEAR SIRS:

The Twelfth Convention of this Association will be held concurrent with the Seventeenth Annual Convention of the Southern Hardware Jobbers' Association, at Richmond, Va., June 14th, 1907, with headquarters for both Associations at "The Jefferson," which will make the following rates to delegates and visitors:

AMERICAN PLAN.

Single room, without bath, one person, $4.00 per day.
Single room, with bath, one person, $5.00 per day.
Double room, without bath, one person, $5.00 per day.
Double room, with bath, one person, $6.00 per day.
Double room, without bath, two persons, $7.00 per day.
Double room, with bath, two persons, $8.00 per day.

The Jefferson is being remodeled, and the new additions, which will be ready for occupancy in February, will include 300 sleeping rooms and the principal public rooms of the hotel. All sleeping rooms have hot and cold running water, long distance telephone, and good natural light, and the hotel is well adapted to our Convention requirements.

Richmond was the unanimous choice of the Committees appointed by the S. H. J. A. and the A. H. M. A. to select the seat of our next Joint Convention, and as many of the delegates will wish to visit the Jamestown Exposition, it is now thought quite probable that arrangements will be made to complete the work of the Committees by the evening of June 13th, to admit of an all-day trip by rail and boat on the 14th to view the fleet of war vessels assembled in Hampton Roads, and visit the Jamestown Exposition.

All applications for reservation in the headquarters hotel should be addressed to P. M. Fry, Manager, The Jefferson, Richmond, Va., and include such information regarding delegates being accompanied by ladies, parlors for display purposes, rooms desired en suite, etc., as will enable the hotel management to intelligently anticipate the accommodations desired. Manager Fry has been furnished with lists of the membership of both Associations, and we would suggest that where the application is made on other than the company's stationery, the applicant should state his connection with membership.

We enclose herewith list of Standing Committees appointed for the present Association year, and beg to advise each Chairman will be glad to receive communications from any member upon any subject within the scope of his Committee work.

Yours very truly,

F. D. MITCHELL,
Secretary-Treasurer.

STANDING COMMITTEES.

HUMOROUS LOGIC.

What is the need of raising the salary of Congressmen? The jobs seem to be in great demand at the present figures.

According to a London physician, music will cure alcoholism, and in the face of this great discovery the police are forcing the saloons to throw out their self-playing pianos.

We notice that the Chicago public schools have added hugless dancing and waterless swimming to the list of educationless accomplishments to be taught the Chicago youth.

F. J. Hoel, treasurer of the McCord-Brady Co., of Omaha, Neb., and wife were presented with a girl baby last Christmas. The Hoel family is still rejoicing.

More people swore off the first of this year than usual. There was all the manufacturers of impure food and most of the habitual users of railroad passes added to the list.

A girl out in Wichita, Kan., got married the other day, and can hardly be blamed for wanting to change part of her name, as the old combination was quite suggestive, being Carrie Wood.

It is understood that when Mr. Bryan recently remarked that the nomination for the presidency was "an honor no American should decline" he was not speaking of the present occupant of the presidential chair.

The fact that the death rate is a third below the average in the Middle West is not worrying the undertakers. A new use has been found for coffins. They are now used for the shipment of game through States having a strict game law.

There must have been something very attractive about that investigation of what pure whiskey really is. We note that Secretary of Agriculture Wilson has decided to pay another visit to the distilleries. Some of the scenery around these distilleries is said to be beautiful.

It is very clear that the shippers are to blame for all the car shortage. The railroads are unanimous in saying so. In fact the shippers seem to be blamed for everything except the railroad dividends. They all come from good management on the part of the officials.

If Uncle Sam ever takes control of the railroads, after finding people to operate them who will not stoop to graft, the next step will be to build a pontoon bridge under the entire right-of-way, to keep it from sinking in the oceans of watered stock, already issued and still being issued "for improvements."

RIGHT TO SALARY OF SURVIVING PARTNER.

QUESTION: A and B were partners sharing equally in profits and losses. On February 17th, 1891, B died without leaving any will. A and B's widow were appointed administrators. A continued the business until 1894 and continued to draw out the same weekly salary he had been drawing before B's death. All this was done without the consent of any of the persons interested in B's estate. There is no doubt that A's services in continuing the business were worth the salary which he drew. Under all the circumstances was he justified in taking it?

REPLY: We think not. It has long been the well-established rule that a surviving partner should not be allowed any compensation for his services in liquidating the business. It is the duty of an administrator to dispose of the business and convert it into cash with all reasonable dispatch and a continuance of the business beyond a reasonable time is unauthorized. An administrator is ordinarily confined to the fees or commissions prescribed by statute. It follows that since the business was continued for the benefit of the estate of the deceased partner, the administrator cannot receive any compensation other than the commissions allowed by law. If, however, he had continued the business at the request of all parties in interest and they were competent to consent, then doubtless he would have been entitled to receive the salary which he appears to have justly earned. But you expressly state that what he did was without the consent of those interested in the estate.

SAVINGS BANK DEPOSIT—PAYABLE TO SURVIVOR.

QUESTION: John Smith and Sarah Smith each had an account in the savings bank and each had a separate book. Shortly before Sarah Smith's death they both signed a paper directed to the bank which read like this: "We, the undersigned owners of bank books Number 23661 and Number 25172 issued by your bank, desire to have the account therein merged into an account running to John Smith or Sarah Smith or to the survivor. Our object being that in case of the death of either, the other may draw the whole amount." Two days after signing this paper Sarah Smith died leaving a will which bequeathed all her property to other relatives. Who is entitled to the money?

REPLY: If the paper or instrument was delivered to the savings bank and acted upon by the savings bank prior to the death of Sarah Smith, we think that it was effectual to vest title to the entire fund in her husband John Smith upon her decease. The paper was executory until its delivery to the bank and could consequently be revoked by either party at any time and would be revoked by the death of either prior to such delivery. But after it had been delivered to and acted upon by the bank during the lifetime of both parties, it became effective to vest title to the entire deposit in the survivor upon the death of either.

MONEY PAID UNDER FALSE PRETENCES MAY BE RECOVERED.

QUESTION: In answer to a newspaper advertisement, I invested $400 in forty shares of stock of a company which was represented to me to be earning about $5,000 a year and to be the owner of about ten miles of very valuable land in West Virginia. I relied on these representations in investing my money. It now turns out that the company never owned any land in West Virginia or elsewhere and was not earning anything. What can I do to get my money back?

REPLY: You can rescind your contract on the ground of fraud, offer to restore the shares of stock delivered to you and sue to recover whatever you have paid. You may also keep the stock and sue for damages for the fraud. Furthermore it appears that this money has been obtained from you by false pretences, and a criminal prosecution will lie against the person who made these representations to you knowing them to be false.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED DECEMBER 17, 1906.

417,240. WINDOW BLIND FASTENER. G. J. Frost, Toronto, Ontario, Canada.
417,285. SAD IRON. A. Rosa, Milwaukee, Wis.
417,326. INDICATOR LOCK. W. H. King, Newark, N. J.
417,403. WINDOW SCREEN. J. Chelini, Washington, D. C.
417,602. PADLOCK. J. Straubinger, Newark, N. J.
417,679. WASHING MACHINE. A. A. Neff, Hill Grove, Ohio.

PATENTS ISSUED DECEMBER 18, 1906.

838,552. CONVERTIBLE MONKEY AND PIPE WRENCH. J. T. Landers, Atlanta, Ga.
838,578. INSTANTANEOUS WRENCH. E. L. Perry, Brooklyn, N. Y.
838,597. HOOF NIPPERS. H. B. Ward, Nampa, Idaho.
838,667. HEATING STOVE. E. G. Thomas, Markle, Ind.
838,677. ANGLE BIT BRACE. J. H. Ackermann, Springfield, Ohio.
838,762. SAFETY RAZOR. F. H. Arnold, Reading, Pa.
838,799. HINGE. H. J. Nagle, Abbottstown, Pa.
838,808. LOCK MECHANISM. B. Phelps, Seattle, Wash.

PATENTS EXPIRED DECEMBER 24, 1906.

417,705. SIGNAL LANTERN. F. P. Copper and Alvin Bair, Tiffin, Ohio.
417,722. SCREW DRIVER. D. R. Hart, New York, N. Y.
417,873. PERMUTATION LOCK. A. C. Lawrence, Toronto, Ontario, Canada.
417,880. WASH BOARD. P. Pfanschmidt, Chicago, Ill.
417,945. WINDOW SCREEN. O. Rolen, Galesburg, Ill.
417,968. WRENCH. A. J. Barber, Auburn, N. Y.

PATENTS ISSUED DECEMBER 25, 1906.

839,087. LADDER. H. Adler, Pittsburg, Pa.
839,102. WRENCH. C. H. Brooks, Clearmont, Wyo.
839,176. COMBINATION TOOL. T. E. Morriss, Forestburg, Tex.
839,197. WIRE HINGE. W. G. Powell, W. B. and J. L. Powell, Shadeland, Pa.
839,333. PERMUTATION LOCK. A. J. Stolt, Manistee, Mich.
839,343. HEATING DEVICE. F. M. Vogel, Lynn, Mass.
839,474. COMBINED FENCE MAKING TOOL. W. S. Guinter, Jefferson, Wis.

"THE MAN BEHIND THE GUN."

A man came into police court the other day carrying a friend on his back. "What's the matter?" asked the judge. The man answered: "Judge, this man is a friend of mine, and his name is Gunn. Now, Gunn is loaded,—half-shot. I know that it's against the law to carry a loaded gun on the streets, so I brought him in here." The judge said: "Gunn, you are discharged." And the next day the report was in the papers. Gunn's employer saw it and Gunn was fired.

GOODELL MITRE BOX

Made entirely of steel. No more breaking. Its quality, durability and improvements make it the most desirable box on the market.

MERCHANTS' ASSOCIATION OBTAIN REDUCED RATES.

The Merchants' Association of New York announces that merchants' rates from the Central West, which is designated by the railroads as Central Passenger Association Territory, will be in effect to New York City on February 9-13, inclusive, and March 2-6, inclusive, with a thirty-day return limit. The special rate is a fare and one-third for the round trip, the reduction being granted under the certificate plan.

The railroads' members of the Central Passenger Association traverse the following section:

Points West of (but not including) Buffalo, Niagara Falls, Suspension Bridge and Salamanca, N. Y.; Pittsburgh and Allegheny, Pa.; Bellaire, Ohio; Wheeling, Charleston and Huntington, W. Va., and points on and North of the Ohio River and East of the Mississippi River, and South of a line from Keokuk, Iowa, to Chicago, Ill., including Cincinnati, Louisville, all towns in Kentucky on the Chesapeake & Ohio Railway, Cairo, St. Louis, Keokuk, Chicago, the Southern Peninsula of Michigan, and Canadian towns on the Michigan Central R. R. and Wabash R. R.

Efforts are now being made by The Merchants' Association of New York to arrange merchants' rates to the metropolis from the Southwest.

The circular announcements of the Association, which give full particulars of the rates, will be issued in about two weeks and subsequently forwarded to the out-of-town merchants in the different sections of the country.

HARDWARE AND IMPLEMENT DEALERS OF THE COAST.

The following has been forwarded to the dealers of the territory named from Spokane, Wash., December 30, 1906:

To the Retail Hardware and Implement Dealers of the Pacific Coast:

GENTLEMEN:—The Hardware and implement dealers in the Pacific Coast States are now thereby organized, each having their local State Associations, all doing good work. These include in their membership the best element in the retail trade in these two lines, Hardware and Implements, and command the earnest attention and the friendliest co-operation of all the jobbers and manufacturers whose lines they distribute. May this always be so.

The experience of the past few years has demonstrated that there is need for the earnest co-operation upon the part of the retail trade throughout this section of the country for some arrangement whereby large questions not local in their nature, but applying with equal force to all the retailers of Hardware and implements, can be handled.

Therefore, for the purpose of organizing the retail dealers in Hardware and implements in the States of Montana, Washington, Idaho, Oregon, California, Nevada, Colorado and Arizona into one big association which shall have charge of handling all questions in which all are mutually interested and affected, a meeting will be held in the city of Portland, Ore., on February 11, 1907. The name of this organization will be "The Pacific Federation of Retail Hardware and Implement Associations." or such other suitable name as the dealers in convention may elect. The exact place of meeting in Portland will be announced in next issue, as these arrangements have not been completed. A most cordial invitation is extended to every retail Hardware or implement dealer in the States named to attend, and take part in helping to organize. Special rates on all roads entering Portland will be assured, and these will be announced later.

Let the cry be "On to Portland," and let every dealer boost for his own welfare by attending the meeting, and urging everyone also connected with the trade to also attend. Hoping to meet you in Portland.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Batesville, Ark.—The Rosenthal Hardware Co. has filed articles of incorporation showing a capital stock of $50,000, of which $16,000 has been paid up. The corporators are Charles T. Rosenthal, president; Carl Rosenthal, vice-president, and George Rosenthal, secretary and treasurer.

Brandon, Man.—The Hanbury Hardware Co., Ltd., with a capital stock of $300,000 is among the recently incorporated companies. The incorporators are John Hanbury, John M. Brown, E. H. Johnson, G. R. Coldwell.

Bruning, Neb.—C. E. Van Buren has opened a new Hardware store.

Cadiz, Ky.—Cadiz Hardware Co. has been incorporated with $25,000 capital stock. The incorporators are Ben. T. White, J. P. White and G. I. Brandon, of Cadiz.

Cairo, Ill.—J. B. Reed proposes to erect a two-story brick business house fronting on Tenth street, in which he will establish a retail Hardware store on a large scale.

Custer City, Okla.—Proffitt, Moody & Rhymer have incorporated with a capital of $6,000 to conduct a Hardware, stove, implement, paint and sporting goods business.

Deshler, Neb.—R. H. Kiene has engaged in the Hardware business.

Gaffney, S. C.—The secretary of state has commissioned the Wilkins-Watson Hardware Co. The capital is $15,000.

Lawrenceville, Va. Thomas Hardware Company has been incorporated. Incorporators: W. S. Thomas, president; C. R. Elam, vice-president; W. G. Jackson, secretary and treasurer—all of Lawrenceville. Capital stock: Maximum, $25,000; minimum, $10,000. Objects and purposes: Hardware business, wholesale and retail.

Leonardville, Kan.—The Bardwell Hardware & Implement Co. has been incorporated with a capital stock of $10.000.

Lincoln, Neb.—The articles of incorporation of the Henkle-Joyce Hardware Co. have been filed. The articles call for the actual paid in capital stock of $150,000. Elmer E. Henkle and Robert M. Joyce are the incorporators. The company will conduct a wholesale Hardware business, taking over the wholesale end of the Lincoln Hardware company's business, of which the incorporators have been the head. They have sold the retail business to the Hardy Furniture Co. The new house has a plant in the wholesale district.

Mebane, N. C.—The Tyson-Malone Hardware Co. has been incorporated. The business proposed to be done will be to conduct and carry on in all its branches a wholesale and retail general Hardware business. The incorporators are Messrs. G. D. Tyson, W. Y. Malone and R. H. Tyson. The capital stock is $25,000.

New Rochelle, N. Y.—The firm of Bedford & Sullivan will shortly open a Hardware store on Main Street.

Scandia, Kans.—Mr. Hohr will open a Hardware store.

Tacoma, Wash.—Stevens & Hood have engaged in the Hardware business.

Tekamah, Neb.—The E. W. Shafer Hardware Co. has been incorporated with a capital stock of $10,000.

Changes and Improvements.

Aberdeen, S. D.—The Jackson Hardware Co. will erect a new $40,000 modern building.

Adams, Neb.—W. E. Hall & Co. have sold their Hardware business to H. J. Merrick.

Alliance, Ohio.—Announcement is made that the Allott-Kryder Hardware Co. will in the early Spring begin the erection of a mammoth new six-story building on the corner of Main Street and the public square to cover the site of their present building. The new building will be up-to-date and modern in every respect. Their location is one of the best in the city, and the new block will, when completed, present an imposing appearance.

Athena, Ore.—The partnership of Cox & McEwen, in existence for several years in the Hardware business, has been dissolved by mutual consent. Mr. McEwen purchased the interest of Mr. Cox and will continue the business.

Ballard, Wash.—Edward G. Crossett has bought the interests of his partner, Fred Wright, in the Crossett & Wright Hardware store at 238-240 Ballard Avenue and is now in possession.

Baltimore, Ohio.—E. E. Bright, of the firm of Hansberger & Bright, Hardware dealers, has severed his connection with the firm the first of the year, and will travel for the Frank Winter Hardware of Lancaster.

Berkley, Va.—C. B. Gibbs, whose store, it will be remembered, was destroyed by fire some months ago, has moved into his new store, erected on the site of the one destroyed. He has installed an immense stock of Hardware, fancy cutlery, enameled ware and carpenters' tools.

Blaine, Wash.—Wolton Bros. have been succeeded in the Hardware business by Wolton Bros. & Montfort.

Brainard, Neb.—Barnes-Havlik Hardware Co. have sold their Hardware stock in Brainard.

Braman, Okla.—D. F. Mooter disposed of his Hardware and implement business to a Mr. Wallace, and in a few days Mr. Wallace sold it to a Mr. Hunt of Kansas who in turn has sold it to a Mr. Dillingham, who now is in possession.

Brayton, Iowa.—George Fredericksen has sold his Hardware store to S. Anderson.

Burwell, Neb.—E. H. Doran has sold his store to the Burwell Hardware Co.

Central City, Neb.—S. B. Knudsen has sold his Hardware store to W. Peterson.

Creston, Iowa.—W. A. Butzloff has sold his business to the Creston Hardware Co.

Dakota, Neb.—George Ford has sold his interest in the Homer Hardware & Lumber Co.

Danbury, Neb.—Henry Goodenberg has purchased the Hardware business of J. L. Sargent.

Davenport, Iowa.—According to present arrangements the business of the well-known firm of Rascher, Schricker and Rascher will shortly pass into new hands. The new owners will be Frank Strohkarck, Henry Stehn and Adolph Eckermann, all at present being employes at the Hanssen Hardware store.

Delavan, Kan.—J. M. Moore has purchased the business of the Kingman Hardware Co.

Dubois, Neb.—Fay Scott, formerly of Tecumseh, has embarked in the Hardware and furniture business at Dubois.

Edgerton, Mo.—The Thomas Hardware Co. has succeeded to the business of Hughes & Tracy.

Edmond, Okla.—Trout & Thompson have purchased the Hardware stock of Lynch & Starr.

Ellinwood, Kan.—M. Dick has sold his Hardware business to Petz & Schwartz.

Emporia, Kan.—J. E. Kincaid has sold his Hardware business to B. J. Crosswhite.

Esbon, Kan.—The F. A. Vance Hardware Co. has succeeded to the business of Ryan, Frost & Cole.

Eureka, Kan.—Stewart Bros. & Co. have succeeded to the Hardware business of Stewart Bros.

Fairmount, Ind.—A deal has been closed by which Ellis Wright sold his interest in the Driggs, Wright & Wiley Hardware firm, the other members of the firm buying his interest. The new firm will be known as Driggs & Wiley.

Fond du Lac, Wis.—J. F. Wegner & Co. have bought the entire stock of Hardware, stoves, etc., of George P. Dana.

Gage, Okla.—J. J. Bennett has purchased the Hardware business of George C. Naden.

Gallatin, Mo.—Rush Hill of Maysville has closed a deal with Howard Poage for his stock of Hardware, implements, buggies, etc.

Gem, Kan.—Eugene Eaton has sold his Hardware store to Treat Bros.

Hereford, Tex.—C. S. Garrison has purchased the half interest of his brother, W. H. Garrison, in the firm of Garrison Bros.

Howard, Kan.—Resler & Johnson have purchased the Hardware business of J. Q. Burchfield, Jr.

Irwin, Iowa.—T. E. Averill has sold his Hardware store to W. W. Ames.

Jennings, Kan.—Bradbury & Noone have been succeeded in the Hardware business by W. P. Noone.

Kansas City, Mo.—The Townley Metal & Hardware Co. is building a five-story addition to its warehouse.

Kingston, Tex.—E. M. Taylor has sold out his Hardware business to Morgan & Marphew.

Kremlin, Okla.—Ishmael Bros. have sold their Hardware store to G. R. Williams.

Larrabee, Iowa.—Conrad F. Troeller has sold his Hardware store to F. J. Drilling.

Laurel, Iowa.—M. W. Fritz has purchased the Hardware store of J. E. McClintock & Co.

Mound City, Kan.—E. N. Gause has sold his Hardware store to C. W. Kingsbury.

New Waterford, Ohio.—The well-known firm of Williamson & Donbar, Hardware dealers, will soon go out of existence. They have sold to J. W. Montgomery, of Sewickley, Pa.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Brooklyn, N. Y.—Gas Stove Mantel Co. has been incorporated with a capital of $50,000. Directors: C. A. Jayne, G. G. Baxter and Stockbridge Bacchus, Brooklyn.

Brooklyn, N. Y.—Wetzelham Mfg Co., has been incorporated to manufacture heavy Hardware and conduct a foundry and machine shop. Capital, $25,000. Incorporators: J. Wetzelham, New York City; A. E. Dubey, J. J. Leary, Brooklyn.

Buffalo, N. Y.—Blennerhasset Gas Light Co. has been incorporated to manufacture gas stoves and gas and electrical appliances with a capital stock of $2,000. Incorporators: Wofford Brown, C. W. Whitsell, William R. McConnell, Buffalo, N. Y.

Buffalo, N. Y.—Stevenson Machine Co. has been incorporated for the purpose of manufacturing machinery, tools, etc; capital, $100,000. Incorporators, C. P. Stevenson, G. L. Kelly and A. Baker, Buffalo.

Buffalo, N. Y.—W. G. King Co. has been incorporated for the purpose of manufacturing machinery, tools, mechanical devices, etc.; capital, $100,000. Incorporators: W. G. King, C. F. Kilhoffer, W. L. Marcy, Buffalo.

Chicago, Ill.—Justrite Co. has been incorporated with a capital of $15,000; manufacturing Hardware and household goods; incorporators, Rudolph William Lotz, Arthur C. Lotz, R. P. Burkhalter.

Cuba, N. Y.—A company has been formed with $20,000 capital which has purchased the business of the Ohio Pulley Co. of Marion, O. The incorporators are Henry C. Morgan, Charles A. Ackerly, the president; A. S. Stevens, John Bresnihan, George H. Eldridge, Charles Olive and F. L. Sibley. H. Paul Morgan is secretary and treasurer. The company is to manufacture wood pulleys. It will employ from 25 to 30 men.

Hamilton, Ont.—The incorporators of the Safety Door Hanger Company, Limited, of this city are William VanBuskirk Topping and Edward Weston Topping, of Ashland, Ohio, J. W. Nesbitt, K, C., J. G. Gould and James Dickson of this city. The company is empowered by its charter to take over the business of the Safety Door Hanger Company, of Ashland, to manufacture buy, sell and deal in door hangers, Hardware and Hardware specialties.

Kittery, Me.—Blanchard Total Combustion Gas Stove Co. has been incorporated to manufacture heat and power devices; capital, $50,000. President, O. S. Paul, Kittery; treasurer, H. P. Knowlton, Malden, Mass.

Lafayette, Ind.—Capitalizing at $50,000, the Indiana Picker and Husker Co., with R. K. Carpenter, Bert J. Kaull, Adam Wallace, H. L. Steele and A. O. Behm as stockholders, has secured articles of incorporation and will proceed to manufacture a new picker and husker, a farming implement.

Louisville, Ky.—The National Nut Co. has been incorporated with a capital stock of $1,000. The incorporators are Alfred and G. Isenberg and Sol and Joseph L. Isenberg.

Middletown, N. Y.—The Tuthill Screen Co. has recently filed articles of incorporation. The capital stock is $25,000. The officers of the company are: President, William F. Heuser, of Cochecton; vice-president, C. A. Ketcham, of Middletown; secretary and treasurer, Harry W. Tuthill, of Middletown. The company is engaged in the manufacture of a patent window screen, of which Mr. Tuthill is the inventor. The business of the concern will be under Mr. Tuthill's immediate supervision. The company, which now has a factory on Henry street, will shortly remove to larger quarters in the Randall Building, on Mill street. The concern will employ mostly girls. Surpless, Dunn & Co., of New York, will be the sales agents for the United States.

Newark, N. J.—Sleeth, Brook & Seaman Co. has been incorporated for the purpose of manufacturing wire, metal and wooden products, capital, $100,000. Incorporators: G. C. Sleeth, Newark; A. T. Brook, G. S. Seaman, Brooklyn, N. Y.

New York, N. Y.—Leighton Lock Protector Company has been incorporated to manufacture locks; capital, $25,000. Directors—C. E. Leighton, Brooklyn; L. S. Williams, New York; H. M. Marble, Newark, N. J.

New York, N. Y.—The American Wire Form Co. has been incorporated for the purpose of manufacturing wire baskets, card holders, etc.; capital, $20,000. Incorporators: W. F. Goodnough and H. E. Chapman, New York City; F. N. Lash, Monsey.

New York, N. Y.—The Brown Supply Co. has been incorporated for the purpose of manufacturing Hardware, cutlery, etc.; capital, $10,000. Incorporators: I. Brown, J. Schlyen, S. Deitz, New York City.

Port Byron, N. Y.—The Forbes-Hutchinson Co. has been incorporated to manufacture book straps and fasteners, wire specialties and metal goods; capital, $100,000. Incorporators: P. J. Forbes, F. C. Hutchinson, C. W. Walker, Brooklyn.

Sanford, Me.—United States Fireless Cooker Co. has been incorporated to manufacture cooking utensils; capital, $300,000. President and treasurer, B. A. Leavitt; clerk, F. J. Allen, both of Sanford, Me.

Toledo, Ohio.—The Toledo Nut Lock Co., with a capital of $60,000 has been incorporated by Edward M. Gale, Benjamin Tanner, Mary C. Smith, Robert B. Wilson and Wm. E. Brown. The company will manufacture and place on the market a patent nut and lock, the invention of an Indiana man. The concern is being promoted by Messrs. Gale and Tanner, the former of this city and the latter of Sturgis, Mich. It is the intention to erect a factory in East Toledo for the manufacture of the company's product.

Changes and Improvements.

Chicago, Ill.—The Grand Crossing Tack Co. has completed the purchase of twenty-eight lots lying between Seventy-seventh and Seventy-eighth streets, title being taken for convenience by John T. Edwards. The company will eventually extend its plant to include part of this property.

Manor, Pa.—The Beamer Pick & Axe works has been taken over by the Consolidated Handle Co., a $1,000,000 corporation.

New Albany, Ind.—George D. Todd, who is engaged in manufacturing hames and Hardware in New Albany, has plans under consideration for the erection of an extensive malleable iron foundry adjoining his plant. Twelve acres of ground have been secured near Mr. Todd's present plant which is along the line of the Pennsylvania railroad, and also within reach of the Southern and B. and O. S-W. railroads. The plant will cost about $200,000, and will give employment to several hundred men.

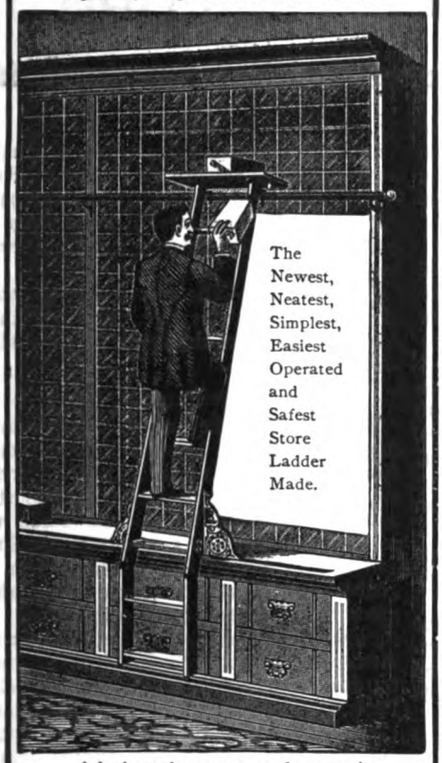
New Britain, Conn.—The Stanley Works, manufacturer of builders' Hardware, is to build an addition to its factory building No. 6, to be 40x50 feet, five stories, to be used for manufacturing purposes.

Newcomerstown, O.—The Rex Saw and File Co. has decided to erect a large addition, the growth of the business having been such that the present plant is inadequate to meet the demands made upon it. This company was formerly located in Jamestown under the name of Jamestown File Co., and among those identified with it are William Hjorth, Arthur W. Hjorth and Roland M. Taylor of this town.

Omaha, Neb.—The Nebraska - Moline Plow Co. has decided to add two stories to its four-story structure at 808 Leavenworth street.

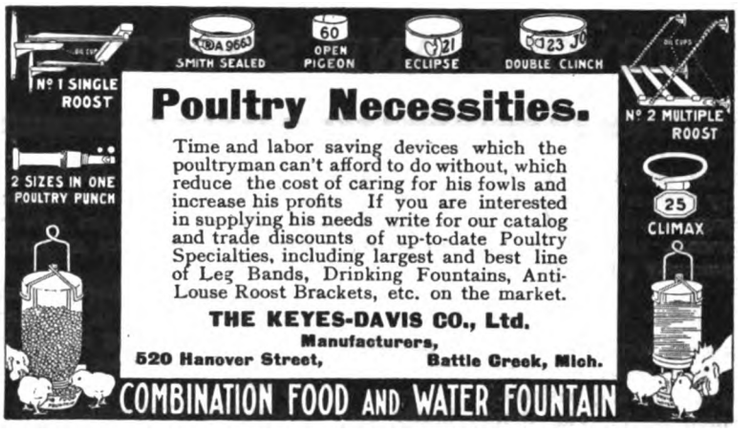
Rock Island, Ill.—At a cost of $40,000 the Rock Island Plow Co. of Rock Island, Ill., has purchased a desirable location in the immediate implement district near the Tenth Street viaduct and depot. The ground comprises one lot and a half, being 99x140 feet, but the exact location has not been announced. Upon this property they will construct a building costing about $75,000, six stories in height. The building will occupy 90x120 feet of the purchased property, leaving room for the necessary platforms.

Smith's Falls, Ont.—There is no trace left of the disastrous fire which recently visited the plant of Frost & Wood, and did such extensive damage. The rebuilding has been pushed so rapidly that only a short interruption resulted in the large business done by this firm. Now the ploughs, reapers and other farm implements which they manufacture, are being turned out in increased perfection of workmanship on account of the new machinery and appliances necessitated by the destruction of the machinery formerly used.



Fires.

Chicago, Ill.—The building at Nos. 107 and 109 Lake Street, occupied by the Corbin Cabinet Lock Co. and several manufacturers, has been burned with a loss of $150,000.



Newark, N. J.—Plant of the Newark Rivet Works at No. 262 Lafayette Street, has been damaged by fire to the extent of $5,000. Insurance $425,000.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Brandon, Man.—The Hanbury Hardware Co. is to establish a Hardware and sporting goods jobbing business.

Elmira, N. Y.—The Detroit Motor Car and Supply Co. has recently been incorporated in Albany. The directors are Frank E. Weston, formerly connected with the Eclipse Bicycle Company of this city; A. P. Morrow, head of the Reliance Motor Cycle Company of Elmira Heights and J. A. Van Wie, manager of the Cortland branch of the Elmira Arms Co. Frank E. Weston and John N. Willys have incorporated the J. N. Willys Company. The two companies will be the sole agents for the new Detroit machine.

Hartford, Conn.—The Elastro Mfg. Co. has been organized under the laws of that State to manufacture a rubber compound for filling tires. Its officers are: President and treasurer, Halsey B. Philbrick; vice-president, Charles H. Cooley; secretary, Edward S. Young, and Charles H. Cooley, Jr., and Leroy S. Lewis, all of Hartford.

Jersey City, N. J.—The Jersey City Sporting Goods Company have incorporated to manufacture and deal in sporting goods; capital, $10,000. The incorporators are: E. Van Slyke, E. J. Van Slyke, Riverside-on-the-Hudson, and O. J. Van Slyke, Jersey City, N. J.

Lamont, Alberta.—Thomas Wallace has opened a Hardware and sporting goods store.

Lavoy, Alberta.—H. B. Hughes has opened a Hardware and sporting goods store.

Louisville, Ky.—The Anglers' Rod Company have incorporated with a capital stock of $60,000. Incorporators: H. W. Buschmeyer, C. L. Sehon, C. C. Early, J. C. Burnett and R. W. Bingham. They will manufacture fishing rods.

New York, N. Y.—I. Davega, Jr., has incorporated to deal in phonographs, bicycles, toys; capital, $10,000. Incorporators: R. Louise Davega, Isaac Davega, Jr., Amunda Ollahengue, New York.

Orillia, Ont.—Thomas Black will establish a Hardware and sporting goods store.

Plainfield, N. J.—Henry C. Squires' Sons has been incorporated to deal in sporting goods, etc.; capital, $100,000. Incorporators: G. H. Squires, W. Squires, Plainfield, N. J.; C. A. Squires, New York City; L. Squires, Plainfield, N. J.

Rochester, N. Y.—Rochester Exhibition Co. has been incorporated to deal in baseballs, etc.; capital, $7,500. Incorporators: C. T. Chapin, A. P. Little, E. F. Underhill, Rochester.

Trenton, N. J.—The National Rifle Supply Company, registered office at 137 East State Street, have incorporated to manufacture targets, rifle range appliances, firearms, etc. The capital stock is given as $100,000 and the incorporators are: A. S. Jones, Passaic, N. J.; H. C. Wilson, New York City; E. J. Dimmick, Washington, D. C.

Washington, D. C.—Charles T. Hickman and Dr. G. H. White have formed a business partnership and are now conducting a sporting goods store at 1319 G Street Northwest.

Changes and Improvements.

Baltimore, Md.—A. G. Spalding & Bros. have leased a building at 208 East Baltimore street. The lease is for a term of five years.

Burlington, Iowa.—Alexander Cairns & Co., manufacturers of oar locks and outriggers of all kinds, have removed from their former home, 24 Walnut Street, Chicago, and are now located in Burlington.

Dickens, Io.—J. T. Cronk has succeeded to the sporting goods business of William McCurdy.

Humboldt, Sask.—O. G. King & Co. has purchased the business of J. H. Lyons & Co.

Milestone, Sask.—The Evans Hardware Co. has purchased the Hardware and sporting goods business of W. H. Pain and H. Hiscox, Vermillion, Alberta, has sold to Heath & Howard.

New York, N. Y.—In its new home, at Nos. 1733 to 1737 Broadway, the Auto Supply Company has installed one of the most complete Hardware and tools departments in the city. This will be especially appreciated by motorists who have in the past been obliged to go to half a dozen places to get automobile Hardware. Motorists will now find at the Auto Supply Company a full line of machine shop and garage requisites, including hard fiber in both sheets and tubes, angle brass for stepboards, tool boxes, etc.; clutch leathers cut to order, genuine camels' hair brake bands of all widths, round leather and rope fan belts, wire cable in all sizes, and new and interesting specialties in tool rolls and boxes.

Philadelphia, Pa.—The A. H. Fox Gun Co. having outgrown its plant at Wayne and Bristol Streets, has purchased the plant and entire equipment of the Philadelphia Arms Co. at 18th and Windrim streets.

Sprague, Neb.—Hale & Stutheit have been succeeded by C. O. Hale. He will handle sporting goods.

Steilacom, Wash.—J. F. Fowler has purchased the Hardware and sporting goods business of the late E. R. Rogers.

St. Paul, Neb.—S. B. Knudson has purchased the sporting goods and Hardware business of William Mathieson.

Taylor, Neb.—J. Rusho, has sold his sporting goods business to W. J. Johnson.

Wawanesa, Man.—M. Fraser has taken over J. J. Storey's Hardware and sporting goods business at that place.

Weyburn, Sask.—C. Warden & Co. have bought out the Hardware and sporting goods business of Thompson & Axworthy.

Fires.

Los Angeles, Cal.—Fire which originated from a pile of rubbish in the rear of the W. H. Hoegee Sporting Goods Company, 138-42 South Main street, did damage to the extent of about $5,000 before it could be checked.

Scranton, Pa.—The sporting goods store of John Rawling at No. 223 Wyoming Avenue, has been damaged to the extent of $20,000 by fire.

Miscellaneous.

Fresno, Cal.—The annual convention of the Retail Bicycle Dealers' Association of Northern California will be held at Fresno on January 21st, 22nd and 23rd. Important matters regarding the bicycle trade will be discussed and new committees appointed and officers elected for the next term. A grand banquet will be given to the delegates at the close of the convention.

New York, N. Y.—The Cycle Parts and Accessories Association has called a meeting for January 16th at the Hotel Knickerbocker. The Cycle Manufacturers' Association meeting occurs on the same date.

Worcester, Mass.—The Royal Motor Works Co. has been incorporated under the laws of Delaware with $100,000 capital stock. Its declared purposes are to produce motor cars, motorcycles and vehicles generally. The incorporators are not named.

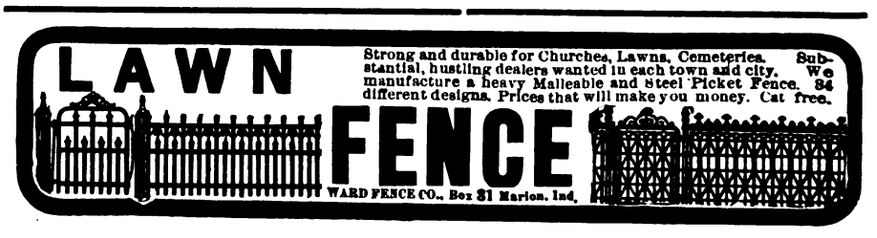
HARDWARE DEALERS.

(Continued.)

Changes and Improvements.

Leonardville, Kan.—E. W. Bardwell has sold his Hardware business to Dodson & Anderson.

Lockhart, Tex.—Joe M. Blanks has sold his extensive Hardware business in the city to his brother, James G. Blanks. An inventory is now being taken and as soon as it is completed the new proprietor will take charge.



Matfield Green, Kan.—G. W. Babcock & Son have been succeeded in the Hardware business by E. W. Babcock.

Montpelier, Ida.—B. H. Bowen has succeeded to the Hardware business of Bowen & Call.

Nelson, Mo.—P. H. Koenig has purchased the Hardware store of T. W. Marr.

Newkirk, Okla.—Bennett & King have purchased the Hardware store of A. R. Moomaw & Son.

Ogden, Utah.—Better equipped in all its branches, with more floor space, more warehouses, and other facilities that increase the efficiency of the present building, as compared with the one wiped out by fire several months ago, the George A. Lowe Hardware Company have moved into the new structure facing Washington Avenue.

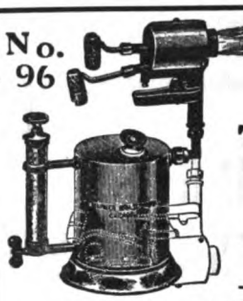
Hight's Union Combination Square

All the Combinations available all the time.

Five Tools in one: 8-inch Try Square, Bevel, Butt Gauge, Marking Gauge and Mitre

If you want to keep your stock up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner.



If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices and full description sent on application.

The best tool of its kind on the market.

STOVE MANUFACTURERS' RECORD

THE VENTIDUCT BANNER TRIPLE HEATER.

The average heating stove does not radiate more than sixty per cent. of the heat which is generated by the combustion of fuel inside. The direct draft style of heater allows a great part of the heat to go right up the chimney without any radiating effect whatever. A base burner increases the circulation of heat but the increase in circulation is at the expense of radiation. In other words, although a base burner circulates the heat more thoroughly, it does not radiate nearly so much as a direct draft pattern. If a heater could be devised which would not only increase the circulation, but at the same time also increase the radiation it seems that it would meet with almost universal acceptance. Such a heating stove is shown in the cut below.

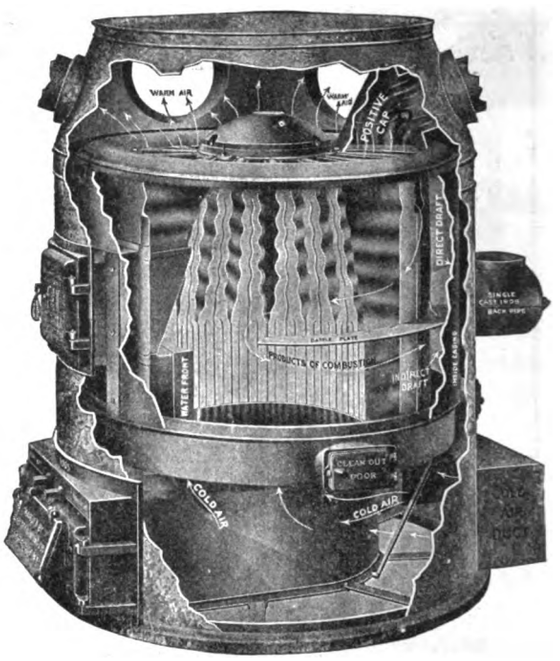
THE VENTIDUCT BANNER TRIPLE HEATER.

The Ventiduct Banner is so constructed that it utilizes and radiates all of the heat which is usually wasted and goes up the chimney. This result is secured by means of a large, all cast Ventiduct flue, extending from the base diagonally through the center and upward to the middle of the main top. By means of this flue, cold air is taken in at the lower opening outside of the base, passed up through the Ventiduct tube which being intensely heated itself, heats the air as it comes up from the base. This intensely heated air next passes out at the top of the Ventiduct flue and then into the room. As soon as the heated air passes up through the Ventiduct flue, cold air from the floor takes its place, becomes intensely heated itself and in turn passes out at the top and into the room, thus keeping up a constant circulation. It is estimated that all of the air in a room will pass through this stove in ninety minutes.

The Ventiduct Banner Triple Heater has all the radiating surface of a regular Oak stove on the exterior and this interior Ventiduct flue besides. The heat which keeps this flue hot is usually wasted and goes up the chimney. It will thus be seen that the Ventiduct Banner, owing to this increased radiating and circulating capacity, requires only about one-half as much fuel as an ordinary heater to produce similar results.

By attaching a pipe leading upstairs to the top of the Ventiduct flue, an upper room can be heated without any additional cost. By means of a damper and draft slide arrangement, the circulation from the Ventiduct flue can be utilized down stairs in the day time and upstairs at night.

Complete information and prices on this pattern will be furnished by the manufacturers, The Baxter Stove Co., Mansfield, Ohio. When writing, please mention HARDWARE.



THE KELSEY WARM AIR GENERATOR.

The Kelsey fresh air system of heating is becoming very well and favorably known as a most healthful and economical method of heating and ventilating homes, churches, schools and public buildings. That this system is giving entire satisfaction is indicated by the fact that over 30,000 have been sold since 1889.

In looking over the booklet explaining the construction of the Kelsey Warm Air Generator, good and sufficient reasons seem to be given for its superiority over apparatus or methods of heating.

THE KELSEY METHOD OF WARMING AIR.

By the Kelsey method, air is warmed in separate currents by passing up through corrugated cast iron flues, which surround

THE KELSEY WARM AIR GENERATOR.

the fire and form the fire cylinder and combustion chamber. There are from nine to seventeen flues in each Generator, according to its size. Each flue weighs about seventy pounds and has eight square feet of heating surface. The flues are in direct contact with and overhang the fire, and as the products of combustion also pass down around the backs of the flues, all the heat available from a given amount of fuel is utilized. Another volume of air is heated, as it passes up between the inner and outer casings, and there's no heat wasted in the cellar or up the chimney.

DISTANT ROOMS HEATED.

Another important and distinctive feature of the Kelsey is the Patented Positive Cap Attachment, whereby the warm air is forced through long pipes or against the wind to the rooms to be heated. The particular reasons for the Kelsey economy, it is claimed, are because its heating surfaces are two or three times greater than the ordinary furnace with same size grate or fuel capacity, and because all the heat is utilized to the utmost, with no waste of same in the cellar or up the chimney.

The booklet referred to, and the book of "opinions" show that the Kelsey system is being installed in the very finest class of residences, and is being specified by prominent architects in all sections, and contains hundreds of letters from the users. It will be sent to any of our readers on request.

The Kelsey Generator is made by the Kelsey Heating Co., Syracuse, N. Y., with branch office, 156 Fifth Ave., New York City. Cook & Van Evera Co., 38 Lake St., Chicago, Ill., are Western Selling Agents, and control the sale in Illinois, Wisconsin, Minnesota, Iowa, and North and South Dakota. Nearly 800 dealers are selling Kelseys in the principal cities and towns.

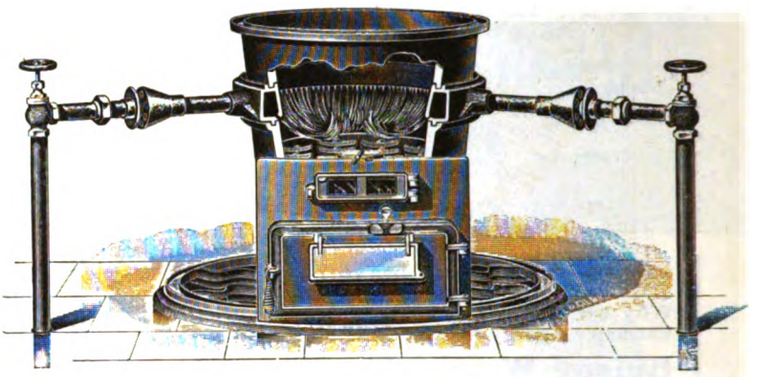
STOVE RECORD, Continued.

THE WALDORF RANGE.

Southard Robertson Company, 257-259 Water Street, 21-23 Peck Slip, New York City, are the manufacturers of the Waldorf Range, complete in six sizes, right or left hand fire chamber, brick set or portable, skeleton base or full warming-closet. All sizes are made for horizontal boiler attachment and also for vertical boiler, will work well with either; patented gas attachment for each size. Tops are cast in sections, allowing for expansion.

THE WALDORF RANGE.



Has large drop broiling door substantially mounted. Covers are made extra heavy, one of which is composed of a series of nested rings, opening to 3½ inches. Cross pieces are doubly supported with inside linings. Fire-box is of good capacity and can be arranged for either duplex grate or flat bottom grate, as desired. These grates can be removed without disturbing anything else in the fire-box and the brick and grate-rest can be removed and replaced without disturbing the water front. Sifter grates are with full closet ranges only. Damper rods and ash sifter are automatically adjusted and cannot get out of order. The ash sifter is entirely separate from the closet, and cinders may be removed by simply lifting out the sifter grate. Ash pans are with all sizes of full closet ranges. Extension panels, for squaring out the sides, can be furnished when desired. Low warming shelf, with brackets, are adjustable to all sizes of brick-set or portable ranges. Patented gas attachment is made with single (two burners) or double (four burners). It is easily applied to any size of portable or brick-set ranges, and can be used in connection with coal fire.

KALAMAZOO STOVE CO.

Kalamazoo Stove Co., Kalamazoo, Mich., are now making a full line of patterns for all styles and sizes of gas ranges for both natural gas and manufactured gas, and by the first of April they expect to be in the market with the entire line. They will give to this department their usual close attention and will equip their factory with all the latest and best machinery known to the business, and they hope to become quite a factor in this business in a very short time.

GIBLIN & CO.

The continued use of natural gas in the South and Western States has made householders interested in learning how this gas can be utilized for heating and cooking. Many appliances are used for cooking, but there are very few successful appliances used for heating. Most houses are heated by furnaces, so particular interest has been awakened in reference to an apparatus for the use of gas in hot air furnaces. We illustrate herewith a gas ring manufactured by Giblin & Co., Utica, N. Y., which has been used for the past twelve years in Pennsylvania, Indiana and Ohio, with marked success. The manufacturers have

GIBLIN'S GAS RING.

sought to devise an apparatus that could be used equally well with gas or coal. There is always a possibility of the gas supply being cut off, either through lack of pressure or other reasons, and when this occurs and no provision is made for burning other fuel in the furnace, hardship is sure to follow. Stoves must be installed, or the house shut up, and great discomfort is caused. The gas ring illustrated is designed to burn not only gas, but by simply shutting all the gas valves the furnace is in condition to burn coal instantly without any other change whatever.

The illustration shows a gas ring which is a separate and distinct casting from any of the other furnace castings, placed between the upper and lower fire-pot of the furnace; it is a hollow ring with connections at the outside for the gas supply and perforations on the inside at the bottom for the outlet of gas. When connected and the gas turned on, it is ignited through the feed door and can be used to heat the furnace castings by means of the gas flames, or else the fire-pot may be filled with fire-brick and the gas keeping the fire-brick hot, heat is thereby communicated to the furnace castings about the same as if a coal fire is used. A regular coal grate is provided with the furnace and where the gas supply is cut off, no change whatever is necessary to use coal for fuel. The gas ring is a heavy casting and withstands the heat and usage of coal for fuel without any damage. The manufacturers claim that by the use of this ring, the consumer has at his disposal an appliance for burning gas when he desires it, and also when he desires it an appliance for burning coal, with no change whatever. This must be of incalculable benefit and will be appreciated wherever used. It is a benefit over an apparatus that will burn gas only and when gas gives out, the owner must put up with a cold house until gas is again supplied, or else have the furnace overhauled to burn coal for fuel.

GEORGE M. CLARK & Co. Division American Stove Co., 72 Lake Street, Chicago, Ill., have favored us with a copy of their Catalogue No. 67 of Jewel Gasolene Stoves. This line of stoves has the following advantages: "Lay-down tanks with brass bottoms, double-seamed on all joints. Evaporator tanks, brass throughout, with ground-seated, solid metal valves and double-seamed joints. Frames of heavy material, rigidly put together and capable of greater strain than they ever get. Generators and burners made on the same principles for twenty-six years." This line includes an assortment of Jewel Camp and Yacht Stoves, and a line of Cooking Utensils, such as Toasters, Waffle Irons, Broilers, etc., as well as Torches and Water Heaters. A large number of cuts for advertising purposes in local papers is also shown. These Jewel advertising electrotypes are made to encourage local advertising, and will appeal to dealers who want to advertise but find it hard to get time to prepare an advertisement. The cuts are standard single-column width. These are furnished free, the only condition being that a marked copy of the local paper containing the advertisement be sent to George M. Clark & Co.

VOL. 6. NO. 267. VICKSBURG, MISSISSIPPI, WEDNESDAY AFTERNOON NOVEMBER 28, 1906 SINGLE COPY FIVE CENTS

GOLD STEEL BAR BRANDED TOOL PROOF CUT THROUGH WITH STARRETT SAW IN 4 HOURS BY JOHN CHRISTIAN

Expert Local Steel and Iron Worker, Employed by the County to Test Endurance and Strength of Steel Cages in New County Jail, Finds His Way Through the "Unsawable" —Will Make Other Tests Which Will Mean Stronger Bars Very Likely to Fill Jail Contract.

Carrying out his contract with Warren County, to make an actual test as the best credential that might be had as to the strength of the steel bars making the "unsawable" cages in the new Warren County jail, John Christian, a well-known local steel and iron worker, in four hours went through one of these bars, that was something over an inch of wrought steel, with what is known to be an ordinary No. 250, 12 inch L. S. Starrett saw, made in Athol, Mass. The test was made in the presence of Captain William Curphey, President of the Board of County Supervisors and Richard Groome, and it is needless to add, that it was to their utter amazement as these gentlemen had been convinced by the many testimonials of the St. Louis firm that furnishes these bars, that they were positively "tool proof." As four cages of this kind are to come under a separate contract of something like $16,000, the company will have to come again, and this time with a stronger bar for these cages.

Will Not Talk Much.

John Christian was seen and asked for a statement as to his wonderful feat, and told that but for the fact that everybody is so familiar with his past "Christian" life, he might be imagined to be almost any old daring criminal and escaped convict, and be arrested for identification. Mr. Christian only smiled in that soft, modest little way he has, and said that he did not feel like saying very much, as he had simply been employed by the county to make a thorough test of these steel bars, and he intends to do it to the letter. He admitted that he had so far made the first test, told of above, and that he had gone through one of the bars intended for the steel cage, which is to be one of the four cages that are being constructed. He was asked if he would make any more tests, and said of course, as this is merely a beginner, as he has a contract to test all of the material, and then to be locked up in the cages, when they are all up, and test the actual cages, and every part of them. Mr. Christian is confident that if the present material is used, he can get out, and says that he would make a wager of five hundred dollars to this effect, if he was a betting man.

The First Test.

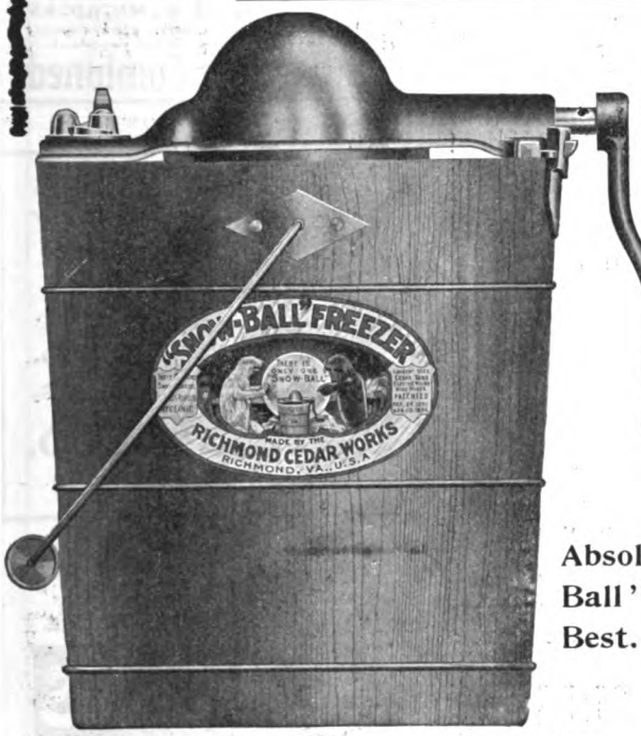
Mr. Christian, who is of the firm of Christian & Rooks, made his first test finally yesterday afternoon, although he started in on the work Monday. The matter has not been generally known, as it was merely the business like part of a contract, in which Warren County is looking well to her own interests. In beginning the work Monday, Mr. Christian employed about seven saws, which were in order, one after the other, dulled and bent out of shape, showing the ability of the steel to withstand the test, and strange to say, the final little, insignificant looking saw, that did the business, resembled more a little harmless nail file, than a formidable steel saw. Well anyway, it went through all right, and there was the first test, showing that not over four hours had been taken up in the task.

The special contract for placing in the steel cages is granted to a St. Louis house, and a part of the sawed bar is now in possession of Mr. Christian, while the other end of it has been sent on to the firm that made it. The intention is to convince the maker it was destructible by tools, which was claimed to the contrary, and the result will be, that this stitch in time has probably saved nine burglars or criminals of other character from getting out of the new jail when it should have been occupied.

THIS IS STARRETT No. 250 THE SAW

No. 250. Flexible Back, Common Teeth, 14 to the inch. For use in Hand Frames. Made in 6, 7, 8, 9, 10, 11 and 12 in. sizes, .022 thick.

One of eleven styles of Starrett Hack Saws. All made of the finest grade of steel for the purpose. The teeth are sharp, with square cutting points, set evenly and in such a manner that *every tooth cuts.* Tempered by our improved process, hard, tough and *uniform.* Starrett Saws "cut quicker and last longer."



Send for complete Catalog No. 17T of Fine Mechanical Tools and special Hack Saw Booklet.

The World's Largest Manufacturers of Wooden Ware and Hardware Specialties

NO OTHER LINES NEEDED IF YOU HANDLE
ALASKA Refrigerators

In every case—you will give better value for the money—than the customer could get anywhere else.

The big demand for Alaska Refrigerators has been brought about by our superior insulation—the Alaska system of circulation—the Alaska patent trap—the fine workmanship and finish and selected materials we use and the care we put into their manufacture.

The Alaska Refrigerators give the maximum of cold air possible from every pound of ice. That is why they are the most economical to own—the most profitable to sell.

Unless you have our catalogs—your refrigerator information is not complete.

Handsome catalogs.

TRADE MARK
"Bristol"

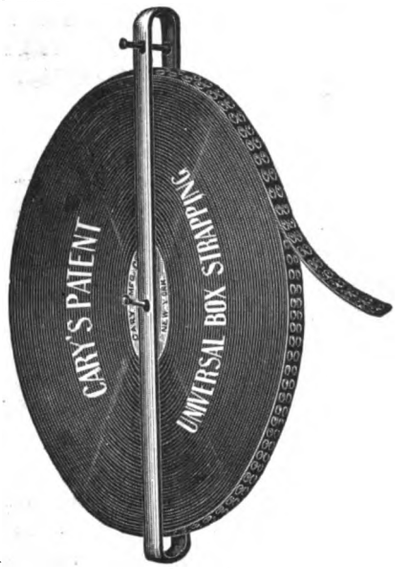
STEEL FISHING RODS

YOU ANGLE FOR TRADE. SO DO WE.

Our interests are One. That's why we help along your sales by liberal advertising and direct fishermen in your locality to come to you. We ask you not to forget the liberal margin of profit there is to you in handling "Bristol" STEEL RODS, and also, as to quality—their sale begets confidence and confidence begets trade. Each one sold will secure a permanent customer for tackle and sundries; and certainly each one sold sells another.

Here is proof of our own confidence. We now absolutely guarantee against breakage, due to defective material or poor workmanship, for **three years,** after a rod leaves our factory. Could you have a better selling point?

Keep up your stock. Let us hear from you. Is your name on our list for occasional advertising matter, etc., to stimulate business?



We originated the steel rod. Protect yourself—our trade mark is stamped on every reel seat. Nearly twenty years experience, with constant improvement, gives us the authority to speak as the unquestioned leaders. "Bristol"

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Quality Tells
When Henry Disston was asked the question:
"What do you put in your saws?"
He replied:
"Good steel and honest work."
UPON THIS FOUNDATION IS BUILT
DISSTON QUALITY
"If you want a saw it is best to get one with a name on it that has a reputation. A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."

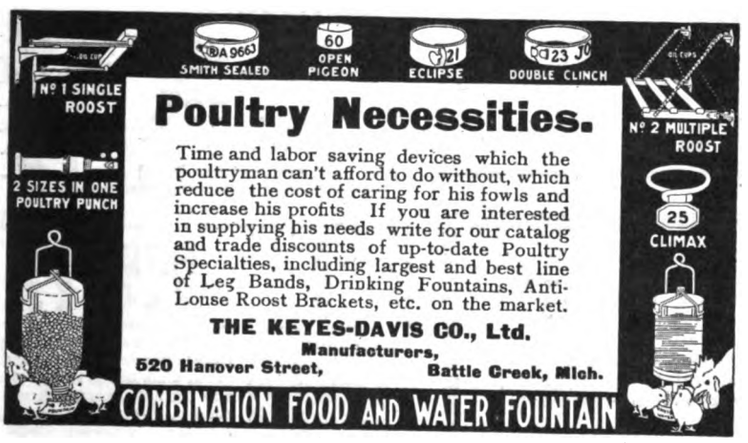
FOR YOU TRUE TEMPER ADVERTISING WILL—

—sell *more* farm and garden hand tools,
—sell *better* and *more kinds* of tools,
—hold old customers,
—make new customers,
—make sales easier,
—advertise your store,
—help your whole business,
—lessen catalog house competition,
—increase your profits,
—*give you the direct results from thousands of dollars worth of advertising,*

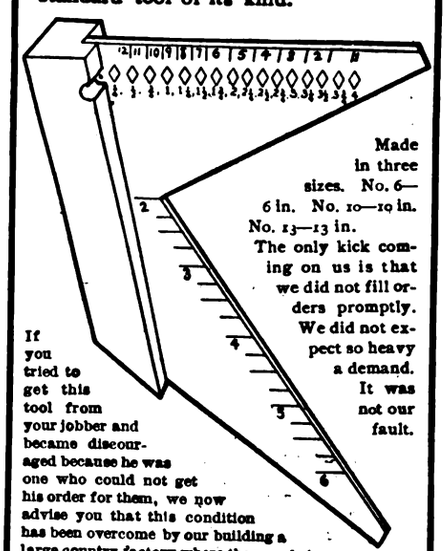
Provided That



—you are prepared to supply calls for True Temper tools, and that,
—you tell and keep telling people of your community to come to *your store* for True Temper tools.

OUR FREE SALES AIDS WILL HELP YOU.

1. Free electros of advertisements for your local papers.
2. "De-lighted Farmer" poster to draw trade into your store.
3. "Selling Pointers," a book that will help your clerks to make more sales.
4. A plan for you to present your customers with a valuable book, "Tools and Their Uses."



Write to-day for these SALES AIDS and learn how to handle True Temper Tools without changing your present line.

AMERICAN FORK & HOE CO., CLEVELAND, OHIO.

The NEW Universal Square

Is proving itself sure to become the standard tool of its kind.

Made in three sizes. No. 6—6 in. No. 10—10 in. No. 13—13 in. The only kick coming on us is that we did not fill orders promptly. We did not expect so heavy a demand. It was not our fault.

If you tried to get this tool from your jobber and became discouraged because he was one who could not get his order for them, we now advise you that this condition has been overcome by our building a large country factory where they are being made by the thousands, and every order whether sample or stock, is shipped promptly. So, Try, Try, again.

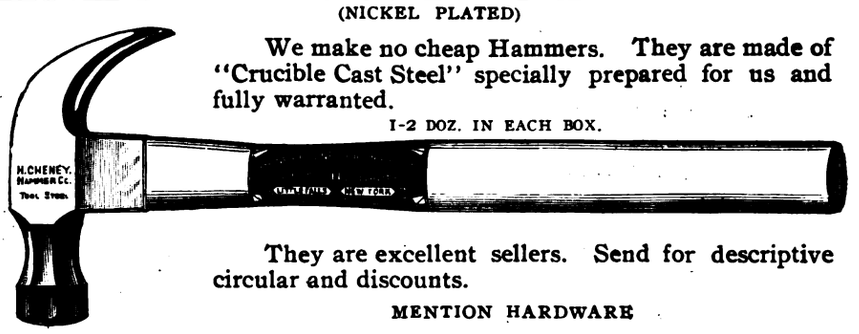
CHENEY BELL FACE HAMMERS

(NICKEL PLATED)

Our Motto

The Best Material



*

The Best Labor

*

Square Dealing

*

We make no cheap Hammers. They are made of "Crucible Cast Steel" specially prepared for us and fully warranted.

1-2 DOZ. IN EACH BOX.

They are excellent sellers. Send for descriptive circular and discounts.

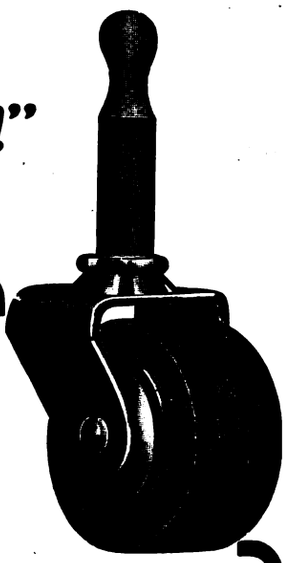
MENTION HARDWARE

Our Hammers

Have an enduring reputation for stubborn endurance in roughest usage.

The **HENRY CHENEY HAMMER CO., Little Falls, N.Y., U.S.A.**

S.&S. KNIVES



WARRANTED

THEY HOLD AN EDGE —·— NO HARD OR SOFT SPOTS

National Cutlery Co. DETROIT, MICH.

The "Faultless!" Why?

Because it is "the CASTER that never refuses to turn."

That's pretty near perfection, isn't it? Especially when we remember what we get with the ordinary kind.

It's all owing to our little patent pivot bearing socket. By the way, that same little socket won us the **Highest Award** at the World's Fair in St. Louis, in 1904.

Then notice the **Leather Wheels**, they give ease and steadiness in rolling and turning.

We make them with interchangeable sockets so they can be used on any kind of furniture.

If you want a seller, a money maker, carry the **"FAULTLESS"** line. Our illustrated catalogue will show you what we make.

THE FAULTLESS CASTER MFG. CO.
Nebraska City, Neb.

Examine Carefully

NEW YORK

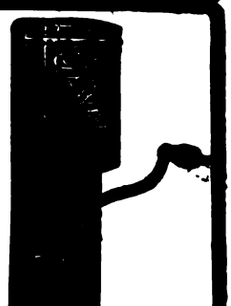
GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.



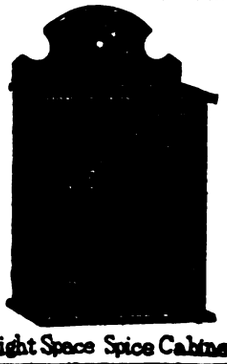
We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE RIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

SICKELS, PRESTON & NUTTING'S SOUVENIR.

About as artistic a souvenir as we have received this season is that of the Sickels, Preston & Nutting Co., of Davenport, Iowa, which takes the usual form of Christmas greeting, in which they distribute to their customers six handsomely colored engravings in portfolio style, that are reproductions from originals by noted artists, and are enumerated as follows: Lucile, by Arthur; Evening after Rain, by Gay; A Forgetful Old Friend, by Osthaus; Breakers Off Nahant, by Gay; Victims of Circumstances, by Coen; and May Blossoms, by Weber. The pictures form really a most attractive souvenir.

NEW SUPERINTENDENT OF POWER AND PLANT IN THE YALE & TOWNE WORKS.

H. J. Lamborn has been appointed superintendent of power and plant in The Yale & Towne Works, to succeed F. A. Waldron who resigned about a year ago. The position is a very responsible one involving, as it does, the management of all steam and electrical plant, the supervision (and frequently the designing) of new buildings, and, in general, everything relating to steam and electric power and distribution, heating and ventilating, water supply, drainage, fire protection, up-keep of buildings, and general repairs throughout the whole plant. The work involved thus requires not only executive ability, but also the training of an engineer and broad technical experience. Mr. Lamborn was born in Philadelphia in 1873, and graduated first from the Philadelphia High School, and later from the Towne Scientific School of the University of Pennsylvania in the course of mechanical engineering. For three years he was associated with John C. Trautwine, Jr., in editorial work for the "Civil Engineer's Pocket-Book;" then for four years connected with the engineer department of the United States Army on harbor and fortification work near Philadelphia, and then for a year with the Hyatt Roller Bearing Company as mechanical engineer. Since 1902 he has held the position of mechanical and electrical engineer and superintendent of the Magnetic Separating Plants of Witherbee, Sherman & Co. at Mineville, N. Y. (on Lake Champlain). These separating plants are the largest in the world, their annual production being 400,000 tons of concentrated iron ore. The separating plants and power stations at Mineville were designed and built under the supervision of Mr. Lamborn, including an extensive concrete power station equipped with turbo-generators of the Curtis type. S. E. Dauchy, who has been acting superintendent of power and plant during the past year, and for several years has held the position of assistant superintendent, will continue in the latter capacity under Mr. Lamborn.

"JOLLY THE WHOLE WORLD."

If a salesman, whether wholesale or retail, would never lose sight of the fact that his stock in trade is his friends and remember that nothing holds a friend but square treatment, says D. C. Washington in the *Optical Journal*, good salesmen would be easier to hire than they are to-day. Remember that in every man whose business you clinch so that he will deal with no one else but you, you have added just one more spoke to the wheel that will eventually roll you out of the employ of other people and into the independent position so often referred to as "your own boss!" Salesmanship is personal magnetism; and the secret of personal magnetism is to feel a real, not an affected, interest in the people with whom you are thrown in contact. Jolly the whole world.

AN UNIQUE NATURAL PRODUCT.

One of nature's most wonderful and unique products is asbestos, a material, which, in spite of its extensive use, is comparatively unknown to the general public. Prior to 1850, it was looked upon principally as a curiosity, although Charlemagne (Roman Emperor from 800 to 814 A. D.) is said to have had a table cloth made of Asbestos, which he cleaned by throwing into fire.

There are two varieties of commercial asbestos, known as Amphibole and Chrysotile. The former is used only to a comparatively small extent, as the fibres are short and without tensile strength and are, therefore, not suitable for manufacturing many of the asbestos products. Amphibole is used to some extent in cements, but is not well adapted even for that purpose. Chrysotile, on the other hand, has a strong and silky fiber, which adapts it for such materials as asbestos fabrics, household utensils, theatre curtains, clothing for firemen, etc.

In Germany, asbestos is known as steinflachs (stone flax), and the miners of Quebec give it quite as expressive a name —pierre cotton (cotton stone.)

Asbestos is mined in open pits, similar to stone quarries, and although it is found in all parts of the world, the mines in Quebec, Canada, are the most famous, yielding about 85 per cent of the world's supply of chrysotile. Probably the largest of these mines it that owned by the H. W. Johns-Manville Co. of New York. In 1879 the output of the Quebec mines was 300 tons, which has steadily increased year by year to 50,000 tons in 1905.

W. A. CONNOR.

We are advised that W. A. Connor, who for nearly four years has had entire charge of the Sales Department of the Savage Arms Co., has resigned his position to devote his attention to other outside interests. Mr. Connor has been long identified with the gun and sporting goods business, and prior to his taking up the work of the Savage Arms Company, was eight years a Department Manager and Buyer for Simmons Hardware Co., St. Louis, Mo. We understand that in addition to his personal interests, that Mr. Connor will represent on the road and assist in developing the sales of the Lefever Arms Co. of Syracuse. Mr. Connor will be succeeded by F. P. Kelley, as Sales Manager, and C. L. Wood, who is at the present time the Assistant Treasurer, as Assistant Sales Manager.

HARDWARE SALESMEN'S DINNER.

The wholesale Hardware salesmen employed in the metropolitan district of Greater New York propose to hold a dinner Saturday evening, February 9, 1907, at the Hardware Club, Postal Telegraph Building, Broadway and Murray Street. Tickets can be obtained from any of the committee of arrangements or by addressing Benjamin S. Alder, chairman, 37 Warren Street. Send application at once, as tickets are limited.

HARDWARE RELICS OF FORMER DAYS.

An interesting account of the "Relics of our Grandfathers' Days," now deposited in the Hull Museum, is contributed to the columns of the English press. Among other interesting features he recalls a number of Hardware goods which ironmongers of the generation or two ago commonly sold. Many kitchen utensils and domestic tools are mentioned, as well as the old-fashioned farm implement the flail. He referred to spoons of antique form, tinder boxes, and nut-crackers made of wood, in which a thumb-screw operating in a hollow tube performed the operation. Wood platters, as well as pewter dishes, once sold by ironmongers, may still be met with in remote districts. A curious square piece of wood with a handle, smeared with grease and sprinkled with sand, was formerly used for sharpening scythes. The old-fashioned sickle is now rarely met with, and horn lanterns are almost obsolete. "Beware of spring guns and mantraps" was a common sign half a century ago, and these curious inhuman articles were sold by ironmongers. Candle-snuffers and trays were used in the houses of the wealthy and the poor, and it is not many years since rush-light holders were sold. The writer of the article goes on to describe the evolution from ancient to modern Hardware, and gives some interesting comparisons between present-day Hardware and old-time ironmongery.

PARCELS POST LEGISLATION.

The National Boards of Trade and Chambers of Commerce held their annual meeting in Washington last week. After having endorsed Parcels Post Legislation for the past twelve years, they reversed their sentiments, and this year stated that they were opposed to Parcels Post, which will be good news to the Hardware trade, especially the retailers and jobbers, and this was brought about by the united efforts of the Hardware manufacturers and Hardware jobbers.

JANUARY 25, 1907

Editorial Trade Review

During this month the inventories will be priced and completed, and the jobbers and retailers will ascertain how profitable the large excess of business has proved to them during 1906, and the hopes regarding its immediate successor, 1907, will be fortified or otherwise. It seems to be the general impression of the trade as far as heard from that there was not such an abundance of profit made from the increased business as judged by the volume of trade that made them so extremely busy would justify, a good deal of it being done at competing prices, and profits were cut down to secure it. Then efforts were made on all points to urge the retailer to lay in his stock while the jobber had it, at prices that were not advanced to the extent of the market changes. Many retailers availed themselves of this advance on goods that the weather failed to respond to, and stocks in many instances are abnormally heavy, and this is the case with both jobbers and retailers, and may make orders from the latter assume a much lighter volume than would naturally be the case if the weather had only been seasonable. This will prevent the full advantage being taken this Spring on the Spring advances where they are most marked, and caution will be the watchword more than ever.

Many of the jobbers whose inventories foot up largely and show a favorable profit line, will find the dividend on the stock consist only in the increase of stock to show for it. A season that will make a speculative feeling if any exist, has little to stimulate it if the stock accumulated of last Fall's goods command caution, but this will enable manufacturers to catch up on orders they will be only too glad to see filled. Just at present they find their plans for active producing hampered by a shortage of labor, which seems to be unobtainable in any volume; and the difficulty of a limited supply of raw material, which is still a scarce commodity to obtain. All of this affects the reduced volume of orders obtainable from the trade which, while the present prices representing in many cases—especially on brass and copper schedules—compel complete revision. Stocks are gone over and brought up to date, to prepare for the demands of Spring trade, which when in the fullness thereof, will have to sit up and take notice, prices or no prices notwithstanding, realizing, no goods no business. They will have to go over their stock on hand, and where it is marked with prices at variance with present quotations, it will have to be overhauled.

This has been a Builders' Hardware winter, in which everything in the building line was fostered and encouraged, the weather assisting in every way possible to bring them to a satisfactory conclusion. Building operations were facilitated by every means possible, and work in that line has progressed faster than ever before, as the interruptions were few and far between.

In regard to business throughout the country, the roads are in some sections almost impassable. As no frost is in the ground, they are slightly better than if the frost were coming out of the ground, but the rains of late have done their share toward unsettling the conditions of the farmers' highway. This always has its effect upon early business, and may have something to do with making retail Hardware Conventions possible in January and February—months that are devoted to so many of them.

THE BUILDING OF INDIVIDUALITY.

Get people's interest aroused in the articles you sell them, not only in the advertising that creates the sale but in conversation with them. It will get them in the habit of regarding their purchases, not as mere, things, but as industrial creations full of individual interest and capable of infinite variety of quality. The customer who goes from your store thoroughly interested in some bit of hammer gossip which may be substituted for the usual comments on the weather, will take a special interest in the hammer he has purchased and, if it is a good one, will unconsciously associate its quality with the store from which it came.

There are many interesting facts about even the smallest mechanical contrivance and by calling a man's attention briefly to something of this sort, the habit is quickly acquired of investing each thing in the store with individual characteristics. Shelf Hardware is no longer so much metal at so many cents a pound, but every piece represents a certain amount of mechanical skill and quality which wins the respect of the purchaser even when the article purchased is of the most trivial kind. This will be found another little blow against the catalogue house that is doing business at too long a range and in too wholesale a manner to individualize. A pound of nails no longer suggests merely the price at which they come, but the process of their manufacture and the mechanical difference between the perfect nail and the shop sweepings that include all sorts of imperfections.

As the habit of close observation grows there comes to the eye beauty of detail that never would otherwise have been noticed but, that, once observed is never forgotten or lost sight of. But do not forget that the customer is usually a busy man. Do not take away from him time for these explanations; simply put the time he has to give you to good use.

SOMETHING LACKING.

There is always something lacking in your store; be on the watch for it. Every man who enters may be the means of telling you what it is; too late, perhaps, to save your customer, but take the lesson from him, none the less. Every clerk carries around the possibility of your finding out; don't always consider even the new man impertinent for commenting on your stock and comparing it in some respects unfavorably with that of his former employer. Wait and see if you can learn something thereby and if you can, swallow your pride and make use of it. That is perhaps the one saving grace of a new clerk; he brings new blood, new vision, new ideas into your business. Make the most of them if they are valuable to you; if not, turn them down, and be thankful of the opportunity for glancing into the business methods of other business men.

There is something lacking in your working force. Perhaps that irate customer, unreasonable though he be, is the man to

Digitized by Google

show you; better listen to him. Or, that puzzled child has possibly found the weak spot. Look it up anyway, and then get busy.

There is something lacking in yourself, be sure of that, and do not regard every man who happens to criticise you a malignant enemy. You wouldn't so regard him if he dragged a hidden robber out from his place of concealment in your store; perhaps you are your own worst enemy in trying to hide and harbor some trait that is defrauding you. Don't even be too cranky with the office boy because he happens to step upon some of your personal corns; he is only calling your attention to your own infirmity. Better thank him and maybe raise his salary for telling you the truth.

Remember always there is something lacking everywhere, some room for improvement; always a chance for honest, hard-headed criticism, and it's the man who listens to the criticism whose business grows.

INDUSTRIAL ACTIVITY IN 1906.

American manufacturers made their best record in 1906, so far, at least, as their record can be measured through imports of manufacturers' materials or exports of manufactures. In practically all of the great articles imported for manufacturing purposes the records of 1906 show a larger total imported than in any preceding year, while the aggregate value of manufacturers' materials imported, whether in the crude state or in a partially manufactured form for further use in manufacturing, was also greater than in any preceding year. Likewise in exports of manufactures the figures of the year are larger than in any preceding year, fiscal or calendar.

So apparent is this greater importation of manufacturers' materials and greater exportation of manufactures that it is unnecessary to await the December figures to justify the assertion that the record of 1906 will be higher than that of any other year. In practically all of the great articles the figures of the eleven months ending with November, 1906, exceed those of the corresponding months of any earlier year.

Not only do the quantities of manufacturers' materials show an increase, but the total value of the great groups also shows an increase. The value of manufacturers' raw materials imported in the eleven months of 1906 was 402 million dollars, against 370 millions in the corresponding months of 1905; and the value of manufactures for further use in manufacturing 223 million dollars, against 180 millions in the same months of the preceding year.

The export figures of the year also indicate great activity on the part of the manufacturers, since in the large proportion of cases they show an increase in quantity as well as value of manufactures exported. The total value of manufactures exported in the eleven months of 1906 was, of manufactures for further use in manufacturing, 220 million dollars, against 194 millions in the corresponding months of the preceding year, and of manufactures ready for consumption 438 millions against 391 millions in the corresponding period of 1905, thus indicating that the total value of manufactures of all kinds exported during the year will exceed 700 million dollars against less than 650 millions in the preceding year. Iron and steel manufactures exported in the eleven months of 1906, for which statistics are now available, show an increase of 28 million dollars over those for the corresponding months of the preceding year; lumber, an increase of 9 millions; refined mineral oil, an increase of 5 millions; cars and carriages, an increase of nearly 5 millions; pig copper, an increase of 4 millions; instruments and apparatus for scientific purposes, an increase of nearly 4 millions; agricultural implements, an increase of about 2 millions, and naval stores also an increase of about 2 millions.

LEGITIMATE TRADE AND MAIL ORDER TRADE.

With the eyes of all business men on the action by the courts on combinations for the restriction of trade there is no occasion for those who unite in co-operation for a commendable purpose to entertain any nervous anxiety. There is a need, however, for conservatism in any movement to protect legitimate trade interests. There is a strong disposition at the present time to unite in some method of counteracting the demoralizing effect of the mail order houses. Though well within the pale of the law, their methods of marketing goods has in far too many instances had a baleful influence in every respect. Those who conduct their business is conformity with the rules which have been established as legitimate through time-honored observance are outspoken in their testimony as to the generally low quality of the wares distributed by the catalogue houses and of the demoralizing influence which the prices they have made have had on the business of the men who stand in the large city or at the cross roads to serve conveniently people in their vicinity. These tradesmen suffer from the comparison made with the prices they quote on high-grade goods, which class of goods they must distribute to maintain their reputation in the community.

NOW LOOK TO THE BLANKETS.

Are the robes and blankets selling as they should? The season for their sale is passing and they do not make the best line in the world to carry over. Never again will they look so attractive as when new, their colors uninjured by dust or a degree of fading; besides there are mice and moths to guard against.

Right after the holidays, when the average dealer is bewailing the slackness of the between-seasons trade, is a good time to push such lines vigorously. There is still enough cold weather ahead to render them of interest, although the time for it is shortening up enough to justify season sales and sale prices.

Find out the people who will be in need of blankets by the beginning of another season and give them enough of an inducement to buy now to pay them for the trouble of carrying their purchase over. They can afford to carry it cheaper than you can because with them it is only a purchase in advance of something they are sure to need in the future; with you it is so much old stock to be carried into next year's tag ends on which, more than likely, a reduction will be expected because it is old. Better make the reduction now and let the other fellow do the carrying. Probably you have already sold enough blankets from the lot to afford a cut on the remainder to about cost and still make money, more than would be made in carrying the stuff over.

If the stock in hand is large it might pay to go into quite an elaborate campaign in order to close it out promptly; but do not fail to make it bring in customers and sell other goods. There need be no real loss in an occasional well-conducted at-cost or below cost sale. Take a lesson from the mail-order people who always accompany each sale with an enticing descriptive circular of something else. Frequently their greatest profit is in the subsequent sales.

Get your blanket advertisement busy in the newspaper of your town, remembering that a moderate-sized advertisement containing one good honest reason that will interest the average horse owner is worth several times its space in meaningless type gymnastics. Make your advertisements talk and do not make them shout; but make them talk blanket, not general Hardware. Set the store window, displaying blanket attractions. Make the whole affair as much a blanket gala day as though offering holiday goods before Christmas.

Go somewhat warily into schemes; yet if the neighborhood demands them be not afraid of them just because they are schemes. All honest business methods are legitimate methods; it depends upon surrounding circumstances of which perhaps the taste of your customers is chief, what methods are the most expedient, and it is a question for your own best judgment to determine when the circumstances demand it. However much opposed you are to guessing contests, word hunts, etc., if such things are popular in your locality, do not sacrifice trade to prejudice; make use of something of the sort, with blankets for prizes and further your special sale in that way if convinced that it is the popular way. Only don't be satisfied to follow in the footsteps of your neighbors. Get your brains as well as your advertising busy, and bring the old worn schemes out in new form. Perhaps, afterall, in the average community there is no surer way of creating interest in a special sale than a prize contest.

Not infrequently a determined push of this sort will bring in some intending purchasers of blankets who make it a rule to deliberately wait until the season is entirely over, when they intend to buy for the next season at their own price. If they see this determined effort to close out they will come into your sale at mid-season price rather than be left out of it entirely. They feel that you still have time to find customers by hunting them up, while in a few weeks it will be too late for that and you will be at the mercy of the few who, like themselves, are willing to purchase a year ahead in order to save money. It is well to encourage such people by giving them a fair inducement to advance buying, but do not become a slave to these thrifty impulses by failing to anticipate them. The man who gets a good lead along almost any road will find more profit than he who always follows behind his neighbors even in more fertile fields.

After the blanket sale is over, and there will be no more demand for them until another season, do not fail to gather up those that remain and store, carefully folded, in a tight, dry, mouse-proof and moth-proof chest that contains nothing else and will not be disturbed. Do not allow them to kick around in the way upon the counters half the summer, or to lie in a tumbled heap in some dusty corner, as frequently is done to a greater or a less extent in many Hardware stores. Even though the freshness of their appearance must be lost to some extent, there are few other things in the Hardware store that require more considerate treatment or that, considering their nature, are more frequently made unsalable through careless handling.

THE IDAHO HARDWARE AND IMPLEMENT ASSOCIATION

The Idaho Hardware and Implement Dealers' Association held their third annual convention at Boise on the 4th and 5th of January. Through the courtesy of the Commercial Club of Boise, the convention was held in their elegant rooms.

On the afternoon of the 4th the meeting was called to order and the President, A. B. Moss, of the Moss Mercantile Company, of Payette, announced that Governor Gooding had found it absolutely impossible to be present that afternoon to deliver the address of welcome as he had expected to do and that the Boise members of the Association had asked the Honorable Willard White, of Boise, a member elect of the coming session of the Idaho Legislature, to speak in the Governor's stead. Mr. White said in part:

"You will appreciate my embarrassment at being called upon to take the place of Governor Gooding, as you have all come here expecting to receive his words of welcome and it would be impossible for me to take his place. But he is engaged in delivering a larger message to the people of this State and I trust that what is our loss may be the gain of the people of this State.

"We extend to you a greeting to 'Boise the Beautiful' and in behalf of the Commercial Club I wish you welcome and if you don't see what you want while you are here with us, ask for it.

"And if you people have an axe to grind during the coming session of the legislature, bring it up to me and I will use my influence in your behalf."

H. W. Wulff, of Hass Brothers, Weiser, was introduced and he responded to the address of welcome in the following words:

"I take great pleasure in thanking you for your hearty welcome. It is always a pleasure for us to visit Boise, as we have here a metropolis of which we are all justly proud and which many of the Eastern States would be glad to have. We trust that you will have no cause to be disappointed on account of the welcome which you have extended to us because we are going to try to behave ourselves while we are here.

"Our organization is still in its infancy, but it can be made into a means of great help to us all. In coming here together we must lay aside all our trade prejudices and while we have our differences, it is necessary for us to unite in order to obtain the best results from our association. We are beginning to find that

OUR COMPETITORS ARE MIGHTY GOOD FELLOWS AFTER ALL

and we come here to learn what we can from them and to help the other members. Every man who comes to this convention is a benefit to the association, not on account of what he hears, but on account of what he says and thus adds to the general discussion. We have all of us made mistakes in buying, in selling and in credit and this organization of ours will help us in that way.

"There are

A NUMBER OF IMPORTANT QUESTIONS TO COME UP BEFORE THIS MEETING.

I should like to see a mutual insurance plan adopted and then we must consider the trouble which we have been having with the canvassers and which has also been troubling our brothers in the East. I am glad to see that men who do not belong to this association are in accordance with our work, and we can make Idaho the leading State in this Western Empire if we will but work together along the right lines."

This address met with hearty applause and Mr. Wulff was warmly congratulated upon the broad-minded view that he had taken as to the work of the association.

The President, A. B. Moss, instead of making the usual annual address, now offered a few remarks in a general way in regard to the past work of the association and what it should try to accomplish in the future.

He said: "I believe that we have been expecting too much of this association. It is only a year old or a year and a half and its field covers the best part of Idaho, the part in which is done nearly all the business of the State, outside of that done in the five Northern counties. We could scarcely have expected in that short time to get together and protect ourselves against peddlers and a parcels post and unscrupulous dealers who get goods on commission and sell them at any old price and arrange with the jobbers and manufacturers so that the legitimate dealers would be protected in their business.

WE CONTRIBUTE TO THE SUCCESS OF ALL ENTERPRISES

and institutions in the communities in which we reside; we have met together several times and we have made two or three towns friends that were enemies and we all the time working against each other. Of course, we have met with disappointments here and there, but we must make up our minds to put up with them and if we keep working along these lines that we have been working on in the past, we are bound to make our association a success.

THERE IS A PLAN ON FOOT TO UNITE THE DIFFERENT ORGANIZATIONS

of Idaho, Washington and Oregon into a Pacific Federation and at this meeting we will have to appoint delegates to attend a convention at Portland for that purpose. You can all easily see the results that will come from such an organization. In the past we have had trouble with jobbers who handle lines of Hardware and implements and who sell to men who do not always maintain prices and so far we have been unable to regulate this matter to any great extent, but with a general Northwestern Association, we can go to these jobbers and say to them that it is not to their interest to disturb prices in this or that community and they will have to listen to us and in this way we will be able to maintain legitimate prices.

"They have these organizations in every State and they're a good thing. There's no use in a business man's having an enemy on every corner—

THEY MUST ALL CO-OPERATE IN ORDER TO GET THE BEST RESULTS.

The organization that we have here is doing right in that we are all working together and we are thus able to accomplish something. We are young yet. Our association is just like a boy, who, while he is yet young, is able to do only a boy's work, and I trust that no member of us will leave any stone unturned to bring in new members so that we may grow up and become strong and do a man's work.

"There are many things to come before this meeting that are of vital importance to us all. At the beginning of this year 1907 we should have some sort of an arrangement between the different towns in our jurisdiction to provide that

NO EXCESS PRICES SHALL BE CHARGED ON GOODS THAT WE ALL CARRY IN STOCK

and to maintain a uniform schedule of prices on staple articles in keeping with the pocket books of our customers.

"Then we must do something in regard to the peddlers. These peddlers who come into our State don't help to pay the taxes, they don't help to maintain our schools and other institutions and they have nothing to do with our affairs. They bring a carload of stuff, buggies for instance, into the country and peddle them out through our territory and get business by giving long time notes and keep the trade away from the regular dealers who are obliged to carry two or three carloads of buggies in stock all the time and who have to pay taxes and help keep up the State.

And we should have a committee appointed to look after legislative matters. The State legislature is about to convene here and we should have a good strong committee appointed to look after the affairs of the business men of Southern Idaho and prevent adverse legislation. I don't wish to infuse my views into the minds of the members here present, but I have been thinking over the matter a great deal and

I BELIEVE IT WOULD BE WELL TO GET SOME RAILROADS INTO THE STATE

before we attempt to legislate about them and have a railroad commission to look after them. There are several railroads at our door and we don't want to do anything that will keep them away. Suppose one of you business men saw a man coming into your store, would you meet him at the door with a club and tell him that you'd like to have him come in all right, but he would have to come in the way you wanted him to come in? Of all the business that passes through our State only six per cent. of it originates within the State and ninety-four per cent. of it comes from other States. Now what more could a railroad commission do than regulate this six per cent.? Wouldn't it be a wise thing to get the railroads in here and then get a railroad commission to adjust the rates and such matters?

When I came to this State, there wasn't a thing between the Eastern boundary line and Boise but the wide desert, and now there are fertile farms and many towns and between here and Weiser to the West there is over $12,000,000 of money on deposit in the banks that has been honestly made right here in the State and the country will develop more in the next ten years than it has in the past and we have got to go to the Oregon Short Line for concessions. Senator Heyburn wants a blanket rate put into effect to prevent charging higher rates on goods shipped

Digitized by Google

to Boise than are charged on goods shipped beyond. Now $1.37½ is the lowest rate that any of us get on any of the goods that we ship into this territory and what if the railroads would say, "Well, now you people have a railroad commission to look after these things and they think that a rate of $1.37½ is all right, we'll just charge you $1.37½ on stuff that you ship back East." What would become of the men who are shipping fruit and lumber and such things back to Chicago and the other Eastern markets? So you see it is absolutely necessary to have men on this Legislative Committee who thoroughly understand the outgoing rates as well as the incoming rates. It doesn't make any difference what rates you have to pay so long as your customer has money in his pockets to buy your goods with."

SECRETARY J. F. COOK'S ANNUAL ADDRESS.

It becomes my duty as your secretary to report on the conditions of our association at this, our Third Annual Convention.

The past year has been one of unsurpassed prosperity for the farmers in this section of the State; abundant crops of all grains, hay, fruits and the new crop of sugar beets have enabled our farmers to become good buyers. In this general prosperity the implement and Hardware people have shared to a greater or less extent, but does this prosperity bring them the gain it should? Are they receiving the profit on their goods that they should and will these profits compare favorably with other lines? If not, what is there that this association can do to bring about the desired results?

One of the troubles to be overcome is the question of *long* credit. Are you satisfied with conditions as they are and do you get action on your money? In other words, are your credit terms short enough to enable you to turn your money to advantage and allow you to take your *cash discounts?*

It seems to us that the dealers have it in their power to regulate this matter of long time credit. Your margin of profits will get narrower each year; in order to make the profits that you should, you will be obliged to double your sales and this, as you know, means more expense and a greater capital investment.

Organization will not cure all the ills of the implement trade but it will do much—it has already done much, not only for the implement but for the Hardware dealers as well. The papers which are to follow on this evening's program and the discussions on the practicability of the cash system, we trust will bring out many features relative to the question of long time credit.

In my report a year ago I advocated the advisibility of the members in each town meeting regularly at least once a month. We find where this course has been pursued there has been very little friction between the members and at this time I shall again repeat the request that during the coming year the members in every town have a meeting at least once a month whether you think there is anything to be discussed or not, for after you get together you will find there is something to be talked about, some point that you can strengthen, some one will have a question that will need answering.

We have learned that the little differences that are sure to come up between members can, as a rule, be easily adjusted, but it is the matters of moment to the organization as a whole that we find that we are unable to handle successfully.

The buggy and range peddlers ought to be with us next season; we can foretell their coming as does the astronomer the appearance of a comet, and from past history, they ought to be with us next season.

We have already learned to value the being ready to meet this unfair competition. With the aid of the organization of the northwest and of the jobbers and manufacturers who have our interest, as well as their own at heart, who can and will assist us if this federation which we find is so strongly advocated from every point is once fully organized, we, as members of that organization will be greatly benefited. We trust that delegations will be named at this time who are in full sympathy with such a movement.

We cannot too strongly advocate the necessity, the advisability of members making known through the secretary the differences and irregularities that may come up at any time in the way of price cutting and underhanded methods of doing business. It ought not to be necessary to bring these petty matters up in the association—the members ought to be able to adjust these differences between themselves, but when you find that you lack the confidence in your competitor that will insure the cure of such practices, it is high time that the matter be reported through the secretary to the Executive or Adjusting Committee that immediate action may be taken on it. If irregularities are being practiced, by standing quietly and allowing these irregularities to go on, you not only allow yourselves to be injured, you are allowing many other members of the association to be so injured. Right here comes in the advantage of being on good terms with your competitors, and this again emphasizes the necessity of regular meetings of the members in every town.

There are some members present who will agree with me that it is not a funny thing to be brought up "on the carpet" with the accusation that he has been cutting prices or undermining a decent competitor by his questionable methods.

There is a movement in the northwest to form a federation of all the associations of Washington, Idaho, Oregon and California. Delegates are to be chosen at this meeting to represent this association at a meeting to be called in February in the city of Portland for the purpose of effecting such an organization. The formation of such a federation means that matters that have been such a source of annoyance to us in the past can be handled to an advantage. Matters that we, as a small organization, were unable to handle will be heard from in an entirely different manner.

During the past year our membership has been increased by the addition of twenty new members—this gives us a total of 64 with a membership of 18 who are not in what may be called good standing on account of their not having paid their annual dues.

We also have an honorary membership of ten members. This latter contingent has become associated with us through the provision made in the amendment of the by-laws passed upon at our last quarterly meeting at Weiser, in October. Article 1 of the by-laws is amended to read as follows:

SECTION II, Article 1.—"Any jobber or manufacturer of Hardware or farming implements may become an honorary member of this association by paying annual dues of $2.00 and may be represented at any and all meetings of this assocciation with the privileges of the floor except when the association is in executive session."

We believe that these new members will be of material help to us as they consist of, in every instance, concerns who have men of intelligence, honest fellows, to represent them, and men who will not only work honestly for their separate houses, but men who have agreed to do all in their power to elevate the moral and social standing of their fellows—I refer to the United Commercial Travelers.

We regret exceedingly that there are so many of our members who are dilatory about paying their annual dues. This is a small matter, a very small matter, when taken into consideration with the great benefits derived and we trust that every one of them will have donated their mite toward keeping up this association before we adjourn to-morrow evening.

We have received during the year from

Membership fees	$ 95.00
Dues	258.00
Assessments, 1905	40.00
Giving us a total of	$403.00

There is due and uncollected on account membership dues for 1905 and 1906 the sum of $140.00. Your dues for 1907 are payable any time between now and July 1st. We do earnestly request that all members who have not paid their dues for 1906 will take care of same before leaving the hall.

In reviewing the work of the association for the past year, we are called upon to state, not only the success attending our efforts in the way of bringing about more harmony between the dealers in various towns and by so doing bettering their conditions financially and socially, but to also record the discouraging features in which we have been obliged to work in many instances. It seems to be the history of organizations of this sort, the same as in any particular line of business, there are men who will hang back, pull in the opposite direction without taking the trouble to investigate, to find out for themselves whether or not there is any virtue in working together.

Several organizations throughout the country report, and we are beginning to find this to be true, that after an association has gotten in good working condition, after the members become better acquainted and the spirit of selfishness has been eliminated to a great extent, after there is a feeling of confidence among the dealers in the same town established, the matter of making a profit on goods takes care of itself.

In many instances men have found it necessary to establish a price on the staple articles and after having worked under this system for a time, abandon the price schedule simply because the members have concluded that they can really make a profit on their goods without resorting to the old scheme of cutting prices and undermining their competitors' business in every way possible.

We are living in an age of progression, not only in relation to the kinds of goods produced and the manner in which they

Digitized by Google

are made, but also in the way in which they are marketed. If we would keep pace with the times, we must adapt our business methods to fit the changing conditions. The old methods will no longer answer the purposes of the time. The necessity of convening, the working together, the adoption of good sound business methods, is what spell success. The old methods are too selfish for present day use.

Keep pace with the times—get a legitimate profit—keep in mind the Golden Rule, and your success is assured.

At the evening session F. G. Higgins, of the Pacific Hardware and Steel Company, read a short paper on the "United Commercial Traveler." Mr. Higgins went on to say, among other things, that the traveling man wasn't such a bad fellow after all, and that he had probably brightened up many a day for the dealer who was feeling blue over his affairs when he had come in with a smile and a hand shake and his hearty "Business is fine." Mr. Higgins' paper was received with marked favor.

V. C. Kerr, of the Kerr Hardware Company of Boise, read a paper on the "Credit System." He said that when this country of ours was first settled and business first started, men traded pelts and hides, etc., for provisions and no credit was asked or needed. But after a time the country became settled up and business increased and business men formed partnerships and conditions made it necessary for the dealers to give long time credit. Now business conditions had once again changed and we had reached the era of gigantic combinations of capital and business. "Nowadays nearly everything that we dealers handle is at some stage in its manufacture controlled by a trust and has an agreed price set upon it. The dealers are being called upon by the manufacturers and jobbers to pay for their goods in shorter time and shall we still go ahead and give our customers long terms on what we sell them, especially on implements? I say no. I think we should at least give no longer time than we ourselves get from the jobbers or the manufacturers."

The next morning, January 5th, a short session was held and several matters of moment to the association were taken up and considered.

In the afternoon the members met in executive session at which the various committees which had been appointed the day before reported and resolutions were taken up for consideration.

A resolution was adopted declaring that the association was not in accord with the appointment of a State railway commission, that the results obtained by such commissions in other States was not commensurate with the immense sums of money required for their support, and that in the opinion of the members a shippers' association composed of producers and farmers and shippers generally would be of more benefit to the State than a railway commission, reference being made to such an organization now existing in Wisconsin.

It was also recommended by one of the committees that each man present should write to his representatives in Congress, immediately on his return home, and ask them to use their influence against the various parcels post bills up for consideration before Congress.

E. W. Evenson, of Spokane, who is connected with the Inland Empire Implement and Hardware Dealers' Association, and who is also one of the men instrumental in bringing about the convention that is to meet in Portland in February for the purpose of organizing the Pacific Federation of Hardware and Implement Dealers' Associations was called upon to explain the results which had been obtained by other Hardware dealers' associations throughout the country and what might be expected from the Pacific Federation if it were formed.

Mr. Evenson said: "About fourteen years ago about twelve of us met over in Minnesota and formed the Minnesota Retail Hardware Dealers' Association. We put the dues at $40 a year and we paid them in advance and with that $180 the secretary started out. He went from town to town and he succeeded in getting about one hundred and thirty members and to-day they have ninety-seven per cent. of all the retail Hardware dealers of Minnesota in their association. About six or seven years ago they started an implement dealers' association and they are simply reproducing the experiences of the Hardware dealers.

"Minnesota was followed by Wisconsin and Iowa and Illinois and Indiana and Ohio and then the New England States. And as these different organizations grew, they kept running up against questions that were too big for them to handle and so they finally met and formed the National Hardware Dealers' Association, which is an amalgamation of all the State associations. Now I can prove to any one of you that if you paid $50 a year into this association for the next ten years, you wou'dn't begin to pay for the good that you have received from this national association, even though you have never belonged to it. Well the retailers kept putting questions up to the jobbers until they too got together and formed the National Hardware Jobbers' Association and these two organizations kept putting questions up to the manufacturers until the manufacturers got together and formed the National Association of Manufacturers of Hardware and Hardware Specialties. And from these associations was appointed a joint Catalogue House Committee. They went to different manufacturers and told them that they were simply cutting their own throats when they allowed their product to be sold to the catalogue houses and within thirty months they had succeeded in getting some six hundred and eighty manufacturers of Hardware to refuse absolutely to allow their product to go to catalogue houses.

"Then this committee has succeeded in preventing the passage of a number of bills which the catalogue houses have prepared for the purpose of furthering their business.

"Your President has asked me to say something to you about the proposed Pacific Federation. It is our plan to unite all the Hardware dealers' associations in the West and then we will be able to take up questions which are too big for the individual organizations. We don't want to interfere with your association in any way—we just want to work with you and if you decide that it is best for you to remain outside of the federation, why we will still help you all we can, but we want you to come in and make the federation as strong as possible."

The President and the Secretary were afterward appointed as delegates to attend the Portland Convention and it was left to the Executive Committee of the association to decide about joining the federation.

The question of making uniform prices on staple articles throughout all portions of the territory taking the same freight rates was then taken up and discussed thoroughly by all those present. A schedule of prices on certain articles was presented by one of the committees of the association and was adopted.

Resolutions were then presented and adopted, recommending that the members in the extreme Eastern part of the State be urged to form an organization of their own which would be under the general association, thanking the Boise members for the entertainment which they had provided for the visiting members, thanking the Commercial Club for the courtesies which they had extended to the convention, and thanking E. W. Evenson for the able address given by him.

A resolution was also adopted requesting Senator Heyburn, Senator DuBois and Representative French to use their influence against the various parcels post measures now up for consideration before Congress.

At the election of officers, A. B. Moss, of Payette, was re-elected for another year. V. C. Kerr, of Boise, was elected vice-president; J. F. Cook, of Boise, was elected to succeed himself as secretary, and E. A. Fraser, of Ontario, was re-elected as treasurer. Nampa was chosen as the next place of meeting.

At the evening session Mr. Evenson was called upon to explain the matter of mutual insurance. He spoke as follows:

"The only way we have of judging what the future of these mutual insurance organizations will be is by what they have done in the past. Last year eighty per cent. of all the fire insurance written in Rhode Island was mutual insurance. That's what they think of mutual insurance in the East. The plan is this. We charge the same premiums exactly that the old line or stock companies charge and then at the end of each year we turn back to the policy holder all the money out of his premium that is not used to pay losses and meet current expenses. All of these various organizations have so far been able to pay back each year from 25 to 45 per cent. of the premiums collected—they have never fallen below 25 per cent. One of the biggest expenses of the stock companies is that of keeping a force of solicitors in the field and this expense we do not have at all, as our members send their applications into the home office. I do not think it necessary or advisable for you to organize an association separate from the one now existing in Washington, because you will save the expense of running another office if you will place your insurance with us in Washington. Last year we wrote between two and three hundred policies and we could have written a thousand just as cheaply. Besides this, if you send your applications to Spokane and have the policies written by us, you will save the tax that is placed on insurance written in Idaho.

"Three thousand dollars is the limit to any one risk. If you have a stock worth $30,000, we will give you a policy for the whole amount, keep $3,000 ourselves and place the other $27,000 with similar organizations in other States. You look to us for the $30,000 and we look to the other States for their portion of it.

"I have not time this evening to go into the matter in detail, but I think that will explain to you the general principles of mutual insurance."

Digitized by Google

After a general discussion of mutual insurance by those present, the association adjourned.

The members were entertained by the Commercial Club for a short time and then repaired to the Idan-ha Hotel where, at the behest of the Boise members, a sumptuous banquet had been prepared. And there, with jest and story and laughter and song was brought to a close the most enjoyable and profitable convention that the Idaho Hardware and Implement Dealers' Association has ever held.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

PERCOLATING WATERS—PROPERTY OF THE OWNER OF THE SOIL.

QUESTION.—A and B are adjoining land owners. A had a well near the line between their farms, from which B had been accustomed to take water when he wanted it. A dispute arose and A forbid him doing this. B then sunk a well upon his own land deeper than A's causing A's well to run dry. Did he have the right to do this.

REPLY.—We think he did. Waters percolating through the earth and not flowing in any certain and well defined stream are the absolute property of the owner of the land through which they happen to flow. So long as the percolating waters are running through his land, the owner has the absolute right to appropriate them, even though they are thereby prevented from reaching his neighbor's soil. This is true in most of the States, even though one sinks a well and drains off his neighbor's percolating waters maliciously and for the sole purpose of inflicting damage upon his neighbor.

COMMERCIAL AGENCY LIABLE FOR PUBLISHING FALSE STATEMENT THAT MERCHANT HAS FAILED.

QUESTION.—A certain mercantile agency published a statement to its subscribers that our firm had failed. There was no truth whatever in this statement, and it is admitted by the agency to have been published by mistake. The statement was published in cipher, to which only the subscribers to the agency had the key. Have we a right to sue the agency, it having admitted its mistake?

REPLY.—We think you have such a right. The publication was admittedly false and must have injuriously affected your credit and standing. It follows that it was actionable libel. It has been contended in some cases of this kind that communications from a commercial agency to its subscriber are privileged, that is to say, if they are made in good faith, even though false, the agency cannot be held liable for making them. This contention is not sound. A communication is privileged when made in good faith by one having a duty to speak to one having an interest to know. Under these circumstances, even though false and injurious, it will not be the subject of a legal action. But it is obvious that not all of the subscribers to a mercantile agency had an interest in knowing of your pecuniary responsibility. To those who had no such interest, there was no just occasion to communicate the information. It follows that the communication was not a privileged one and that you can recover in action for libel against the agency.

INCREASED BUSINESS OR INCREASED PROFITS?

The year just closed has probably been the largest in volume that the Hardware trade of the United States has ever known. Nearly every dealer has the same story to tell of increased business. Such expressions as "We have done the greatest trade in the history of our business." "Never have we been so busy at this season of the year." "The outlook for Spring business is even better than a year ago." Such expressions of trade conditions from the Hardware dealers throughout the country are pretty good evidences of present conditions and of trade prospects for 1907. Almost all jobbers have enlarged their trade—some by working new territory—but in most cases because of a larger demand for goods.

LOOKING FOR BETTER PROFITS.

But in spite of this great business activity and this enlarged trade, still there are many merchants who now, after taking inventory and footing up balance sheets, find that the net profits have not grown proportionately; in fact, in many instances, even with a larger volume of trade and a rising market, their profits have actually decreased from 1905. The decrease in profits comes from increased competition, from pushing unprofitable lines and branches of the trade to the detriment of those paying a larger and handsomer profit.

EXPERIENCE OF ONE DEALER.

In speaking of this fact one Hardwareman said: "We are all doing too much business for nothing—selling goods for glory, rather than for profit. Often I used to think that there was business I ought to get, even at a small profit, that would be a help in the course of a year—that could be had without adding to my expense of doing business—and thus would be 'velvet' for me."

A CASE IN POINT.

Continuing, this merchant gave the following example from his own experience: "We had a small part of the trade from a certain mill, which amounted to from $35 to $50 a month, in small items—files, saws, paper and emery cloth. The mill is a large one and I knew that these supplies they used in large quantities, purchasing from me only to fill in when entirely out—simply using my stock as a convenience. We charged them fair prices with an average profit of about thirty-five per cent. My prices were never questioned by the purchasing agent, who knew that in buying thus in small lots he had to pay a higher price. Their bill was paid the tenth of each month.

"I figured that if I could get their entire business it would be a big thing for me, but also knew that in such a case I would have to meet close prices. But that the additional business would be velvet for me, I started out for their entire business in my line. We were good friends and they would be glad to give me the business, but I must meet prices. I went into the matter carefully and after some figuring and a good deal of correspondence I secured their next month's supply. This first order was about $400. Some goods I had to sell actually at cost. But I knew that by having their trade I would be enabled to purchase larger quantities and felt that thus I would secure lower prices. On this first order of about $400 my profit averaged only about seven per cent. Still I was proud of the order and felt it quite a feather in my cap. From a business of only $35 to $50 I was soon selling this mill about $275 monthly. But my stock increased in these lines. I purchased larger quantities in order to buy as cheap as possible—and to have the stock on hand when called for. Expenses also increased; I found quite often that I was obliged to wire for some supplies, and in a number of cases had to get the goods by express—as I had to purchase from a manufacturer to get prices, and I found the makers did not ship as promptly as did the jobber.

"Most of my profit of thirty-five per cent., which I had formerly made on the small business, had now been sacrificed to get the large volume—as I found the mill people expected to buy small odd lots or odd sizes of files, etc., at same discount as on the larger quantities. In these various lines I increased my stock from a few hundred to several thousand dollars."

But the interesting part of this business transaction is the conclusion reached by this dealer, who said with emphasis:

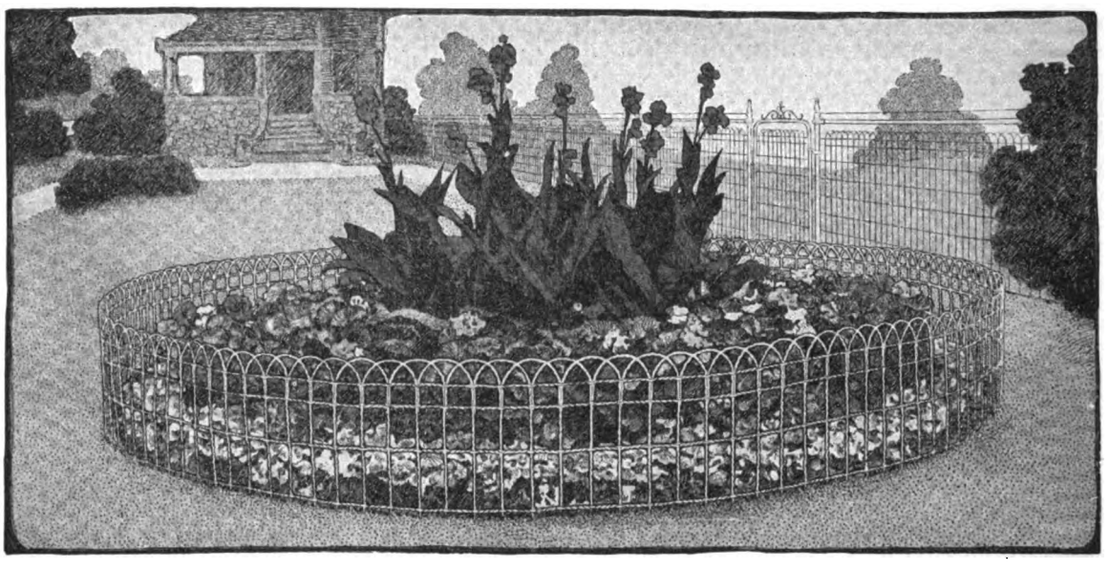
"Some business don't pay, and the sooner a Hardwareman can find which it is, the sooner he will become wealthy. It would have been better for me to have held the small pick-up trade of that mill at a fair profit than to have reached out for this larger business which finally tied up a lot of money and which I've really been handling at a loss. In 1906 it actually cost me 13½ per cent. to transact business."

BUSINESS BRISK BUT PROFITS SMALL.

This Hardwareman had a brisk business with that mill, but as he himself now figures it, it was a losing trade. Each part of the business done by a merchant should carry its proportion of the expense. Volume of trade without profit enough to cover this expense is of little value to the merchant. Add to the business if possible; make it grow, but add profit-making lines. Cut off "close business" during 1907 and the balance sheet of 1908 will look better and the Hardwareman will have more real satisfaction in his business.

HAMMERNAIL.

THE ROCKWELL MFG. CO.



The Rockwell Mfg. Co., Malvern, Ark., whose handsome catalogue we referred to in our last issue, and whose advertisement appears in another column, say: "While this is only the second year in the business, our influence has grown to immense proportions. At the present time we are the only screen door factory of any consequence in the West outside of the Trust. We are making a strictly high quality of goods." We are really glad to hear of the success of this progressive company, and they purpose supplying promptly the Western demand for screens and screen doors now so necessary to the general happiness.

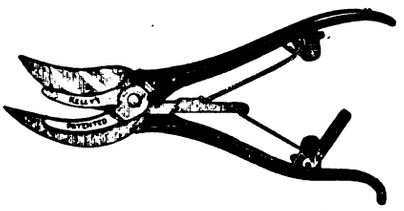
NEW GOODS AND SPECIALTIES

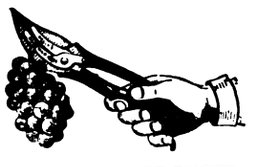
CYCLONE FLOWER GUARD.

Cyclone Woven Wire Fence Co., of Waukegan, Ill., and Holly, Mich., among the many handsome styles of fencing which can be used very effectively, are making the style shown in the accompanying cut, which was made from a photograph and shows exactly how their Flower Guard is applied to a circular bed.



CYCLONE FLOWER GUARD.

It is used as easily applied to any form or size of flower bed. No posts are required. The picket ends are left projecting for insertion in the ground. The cut shows their 18-inch border. This height gives ample protection to flower beds in city parks that are not fenced. They also manufacture this in 12-inch height. This border is claimed by the manufacturers to not only protect but adds to the beauty of every flower bed. It can be quickly taken up and used from year to year. It is cut off to the length required, and the ends hooked together when set. It is carried in stock in 15 and 20 rod rolls, but on orders it can be made any length up to 25 rods.

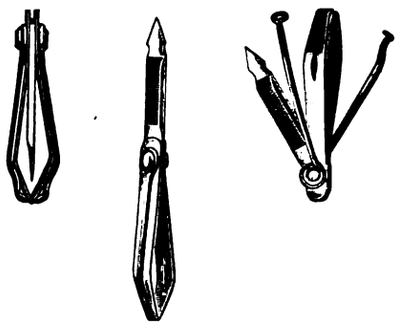


PRUNING SHEAR, GRAPE PICKER AND FLOWER GATHERER

Kelly's Cutlery Works, 218 Ottawa Street, Toledo, Ohio, are the manufacturers of a new departure in pruning shears and grape pickers, a combination shear and holder working with one movement, made of the highest grade cutlery steel properly

THE KELLY PRUNING SHEAR.

tempered and ground sharp. Its length is 6⅔ inches, with japanned steel handles warranted. The lower jaw of holder is fastened solid to lower cutting jaw. The upper jaw of holder opens



USED AS A GRAPE PICKER.

and closes simultaneously with upper cutting jaw. The two are distinct from each other. In operation, the two close together until holder grips firmly whatever is to be cut, when the cutting jaw passes on and does the cutting, and the nolder holds firmly what has been cut off until released by the operator. As a Grape Picker, the bunch of grapes is cut off and held firmly, and can be placed in the basket without contact with the hand, also allowing the free use of the other hand for holding vines or basket. It is claimed to reduce the time and labor of picking grapes from one half to two thirds. The points of shears extending beyond the holder are slender and sharp, and can be used in trimming off small branches or defective grapes. In pruning rose bushes, the prunings are held firmly by the shears and do not come in contact with the hands. It is advantageous reaching high or low or any place, and secure the desired blossoms without injury to the hands.

"CLIMAX" POCKET INSTRUMENT.

Climax Mfg. Co., Orange, Mass., are putting on the market the little combination instrument shown in the accompanying illustrations. It is an instrument combining the most useful of articles for toilet and general use, which includes special tweezers

"CLIMAX" POCKET INSTRUMENT.

for removing splinters, etc., the cutting of hangnails; is a handy letter opener and paper cutter; blackhead and pimple extractor, an improved design nail cleaner and file, and a handy pipe cleaner, all designed to fold neatly together. The usual objectionable feature of a separate case for nail files and cleaners is overcome in the present instrument, as the file and cleaner is self-contained in its casing and readily swings in or out for instant use. By having such perfect protection, the cleaning points are kept in good condition. The cleaning and filing edges are so made as to operate equally well on either hand. The Climax can be carried in the vest pocket or ladies' purse, or is a handy instrument for the desk or dressing table. It is well finished in nickel.

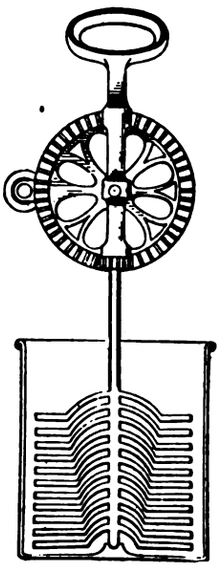
BEECHER DRAUGHT SPRING.

Beecher Draught Spring Co., 191 Olive Street, New Haven, Conn., are the manufacturers of the Beecher Draught Spring, an illustration of which, showing their safety device, accompanies this article. They are most simple in construction, consisting of a set of spiral steel springs arranged on steel rods, so that the draught or pull comes against the coils. They positively will not break, and being interchangeable are claimed to outwear the

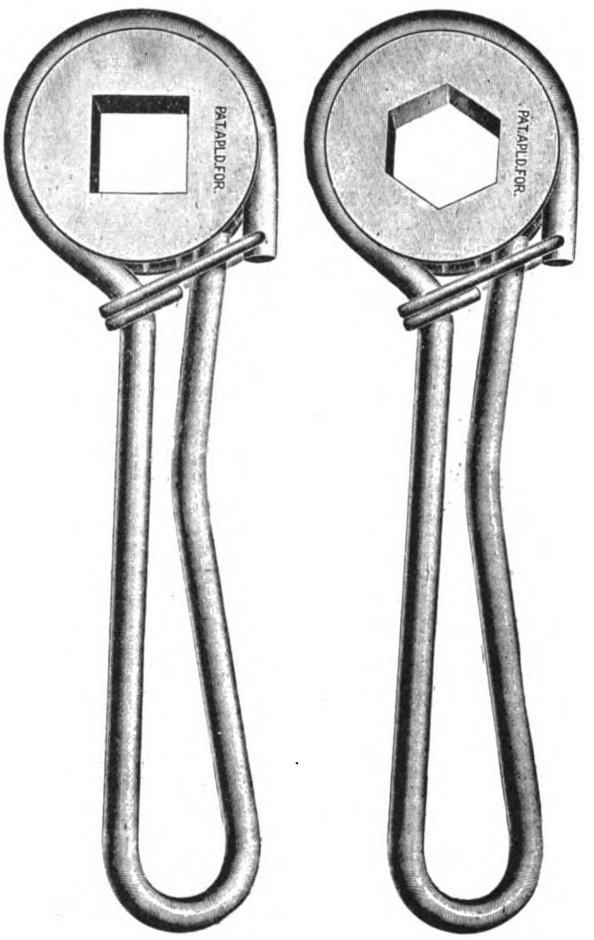


BEECHER DRAUGHT SPRING.

best wagons and harnesses several times over. They are all made of the very finest quality of steel, and are the only guaranteed springs in the market to-day, the manufacturers replacing gratis any defective spring. They act as a cushion to the horse's shoulders, completely obviating all sudden jolts, jars, jerks and strains occasioned by passing over holes and obstacles and starting loads. They are designed to help horses start heavy loads, in the belief that starting is the one thing that shortens the horse's life. At the same time they materially assist in drawing the load after it is in motion. They are largely in use by transportation companies and especially by fire departments.

LOLL'S HOUSEHOLD SPECIALTIES.

The F. W. Loll Mfg. Co., Meriden, Conn., among the numerous articles of utility manufactured by them, are making one that is popular with the trade, and of which we give illustra-



THE ONE MINUTE EGG AND CREAM BEATER.

tions herewith. The One Minute Egg and Cream Beater, Model No. 2, has a beater made of malleable iron, giving it strength and durability. It can be used in any dish, and the rapidity with which its twenty arms strike the cream, enables it as claimed by the manufacturers to beat the poorest cream in one minute. It can be cleaned easily, and the improved form of the beater makes it extremely efficient.

WALDEN RATCHET TIRE BOLT WRENCHES.

Patterson, Gottfried & Hunter, 146-150 Centre Street, New York, are putting on the market a series of moderately-priced Ratchet Tire Bolt Wrenches, the two styles of which are here illustrated about two-thirds size. While a device of this character is handy and useful in many ways, its original purpose is for the quick tightening or removal of hexagon or square nuts of tire bolts on the inner and inconveniently reached nuts of both automobile and carriage or wagon wheels. The wrench is

WALDEN RATCHET TIRE BOLT WRENCHES.

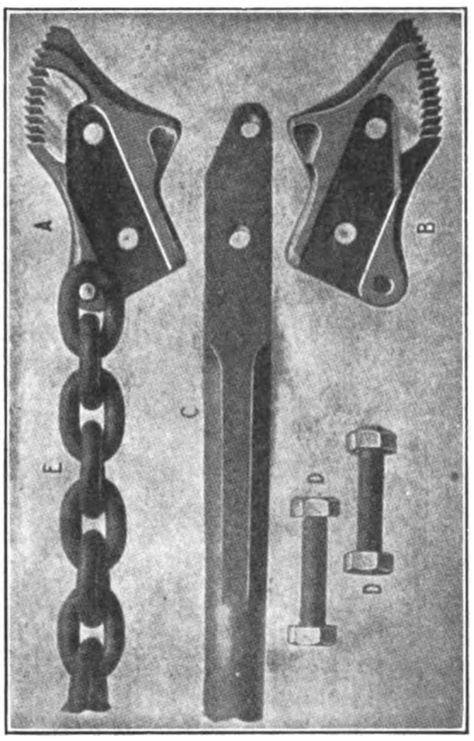
made to fit exactly most of the hexagon nuts of automobile tire lugs, the hexagon openings being ½, 9-16, ⅝ and ¾ inch, Fig. 1 illustrating the hexagon style. The ratchet wrench, Fig. 2, for square nuts, will fit the standard nuts of ⅛, 3-16, ¼, 5-16 and ⅜ inch in diameter tire bolts, more particularly for wooden carriage wheels. The circular metal center has teeth in the groove, so that as the handle is moved backward and forward the bent steel wire handle, held in place by the smaller wire loops, engages with the teeth, thus enabling an individual to quickly tighten or remove tire bolt nuts and without rounding or burring the corners. The wrenches are about five inches long over all, and the handles are made of 3-16 inch steel wire, the principal advantages of which are the light weight, ease and rapidity with which nuts can be turned without injury, and the small cost.

THE IDEAL CHAIN WRENCH.

Kroeschell Bros. Co., 29-55 E. Erie Street, Chicago, Ill., are the manufacturers of the Ideal Chain Wrench; a general view of its parts is presented in cut Fig. 1. It is claimed to be the result of many years' reasoning, experimenting and perfecting by a man whose life-work has been practical pipe-fitting. It is broadly and unequivocally guaranteed to do all the work which any of its predecessors on the market have done, and to perform in addition thereto some other work of the highest importance which no chain wrench has executed heretofore. The jaws A B, illustrated in the cut, are drop-forged of the best quality of tool steel. They can be tempered and sharpened

Digitized by Google

by any blacksmith, whenever required, and used until worn out, when new ones can be obtained and attached to the old handle. The handle C is made of spring steel. It is a model of strength and efficiency, combined with lightness. However, if desired, other handles can be substituted, and even an ordinary crow-



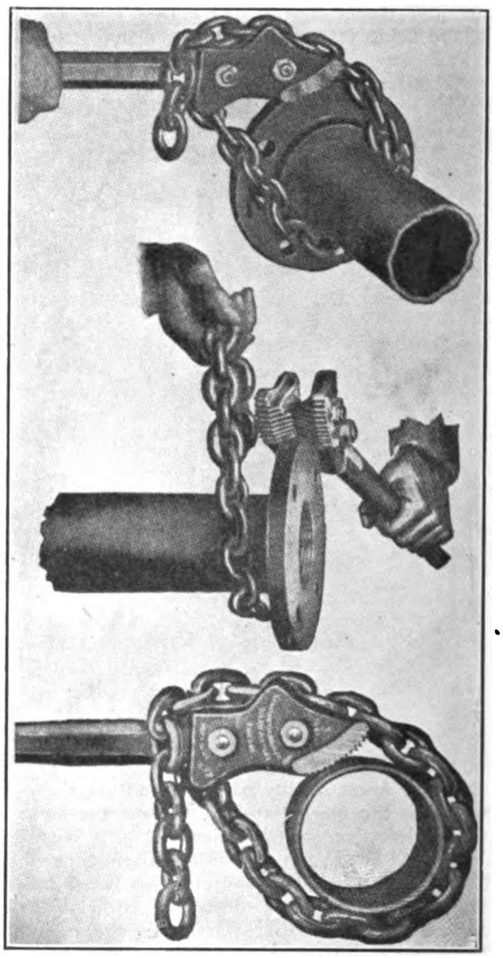


FIG. I.—THE PARTS OF THE WRENCH.

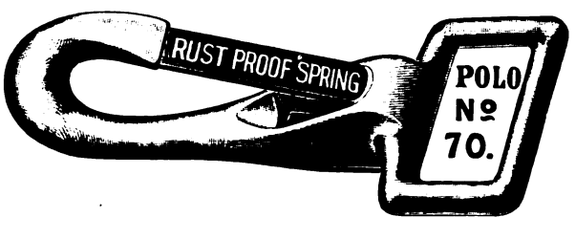
bar can be easily fitted into the jaws. The two double nuts DD are all that is required to hold together the parts of the Ideal Chain Wrench. The most important improvement of the Wrench over the old styles is embodied in the construction of the jaws

THE MECHANISM OF THE JAWS.

A and B. For the first time in the history of chain wrench manufacturing the entire mechanism of the tool has been concentrated in these jaws, which will grip not only square but also round, flat, oblong and irregular surfaces. Nearly all the old makes have side jaws with hollow space between. No beaded fitting, valve or narrow flange can be gripped with the jaw thus constructed. The Ideal Wrench presents a radical departure from all the existing types. It has a double biting surface in either of its jaws; the outer one has flat serrated edges, which will grip the pipe securely, the same as the best makes of ordinary chain wrenches, and which are so arranged that the gripped article cannot be crushed; the inner biting surface has jaws of the shape of a wide V, which are specially designed to grip beaded fittings or valves, flanges and castings of odd form. Among the points of interest referred to in the construction of this wrench in addition to those mentioned, is the recess of



UNIQUE USES OF WRENCH.

hollow between the inner edge of the gripping jaws and the chain support. This enables the operator to take up all slack in the chain and to retain a proper grip anywhere on surface of jaws. Ease of repair. The removal of a steel pin enables the operator to discard any broken links. Automatic chain lock. A pull of the chain causes it to drop into the lock, with all slack taken up. No possibility of its falling out, even if in an inverted position. There is exchangeability of parts, with mechanism concentrated in the jaws. This permits the jaws to be fitted to any bar or old discarded wrench handle. It is built of tool-steel drop forgings throughout, which makes it more durable than wrenches are usually made, and in this case it is absolutely guaranteed.

COVERTS' NEW "POLO" SNAP.

Again the Covert Manufacturing Co., Troy, N. Y., have given the trade a rare exhibition of their inventive genius in placing upon the market one of the most valuable acquisitions to their unequalled line of Harness Snaps. Their "Polo" Snap, illus-

COVERT'S POLO SNAP NO. 70.

trated herewith, is their latest achievement, and its many valuable points of merit will at once make it a favorite with the trade and the consumer. It is a unique departure from the usual line of Snaps, has a guarded rust proof spring, is very strong, serviceable and neat in appearance and is made in all regular sizes.

RECENT TRADE PUBLICATIONS.

NORTH BROS. MFG. CO., Philadelphia, Pa., have issued their catalogue of Ice Cream Freezers. These Freezers have automatic twin scrapers, the pails are fitted with electric-welded wire hoops, guaranteed not to break or fall off, and the cans are of heavy tin plate with drawn steel bottoms, guaranteed not to leak or break. Their line includes the Lightning, Jumbo Lightning, Gem, Blizzard, Crown, with crank or fly wheel and with pulley, and the American Twin Freezer, regarding which the company say: "A Freezer to make two flavors at one time has been wanted ever since ice cream became so popular. In families some members prefer one flavor, others another; some prefer ice cream, others can enjoy a water ice or sherbet, so some had to be dissatisfied no matter what was made in old style freezer. Much time and ingenuity have been spent in trying to devise some means to freeze two flavors at one time, but without any practical results. Now that it is an accomplished fact, one wonders why it should have been so long delayed, when it is so simple." This Freezer freezes two flavors of ice cream or an ice or sherbet and ice cream at one and the same time in one freezer. North Bros. Mfg. Co. also manufacture a line of Ice Chippers, Ice Shaves, Machine Freezers and Ice Breakers.

WALWORTH MFG. CO., 128-136 Federal Street, Boston, Mass., with New York office in the Park Row Building, have distributed their catalogue of Engineers' and Steam Fitters' Pipe Tools. Included in the contents will be found Stillson Wrenches, Hall's Brass Pipe Wrenches, Walworth Die Plates, Gleason's Screwing Stocks for Brass Pipe, Pipe Cutters, Vises, Nipple Holders, Brass Valves and Cocks; Pipe Taps, Reamers and Drills, Tapping Machines, Gas Fitters' Augers, Chain Tongs, Pipe Bending Machines, Gas and Burner Plyers, etc., etc.

BAXTER STOVE CO., Mansfield, Ohio, have published a booklet on "Beating Catalogue House Competition on Stoves," giving the methods of a stove dealer that have proved successful. This is intended for Western Hardware dealers and is published by permission of O. B. James, of the firm of D. G. James & Son, Richland Center, Wis. Everyone who is vitally interested in this subject should send for a copy, so that he may read the ideas and methods of a dealer in selling stoves and ranges against catalogue competition. Ideas of proved practical value are dealt with, and a little account of what has been done is given in the contents.

SUN MFG. CO., Columbus, Ohio. Catalogue No. 30 of Coffee Mills, Money Drawers, Camp Furniture and Rat Traps. Their Coffee Mills are smooth sanded and have perfectly square boxes. The castings are enameled, and the mills have a polished finish. Each mill is wrapped separately in paper, and packed in packing boxes to stand re-shipment. The Money Drawers are made in several designs and are of hard wood, golden polished finish. Camp Stools, Cots, Chairs and Hammocks are shown in variety, and the company also manufacture Display and Cigar Floor Cases.

COLT'S PATENT FIRE ARMS MFG. CO., Hartford, Conn., have issued their catalogue for 1907 of Colt's Revolvers and Automatic Pistols. The company make the following reference to their goods: "The experience of more than half a century is embodied in the product of the Colt's Patent Fire Arms Mfg. Co. Seventy years ago Samuel Colt first introduced his Revolvers, and to-day the arms bearing the name of this inventor are known in every country on the globe. The high standard in quality—to which the success of these arms from the start was due—has been strictly maintained, and Colt's Revolvers have been adopted and are now, the Standard Arm of governments, military organizations, police departments, etc., throughout the world. Colt's Revolvers are made for use, their reliability—due to superiority in material, workmanship, finish and accuracy—is the result of careful design, the most skilled labor, critical tests and inspection. The fact that they are absolutely and at all times reliable, is the secret of their reputation and unparalleled success. The regular finish of Revolvers is blued or full nickeled, with hard rubber stocks. Blued finish is always supplied unless otherwise specified. Automatic Pistols are blued finish only. Our arms can be supplied with gold or silver plating, inlaid work and engraving, pearl and ivory stocks, plain with monogram, or special design,—prices depending upon the amount and character of work desired."

CHARLES ROSS & SON CO., 148-156 Classon Avenue, Brooklyn, N. Y. Catalogue No. 5 of Paint Machinery. This company are also builders of Burr Stone Mills, Printing Ink, Mixing and Grinding Machinery. Original drawings are furnished and contracts taken for complete paint plants or other works. Illustrations and descriptions are given of Flat Stone Paint, Color, White Lead and Liquid Paint Mills; Ink Mills, Collapsible Tube Fillers, Three-Roller Mills, Can Mixers, Liquid Paint Thinning, Shading and Tinting Mixers, Lead Feeders and Coolers, etc.

C. T. HAM MFG. CO., Rochester, N. Y. Catalogue of Ham's "Cold Blast" Automobile Lamps. Of these lamps the manufacturers state: "Made on the genuine 'Cold Blast' principle. In the construction of reflector lamps, the most perfect principle of reflection and projection is useless with a poor light, but the more intense the light, the greater the results. Therefore, the brilliant and intense white flame produced by our 'Cold Blast' principle, places our Automobile Lamps beyond competition in light-giving qualities and they are conceded by all to be not only the most reliable but also by far the best light-producing oil lamps made. The strong, penetrating light, absolutely proof against extinguishment by any conditions of riding over rough roads or in the most severe winds, combined with handsome constructions, brilliant interior and exterior finish and the simple operations to gain access to every part are the most noticeable of the many features of our lamps, but their superiority can only be fully appreciated by those who have experienced the usual annoyances of oil lamps and then give our lamps a trial. There is positively no smoke or odor nuisance, hence, no soot to accumulate; the front glasses do not 'sweat' and have a greasy appearance. The simple and effective locking device for attaching oil fount to body of lamp, makes the burner easy of access for trimming the wick or filling the fount; the founts are drawn from heavy brass, the bodies are strongly made of heavy brass, riveted throughout and reinforced with steel plates on the sides to take the strain on the brackets."

GEORGE GRIFFITHS CO., 817 Commonwealth Building, Philadelphia, Pa., owned by the Ames Shovel and Tool Co., have issued a price list of the Shovels, Spades, Scoops and Drainage Tools made by the Keystone Shovel Works. All styles and patterns of these goods will be found listed in the contents, with numerous illustrations. This company is well known to the trade, having been established in 1857, and has received gold medals from the Centennial and Louisiana Purchase Expositions.

WESTERN ELECTRIC CO., Chicago, Ill., have favored us with a booklet describing and illustrating in detail their Hawthorne Works. The Western Electric Company has been engaged in the manufacture of electric light and power apparatus since 1882. They were early pioneers in the development of the direct-current series of arc machines and arc lamps. Many large municipalities, both in the United States and abroad, are still successfully operating these machines. As the business grew and the tendency developed toward the use of larger machinery, it was found that the buildings in the city were not well adapted for such purposes, and it became necessary to seek a location where ample room could be provided, not only for present needs, but for future growth and where buildings could be erected of suitable character, equipped with heavy cranes for handling economically the largest apparatus, and where direct railroad facilities were available for receiving and shipping heavy machinery. Five years ago a tract of 110 acres at the extreme west of the city of Chicago was purchased. Since that time, more land has been acquired, and extensions are now being built, which together with the buildings already completed, constitute the Hawthorne Works. Two railroad trunk lines, the Chicago, Burlington & Quincy, and the Illinois Central, cross the plant, and are provided with switch connections, while the Western Indiana Belt Line, the Manufacturers' Junction Railroad and the Chicago Terminal Transfer Railroad, give connection with all other [illegible] entering Chicago. The works consist at present of the following principal groups of buildings: The Office, the Pattern Shop, the Pattern Storage, the Foundry, the Forge Shops; and the Machine Shops, devoted to the manufacture of direct Rubber Plants, are located east of the Railway. In addition to these buildings, there is a gas plant, water tower, power plant, two crematory buildings, freight house and round house for locomotives. The driveways connecting all the buildings are paved with concrete block.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED DECEMBER 31, 1906.

418,167. SCREW DRIVER. T. E. Copelin, Chicago, Ill.
418,185. CHURN. O. P. Jackson, Victor, Mont.
418,320. PERMUTATION LOCK. M. B. Mills, Chicago, Ill.
418,337. WRENCH. H. F. Kors, Virginia, Ill.
418,358. COMBINATION TOOL. W. Stowe and J. Uhl, Oro City, Colo.
418,360. DEVICE FOR DRIVING NAILS. F. H. Van Houten, Matteawan, N. Y.
418,400. DOOR LOCK. J. Connor, Whitestone, N. Y.
418,409. WASHING MACHINE. J. S. Headen and J. T. Boswell, Pleasant Hill, Mo.

PATENTS ISSUED JANUARY 1, 1907.

839,802. STAPLE PULLER. T. J. Alsop, Brooklyn, Wis.
839,811. HOSE NOZZLE. F. J. Christian, Syracuse, N. Y.
839,847. HINGE. G. Holden, Merchantsville, N. J.
839876. DOOR HOLDER FIXTURE. J. S. Naery, Lafayette, Ind.
839,877. KNIFE SHARPENER. B. Nichols, Seattle, Wash.
839,993. PLIERS. C. A. Fritz, Minot, N. D.
840,161. WRINGER SUPPORT FOR WASHING MACHINES. W. S. S. Rogers, Columbus, Ohio.
840,329. WRENCH. J. W. Hielscher, Kniman, Ind.
840,418. CARPENTER'S PLANE. W. F. Arnold, Oakland, Cal.

PATENTS EXPIRED JANUARY 7, 1907.

418,688. WASHING MACHINE. J. W. Bader, Red Key, Ind.
418,720. PRUNING IMPLEMENT. P. Hess, Iveyville, Iowa.
418,742. COMBINATION TOOL. W. J. McFreely, Mt. Vernon, O.
418,844. NAIL. W. V. Kay, Chicago, Ill.
418,846. GAS BURNER FOR STOVES, ETC. J. H. Keyser, New York, N. Y.
418,847. BENCH VISE. H. Liefer, Hinsdale, Ill.
418,848. STOVE GRATE. W. C. Metzner, Chicago, Ill.
418,851. COOKING STOVE. J. A. Price, Scranton, Pa.
418,884. PADLOCK. W. H. Bramble, Decatur, Ill.

PATENTS ISSUED JANUARY 8, 1907.

840,549. WRENCH. Henry D. Aupke, Sharpsburg, Pa.
840,564. WRENCH. Thomas W. Harber, Golden City, Mo.
840,580. COMBINED NAIL PULLER AND BAND CUTTER. Marion A. McMillan, Stedman, Cal.
840,711. KEY-FASTENER. Albert H. Puttcamp and Leamon H. Judson, Los Angeles, Cal.
840.843. WRENCH. Seaborne R. Griffin, Whigham, Ga.
840,872. COMBINED DOOR CHECK AND SPRING. John H. Shaw, New Haven, Conn.
840,873. LOCK. William E. Sparks, New Haven, Conn.

PATENTS EXPIRED JANUARY 14, 1907.

419,188. JAW TRAP. T. Donlon, Cortland, N. Y.
419,201. DOOR HANGER. A. T. Kingsley, Millport, N. Y.
419,387. MOP AND WRINGER. C. L. Westbrook, Reynolds, Ind.
419,412. CYLINDER CATCH FOR REVOLVERS. H. M. Caldwell, Worcester, Mass.
419,427. CLOTHES LINE AND CLOTHES PIN BOX. J. E. Eichner, Jr., Philadelphia, Pa.
419,431. KNOB ATTACHMENT. J. B. Finch, New York, N. Y.

PATENTS ISSUED JANUARY 15, 1907.

841,117. DOOR HANGER. John H. Burkholder, Ashland, Ohio.
841,131. BRACKET. George H. Dorken, Gevelsberg, Germany.
841,147. DOOR STOP. Ezra W. Hasenpflug, Geneva, Ohio.
841,185. WEATHER STRIP. Charles E. Saint Clair, Star City, Ind.
841,207. REDUCING WHEEL. Frank L. Wolfe, Medford, Mass.
841.209. LOCK. William B. Wykoff, Omaha, Neb.
841,246. WAGON JACK. John L. Hartnett, Fabius, N. Y.
841,248. PIPE JAW ATTACHMENT TO WRENCHES. John P. Hill, Phelps, N. Y.
841,269. DOOR HANGER. Henry B. Pitner, Olean, N. Y.
841,284. DEVICE FOR FASTENING KNOBS TO BOLTS. Daniel W. Tower, Grand Rapids, Mich.

OHIO HARDWARE ASSOCIATION CONVENTION.

Frank A. Bare, secretary of the Ohio Hardware Association, writes us:

The Columbus Convention outlook grows brighter every day. Our Hardware exposition is attracting great attention. Letters are being sent to every retail Hardware merchant in Ohio, urging him to come to the Columbus Convention prepared to buy goods and add new lines. We wish if possible to make the exposition a practical, profitable buying place. It gives the merchant an opportunity to study new lines under favorable conditions. Experiments and demonstrations can be carried on at this exposition in a manner that could not possibly be done in the merchant's store. The Question Box will be made a prominent feature of the coming meeting. National Secretary Corey will have charge of the Question Box. This insures unusual interest.

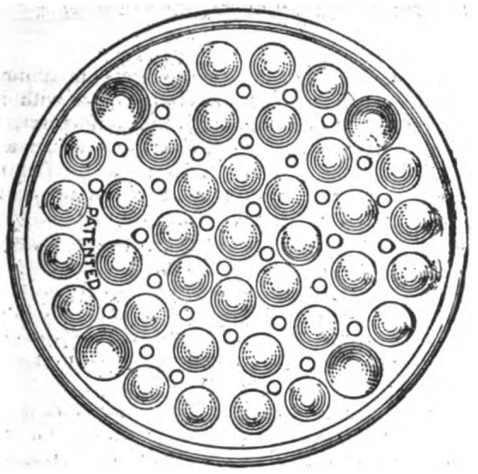
THE AVERY STAMPING CO.

The Avery Stamping Company, of Cleveland, Ohio, manufacturers of "Never-Break" steel hollow-ware, comment upon the Pure Food Laws, thus:

"Pure Food legislation will do most good when people observe sanitary principles in preparing their food. The purest food may be spoiled if unhygienic cooking utensils are used. Utensils should not absorb grease and carry over or impart flavors of burnt grease or previously cooked food. They should not chip or scale off, as the scalings get into the food. Noted foreign physicians, and lately a physician connected with a New York hospital, expressed the opinion that the use of cheap enameled ware has materially increased the prevalency of appendicitis and cancer of the stomach. The minute particles which are introduced into the human body while eating food that has been prepared in improper utensils, work all the danger. The statement was sent broadcast by the Associated Press and was published in the Medical Record of New York. We compliment the Hardware merchants upon the energetic advocacy of the highest possible standards and are pleased to note the effect of same upon 'Never-Break' steel ware, for the demand for same has never been so large in all our twenty years of manufacturing these goods."

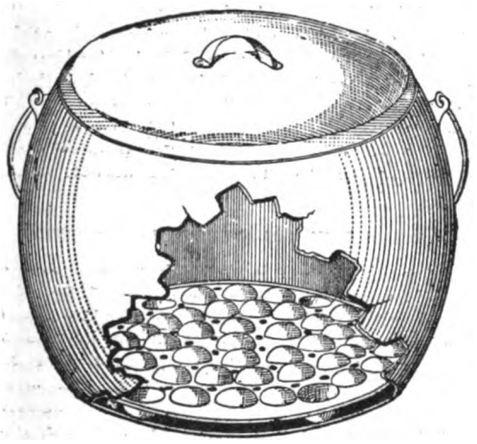
TWO VALUABLE ASSISTANTS FOR THE TRADE.

American Fork & Hoe Co., Cleveland, Ohio, are sending out to the trade copies of two new books entitled "Tools and Their Uses" and "Selling Pointers," both of them being unique. The first-named is replete with information concerning Farm and Garden Hand-Tools, such as has never before been compiled and published. Several fine half-tone engravings are included in the contents, showing these various tools in actual use in the field or garden. The second named book relates to a feature of selling and advertising that has been greatly neglected, and is dedicated to clerks who aspire to become better salesmen, more valuable to themselves and to those whom they serve. Such pertinent subjects as the following are discussed at length: A Salesman's Worth, Opportunities of Retail Salesman, How to Study Salesmanship, How to Sell More Goods, How to Answer Objections, Getting New Customers, How Sales Can Be Boomed, etc. Copies of these books will be gladly sent upon application to the company, as above.



FARWELL, OZMUN, KIRK & CO.'S ANNUAL DINNER.

Farwell, Ozmun, Kirk & Co., St. Paul, Minn., gave their tenth annual dinner to their traveling salesmen and heads of departments on Thursday, December 27, at the Merchants Hotel. The evening was voted by those who attended as being one of the pleasantest of these occasions. There were about 125 present. A few remarks were made by President R. A. Kirk, W. A. Pier, of the Favorite Stove & Range Co.; T. T. Bacheller of *The Hardware Trade* of Minneapolis, and a number of invited guests, following which the assembly was treated to a very enjoyable entertainment of about an hour's duration. The programme of the dinner was issued in a very attractive form, on the cover of which is shown a remarkably clear snap-shot photograph taken in midsummer from the banks across the river almost directly opposite their new building shown in the foreground. It is a very graphic and interesting photo. The two larger openings shown in the lower corner of the imposing building in the photo, are the double-track entrance to the building, and driving entrance to the shipping room on ground floor. The Union Depot sheds are shown just one block east of the building. The company is just completing its first year in the new quarters, and take pleasure in stating that the building and its appointments have come up to the most sanguine expectations.



Digitized by Google

THE STANDARD BOILER PROTECTOR.

The Kitchen Specialty Mfg. Co., Reading, Pa., are the manufacturers of the salable novelty in the domestic economy of the kitchen which we illustrate herewith. It is made in agate ware and tin, in sizes to fit all boilers, and among its many advantages may be mentioned: By its use there will be no burning of either victuals or of the boiler. Boilers last a great deal longer, as they do not need so much scouring, while the food is cooked in three-fourths the time. The Protector when placed in position in a cooking boiler is claimed by the maker to positively prevent the victuals from burning or sticking to the bottom of the boiler. It is made of agate ware or tin plate and indented in a manner that raises the food so far above the bottom of the boiler as to prevent all scorching and burning in the event of boiling dry. It can also be used for steaming purposes as well.

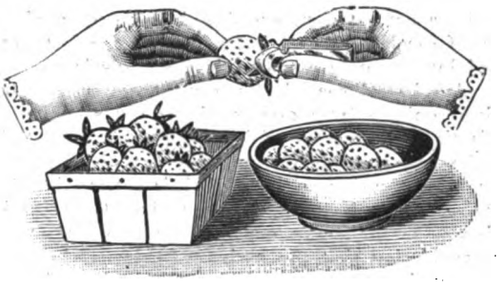
THE STANDARD BOILER PROTECTOR.

THE PROTECTOR IN POSITION.

MERCHANTS' AND MANUFACTURERS' ASSOCIATION ELECTS OFFICERS.

The Hardware Merchants' and Manufacturers' Association of Philadelphia at its annual meeting elected the following officers to serve for the ensuing year:

President, John R. Griffith; vice-president, E. S. Jackson; secretary-treasurer, T. James Fernley; board of directors, William W. Supplee, Charles Z. Tryon, Thomas Devlin, Ellicott Fisher, John R. Griffith, Charles M. Biddle, T. James Fernley.



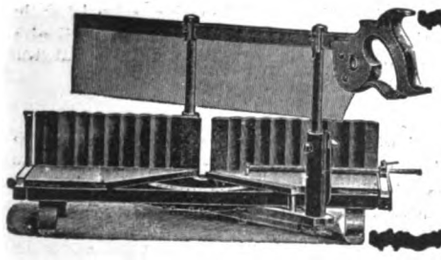
The twenty-first annual banquet of the Association will be held on Thursday evening, January 31, at the Bellevue-Stratford. Eminent speakers will respond to toasts.

THE "NIP-IT" STRAWBERRY HULLER.

Windsor Stephens & Co., Waltham, Mass., are the manufacturers of the improved "Nip-It" Strawberry Huller, of which we present an illustration. This ingenious device is manufactured from thin sheet steel of an improved form, for easily and quickly removing the hulls of strawberries without the fear of soiling fingers, or getting seeds or grit under the nails, avoiding all crushing of the fruit, and by taking out any soft spots the berries are kept in condition for table use. The device is nicely nickel-plated, and for display purposes on the counter a dozen are mounted on a card. It is designed for ready sale at an extremely moderate price, and is an especially "taking" specialty that becomes popular wherever it is introduced.

THE "NIP-IT" STRAWBERRY HULLER.

MODE OF USING IT.



DIRECTOR OF WORKS APPOINTED FOR THE ALASKA-YUKON-PACIFIC EXPOSITION.

Frank P. Allen, Jr., an architect and engineer of wide experience, has been appointed director of works of the Alaska-Yukon-Pacific Exposition which will be held at Seattle during the Summer of 1909. It is the duty of the director of works to supervise all work done on the grounds, and after the exposition opens to have charge of the maintenance of the grounds and buildings.

Mr. Allen gained his exposition experience at the Lewis and Clark Exposition at Portland in 1905 where he had charge of the structural work. Mr. Allen was born in Grand Rapids, Mich., and has been an architect and engineer all his life. He secured his early training in his profession under his father, Frank P. Allen, Sr., who was a prominent architect. After taking a course in civil engineering at the University of Michigan he went to Chicago where he spent six years, specializing on structural work for bridges, railroads and large buildings.

At Portland he became a member of the firm of Lewis & Allen, consulting and constructing architects and engineers. He is manager of the General Engineering and Construction Co., of Seattle and Portland. The latter company has built the Waldorf and Perry apartment houses at Seattle, large concrete structures; and is building an immense warehouse on the water front. It also has the contract for the construction of four additional stories on the new Savoy Hotel.

The exposition grounds cover 250 acres of the unused portion of the campus of the University of Washington and border for more than a mile and a half on Lake Washington and Lake Union. The site has been pronounced by John C. Olmsted, the famous landscape artist, who laid out the grounds, as the most beautiful ever utilized for such a purpose. Mt. Rainier and Mt. Baker, with their perpetual snow peaks are in plain view. Twelve large exhibit palaces will form the nucleus of the exposition. Work on the grounds has already begun under the direction of Mr. Allen.

GOODELL MITRE BOX

Made entirely of steel. No more breaking. Its quality, durability and improvements make it the most desirable box on the market.

Send for circular and prices. GOODELL MFG. CO., Greenfield, Mass.

OUR BRITISH LETTER.

LONDON, January 12, 1907.

THE MONTH'S TRADING.

During the month which has elapsed since sending you my last letter, retail trading in Great Britain has been somewhat disjointed, and the ordinary course of business interfered with, owing to the special efforts made by retailers in almost every branch of trade to secure some portion of what is generally termed Christmas trade. The holidays, too, have somewhat interfered with ordinary business, and the days succeeding Christmas have been quiet, and ironmongers, in common with other traders, have not yet commenced with any degree of energy the business of the New Year. Indeed during the first two or three weeks of January only casual orders, for goods actually required, are placed, and special efforts must be made if business is to be kept going. Ironmongers of the old school seem to accept this time of reaction as inevitable, and content themselves with balancing their books, making out their accounts, and, possibly, with squaring up some of their outstanding debts. The progressive trader, however, does not accept the inevitable rest from business, and seeks out how he may create new trade, wisely considering that the rush of Christmas business and its attendant profit would be minimized if he allowed the first few weeks of the New Year to pass by with his till empty and the pages of his new day-book blank.

The modern ironmonger, therefore, follows in line with the draper, boot-maker, and fancy goods emporium, and organizes a "special clearance sale." A very casual glance round the warehouses and showrooms of the average ironmonger shows the visitor with an enquiring turn of mind and an intelligent knowledge of the Hardware trade, that there are many things upon those shelves, in those cupboards, and in the glass cases, which are far from being desirable stock and cannot even by the widest strength of imagination be classed as salable goods. Indeed, the ironmonger is by no means exempt from accumulating residue at the close of every season, and it is increasingly desirable that he should make some effort to remove these old shopkeepers and make room for new goods, as well as release capital, so that he can go to the best market with cash in hand. This phase of modern trading is being realized more and more year by year, and I am pleased to be able to record that this Year of Grace 1907 has brought with it more ironmongers' sales than in the past, and at the present time many even leading ironmongers and those who have hitherto been considered somewhat conservative, are holding these after-season sales, and reducing the prices of the goods they wish to clear. Such sales are by no means as damaging to future business as they were formerly thought to be, because the greater portion of the goods sold under sale conditions go to strangers, and to those who have not hitherto been customers, or else they are secured by regular buyers, not because they actually require them, but rather because of the bargain prices which tempt them to buy. Indeed a competent authority upon the subject has recently stated that he has found by careful scrutiny that such sales increase the number of his regular customers, acting as a very satisfactory advertisement, bringing in new business during the year.

THE PROSPECTS FOR 1907.

The prospects for business during the present year are exceptionally hopeful. The metal market about which there has been such talk both in the United States and in Great Britain during the past few months has been almost an unprecedented boom; not so much from the fact that the prices have risen so rapidly and to such an extent, but that the advances have been due to an increased volume of business rather than speculation, and also to the fact that the boom in prices has been accompanied with increased trade in almost every department affected by the raw materials associated with the metal market. Manufactured Hardware is sold steadily throughout the whole of the home markets, and in scarcely any branch of the metal industries has the demand which received such an impetus a few months ago, slackened. Further, the export business of this country has been good during the past few months. It continues satisfactory at present, and the consensus of opinion among manufacturers and exporters is that it is likely to remain steady, if it does not actually increase during the year 1907. The demand for manufactured Hardware, which has been steadily increasing, has not hitherto affected the retail ironmonger to the same extent as the factor and shipper, as it is well known in commercial circles that a general boom in raw materials brings with it first an increased volume of trade benefiting the manufacturer, factor and shipper, but the fortunes of the retailer come in for a share of the benefits obtained at a somewhat later date. The manufacturer and the merchant have had the best innings so far in the present trade boom, but it is now the retailer's turn, and consumers, many of whom have benefited by larger dividends paid by manufacturing firms, and by the increased status of their sources of income, are now prepared to spend more freely in their own domestic requirements. Some of the wealthier are contemplating increasing their expenditure, possibly re-building their houses, or fitting them up with more up-to-date appointments.

Then the improved status of the engineering trades and the manufacturers of Hardware generally have produced steadier employment, and better wages for the industrial classes, and the erection of new works, which have been going on for some months past, has caused developments in retail centres of commerce. All these matters are factors in the coming trade, and materially improve the prospects of 1907 retail Hardware trading. Such prospects, although primarily affecting the home markets, must to a certain extent improve the manufacturing industries in the United States and other countries, and will eventually lead to larger orders being placed for domestic appliances, and the thousand and one things that British Hardwaremen handle and buy through merchants and factors having their origin on the other side of the water. There can be no doubt, therefore, that the retail trading for 1907 will benefit manufacturers, merchants, and shippers in the United States proportionately with the increased volume of trade in the home markets in this country.

THE ADVANTAGES OF MODERN MACHINERY.

Perhaps one of the most striking features in connection with the improved status of trade is the desire of British makers to adopt the most up-to-date schemes of modern plant and machinery, and many of the machines and appliances made in America are found acceptable in the engineering and machinery workshops of Great Britain. Just as a few years ago the retail ironmongers of this country woke to the necessity of rebuilding their shops, putting in new plate-glass fronts, adopting the use of air-tight glass cases and other schemes so necessary to modern retail trading, they are now turning their attention to their workshops. The traditional ironmonger's workshop as it was in the seventeenth century, consisting of a few wooden benches, a wooden hollowing block, and some remarkably antique tools known as kettle horses, stove pipe stakes, and similar primitive contrivances, satisfied the ironmongers until the close of the nineteenth century.

In fact it is scarcely more than a quarter of a century ago since the general ironmonger thought it necessary to introduce modern machinery. Here and there some of the more advanced ironmongers have laid down plant and brought power to bear upon the few machines they use instead of the hand mechanism of former days. Even yet turning latches are worked by foot power, and some grinding machines turned by the aid of a large fly-wheel something like an old-fashioned chaff-cutter wheel. The bellows are worked by hand, and the spinning jenny and the bottom turning machine are operated by the same man who guides the can or other article being fashioned. Now, however, it is felt that home-made tin-ware can only be produced by the aid of better machinery and improved tools. As I have stated, there is undoubtedly a wave going over the country, and a general inclination on the part of ironmongers to adopt these modern contrivances, and in the satisfaction of such needs the manufacturers of the United States of America, who have been noted for so long a time past for their beautifully contrived and well-finished tin-plate machinery, will undoubtedly come in for a large share of the new business.

◆

There is only one class of men in the retail business which is more to be pitied than those who do not advertise. This is the class which runs one ad. from one year's end to another, for this class not only gets no good from such an ad., but also parts with its good money.

Digitized by Google

REVIEW OF THE MARKETS.

WIRE NAILS: While there is not quite so much new business in this line as there was last month, there is enough to still keep deliveries in the background. The specifications now being received are generous enough to put the home stock in shape for business. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$2.00
Carload lots to retailers	2.05

New York.—As is usual at this time of the year, the local demand is only a moderate one. The market is firm under the circumstances; New York quotations are on the following basis:

To retailers, carloads on dock	$2.19
Less than carloads on dock	2.33
Small lots at store	2.30

CUT NAILS: The Cut Nail Association had their meeting without changing prices. The mills are still several weeks behind in filling orders and making deliveries, so that the jobbers' stocks still lack sizes to make the assortments complete. Demand is good. Quotations are as follows, f.o.b. Pittsburgh:

Carload lots to Jobbers	$2.05
Less than carloads to Jobbers	2.10
Less than carloads to Retailers	2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—The local demand is limited to the natural business to be had in the market, which is only moderate. Quotations from jobbers are on the basis of $2.30 for small lots from store.

BARB WIRE: Stocks now are expected to be in order for an early trade, so jobbers are sending in liberal specifications and urgent requests for an early delivery, with a view to expedite the result. The mills are still behind in filling orders, although the new business is not extravagant. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: The filling of specifications on previous contracts is the largest amount of business on hand at the mills, the mills being somewhat behind on deliveries, the car shortage contributing largely on all wire products to cause delay. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.85
Retailers, carloads	1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

STANLEY RULE & LEVEL COMPANY: A new schedule of prices, covering a greater part of their product, has been issued by the Stanley Rule & Level Company, New Briatin, Conn. Advances are shown in numerous styles of Rules, Squares, Levels and Planes, but the feature of the schedule is that it consists of net prices, and the system of discounts has been virtually done away with by the company.

SHOVELS: Following the withdrawal of quotations on Shovels by the constituent companies of the Ames Shovel & Tool Company, higher prices have been announced by these and several other prominent producers of the line. Quotations represent advances of 5 per cent. in first and second grade goods, and 10 per cent., or nearly 50 cents per dozen on Shovels of the third and fourth grade. Some manufacturers, however, state that their prices remain unchanged.

HORSESHOES: New prices announced by the manufacturers are $3.65 per keg for Steel and $3.90 for Iron Horseshoes to quantity buyers, with a concession of 10 cents per keg on carload lots. To other buyers the price is $3.85 for Steel and $4.10 for Iron Shoes. These changes represent an actual advance of 10 cents per keg on carloads and 20 cents on less than carload lots.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12¾ to 13½
B Quality Manila	11¾ to 12½
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8½ to 8¼
No. 1 Jute, ¼ and larger	8½ to 9
No. 2 Jute, ¼ and larger	8 to 8½

Less ¼ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels	43 cents per gallon.
In lots of 5 barrels or more	42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil. 2 cents per gallon higher than raw.	
Regular Boiled Linseed Oil. 1 cent per gallon higher than raw.	
Calcutta Oil	70 cents per gallon.

THE ALBANY TRADE.

Based on orders already taken for Spring delivery, indications point to activity and volume in business. The steady and firm condition of the market, the plans already outlined for State and municipal work, the building of new houses to accommodate the influx of people to the cities and large towns presage an early and busy season.

The fitful weather thus far this Winter, jumping from zero to almost Summer-heat and vice versa with plenty of rain and but little snow, has tried the patience of man and beast, lessening sales in some lines, but increasing in others that thus escape being carried over. The ice-crop is important in this section and but little thus far has been harvested. Another month, however, can usually be counted on for the last act of the Winter drama, and the curtain may be rung down mid ice and snow with overflowing ice houses along the river front. This would mean good sales in tools and many supplies for the dealer who is eager to turn merchandise into the ready money with which the harvester is usually supplied.

Difficulty in obtaining reasonably prompt shipments is still the complaint, and scarcity of goods begets the question of "have you got it" and "how many," rather than "what's the price." It will take unusual care in ordering now to provide the needful in goods when the season finally opens, and "shortages" may require another name to correctly describe the back orders. Hence, the careful study of the inventory will be interesting and necessary.

Let us hope that the right side of the ledger may show that the labor and unusual care of the past year has brought its proper reward. ALBANY HARDWARE AND IRON CO.

THE CLEVELAND TRADE.

Most of the manufacturers have been slow to believe that the advance in iron and steel would be permanent, and yet 1907 finds prices still advancing. What is being done with such immense quantities is an interesting question. The trolley roads invading the country, East, West, North and South, have created an immense new demand and the automobile craze is adding to it. Steel cars is largely a new industry and the increased bridge building for trolley roads, with the increased use of steel in erecting buildings, goes far in answering the question. This verily is the age of steel and iron. What of the future? Trolley roads are only in their infancy and the demand for rails for their use is sure to increase, and the million new inhabitants added to the country yearly must be housed. Steam roads must add to trackage if they are to keep pace with the demands upon them. Will not the pace slacken? Yes, but the steel and iron industries are not likely to be in the paupered class again. They will not be commanded by other business. They are too stalwart to droop in the shade, and panics will not disrupt them. They may be benefited by legislation, but are not dependent on it. The

world's work requires iron and steel, and if less is demanded for a time mills will not be bankrupted by waiting. They will not be compelled for financial reasons, to destroy the value of their product by oversupplying the market. Change in price, when it comes, will not be radical. That there is a limit it is sure to prevent an under-estimate of its value, and the increased value caused by delay may compensate for delay in realizing on it. To be in condition to chose the time to sell, is a safety valve new to the steel and iron industry, and will prove of immense value to the country. THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

Sales for the first half of January are just about the same as for the corresponding period of 1906. The mild weather which prevailed cut off the demand for Winter goods, and the depth of mud in the country roads prevented country merchants from hauling in their heavy goods, and the farmers from reaching the stores. Colder weather arrived on the 16th inst., so that seasonable goods will again be called for. There is a general feeling that we shall have a very busy year, and we can see nothing to prevent this expectation being realized.

LOGAN-GREGG HARDWARE CO.

THE SAN FRANCISCO TRADE.

The Hardwaremen of Spokane, and, in fact, all the larger business firms of that inland coast territory, are girding themselves for a battle royal when the Interstate Commerce Commission convenes in that city next week. The Chamber of Commerce and the Spokane Jobbers' Association have the matter in hand, and the municipality is aiding with a substantial cash grant for the conduct of the case. The question at issue is Spokane's demand for a readjustment of trans-continental freight rates so that the Spokane country will be on a parity with Portland and Puget Sound terminals. Spokane pays in the majority of instances higher rates on trans-continental freight than do Portland and Sound terminals, although the haul is 400 miles shorter, and this construed injustice to them, say several representatives of strong Hardware companies in Spokane, is what we are going to strenuously ask the Interstate Commerce Commission to rectify. The defense, in a nutshell, is that railroads are justified in charging the lower rate for the longer haul, because of the competition of water haul.

The New Year wish of the decent people of San Francisco is that they might have a mayor like the one who is now serving his second term for the city of Oakland on the east side of the bay. This east side official is a remarkable man on this coast, and his name is Frank K. Mott, proprietor of the Mott Hardware Company, one of Oakland's three large liners in the trade. Reorganization is now going on in Oakland's City Water Company, a $12,000,000 institution, according to its recent sale, and last week this company's finance committee called on Mott, the Hardwareman, with a proposition that he become the water company's president at an annual salary of $12,000 guaranteed for five years. This offered compensation is three times more than attaches to the mayoralty office. Mr. Mott took the matter under advisement for three days and then notified the company that the plans he had been moulding into shape for many months for the laying out of city parks and boulevards, and otherwise beautifying Oakland, had been approved by the people's vote of $1,000,000 for the purpose, and that the forwarding of this business to completion would require the mayor's close and active attention for some considerable time; besides I have a Hardware business to look after, all of which appeal to me so strongly that I feel I must respectfully decline your appreciated offer of the presidency of your water company.

State Mineralogist Aubury predicted for the writer to-day that the statistics of the copper output of California in 1906, a rapidly growing industry in which several of our foremost Hardware and steel men are largely interested, will show that all previous records of the State were beaten by many millions of pounds. The figures will not be compiled until June, but the State official has approximate information as to what they will be. Incidentally Mr. Aubury said: "The compilation of statistics we are making will show California's production for the year 1906 more than $1,500,000,000 in gold alone.

Northern California Hardware dealers are planning to effect an organization embracing as members all of the State Hardware and Implement Associations of the Pacific Coast, forming one large organization. Within a few days E. W. Evenson, secretary of the Inland Empire Hardware Association, will issue a call for a meeting of all Hardware and implement dealers of the coast, to be held at Portland, February 11, for the purpose of organization. The organization will be named "The Pacific Federation of Hardware and Implements Dealers' Associations."

When this letter is half-way on its journey to the editor of HARDWARE The Inland Empire Implement and Hardware Dealers' Association will be convening in Spokane to hold its third annual convention.

The California Hardware dealers of the Southern portion of the State are enthusiastic over the proposition, advanced some time ago, of holding the next convention of the California State Retail Hardware Association in Los Angeles. According to the association's by-laws "meetings shall be held in San Francisco."

IMPROVED CARPENTERS' TOOLS

but under conditions produced by earthquake and fire, prudence is dictating some other city for the next convention. The Southern dealers feel that the holding of the convention in Los Angeles, would stimulate the association work in the South and are ready to guarantee a large attendance from all sections.

INDUSTRIAL PRESS ASSOCIATION.

NORTH DAKOTA HARDWARE ASSOCIATION.

In regard to the convention the above Association intends holding at Minot February 5, 6 and 7, not having as yet a complete programme blocked out, the secretary sends us the following summary:

PROGRAMME

TUESDAY, FEBRUARY 5, 1907.

The entire Afternoon Session will be an *Executive Session* for members of the Association or vouched for Hardware Merchants. Every Hardware Merchant in North Dakota is especially invited and requested to be present during this entire session.

2 P. M.—Reception of Members; Enrollment of New Members; Payment of Dues and Distribution of Badges.

2:30 P. M.—Session Called to Order by the President.

Appointment of Committees.

Collection of Railroad Certificates.

Annual Report of Secretary.

Report of Auditing Committee.

Report of G. W. Wolbert, representing the National Retail Hardware Association.

Opening of Question Box.

Discussion on "Good of the Order."

WEDNESDAY, FEBRUARY 6.

MORNING SESSION—9:30 A. M.

9:30 A. M.—Reception of Members; Enrollment of New Members; Payment of Dues and Distribution of Badges.

10 A. M.—Convention Called to Order by the President. Opening Prayer—Rev. N. E. Ellsworth.

Address of Welcome—Hon. D. C. Greenleaf, Mayor.

Response for the Association—Prest. H. F. Emery.

Address—"Credits"—F. L. Macomber, Manager of Credits, Hibbard, Spencer, Bartlett & Co., Chicago.

AFTERNOON SESSION—2 P. M.

This entire Session is assigned to the Jobbers and Manufacturers, and will be occupied by them in addresses and General Discussions.

Session Opened.

Musical Selection, by J. B. Freye, Chicago.

Appointment of Additional Committees.

Report of Special Committees.

Discussion.

EVENING—8:15 P. M.

Entertainment in Jacobson's Opera House, tendered by Commercial Club of Minot.

THURSDAY, FEBRUARY 7,

On Paints. As the discussion "on Paints" in our 1906 meeting created so much interest the Committee having in charge the arrangement of this programme have, by request, set apart this day for further discussion of the subject, and the terming it Our Paint Day (not red).

MORNING SESSION—9:30 A. M.

A Talk on White Lead—Its Advantages as a Paint Pigment—By a Representative of the National White Lead Company.

Address, with Demonstrations and Illustrations—"Sublimed White Lead, a Fire Process Lead Pigment," by L. S. Hughes, Chief Chemist Picher Lead Company.

Discussion.

AFTERNOON SESSION—2 P. M.

Paper—"On History and Composition of Paints," by Maximilian Toch, of Toch Brothers, New York.

Address—"Pure Paint Law of North Dakota"—Prof. E. F. Ladd, Professor North Dakota Agricultural College, and Commissioner in Charge of Pure Paint Law of the State.

Discussion.

Selection of Next Place of Meeting.

Report of Committees.

Election of Officers.

Adjournment.

NOTE.—At the close of this Session there will be a short meeting of the Executive Committee.

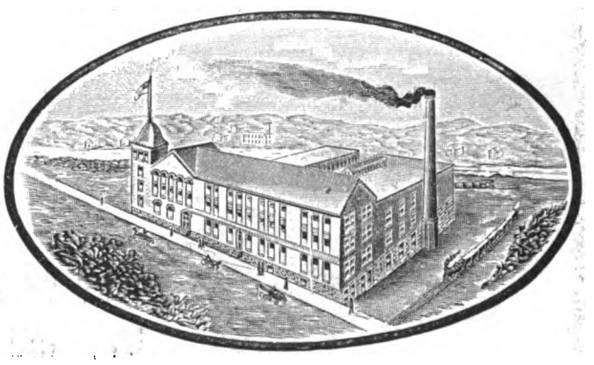
In addition to the above the railroads have granted a special rate for the meeting, the "Soo" line naming one fare for the round trip and the other roads in the State a fare and a third on the certificate plan.

Secretary C. N. Barnes states: "We never before received word from so many of our members who propose attending the meeting as we have this year, and from every indication it is going to be the best in the history of the Association. Our growth in the past year has been larger than in any year since we organized. We have added 100 members during the last twelve months, which we consider almost phenomenal in a State where there are comparatively so few Hardware dealers as there are in North Dakota. We feel that the programme we have arranged for the different days of this meeting is going to make it very instructive as well as very profitable to every one who attends. As will be observed, the last day is devoted entirely to the Paint subject, and as we have several distinguished speakers who will be with us, we know the day cannot help but be very profitably spent.

DEATH OF T. HENRY ASBURY.

T. Henry Asbury, president of the Enterprise Mfg. Co., Philadelphia, Pa., died at his Winter home in Clearwater Harbor, Fla., on Friday, January 11. Born October 19, 1838, in Birmingham, England, he started in early life to carry out a motto which throughout all his career has been his ideal, "Aim high, aim true." He left his home in England when eighteen years of age against the protests of both of his parents.

After a very stormy passage of over seven weeks he landed in Philadelphia. His first position was with T. Stewart, machinist, at a salary of $5 per week; he later found employment at Sharp's Rifle Company and remained there until the panic of 1857.



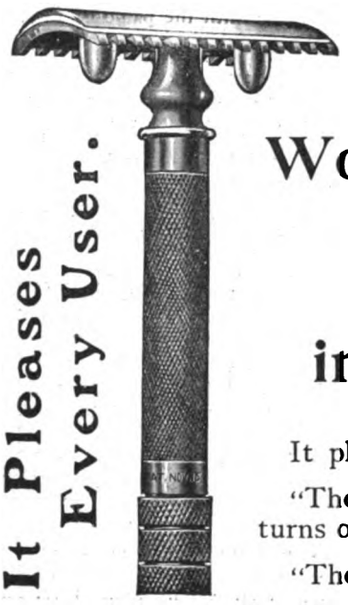
When the war broke out, the late Henry Disston induced Mr. Asbury to accept a position as foreman in his works. It was while in this capacity he employed John G. Baker, who afterward associated himself with Asbury & Co. Mr. Baker invented a self-measuring Faucet for drawing and measuring molasses, heavy oils, etc., which this firm made and sold in large quantities. Realizing at this time the advisability of a selling organization in connection with the manufacturing Mr. Asbury combined Asbury & Co. with Smith, Seltzer & Co., who were then wholesale Hardware jobbers, and organized the Enterprise Mfg. Co. on September 8, 1866. Small quarters were secured at American and Dauphin Streets, and a small machine shop and foundry were built. The business steadily grew until now its output is shipped to all parts of the globe and over 800 people are employed.

Mr. Asbury was a man of keen judgment and always believed that it was a waste of time to make anything but a first-class article. Mr. Asbury's home life was ideal. In the early eighties, with a family of five children, he purchased a large tract of land in the suburbs of Philadelphia, believing that such investment would be wise, as was demonstrated later, and also that his children might make their several homes near him.

Mr. Asbury is survived by his widow, two sons, Charles W. and Harry E. Asbury, and three daughters, Mrs. C. E. Gadbury, Mrs. A. C. Harmer and Mrs. N. H. Rand. Charles W. Asbury occupies a conspicuous and influential position in the trade as president of the American Hardware Manufacturers' Association.

E. A. PFLUEGER.

The attention of the trade is especially called to the fact that E. A. Pflueger, Akron, Ohio, who has been connected as secretary and treasurer with the Enterprise Mfg. Co., of that city, since its organization, has resigned his position with that company, and has organized the undersigned company, to the success of which he is now devoting his attention. The two companies bear no relation to each other, but are entirely separate and distinct, each being engaged in business upon its own account. They are pushing forward the equipment of their plant as rapidly as possible, and an illustrated catalogue of Fine Fishing Tackle will be mailed to the sporting goods trade as soon as ready.



The new plant shown in the electrotype herewith is located at the intersection of North College Street and Pennsylvania Railroad. Machinery is now being installed and it is expected to be in operation by the first of March, 1907. The factory is a brick building, three stories and basement, 60 by 140 feet, equipped with 100 horsepower boilers and engine; also electric lighting plant, making it the largest plant in the United States devoted to the manufacture of Fishing Tackle. The business will be under the direct management of the president of the company, E. A. Pflueger, who is known all over the United States and Canada through his connection with the Fishing Tackle trade for the last twenty-five years.

JOSEPH RODGERS & SONS, LTD.

Alfred Field & Company, 93 Chambers Street, New York, who are the sole agents in the United States for Messrs. Joseph Rodgers & Sons, Ltd., No. 6 Norfolk Street, Sheffield, England, make public the following, which is being distributed to the trade in their interest:

Messrs. Joseph Rodgers & Sons, Ltd., of No. 6 Norfolk Street, Sheffield, desire to bring under notice of the trade and all customers generally that there has recently been a considerable amount of piracy in connection with their name and mark, and that various attempts have been made to sell cutlery which is not the manufacture of their long-established house, which was founded in 1724.

Under these circumstances Messrs. Joseph Rodgers & Sons, Ltd., have been obliged to take action, both at home and abroad, in defense of their rights, which they have done with complete success, and they desire to bring under the notice of the trade and customers generally the following facts:

They proceeded recently against Messrs. Hearnshaw Bros., of Sheffield, who claimed to sell cutlery marked "Rodgers Bros.," a name which the firm had purchased in connection with an edge tool business only, and the company were successful in obtaining a perpetual injunction in the High Court of Chancery, which was granted by Mr. Justice Buckley, and in connection with which an enquiry as to the damages suffered by Messrs. Joseph Rodgers & Sons, Ltd., were ordered to be taken against the defendants.

The company desire particularly to call your attention to the fact that in this case, after abundant evidence with regard to the trade of the company in all parts of the world, the learned judge held that "Rodgers Cutlery" had acquired the meaning of cutlery manufactured by this company, and the effect of this decision is, that it is unlawful for anyone to deal in cutlery other than that manufactured by this company (even if it bears legitimately the name of some firm in which the word "Rodgers" forms part) as "Rodgers Cutlery," which name can alone be applied to Joseph Rodgers & Sons Limited's productions.

Another action has been brought against one Joseph Rodgers Simpson, who was marking cutlery with the name "Joseph Rodgers Simpson & Son" in such a way as to pass off his goods as and for the manufacturers of Joseph Rodgers & Sons, Ltd., and who had made very prominent the name "Joseph Rodgers" and who had added the words "& Son" to his name, and a perpetual injunction was granted to Messrs. Joseph Rodgers & Sons, Ltd., by Mr. Justice Buckley.

In connection with the last-mentioned action it was discovered that one Harris Wolfson, carrying on business in London, had been selling cutlery manufactured by Mr. Simpson as "Rodgers Cutlery" and with the consent of the defendant a perpetual injunction was granted against him by Mr. Justice Swinfen Eady.

The above are three recent instances (among many others) of action taken by Messrs. Joseph Rodgers & Sons, Ltd., in protection of their rights, and notice is hereby given that they will in every case where it is brought to their notice that their rights are being infringed take immediate steps against the person or persons offending, and they desire specially to call the attention of their customers to the fact that they are the only firm entitled to describe their cutlery as "Rodgers Cutlery," and those desiring to purchase the well-known article which is universally known as "Rodgers Cutlery," namely, the productions of Joseph Rodgers & Sons, Ltd., are warned against unscrupulous middlemen who may attempt to sell them inferior manufactures under the name of "Rodgers Cutlery."

Messrs. Joseph Rodgers & Sons, Ltd., trust that this notice will be a safe-guard to those who desire to purchase and deal in their well-known manufactures.

The company will be greatly obliged if any customer, who finds that he has been led into purchasing "Rodgers Cutlery" which is not of the manufacture of their old-established house, will bring the matter under their notice, so that immediate proceedings may be taken to protect alike the interests of their house and of the public at large.

CONFESSIONS OF AN AUTO.

Monday: Just out of the shop. I'm supposed to be worth $2,000, but I feel like thirty cents.

Tuesday: On exhibition. Been admired by three blondes, four lawyers, one clubman and a retired sea captain.

Wednesday: Sold to a man who couldn't afford to buy me. But he did. His wife is trying to get into suburban society.

Thursday: Gee, but I feel mad in my bearings. Also, I believe I've got wind in my carbureter. Man tried me to-day. Went for ten miles and then I laid down. Sent for agent. Agent too busy to come. Having troubles of his own.

Friday: The trouble with me was, I wasn't assembled right. I came out in a lot of 200, and they had to hurry over me. It's tough to be an invalid so young in life.

Saturday: Man took me out again to-day. Oh, my, I should hate to feel the way toward any human being he does toward me! First he was stuck on me, and now he says he's stuck with me.

Sunday: The trouble with me is that I have a dose of malaria. It gives me that tired feeling. I had to be towed home by a watering cart. Never expected to be so near a water wagon as that.

...onday: Man advertised me for sale to-day.

Tuesday: Guess I was mistaken about what my owner thought. By the way he praised me to a possible purchaser, he loves me better than anything on earth.

Wednesday: Sold again at half price. Man who bought me has been trying to run me ever since.

Thursday: Here I am again at factory. By Jove, they're going to take out my appendix!

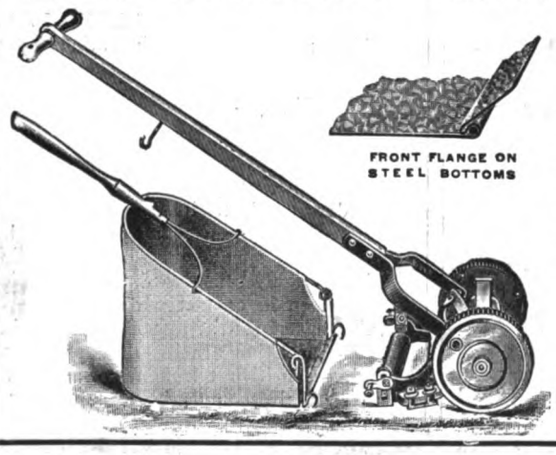
Friday: Operation was successful. All I took was gasoline.

Saturday: Full of ginger. Went a thirty-mile clip all day. New owner much pleased.

Sunday: Sick again. My crankshaft has neurosis, I guess. Man changed my clutch too soon—curse him!

Monday: Traded for a horse.

Tuesday: Back at factory. These visits are getting too frequent.



Wednesday: New owner impatient.

Thursday: New owner had me out. Ran into a wagon of bricks.

Friday: And to think I should end my days in a scrap heap!—Ex.

LUTHER BROS. CO., North Milwaukee, Wis., are sending out to the trade some very attractive literature pertaining to their various products in the shape of little folders. They are distributed for the purpose of making known the merits of the Fire Fly Sharpener, Challenge Hand Sickle and Tool Grinder, Carbo Diamond Sharpener, "Best Made" Sharpener and Grinder, Electric Diamond Grinder, Luther's Bi-Pedal Tool and Sickle Grinder, the Newman Special Tool Sharpener and Sickle Grinder and Reed's Carborundum Grinding Stand.

Joyce-Cridland JACKS

Are Made in 50 Standard Sizes and Types for Every Railway and Machine Shop Use, House Moving, etc.

We have made jacks for 30 years and we wish to show you that we make them right.

We have our own steel casting foundry and oil-fired annealing and case hardening furnaces. Not an ounce of cast iron is used in any Joyce Cridland Jack and all working surfaces are machined. The lifting bars are case hardened, the gears are of 40 carbon steel, and all pins are hardened and ground tapering in a universal grinder. Other makers use straight pins, which ream out their holes when driven in. All heavy forging is done on a two-direction hydraulic press using special dies. Tempering is done in oil baths.

In designing, we seek to keep down complication and to increase safety; for instance, our 30-ton Geared Lever Jack has but 26 parts, counting keys, screws and all, while another make has 61 parts. We rate our Jacks conservatively. Others claim 15 tons on a 1 3 16 in. fulcrum, while we have only ¾ in. fulcrum, and the same length of lever. We test every one of our jacks on a Hydraulic Testing Machine and know that they will raise the rated load easily and carry an overload two times as great safely.

Our line may be classified under **Lever Jacks, Geared Jacks, Screw Jacks and Hydraulic Jacks.**

Our **Lever Jacks** contain only three moving parts—the bar, the pawl, and the gear and lever.

Our **Bell Base Screw Jacks** are better than the ordinary "jack screws." The screw is protected from dirt, and the head has three openings to receive the lever, equal to a ratchet with six teeth. We also make **Ball-bearing Screw Jacks, Rapid Movement** and **Double Movement Screw Jacks,** which save time, and **Telescoping Screw Jacks** having a high lift. Our **Traversing Screw Jacks** are handy for shifting heavy machinery. Hydraulic Jacks will be described later.

Tell us what you want to use a Jack for, or ask for our Catalog "H."

The JOYCE-CRIDLAND CO.

DAYTON, OHIO.

KEEPING UP STOCK.

Make it a rule with every employee, from the office boy up, to report at once any line of goods that is out or getting low and teach them as far as possible what your experience has taught you is "low" and what is "enough" in your trade. Otherwise where several clerks are employed one of those unexpected little runs upon an article will sell you out before you know it and probably turn several disappointed customers away into the bargain.

A system of immediate reports insures a constant warning as a run on any line begins to deplete it, a good method being to supply each clerk with cards for the purpose. When a sale is made and the cash is sent to the cashier the clerk should at once fill out a "depletion card" and send it in. The system, properly worked out to meet the needs of individual establishments, keeps its head in more constant touch with what is going on through the day than the more delayed report in its usual form.

Not only should these "depletion cards" be closely watched by the buyer, or whoever is responsible for keeping up the stock, but by the advertising man as well. He will get many points and suggestions that will greatly influence his own work.

WHERE THE WORLD'S NICKEL COMES FROM.

One of the most valuable metals of commerce is nickel. Gold is where you find it—and so is nickel. Up to the present time, nickel is found only in two places—Eastern Australia and in the region of Sudbury, Ontario. These Canadian nickel mines were discovered by accident, and for years went begging for recognition—no one seemed to know the metal had any value.

When the Canadian Pacific Railway was building its main line through Western Ontario, the graders cut through a rock formation carrying both copper and iron. This was a point north of Georgian Bay, now known on the map as Sudbury.

The per cent. of copper in the rock was small, running from two to three per cent., but it was sufficiently rich to warrant an attempt at development. The Canadian Copper Company was formed, and the Copper Cliff mines opened up. The ore was shipped, some to Wales, and some to the copper reducing works in New Jersey.

Combined with the copper, was another metal besides iron. No one seemed to know what it was. It was new to the experts, both at the mines, and at the reduction works. So the New Jersey smelter allowed it to run off with the slag. Not so with the Welshmen—they knew the metal and also knew its value. Like good business men they kept their secret and bought all of this particular copper ore they could get—the nickel was worth more than the copper—and it was clear profit. But the secret at last came out, and the Sudbury copper mines became the greatest nickel mines in the world.

The mines at Copper Cliff, a few miles from the present town of Sudbury, resemble the ordinary copper mines—the shafts have already reached a depth of 1,200 feet—and the nickel-copper bearing vein shows no sign of exhaustion. The Creighton mines, however, are like the mines of the Mesaba iron range—vast excavations where the steam shovel has laid bare acres upon acres of rich ore—there seems to be no limit to the amount. The ore runs about two per cent. copper, six per cent. nickel, 40 per cent. iron and the rest mostly sulphur. After reduction, a ton of ore will turn out about 120 pounds of nickel, which now bring 40 cents per pound.

The ore is partially reduced at the mines. It is crushed and screened, then spread out over vast beds of cord wood—acres in extent. Fire is applied, and the ore roasts for sixty days. This process drives out most of the sulphur leaving the metals in a form called matte. This matte is shipped to the refining works in Constable, N. J., where the nickel of commerce is made.

INVENTS LAMP THAT TALKS.

Two new and unique inventions have been secured by Managing Director Niesz for the electrical show announced for the Coliseum, London, January 14 to 26. One of these is an incandescent lamp that lights when it is spoken to; the other is a talking arc lamp. They are the inventions of Frank Moulan, star in "The Grand Mogul." While there is no practical use to which either of these inventions may be put they demonstrate the wonders of electricity.

The incandescent lamp that talks, however, is a reality. The device is a simple one—just an ordinary telephone transmitter with a highly sensitive diaphram, which vigrates to such an extent when in contact with the human voice that it touches the wire that starts the motor for the lights.

The speaking arc lamp is also a reality. It is wired from a highly sensitive telephone transmitter into which the voice is injected, the sounds being audibly reproduced from the sputtering carbons of the lamp.

STOVE MANUFACTURERS' RECORD

THE MICHIGAN STOVE CO.

The Michigan Stove Company, Detroit, under date of January 9th, 1907, make the following announcement:

On Tuesday evening, January 8, at 6.30 o'clock, fire was discovered in the automatic coal chutes of our plant, and within the next three hours a portion of our storage plant was completely destroyed, incurring a very heavy loss. Fortunately our foundries, power plant, and a large part of our manufacturing buildings were saved, and we expect to be under way manufacturing "Garland" Stoves and Ranges, Gas Ranges and Heaters, not later than the fifteenth inst., and to be in position to take prompt care of our customers' requirements with very little, if any delay. Our facilities have not been seriously impaired, and we fully expect, as stated, to be in position within the next week to take prompt care of orders received. In the meantime, we ask the kindly consideration of our customers in our present misfortune, assuring you that any delays that may occur to immediate orders will be of a very temporary character.

THE MICHIGAN STOVE COMPANY.

THE DETROIT VAPOR STOVE CO.

The Detroit Vapor Stove Co., Detroit, Mich., which branched into the manufacture of gas stoves and steel ranges a short time ago, has met with such success as to require a new building to accommodate the business. The structure, which now is being built, faces Woodbridge Street East, directly back of the old factory on Franklin Street. It occupies a ground space 125 by 90 feet and will be four stories high. It will be of brick and steel construction, with a pressed brick front. The total cost, without equipment, will be about $15,000, and the building will be ready for occupancy about the first of the year. The company has been in existence eleven years, and heretofore has devoted itself to the vapor stove business, working from designs patented by the heads of the company. The output has been about 12,000 stoves a year, and this will be increased to 15,000, while the working force will be increased from 120 to 150.

MICHIGAN STOVE CO.

The Michigan Stove Co., Detroit, Mich., referring to their New Cabinet Range, has this to say in favor of its excellent features:

The finish is Wellsville Polished Steel, the best in the world, and is the same that has always characterized Garland Gas Ranges, and is especially suitable to and effective in this class of goods. The usual graceful "Garland" lines and shapes, as well as all of the essential working features of durability, convenience and safety, found exclusively in our ranges, have been preserved in this pattern, and it is much handsomer and more attractive than a mere cut could possibly indicate.

A Two-Burner Extension Top can be attached at the right side of the range, greatly increasing its capacity, if desired.

A Coke Burner, in which can be placed an ordinary waterback, for heating range circulating boiler, can be attached at the left of the oven end of this range; this will be found a very useful addition, and is original with us.

Gas Water Heaters. When it is desired to heat water by gas, it is much better and more economical and satisfactory to use for the purpose an Independent Water Heater, rather than one attached to the range.

Feeling confident that this new specialty will appeal to you as being an important adjunct to the already complete line of gas specialties which we offer, and be appreciated accordingly, we respectfully urge your careful consideration of same, and request the privilege of sending you a sample range for inspection and exhibit. It will be sure to sell readily, and bring you customers for others of the same kind.

This new Cabinet Range, illustrated herewith, adds to our already large and varied assortment of Garland Gas Ranges—the most modern and up-to-date line of range and heater specialties in existance.

There is a large and constantly increasing demand for a range of this type by discriminating and fastidious consumers, who desire all the conveniences and latest improvements, etc., and are willing to pay a reasonable price for such features; and we feel confident that there will be a large demand for this splendid specialty and that it will prove a winner from the outside.

It is made, as you will observe, with the oven and broiler at the left of the cooking top, which is generally conceded to be the correct and most convenient form of arrangement, and preferable in every way to the opposite form of construction, with the oven at the right.

The series will be designated as No. 150-5, and will be made in one size, with eighteen inch oven.

The broiler is eight inches high, eighteen inches wide, eighteen inches deep, and incorporates all the advantages found in the broilers of our regular line. It is placed high enough above the floor to be used by the operator standing in an erect position, thus preventing stooping, back-breaking, etc. This important "Garland" feature is thus fully preserved.

The Oven, aluminized inside, holds the heat better, and is more

NEW GARLAND CABINET GAS RANGE.

cleanly, wholesome and preferable in every way to asbestos; is of a very convenient height for operation. The top of the oven is low enough to be used conveniently as a shelf, and is generally hot.

The Low Warming Ovens are both eight inches high, eighteen inches wide and eighteen inches deep, and are kept at just the right temperature by a small flame underneath the floors of closets. This arrangement is very effective, and makes both warming ovens thoroughly practical and useful for the purpose intended;—neither too hot nor too cold.

BRIDGE & BEACH MFG. CO.

Bridge & Beach Mfg. Co., St. Louis, Mo., manufacturers of the Superior Stoves and Ranges, give the following list of their traveling salesmen for the year 1907::

Edward J. Fox, Northern Missouri.

HARDWARE DEALERS RECORD

New Stores, Incorporations, Etc.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

Auburn, Wash.—Harper & Hopper Hardware Company has been incorporated with a capital of $15,000, by Solomon Harper, Anna D. Harper, D. H. Harper.

Camden, N. J.—The Kinkerter & Sheppard Co. has been incorporated to deal in Hardware, tools, house furnishing goods, heaters, ranges and sheet iron work; capital, $50,000. Incorporators: R. L. Sheppard, J. Kinkerter, W. M. Jones, J. M. Craig, Camden.

Charleston, Ill.—W. H. McCarthy Hardware Company has been incorporated; capital, $12,000. Incorporators: W. H. McCarthy, C. J. McCarthy, Charles C. Lee.

Chicago, Ill.—McVoy-Wessling Hardware Co. has been incorporated; capital, $100,000. Incorporators: Ferdinand Goss, Thomas E. Rooney, Israel Shrimsky.

Colton, Cal.—The O. L. Emery Hardware Company, the principal headquarters of which is to be Colton, have filed articles of incorporation. The capital stock is $50,000. The directors are O. L. Emery, M. A. Hebberd, George B. Castor, E. H. Emery and Roy Sias, all of Colton.

Davenport, Iowa.—Articles of incorporation have been filed by the Strohkark, Stehn & Co., Hardware merchants. They are capitalized at $18,000.

Davidson, N. C.—The new year will open with Davidson in possession of a Hardware store proper. R. D. Mooney & Company is the name of the firm. In addition to Hardware they will have a general line of building supplies.

Hackettstown, N. J.—Osmun Company has been incorporated to deal in Hardware; capital, $100,000. Incorporators: E. M. Ozmun, Charles R. Ozmun and H. W. Hazen.

Johnstown, Pa.—The Moxham Hardware Company, the concern which recently bought the Dunham store property on Central Avenue, will in the near future make an application for a charter. The proposed incorporators are Charles Leventry, W. E. Shissler and Attorney Dan L. Parsons. The store building is to be entirely remodeled.

Malone, N. Y.—C. W. Wilding Company has been incorporated to deal in Hardware; capital, $50,000. Directors: C. Wilding, Lena Wilding, W. H. Rozon, Malone.

Montreal, Canada.—The firm of A. C. Leslie & Co., Ltd., has been incorporated with a capital stock of $250,000. It will carry on business in Hardware.

Morristown, Tenn.—A new wholesale and retail Hardware house has been established here under the firm name of the Grant-Hasson Hardware Company, with a capital stock of $25,000. The new Hardware house will be located on Cumberland Street in the new three-story brick building being erected for them, and now rapidly nearing completion.

Nashville, Tenn.—Lew Roberts has opened at No. 16 Arcade a store for the handling of cutlery exclusively. The store presents an artistic appearance, and the line which Mr. Roberts will handle consists of razors, manicure sets and a general line of cutlery.

Otterbein, Ind.—Seiwell and Yeomans has been organized to do a general Hardware and plumbing business; capital, $15,000; directors, C. H. Yeomans, C. W. Seiwell and E. A. Seiwell.

Ozark, Mo.—Ozark Lumber and Hardware Company has been incorporated; capital stock, $10,000. Incorporators: H. V. Reid, S. Chapman, D. F. Hedgepeth and others.

Swan River, Man.—Letters patent have been issued incorporating Ashdown & Bossons, Ltd. This company will take over the business of Ashdown & Bossons, Hardware merchants. The capital stock is placed at $100,000.

West Union, Ohio.—E. L. Rotroff and J. G. Metz have formed a business partnership and will open a general Hardware store at Peebles early in January. The site of the new store will be the Platter block, which Mr. Rotroff recently purchased.

Winnfield, La.—The People's Hardware & Furniture Company has filed its charter. The capital stock is $50,000, and has been taken by local business people. R. H. Fletcher is president of the company.

Changes and Improvements.

Alfred, N. Y.—Cottrell Bros. have sold their Hardware store to E. E. Fenner, of Alfred, and Edgar Fenner of Cameron, who now owns a similar business in Cameron of which Edgar Fenner is the manager. The Alfred store will be under the management of E. E. Fenner.

Ann Arbor, Mich.—The Phelps Hardware Company are going out of business and offer their stock of Hardware, implements and carriages at wholesale prices.

Cambridge, Neb.—G. M. Evans, who has been engaged in the Hardware business here during the past year, has sold his stock of Hardware goods to James H. Carroll of Ragan, Neb. Mr. Carroll takes possession at once.

Charlotte, N. C.—J. F. Abernethy & Son, successor to Abernethy & Whitener, under the firm name of Abernethy Hardware Co., will open up a stock of Hardware in their handsome building which has just been completed on North Park Place.

Edgar, Neb.—The Stoddard Hardware Company have sold their stock to the Richards Hardware Company of Blue Hill, Neb. The Stoddards are intending to go to St. Joseph, Mo., and will go into business there. The Richards firm will come to Edgar and locate permanently.

Fillmore, N. Y.—Announcement is made of the sale of Ricker's Hardware to a stock company. The members of the company are said to be Robert Lewis, A. H. Lyman, Dan Hodnett and J. W. Curtis.

Freeport, Ill.—A Hardware deal of importance in business circles took place recently in the transferring of a large interest in the Acme Manufacturing Co. to the Fraser Mercantile Co. The Acme company is located at 57 Chicago Street, in the Schrenkler building. They manufacture Hardware specialties, sheet metal work, smoke stacks, tanks, furnaces, roofing, spouting, plumbing and general repair work. The Fraser Mercantile Company, with Samuel Wiltshire, the present superintendent and general manager, will continue in the business at the present location, in connection with the Hardware store they expect to open up in the old postoffice building about February 1.

Freeport, Ill.—John Buss, the Hardware merchant located at the corner of Chicago and Galena Streets, has disposed of his business to Frank A. Steffen and Charles Seyfarth, the gentlemen being in possession.

Ft. Wayne, Ind.—Announcement has been made of the dissolution of the partnership existing between William H. and Henry F. Aumann and William E. Gerding, under the name of Gerding & Aumann Brothers, which for twenty years has been one of the established firms of the city. William H. Aumann is the retiring member and the business will hereafter be conducted by his brother and Mr. Gerding under the name of Gerding & Aumann. The firm has for a number of years been located on Wallace Street and is one of the best known concerns in Northern Indiana, dealing in Hardware, furnaces, etc.

Gaffney, S. C.—The R. M. Wilkins Hardware Company will change to a stock company, with $15,000 capital. The firm name will be Wilkins-Watson Company. Mr. Edward Watson of Greenville is the new member of this enterprising Hardware firm.

Germantown, Neb.—Fetterman & Son have sold their Hardware business. This is one of the oldest firms of Seward County and their retirement comes as a surprise to their patrons.

Gloversville, N. Y.—William H. Loft, the Bleecker Street Hardware dealer, has disposed of the bulk of his stock to Harry Williams, and Thrall & Annable, and will retire from business.

Ithaca, N. Y.—The firm of Barr Bros., after thirty years' existence, has taken steps to incorporate under the name the Barr Hardware Company. Included in the new company will be Theron Mandeville, Fred G. Patmore, Milton Mandeville and Ralph Mandeville.

Knoxville, Tenn.—A new Hardware firm, which is to be composed of two existing Hardware firms in the city, has been formed and will be known as the Moore-Carpenter Hardware Company. Both the Hardware store of Mr. Carpenter on Vine Avenue and of Mr. Moore on Gay Street will be continued at their present locations for the present. Those who compose the new firm are James T. Moore, E. V. Jacobs, Richard Wright, C. D. Carpenter and Mr. Norton.

Memphis, Tenn.—The Bond Hardware Co., at 205 South Main Street, has been sold to A. E. Beasley, late of the Simmons Hardware Co. of St. Louis and T. A. Divine, late with the Winchester Repeating Arms Co. The purchasers will conduct the business under the firm name of Beasley & Divine Hardware Co.

Moscow, Idaho.—Purchase of a Hardware store has been made by the Empire Hardware Company of Spokane, for $16,000. The officers of the company are: H. L. Herhelrath, president; E. H. Brandt, vice-president and treasurer; P. E. Hackett, secretary and general manager. The company was organized for the purpose of acquiring the business, which it will continue to conduct. The store was purchased from C. F. Stork.

HARDWARE MANUFACTURERS' RECORD

New Incorporations, etc.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

Abingdon, Ill.—Ideal Fence Tool Company has been incorporated; capital stock, $2,400; manufacturing. Incorporators, Jas. A. Clements, Albert H. Clements and Chas. W. Robertson.

Boston, Mass.—Bay State Saw & Machinery Co. has been incorporated to manufacture machinery; capital, $25,000. President, F. H. Hall, Ashmont; treasurer, E. W. Adams, Highlandville.

Brooklyn, N. Y.—New York Flatiron Co. has been incorporated to manufacture Hardware specialties; capital, $20,000. Directors: F. R. Shaffer and M. H. Beall, New York; R. R. Fresco, Brooklyn.

Buffalo, N. Y.—A certificate of incorporation of the Vacuum Burner Company has been filed. The new corporation will engage in the manufacture of gas burners and similar appliances. Its capital is $10,000. The directors are: Benton H. Wilson, Eugene C. Waldorf and Greenleaf S. Van Gorder, all of Buffalo.

Cazenovia, N. Y.—The E. L. Eldridge Mfg. Co. has been incorporated to manufacture door catch and other metal devices; capital, $10,000. Incorporators: E. L. Eldridge, F. M. Elliott, W. Watkins, Cazenovia.

Dayton, Ohio.—The Miami Valley Machine Tool Co. has been incorporated by S. D. Conover, W. D. Foster, Harry T. Chamberlain, E. R. Evinger, P. P. H. Conover; capital, $20,000.

Hooven, Ohio.—The new plant of the Graham-Phillips Horseshoe Co., at Hooven, near Cincinnati, has been placed in operation. H. Lee Early, of Cincinnati, is interested in it.

Kittery, Me.—United States Tool Co. has been incorporated to make and deal in tools and machinery; capital, $500,000. President and clerk, J. W. Hawes, Kittery; treasurer, H. P. Knowlton, Malden, Mass.

New Haven, Conn.—A certificate of incorporation has been filed by George G. Prentice & Co. The corporation will make machinery, tools, Hardware, etc. The authorized capital stock is $500,000 and business will begin with $375,000. The incorporators are George G. Prentice, Harvey M. Prentice and Thomas C. Shiling, all of New Haven.

New Haven, Conn.—The Connecticut Computing Machine Co., recently incorporated for $600,000 to manufacture a mechanical mathematician, is having plans drawn for a new brick building 50 by 150 feet, five stories high. It is also contemplated to erect smaller structures, such as engine house, boiler house, etc. The officers of the company are: Rollin S. Woodruff, president; Charles M. Jarvis, of New Britain, vice-president; Edward S. Swift, of New Haven, secretary; Frederick M. Carroll, assistant secretary, and William R. Tyler, treasurer.

New York, N. Y.—Cataract Faucet Co. has been incorporated; capital, $10,000. Directors: A. W. Murphy, O. M. Kinkelde, T. W. McKnight, New York.

New York, N. Y.—John Hassell, Inc., has been incorporated to manufacture wire nails, rivets, etc.; capital, $120,000. Incorporators: John Hassell, Southfield, N. Y.; James Hassell and William W. Smith, Queens, N. Y.

New York, N. Y.—Jones-Julia Manufacturing Co. has been incorporated to manufacture tools and chemicals; capital, $10,000. Directors: J. J. Julia, William Jones, G. E. Duncan, New York.

New York, N. Y.—L. F. Benton Co. has been incorporated for the purpose of manufacturing tools, Hardware, etc.; capital, $60,000. Incorporators: L. F. Benton, C. R. Benton, Vergennes, Vt.; F. G. Griswold, C. E. Benton, New York City.

Rochester, N. Y.—Monroe Tool Works has been incorporated to manufacture tools, machines, etc.; capital, $12,000. Incorporators: Burton D. Bogley, Mary E. Bogley, Henry D. Taylor, Rochester, N. Y.

Rockford, Ill.—Rockford Pencil Knife Company has been incorporated; capital, $25,000. Incorporators, O. J. Wigell, L. V. Haegg and O. E. Hammond.

Vineland, N. J.—Leavens Mfg. Co. has been incorporated to manufacture Hardware supplies; capital, $50,000. Incorporators: D. Harry Shander, John S. Halsey, Alfred M. Pierson, Vineland, N. J.

West Palm Beach, Fla.—The American Cylinder Brace & Tool Mfg. Co., recently organized with a capitalization of $10,000, has secured a tract of land for the location of its plant, and is making arrangements for the erection of necessary buildings. William Heim, of West Palm Beach, Fla., is president of the company, and M. E. Spence, secretary and treasurer.

Worcester, Mass.—Walden Mfg. Co. has been incorporated for the purpose of manufacturing tools; capital, $20,000. President and treasurer, F. E. Walden, Worcester.

Changes and Improvements.

Girard, Pa.—The Girard Hardware Co. has taken over the general Hardware business of Easterbrooks & Co. No equipment will be purchased at present. J. P. Sherman is treasurer of the company.

Hartford, Conn.—The Adams Tool Company, which has been in the hands of Percy S. Bryant as receiver, will be taken over by H. A. Adams and Hartford interests. Part of the machinery equipment will be sold, but the most of it will be used by the new company. H. A. Adams is president of the Adams Tool Company and A. F. Kummel, of Hartford, vice-president. The plant carries with it a limited water power from the mill pond and dam used by the old Cox grist mill located in Hockanum, which has been remodeled into a machine shop.

Menominee, Mich.—The Dudly Tool Co. are making preparations to move from their present quarters on Kirby Street to the new Electrical building. Henry Tideman, who is general manager of the Dudly Tool Company, has given the company space in the new building.

Meriden, Conn.—The Miller Brothers' Cutlery Co. have awarded the contract for the erection of a three-story addition to their plant on Pratt Street, and work will be begun as soon as an old building now standing on the ground which is to be occupied by the new one is removed. The new building will be erected directly in the rear of the present factory and will be 60 by 33 feet on the ground. It will be of regular mill construction, common brick with bluestone trimmings.

New Britain, Conn.—Plans have been drawn for a five-story brick addition, 50 by 60 feet, by the Stanley Works, manufacturers of iron butts, bolts and hinges.

New Britain, Conn.—The Landers, Frary & Clark Co. has contracted for a new annealing shop, one story, 30 by 50 feet. An addition, 37 feet square, will be made to the die vault.

New Britain, Conn.—Work has been begun on the new power house, 20 by 45 feet, which P. & F. Corbin, manufacturers of Hardware, is building.

New Haven, Conn.—Contractors are figuring on plans for the new factory to be erected by the Winchester Repeating Arms Co. A large amount of iron and copper work will be required.

New York, N. Y.—The Computing Scale Company of America has reduced its capital stock from $3,500,000 to $1,500,000. This company, of which Edward Canby is president, is a consolidation of the Computing Scale Company of Dayton, Ohio, the Money-Weight Scale Company of Chicago, Ill., the W. F. Stimpson Company, Elkhart, Ind., the Stimpson Computing Scale Company of Detroit, Mich., and the Computing Scale Company of Canada, Ltd. It was incorporated under the laws of New Jersey, October, 1901.

Richmond, Ind.—The Border Bolt and Nut Lock Company has increased its capital stock from $35,000 to $75,000. The plant is being equipped with new machinery. The output of the company is the invention of Charles Border, a local mechanic.

Tulsa, I. T.—The Cleveland Tool Company has purchased the Tulsa foundry and will move its entire equipment here at once from Cleveland, Okla. The company is understood to be under the control of the Texas company which is building a pipe line from Tulsa to the Gulf. A large number of men will be employed.

Waterbury, Conn.—Municipal permits for the erection of two additional factories, 103 by 110 feet, and 110 by 118 feet, to be used as rod mills, have been taken out by the Waterbury Brass Co.

Worcester, Mass.—J. E. Snyder & Son, builders of upright drills, 100 Hermon Street, are to build a new shop at Parker and Dewey Streets. The new building will be 90 by 170 feet, inside dimensions, and one story, affording practically 17,000 square feet of floor space, as compared to the 7,000 square feet now occupied by the business. Orders have been placed for a 50-horsepower engine and a boiler. A traveling crane will be put in, and all tools and machinery which will be needed to give the required capacity have been purchased. The building will be of concrete throughout, with stone foundation, and will be the first manufacturing building of this material in Worcester. The firm now employs about forty hands. When the new shop is completed the number will be doubled.

BICYCLE AND SPORTING GOODS RECORD

New Stores, Incorporations, Etc.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

Chicago, Ill.—Chicago is to have a new sporting goods house. Chandler Egan, Kreigh Collins and Walter Eckersall have formed a partnership and early in February will open a large store in State Street within the loop district. The name of the firm will be Eckersall, Collins & Egan.

Newark, Ohio.—Applegate Bros. have opened a new store at 17 North Fourth Street.

Pittsburgh, Pa.—A charter has been applied for by the Pittsburgh Sportsmen's Show Association. The signatures to the application are C. A. Painter, A. H. King, Norwood Johnson, W. T. Hamilton and P. W. Shephard. The objects of the association it is stated is to hold shows for the purpose of exhibiting sporting goods and trophies.

Sandusky, Ohio.—Will S. Collins has opened a new store at 629 Hancock Street.

Changes and Improvements.

Boston, Mass.—Elon B. Nobles, formerly associated with the Fisk Rubber Co.'s Boston branch, has been appointed manager of the G. & J. Tire Co.'s establishment in that city. He succeeds H. L. Johnson, who resigned on the 1st inst.

Canyonville, Ore.—Miles McIntyre; business removed to Grant's Pass, Ore.

Catskill, N. Y.—Nelson Mattice has sold out to Theodore Wynkoop.

Chicago Ill.—O. S. Tweedy, manager of the Diamond Rubber Co.'s Chicago branch, having resigned that office to engage in other business, C. H. Smith has been appointed to fill the vacancy.

Colorado Springs, Colo.—Anthony Motor & Cycle Co. has sold out to Western Automobile & Supply Co., J. W. Ebert, president.

Hartford, Conn.—Elliott Mason, for a quarter of a century the manager of the Pope Mfg. Co.'s branch in New York, is now connected with the headquarters in Hartford.

Hartford, Conn.—Fred C. Gilbert, manager of the Pope Mfg. Co.'s Western department, has been appointed manager of the entire Pope jobbing department. The appointment carries with it Mr. Gilbert's return to Hartford, where originally he was stationed.

Johnstown, N. Y.—J. R. Vosburgh has purchased the cycle business conducted by W. H. Loft for the past ten years at Gloversville, N. Y. It will be removed to a new location and under the management of Frank Fish will be continued as a Vosburgh branch.

Minneapolis, Minn.—The Theim Mfg. Co., who for many years have made cycle specialties and latterly have produced a bicycle motor under contract, are making ready to market a motor bicycle of their own. It will bear the name Theim.

Nashua, N. H.—Hartman & Co. have sold out to A. C. Pollard, who removes to the Hartman building.

New York, N. Y.—P. H. Ferguson, formerly with the tube department of Peter A. Frasse & Co., of New York, has resigned to accept a position with the Seamless Tube Co. of America, whose headquarters are in Pittsburgh.

New York, N. Y.—The Ovington Motor Co., American agents for the F. N. four-cylinder motor bicycle, have leased the double store at 2208 Broadway, near 79th Street.

Pendleton, Ore.—Frost & Bowman have added to their quarters in the East Oregonian building by securing the room in the rear of E. T. Wade's office and which has formerly been used by Mr. Wade. By constructing a large archway from the gun shop into the additional room Frost & Bowman have thereby secured some badly needed space. In the future much of the stock in the store, such as bicycles, will be stored in the new room while the main room of the shop will be devoted to displaying other sporting goods.

Phoenix, Ariz.—T. L. Morris has sold out to Gove Phelps and Robert Stapley; new style Stapley & Phelps.

Burglaries.

Los Angeles, Cal.—The Dyas-Cline sporting goods store No. 2, at 113 West First Street, has been entered by burglars, and revolvers, knives and money to the extent of $400 taken. About $75 was taken from the cash drawer. The loss was fully covered by burglar insurance.

Embarrassments.

Greenfield, Mass.—Charles J. Page has filed a petition in bankruptcy; liabilities, $622.11; no assets.

Miscellaneous.

Chicago, Ill.—At the annual election of the Chicago Motorcycle Club the following workers were elected for the ensuing year: President, S. W. Farlney; vice-president, Grant W. Hunter; recording secretary, C. H. Lamb; financial secretary, C. W. Keller; captain, W. L. Johnson; directors to act in connection with the president and vice-president, Frank Haungs, A. J. McCollum, J. A. Turner. There will be considerable improvement made for the club's accommodations in the near future. Three large rooms will be remodeled and furnished for the club's benefit, also a garage for storing motorcycles.

New York, N. Y.—At the annual meeting of the New York Motorcycle Club the following officers were elected for the ensuing year: President, R. H. Nickerson; vice-president, F. A. Roy; secretary, D. Patterson; treasurer, F. M. Manning; captain, M. E. Toepel; first lieutenant, A. Kreuder; second lieutenant, A. O. Viereck; board of directors—A. T. Nickerson, M. L. Bridgman, R. G. Betts, E. Malloy. Roland Douglas originally had been nominated for the presidency but declined the honor.

HARDWARE DEALERS RECORD.

(Continued.)

Newton, N. J.—E. J. Crissey has sold his Hardware business to Charles A. Walker.

Oakland, Cal.—Notice has been filed that the Frank K. Mott Company has agreed to dispose of the Hardware business now conducted by them at 908-910 Broadway, to Brittain & Company of San Francisco.

Oxford, N. Y.—Benjamin Titus has sold his Hardware and plumbing business to William H. West and Earl D. Palmer.

Findlay, Ohio.—A change in the Hardware and implement company of Thomas & Thomas occurred recently, Marion Vaughn and Frank Lake, two old and trusted clerks, with years of experience, becoming equal partners in the big store, and from now on will be financially interested.

Penn Yan, N. Y.—The firm of Pearce & Stearn, Hardware dealers, has been dissolved, and Frank Coe will take the interest of Mr. Stearn, the firm name becoming Pearce & Coe. These gentlemen have rented the Merrill Beach Block for a long term of years. The store space has been increased of late by an addition in the rear of nearly 300 feet.

Pullman, Wash.—R. S. Erb has sold his interests in the Pullman Hardware Company to J. D. Allen, Sr., and left for Greer, Idaho, where he will engage in Hardware business with his brother.

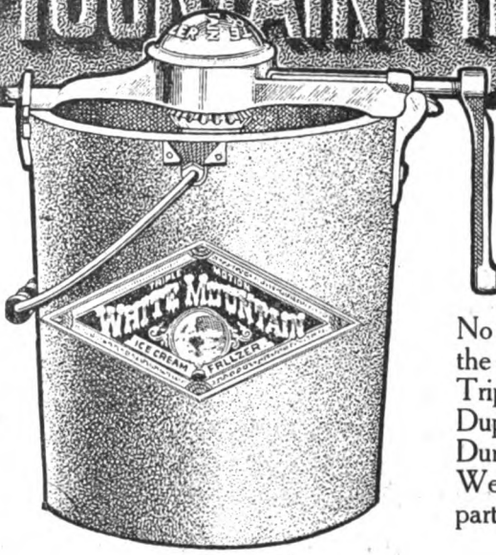
Radcliffe, Iowa.—The firm of Drake Bros., composed of A. N. Drake and W. A. Drake, have sold their stock of Hardware to J. T. Nervig of Hardy, Iowa. The invoice is nearly completed and Mr. Nervig will take possession at once.

Richmond, Mo.—Walter T. Shoop, the East Side Hardware and furniture dealer, recently sold a one-half interest in his stock to Harry B. Smith. The new firm will be known as Shoop & Smith.

Schuyler, Neb.—The Hardware firm of McNally & Higgins have retired from business. It has sold all its fixtures to John Smith, county commissioner, the same to be moved to Richland, Neb., where he will start a Hardware store.

Sedalia, Mo.—The Knight-Marshall-Howe Hardware Company have purchased the entire stock of Thomas & Goodell, of the New York Racket store, on West Second Street, and will place the stock on sale at one-third off the regular price. The Knight-Marshall-Howe Hardware Company want the additional room for their fast-growing Hardware line and must move the stock at once.

Seymour, Ind.—Thomas J. Stanfield has sold his interest in the Hardware, lumber and saw-mill business of the Stanfield-Carlson Hardware Company to his partners, N. M. Carlson and Ed. Stanfield.



Springfield, Ohio.—The Vulcan Hardware Company, located at 69 and 71 East Main Street, has increased its capital stock from $20,000 to $30,000. The officers intend to push the business in many ways during this year. They are: President, C. J. Tuttle; secretary, R. E. McDaniels; treasurer, T. C. Blowers.

Staunton, Va.—Worthington Hardware Company has been incorporated. J. H. Worthington, president, Staunton, Va.; Clarke Worthington, secretary and treasurer, Staunton, Va.; I. S. McNeil, Harrisonburg, Va.; John L. Goodloe, Staunton, Va. Capital stock, $60,000 to $80,000. Objects and purposes: To do a general Hardware business.

Table Rock, Neb.—The Hardware firm of Kovanda and Tillotson, of this place, has been dissolved, Mr. Tillotson retiring from the firm, and Mr. Kovanda succeeding in the business.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

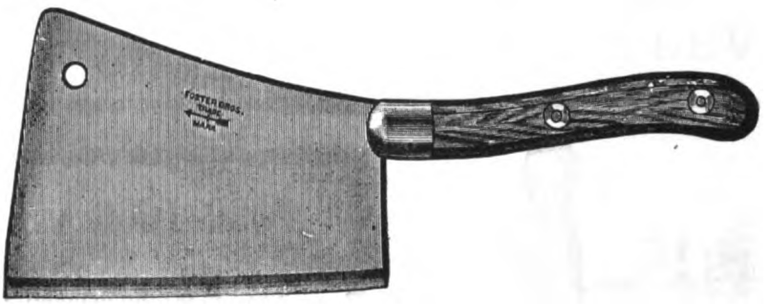
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

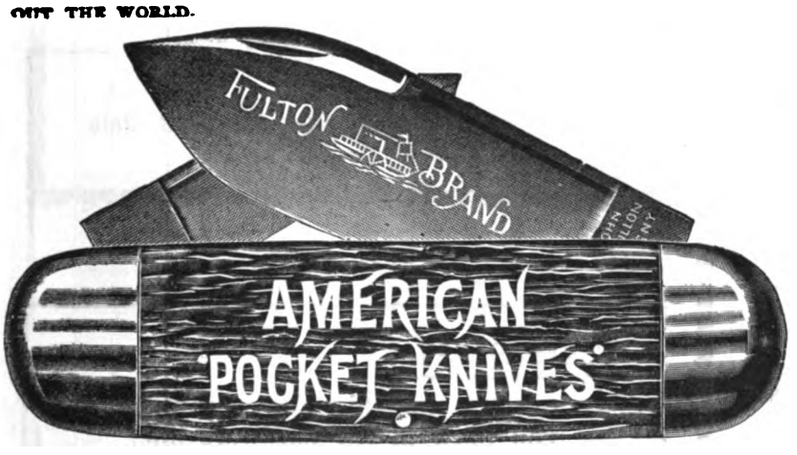


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

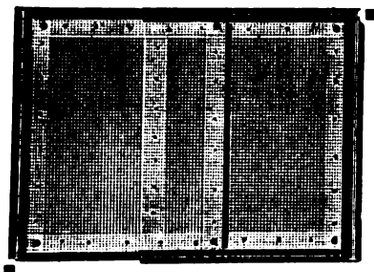
FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

85 to 93 CLIFF STREET and 12 JACOB STREET.

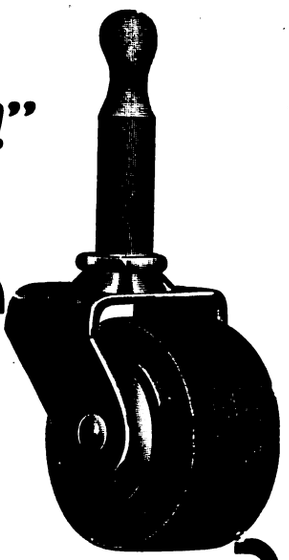
They are also fly-proof.
They cannot warp or shrink.
They are strong and lasting.
They can be adapted to any shape.



Lists and Prices from

The METALLIC SCREEN CO.

Sole Manufacturers

COLLINS, - - - - WISCONSIN

The "Faultless!" Why?

Because it is 'the CASTER that never refuses to turn."

That's pretty near perfection, isn't it? Especially when we remember what we get with the ordinary kind.

It's all owing to our little patent pivot bearing socket By the way, that same little socket won us the **Highest Award** at the World's Fair in St. Louis, in 1904.

Then notice the **Leather Wheels,** they give ease and steadiness in rolling and turning.

We make them with interchangeable sockets so they can be used on any kind of furniture.

If you want a seller, a money maker, carry the **"FAULTLESS"** line. Our illustrated catalogue will show you what we make.

THE FAULTLESS CASTER MFG. CO.
Nebraska City, Neb.

POOR FOOD vs. PURE FOOD

The Law says "Food must be Pure" and the people demand Cooking Utensils that do not warp, scorch, burn, or spoil that food—it means big business for you in

"NEVER-BREAK"

Steel Spiders, Griddles, Kettles, etc., advertised in the Magazines.

The Genuine branded "Never-Break." Imitations fool the foolish.

THE AVERY STAMPING CO., Cleveland, Ohio.
Exclusive Manufacturers.

TRADE MARK

FARM and GARDEN HAND-TOOLS

We don't ask you to push "True Temper" Forks, Hoes, Rakes, Weeders, Special Purpose Tools, etc. alone---we help you, and do most of the pushing.

We help in every way toward selling these goods and our efforts will bring many people to your store if you will tell them that you have "True Temper" Tools for sale.

Our forceful, far reaching advertising interests tool-users, convinces them of the merits of "True Temper" Tools, persuades them to buy, and tells them to ask the Retailer for these Tools---

But it's up to you to tell the people in your community that yours is the store to come to for "True Temper" Tools---

And it's up to you to transact the sales.

We even help you to do these things---we supply you with **FREE SALES AIDS.**

[1] Free electros of advertisements for your local papers.
[2] "De-lighted Farmer" posters to draw trade into your store.
[3] "Selling Pointers," a book that will help your clerks to make more sales.
[4] A plan to present your customers with a valuable book. "Tools and Their Uses."

If you are handling one of our First Quality Brands, you can obtain the "True Temper" grade of it. Write your Jobber about this.

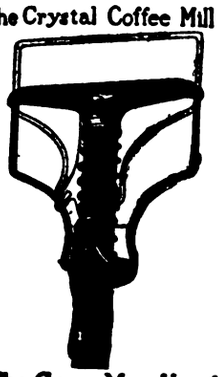
GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

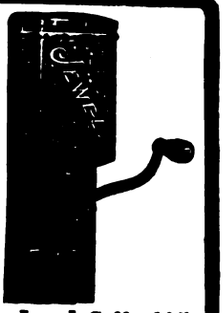
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.



To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

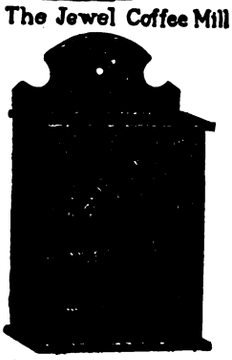
We show on this page four articles that are money-makers for the dealer.



The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

The Gem Mop Head.



THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

The Jewel Coffee Mill

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

Eight Space Spice Cabinet

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

The Lufkin Rule Co., Saginaw, Mich., have taken out a license to do business in Ontario. Their new factory at Windsor will soon be in operation.

W. F. Gray & Co., South Norfolk, Va., have opened a Hardware store, to carry a full line of Hardware, paints, etc. Special attention will be given their line of mechanics' tools.

The Washington Cutlery Co., Milwaukee, Wis., have removed their general office and shipping department to their shops at Watertown, Wis., where all mail is to be addressed in the future.

S. W. Fulk Hardware Co., Pilot Mountain, N. C., have incorporated with a capital of $25,000, to carry on a Hardware business in all its branches. Special attention will be given to mechanics' tools.

The Central Hardware Co., Portsmouth, Ohio, having lost the greater part of their stock of catalogues in one of the greatest floods that has visited their town since 1884, the water standing 43 inches, they would like manufacturers to send them their catalogues and price lists, to make their stock of them complete.

Walter Meese, importer of and dealer in Hadware and Cutlery, Household Wooden and Willow Ware, has changed his business location from 1009 Washington Street, Oakland, Cal., where he has been for the past fifteen years, to 1014 Clay Street, where he expects to serve his patrons as well if not better than at the old stand.

The C. A. Peck Hardware Co., of Berlin, Wis., manufacturers of the well known Gem and Jewel line of rural mail boxes are advising their trade of an advance of fifty cents a dozen on the Gem and twenty-five cents a dozen on the Jewel line. They state that while the phrase: "This doesn't cove the advance in the cost of raw material," has become a stock phraase, still that it nevertheless emphatically applies to the rline of goods and they cannot afford to reduce the quality in order to maintain the present prices.

There has been no change in the prices of Automatic trucks and Gem sliding barn door latches.

Seattle Sporting Goods Co., Seattle, Wash., announce their removal from 711 Second Avenue, owing to the fact that they were very much in need of additional space. They have leased the fourth and fifth floors of the Norris Building, 307-309-311 Third Avenue South, where, in the future they will conduct an exclusive wholesale business.

Their new quarters afford an area of 14,000 square feet of floor space and are equipped with both passenger and freight elevators, enabling them to handle their increasing business to the best possible advantage.

SPECIAL RATES FOR BUYERS.

The Merchants' Association of New York announces that Merchants' rates to this City will be in effect from Trunk Line Association territory on February 23rd to 26th, inclusive and March 16th to 19th, inclusive, with the customary fifteen day return limit. The special rate will be, as usual, a fare and one-third for the round trip, the reduction being granted under the certificate plan.

Roughly described, Trunk Line Territory extends from the New England-New York border west to and including Buffalo and Salamanca, N. Y., Erie and Pittsburgh, Pa., Wheeling, Parkersburg and Huntington, W. Va., south to the Potomac River and the line of the Chesapeake & Ohio Railroad. The rate does not apply from points in the States of New York, Pennsylvania and New Jersey less than one hundred miles distant from the metropolis.

The merchants who take advantage of these rates will register at the Association's new headquarters, The Merchants' Association Building, 66-72 Lafayette St., (formerly Elm St.) between Leonard and Franklin Sts. In the new offices, which occupy the entire second floor of the building, every convenience will be afforded to visitors to the city, a prominent feature being a large and well equipped reading and writing room.

LIBERTY BELL CO. ABSORBED.

The New Departure Mfg. Co., Bristol, Conn., has bought out the plant and business of the Liberty Bell Company, a rival company that has been in business here since 1879. The Liberty Bell Company is capitalized at $50,000, and it has been making the same line of bells as the New Departure. Its plant is at East Bristol. The purchase was made for the purpose of increasing the factory facilities of the New Departure Company and at the same time separating bell manufacturing from the rest of the plant. Commencing at once, therefore, the Liberty Company will be known as the bell department of the New Departure Manufacturing Company. The large factories of the last-named concern on North Main Street will be devoted entirely in the future to the manufacturing of coaster brakes, automobile parts and bearings, and other automobile accessories.

WHERE COLORS COME FROM.

The cochineal bug furnishes many of the most brilliant colors, including the bright carmine, crimson, purple lake, and scarlet. The cuttlefish gives the sepia, and Indian yellow comes from the camel. Ivory chips produce ivory black, and the exquisite Persian blue was discovered accidentally by fusing horses' hoofs and other refuse animal matter with impure potassium carbonate. Crimson lake comes from the roots and barks of certain trees; blue-black from the charcoal of the vine chalk; and Turkey red comes from the root of the madder plant found in Hindustan. India ink is made from burned camphor by the Chinese.—*Ex.*

H. F. BRAMMER MFG. CO.

H. F. Brammer Mfg. Co., Davenport, Iowa, under recent date, make the following important announcement:

It affords us pleasure to be able to inform you that we have acquired the exclusive right for the manufacture and sale of the entire line of washing machines heretofore placed on the market by the Benbow-Brammer Mfg. Co., of St. Louis, so that our line is now the largest and most complete one in the States.

Our entire line now comprises the following well-known standard makes: The "O. K." Rotary, "Royal Blue" Rotary, "Mystic" Rotary, "B. B." Rotary, "Snow-White" Rotary, "Schroeder" Rotary, "Peacemaker" Rotary, "Flyer" Lever Rotary, O. I. C. Pendulum, Original Brammer Lever, Columbia Square Lever, Columbia Round Lever, The Great Western Square Lever, The Great Western Round Lever.

To avoid delays, all correspondence relative to any of the above machines, or repair parts for same, should be addressed to us at Davenport.

THE LEGAL WAY.

Keep reasonably close to the best legal forms of doing business, even with your best friend. Probably you believe him strictly honest and the longer that belief stays with you the happier you will be. But it is not an act of friendship to put temptation in his way by dealing loosely with him.

This world is not such a bad place after all and most men are by nature honest; it's when they are crowded by adverse circumstances that they become otherwise. But in these days of speculation it is always hard to tell just who may be crowded, and it is not wise to help make even your best friend the victim of circumstance. It is much better for both parties to be safe than sorry.

Some great legal authority has said that the object of law is to make it as easy as possible to do right and as difficult as possible to do wrong. Probably most of us have seen the time when we were inclined to reserve this statement; still, by doing our own part in rendering all our business deals valid and binding, we can do much to advance the true object of law as stated by its illustrious disciple.

Few things are more prolific trouble-breeders than loosely made agreements and the worst of it frequently is that both men are sincere. The inquiry necessary to prepare the agreement after legal forms would hardly fail to bring out the misunderstanding before either party has benefited and while adjustment of the difference is still easily made.

FEBRUARY 10, 1907

Editorial Trade Review

The stormy weather we have had during the last fortnight has put something of a limit to trade transactions in consequence, and dampened the ardor with which business was started for the programme of 1907. But we have had so little of winter conditions, such as we usually have, that it will prove to be a blessing in disguise, and enable some of the delayed stock of winter goods to be handled advantageously. In some sections of the country the good trade promised for 1907 opens famously, the bulk of sales reaching past the record for January a year ago, the jobbers having received many more orders for Spring shipment than they anticipated, so that the opinion that trade activity is sustained and that business will be as good as has been predicted. The Spring orders already in sight justify the sanguine belief. The weather this winter has been so unfavorable to the speedy disposal of heavy winter goods that this may affect purchases a year off, which will make next winter's supplies curtailed of their fair proportions. A year ago, it may be remembered, goods were so slow of delivery that the commercial wisdom of ordering early deliveries for this year is invariably conceded.

The retailers are remarkably dull for several reasons. It is their dull season, for one thing. Then, a good many State Associations of the trade are holding their customary conventions during January and February, comparing notes on future trade and traffic, and listening to good advice given to them by the magnates of the profession. But the Spring goods arriving that were ordered last Fall by sagacious dealers, will stock them up, so they will find it necessary to "get busy" as early as the weather will permit them.

The advanced prices on the established lines of goods already quoted for 1907 are being well maintained, and there is less inclination so far to cut prices in order to sell a bill. Goods are still difficult to obtain from the makers, who are in many cases working on back orders, and the jobber who has his supplies still to come is disinclined to throw away all of his advantage by cutting the prices. The temptation in so many cases is to let the order at old prices wait, while the newer orders at the advanced price are filled more expeditiously. Now let the retailer do his share, and get a fair advance on the stock he has on hand, and the whole trade will be benefited. The only fear is the retailer will sell off what he has at the old price, until he has to replenish his stock at the current advances.

WINDOW DRESSING.

It is interesting to notice the way in which different assistants approach such a task as window-dressing. There are some whose operations are suggestive of the visitation of an earthquake or the passing of a cyclone, while others proceed so systematically that it is scarcely noticeable that anything unusual is afoot. Assuming that nobody wishes to acquire the former method, let us see how a window may be emptied, cleaned and redressed with as little disorder as possible. The first essential is forethought; don't begin until you are ready, and don't begin at an inopportune time.

Before emptying a window decide how it is to be filled again. Make a plan of drawing lines down and across a sheet of paper to produce a space for a shelf, and write in each space what is to go upon the shelf it represents. Then make sure that all goods, dummies, etc., are ready; don't have to put up dummies while the window stands empty. Don't choose the wrong time for the task—the busiest day in the week or the early closing day. Also, as far as possible, see that nothing is likely to prevent your going straight on.

In emptying a window, separate goods that are not to go back from those that are. Don't keep the former about the shop; they will have to be put away, and it is best to dispose of them at once. Things that are to go back should be put into boxes or placed neatly in a corner where they will not cause inconvenience. I have seen the contents of a window heaped upon the counter until it is full, when the remainder was piled on the floor in such a position as to be in everybody's way.

As it is waste of space to show things which do not lead to business, it is almost equally so to show goods which bear a very poor profit. Of course, if the space is paid for, it is another matter.

The right policy is to push goods when they are wanted. It is waste of energy trying to stimulate trade in goods for which no demand exists.

It is worth while to remember that a big display does more good in proportion than a small one. The man who crowds his window with one thing gets a better return than he who shows a little of everything. Always price goods conspicuously. It is better in every way; it inspires confidence and makes the display more interesting. People will often decide on a purchase when they know the price, where they would not enter the shop and ask.

AN AGRICULTURAL ALLY.

A great many Hardware dealers are located in an agricultural community, where season goods are more in evidence than in any other line to which the trade caters. For such, a most useful lesson or series of lessons can be drawn from a study of one or two farm papers especially intended for the locality. Usually the agricultural editor, in close touch with his readers, is saying things about the needed machinery of the season that tends to create a buying impulse, and there is no other place in the world where the alert retailer can get better filled up with good selling ideas.

The editorial comments are from the farmer's point of view, advising him what is profitable for him to buy and why it will not pay him to get along without it. That's just the sort of talk the salesman needs to be loaded with; its twice as efficient as anything that originates in the selling interest.

Not all Hardwaremen are practical farmers. They may know in a way that plows are in season during the early Spring, but still may not be prepared to explain to a customer wherein a disk harrow fills a place in the most profitable preparation of the ground that no other kind will fill. It isn't always enough to tell a farmer all about how a machine works and wherein it beats, in mechanical movement, its rivals in the same field. The average farmer does not care a rap how strong a machine is in a particular place if he is not convinced that it will do a certain thing worth doing to his particular soil. What does its strength matter to him or what are its wearing qualities if its first value to him is not an assured fact?

Whether preparing advertising copy or arguments for clerks

Digitized by Google

and salesmen, it is a fact that usually the agricultural editor will bring out the whys and wherefores of an implement more forcibly than any agent of the implement can do. He has at once a practical knowledge of farm needs, and a forceful way of expressing his thought and knowledge. That is his stock in trade, knowledge and expression, and no agricultural publication can long keep its standing among its patrons now who is not strictly up to the times. What the editor says about tools, represents at once what the farmer really wants and what the implement must do. The Hardware dealer who can reproduce these ideas the most faithfully and apply them most efficiently to his own business, cannot fail to touch the tiller of the soil very close to the bald spot of his farm equipment.

THE DULL SEASON.

The seasons of slack trade are perhaps the richest in the entire career of a business man for making his opportunities count for more. The busy season is looked after; it's the time when trade is dull that the average man relaxes and inclines to let things drift.

If there is anything that needs doing that has been neglected for want of time, the introduction of some new system, the replacing of cumbersome shelving for a neater stock-keeping device, an overhauling of accounts, a new series of advertising matter prepared, new stationery made ready for the printer, the slack season is certainly the time to do it and, if all was done then that needed doing, there would be no slack time.

It is fortunate for the enterprising retailer who understands the use of opportunity that there are seasons when the public is less free in trade demands than at others, else much of his internal affairs would go forever undone and finally prove the undoing of himself. This is the season when a man should pull himself together; should pick up the fag ends of the neglected tasks and thread them all back into their proper shuttles in the commercial loom. It is the best time for the purpose, too, for more reasons than because he has a little time; others have time also and the work that brings in other industries will be better attended to. The printing that is given out in the dull season can be looked after more efficiently and economically than that which crowds insistently in where and when there is no room for it. The idle press can turn out its work at less cost than the over-crowded press and every order given out when orders are scarce helps to distribute the press of business more evenly over the season, an accommodation that a worthy printer will not be slow to reciprocate.

The well-balanced business has fewer idle hours than one that is less efficiently managed and, conversely, is less often swamped and over-crowded. Often the difference between profit and loss is little more than that between the highest and lowest running expenses of the year, and the nearer any business house can come to putting an even stress upon its working force throughout the year the nearer this expense may be brought toward the lower figure.

DEATH OF JOSHUA STEVENS.

After a long and useful life, Joshua Stevens, inventor of the celebrated rifle bearing his name, passed peacefully away Monday evening, January 21st, at the home of his daughter, Mrs. Wilbur F. Davis, Meriden, Conn., with whom he had made his home since 1896. He was ninety-two years of age. Mr. Stevens had been suffering for the past several weeks with ailments peculiar to advanced age.

Mr. Stevens is survived by three daughters; Adelaide, widow of Judge Wilbur F. Davis; Isabelle, wife of Professor Tolman, instructor of English literature in the University of Chicago, and Jane, wife of Amos Crane of the Boston and Albany railroad.

Joshua Stevens was born in Chester, Mass., September 10, 1814. He learned his trade as a machinist in Chester, where he commenced as an apprentice in 1834, working from 5 a. m., until 7 p. m., for $6 per month for the first year and $8 and $10 per month respectively, for the two succeeding years. In the Spring of 1834 he settled with his employer, taking his note for $150.

Soon after this he took up pistol and gun work, which he kept at in some form up to his retirement from business in 1896. He was probably as familiar with the history of the gun business in this country as any one living. The modern pistol and rifle began to be evolved about 1838. Mr. Stevens commenced to work for Cyrus B. Allen in a small shop in Springfield, Mass., in that year, and continued for some years in his employ.

Early in the forties he met the celebrated Sam Colt, who had in his possession a crude idea of a revolver, which after some changes he had patented and made by Eli Whitney at Whitneyville, Conn.

Colt thought he could save money by having a shop of his own and in company with Mr. Stevens, rode about the country looking for a place to locate. He finally started a small shop on Pearl St., Hartford, Conn., and there, while in Colt's employ, Mr. Stevens produced the first model of Colt's revolver ever made in Hartford.

A few years after that Mr. Stevens invented another revolver, which he started to make on his own account, when Colt sued him for infringement. The case was tried in the United States court in Boston, and although Mr. Stevens had the eminent Rufus Choate for one of his lawyers, he lost his case and was obliged to quit that branch of his business.

Soon after the commencement of the Civil War, Mr. Stevens started the J. Stevens Arms & Tool Company, located at Chicopee Falls, Mass. From a small beginning this company has grown until at the present time it is one of the largest factories engaged in the manufacture of firearms for sporting purposes in the world. These factories cover twelve acres of floor space, turn out hundreds of guns per day and employ over 1200 hands in the various departments of the concern.

JOSHUA STEVENS.

Mr. Stevens was president of this corporation until 1896, when on account of advancing age, and the removal of his daughters to other parts of the country, he decided to retire from business and made his home in Meriden, Conn.

In the year mentioned, Irving H. Page bought the interest which Mr. Stevens and his partner, James E. Taylor, had in the business, and C. P. Fay acquired the interest which his father, William Fay had held in the J. Stevens Arms & Tool Co. This ended Mr. Stevens' active participation in business and shortly after he removed to the home of his daughter at Meriden, Conn.

Mr. Stevens was very proud of the success of this business and the popularity and great sale of the rifles and guns which bear his name, and made frequent trips to Chicopee Falls to keep in touch with the business and give the present management the benefit of his ripe experience.

Mr. Stevens had an extensive acquaintance among men in military circles and among manufacturers of firearms in the past sixty years, many of whom have passed away. He was a friend of John Brown, and the pistols Brown used in his raid at Harper's Ferry were made by Mr. Stevens and sold by him personally to Brown at Chicopee Falls, only a short time before the historic raid.

A few years ago the company branched out still further and began the manufacture of gasoline automobiles, known throughout the world as the Stevens-Duryea—the first part of the trade name being in honor of Joshua Stevens.

In his domestic life, Mr. Stevens was an ideal character. Gentle and kind of disposition, he made many friends who will be sorry to learn of his demise. His nature was that of the true old New England gentlemen, courteous and affable at all times, and under all circumstances, and though naturally retiring, those who were fortunate enough to call him friend, are the better for having known him. In the death of Joshua Stevens, New England loses a grand old man and the firearm industry its patriarch.

MISSOURI RETAIL HARDWARE ASSOCIATION

The members of the Missouri Retail Hardware Association assembled in annual convention, January 17 and 18, at the Midland Hotel, Kansas City. Notwithstanding the unfavorable weather conditions, the attendance was up to the mark of last year, there being 100 members and visitors present. Many members of the association are also members of the Western Implement and Vehicle Association, whose annual meeting was held in Kansas City January 14 to 17. In fixing the date of its meeting the Hardware Association had in view the convenience of its members attending both meetings.

Much interest was manifested in the discussion of subjects provided in the programme, and although there were no formal speeches made or special papers read, each session was filled with earnest consideration of topics presented and plans suggested for advancement of the interests of the Hardware trade.

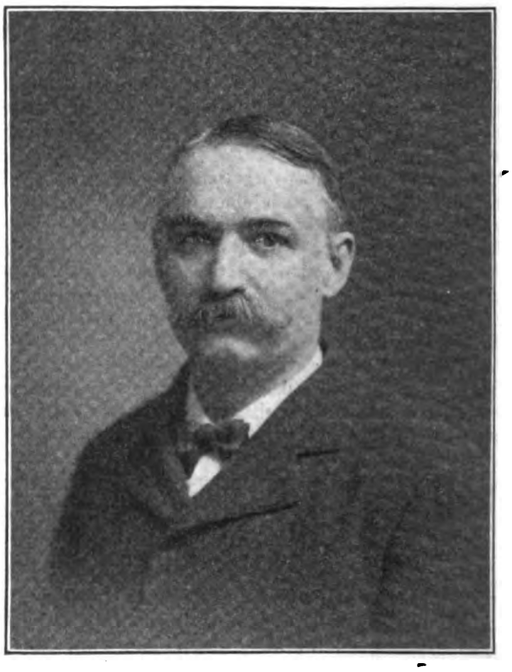
The opening session on Thursday morning was called to order by President W. H. Hahn. In a felicitous speech Acting Mayor D. R. Spaulding tendered a hearty welcome to the Hardwaremen, which was happily responded to by the president.

EX-PRESIDENT TAYLOR FRIER.

PRESIDENT'S ANNUAL ADDRESS.

After reviewing the work of the organization and commending the faithful and efficient work of Secretary Neudorff, and emphasizing the need of better organization, President Hahn, in his address, spoke in part as follows:

I have a suggestion that as president of this association I wish to make. Our present secretary, as you know, has done loyal and beneficial work in behalf of this association. He has spent not only much valuable time in looking after its interests, but has also spent his own money in defraying its expenses without expectation of reimbursement. Now this should not be expected of any officer, and I want to suggest that this association consider the advisability of paying its secretary a reasonable salary, that will in some measure at least compensate him for his services.



WHAT CAN BE DONE BY ORGANIZED EFFORT

is plainly shown in St. Louis, where they have a strong local organization. Jobbers there have ceased to sell at retail, and everything in the nature of a catalogue house has been eliminated, all of which is due to well directed organized effort. I would further suggest that in selecting our new officers the president and secretary be chosen from the same city. Much burdensome correspondence would thereby be avoided and better results secured. There are, I think, too many petty jealousies among retailers. It hurts prices and destroys profits. Let us get together, as the jobbers do, and maintain our prices at a fair profit level.

MR. NORVELL'S ADDRESS.

A call for practical talks on how best to sell various articles of Hardware called forth animated discussion, which occupied a large part of the afternoon session. Among those who responded was S. Norvell of the Norvell-Shapleigh Hardware Company, who talked entertainingly upon the subject in hand, and also touched upon other topics of vital importance to the trade. The following extracts are made from his remarks:

In my experience I have seen merchants get rich, and I have seen them fail. I have seen one merchant grow wealthy enough to start a national bank, while the man who bought his store and succeeded him soon went into bankruptcy. The difference between the two men was simply that one was a merchant and the other was not. There is something worth while in the name of merchant. It means something, and might well be made the subject of a long talk.

FREDERICK NEUDORFF, SECRETARY.

I want to speak of a custom that I have observed among merchants, which I consider most unbusinesslike. When an invoice of goods is received, and the merchant sits down at his desk with the invoice and proceeds to mark up his selling price without examining the goods, I am convinced that he is a poor merchant. Because a thing costs you $1.50 a dozen is no definite reason why it may not be worth either more or less than that price. Only an examination of the goods will tell what the true values are.

I have noted the remarks that have been made about selling everything at high prices. You can't sell everything at a high price; some articles will bear it and others will not. Besides, you have to consider competition. I believe in the average. Life is but an average, man's health is nothing but an average, and your ability runs on an average. I believe, therefore, in selling on an average. And if you use good judgment in marking your goods you can sell them cheaply.

REPORT OF THE SECRETARY.

In Secretary Neudorff's report, read at the Thursday afternoon session, the difficulties encountered in the work of the organization were pointed out, and the association was urged to more serious effort in order that it may realize in the fullest measure the results for which it is striving.

THE HARDWAREMAN'S ADVERTISING.

A discussion of "Hardware Advertising" was freely participated in by the members present and brought out a variety of views and suggestions. Referring especially to gift advertising, R. H. Meyers expressed himself in part as follows:

I am against fake advertising. It is a common thing with us in the larger cities, and no doubt to some extent in the smaller ones, that when some church affair or social entertainment is to be gotten up with a programme they seek to raise money by filling it with advertising. From among your customers a representative is selected to call on you at your store and ask for a $5 or $10 advertisement. This became so troublesome and annoying that when our local Retail Merchants' Association was formed it was one of the first matters taken up. We at once passed a resolution that was signed by every house except one or two, and we finally succeeded in getting them in, so it was unanimously voted that no advertisement of any kind in the shape of programme or other special advertising, outside of the regular newspapers and journals, should be allowed. To our surprise and gratification we found that it worked like a charm. When called upon by scheme advertising solicitors we would show them a printed notice stating that we were prohibited under penalty of a fine from placing advertisements except through regular established newspapers and journals. I think I am safe in saying that this action resulted in a saving to us of $500 a year, formerly spent for advertising that was never of any practical advantage to us, and which, acting individually, we could not turn down without incurring the displeasure of our customers. It worked so well for us that I feel it can be used advantageously in towns, large or small, if you can get merchants to stick together on it.

RESOLUTIONS.

The usual resolutions of thanks were presented and adopted:

The Friday morning session was devoted largely to routine business, including the appointment of committees and election of officers. The following officers were elected for the ensuing year:

PRESIDENT, W. H. Hahn, St. Louis.

VICE-PRESIDENT, M. A. Wengert, Kansas City.

SECRETARY-TREASURER, Fred A. Kansteiner, St. Louis.

The present secretary, Frederick Neudorff, will continue to serve in this capacity pending the adjustment of some special matters that he has now under way.

The present Executive Committee will remain unchanged in its personnel, W. T. Shoop, Richmond, being re-elected for a three year term. The committee is composed of the following members: O. W. Johnson, Marshall; F. A. Kansteiner, St. Louis; W. T. Shoop, Richmond. The Committee on Trade Abuse will for the coming year be constituted as follows. R. H. Meyers, St. Louis; J. L. Boehl, St. Louis; A. B. Bondurant, Galt.

ST. LOUIS NEXT YEAR.

In the question of selection of a meeting place for next year's convention, the convention unanimously voted that its next session be held in St. Louis. Resolutions were also adopted providing for the incorporation of the Missouri Retail Hardware Dealers' Association; and the secretary was given authority to make assessments upon members for the expenses of the organization when necessary.

BANQUET.

An informal complimentary banquet was tendered to the members of the convention by S. Norvell of the Norvell-Shapleigh Hardware Company, St. Louis, at the Midland Hotel.

*

S. Norvell, president of the Norvell-Shapleigh Hardware Company, St. Louis, Mo., with a small party of manufacturers and jobbers from different parts of the United States, will sail from New Orleans early in February to visit a number of ports of Central America. They will spend several days inspecting the Panama Canal. They will also visit Hayti, Jamaica, Cuba and Porto Rico. The object of the trip is not only rest and recreation, but to study the business possibilities of the various places visited.

PERT PARAGRAPHS.

The longer a man argues the less he cares about the truth.

Marrying for money doesn't require as much courage as marrying without money.

It is hard to do a man who doesn't mind being downed.

If you never made any failures your success didn't amount to much.

Some people think it doesn't matter what others call them as long as they do not respond.

Turning the other cheek isn't a hard matter if your face is brass plated.

WINDOW HINTS.

By B. A. CHAMBEAU.

Card board signs for use out of doors may be rendered water-proof by brushing over them with two successive coatings—allowing one to dry before the other is applied—of a mixture made of four parts of slacked lime in three parts of skimmed milk, with a little alum added. A water-proof ink may be made by boiling together two ounces of shellac and two ounces of borax with sufficient water to make a solution, and then adding two ounces of acacia and sufficient lamp-black to give the desired color. The thickness of the ink is regulated by the amount of water used.

* * *

Another water-proof ink is made by dissolving together by gentle heat one ounce of bleached shellac, one half ounce of Venice turpentine and two and a half ounces of oil of turpentime, afterward adding the color—powdered indigo, lampblack, vermillion, and so forth.

* * *

A crank walked along East Twenty-third Street, near Fourth Avenue, New York, the other morning, and, armed with a hatchet, smashed in fifteen plate-glass show-windows in the stores of the Mercantile Building. When the police asked him why he did it he explained, "I just can't stand them shiny windows, especially in that building. I won't allow any windows, especially in that building. I won't allow any windows in it!"

What did the merchants do? Well, first, before replacing the glass, they each posted up signs. One said, "Well, we're glad he didn't crack our safe too." Another said, "Cracked glass isn't what it is cracked up to be, but we are in business at the same old stand just the same." Another: "A smasher of this kind ought to get twenty years smashing rocks." Another, "The window was the only thing to suffer. All of the stock was out of reach when the Wild Man of Borneo started to break all the glass in the street." The cleverest though, was a small lettered note above the big hole in the glass narrating the circumstances and winding up with: "He was trying to get in, attracted by our twenty-dollar suits."

A situation like this is ready for the grasp of the advertising man. Never fail to grasp such an opportunity. There are many local occurrences of a less striking nature which may be seized upon in featuring a store.

* * *

When metal letters come off the window, it is easy to cement them on again with a mixture of one part gum mastic, two parts litharge (lead), one part white lead, and three parts linseed oil. Melt together in a homogeneous mass and apply hot. The letters should also be heated to a temperature at least that of the cement.

* * *

If nothing else is done it is easy and of primary importance to keep the window glass clean and the show space neat and orderly. Be on the lookout lest any goods or advertising matter in the window, while appearing normal from inside the store, has faded into unsightliness from the street side. Set aside the trimmings of a display for use at a future time. Gradually in this way quite a property outfit will be accumulated. Money spent on crepe paper, ribbons, artificial flowers and other trimming aids is a good investment.

* * *

Perhaps the best way to realize the full value of a show window is to hire a few. That which we are accustomed to use daily has a tendency to seem of smaller account than it really is. The show window is of value in several ways; to admit light, as a place to display wares, as a power to draw custom into the store. It should not be forgotten, also, that the merchant is paying part of his rent for it all of the time. Never treat it lightly.

* * *

To polish your show windows, making them as clear as day, use the following paste, applying with a soft rag, and rubbing off with another soft, dry rag: Take of prepared chalk, nine ounces; white bole, one-half ounce; jeweler's rouge, one-half ounce; water, five ounces; alcohol, three ounces. Mix thoroughly.

* * *

No matter where the store is situated, care of the show windows pays. Anything that pays is worth thought. The show window question cannot be neglected. If a good window makes trade, a poor one drives it away. There is nothing negative about a window; it has an active influence one way or another. If you have not taken up window dressing as a regular feature of your business *do it now!*

Digitized by Google

Displays may be divided into two grand divisions— the simple and the elaborate. Either is effective. According to the character, the ideas of the exhibits may be of bulk goods, class, specials, purely decorative, price feature paramount, holiday, mechanical, live animals, of local or historical interest. Each one of these styles of display has its own peculiar merit, and the varying of them all in turn affords endless variety of material for business-pulling windows.

* * *

The clerk who is a good window dresser is always worth more than the one who is not. The combination of good salesman and good display man cannot be beaten. Such a man will have no trouble in geeting a salary above the average and holding it permanently. He will always be in demand. The clerk who is not a good window man is wasting part of his opportunity. There may come a time when his securing a coveted position will entirely depend upon his experience and ability in dressing windows.

* * *

Bleary eyes in a man do not tempt to closer acquaintance. A bleary-eyed store warns people away. Keep your store's eyes clean, bright, honest, attractive, if you wish trade.

* * *

In a few weeks the frost will bother us, covering the windows and hiding the displays. That is, it will in all the stores except those that have their window spaces snugly enclosed and lighted electrically, and, perhaps, heated by hot air from a furnace in the cellar which gets its cold air supply from out of doors. Remember there is bound to be moisture in the heat of a furnace that gets its cold air supply from within.

* * *

Change the window at least once a week, redecorating it and changing the subject. Beyond that time any display will lose its effect, become tiresome. However, in three months time it may be that the same display may be made. It will then have regained its edge, like a dull razor laid aside for a time. A system in dressing your windows and a rotation of displays is an actual economy. Have your ideas planned out weeks ahead. Keep a date book. In this way there will be no confusion, and when the display should be changed it will be done with definite purpose and idea.

* * *

Some merchants purposely misspell window signs in order to attract attention. It does attract attention—but some people may go away thinking you knew no better, and that is bad. Publicity may be achieved without eccentricity—but never without originality. You don't have to be a clown—you must not be humdrum. Still, I would rather be a crank, and be known, than a humdrum and not be known. Best is it to strike a happy medium. You have to be on the border land of eccentricity to be a good advertiser—you are bound to be on the border land of bankruptcy if you are commonplace.

* * *

Notice the people on a busy street of a large city and see what they are doing. The majority are moving swiftly along, but a few loiterers are looking in the shop windows. Something has aroused their interest. Occasionally one of them leaves the window to go into the store. In this case the window has likely made a sale otherwise impossible. It is paying the rent. But with many of the others who did not go in, the window may have made a sale, to be consummated in the future. The display sticks in the subconsciousness of the observer, and when he wants something he will remember where he saw it.

* * *

Signs are a necessity, but identifications are of a secondary nature; they do not catch the passing attention. In a large city there are so many signs that the eye wearies of them and in self defense eventually refuses to convey their message to the mind. But a good show window stands out. It has assertive individuality. In the country towns the same principles hold good, except that nowhere else do novelty and originality create so much comment and draw so much attention as in a rural district. People there are not surfeited with novelties. Something striking is a positive amusement and excitement.

* * *

Have you ever dressed a window yourself? How long did it take you? Try it and time yourself. You will be surprised at the shortness and the lightness of the labor. The trouble in many cases is that an idea prevails that it is necessary to spend much money to trim a window. Certainly much outlay can be made if desired, but a multitude of good displays can be made without the expenditure of a cent, and many more without spending more than a very small amount.

DISTRIBUTION OF MANUFACTURES IN THE EXPORT TRADE OF THE UNITED STATES, 1906

Exports of manufactures in the year just ended aggregated 719 million dollars and formed 41 per cent of the total exports. These figures, just announced by the Bureau of Statistics of the Department of Commerce and Labor, relate to the calendar year 1906. At the same time the Bureau presents a detailed and thorough analysis of the exports of manufactures to each country and grand division of the world, and the share which manufactures form of the total exports to each country and grand division, for the fiscal year 1906.

In the distribution by countries and grand divisions the percentage which manufactures form of the exports of course varies greatly, their proportion being naturally much smaller in the exports to Europe, the great manufacturing section of the world. It is interesting, however, to find that even in the exports to Europe manufactures formed in the fiscal year 1906 26.78 per cent of the total; to North America, 61.83 per cent; to Africa, 65.64 per cent; to Asia, 74.93 per cent; to Oceania, 84.74 per cent; and to South America, 86.06 per cent. Considering the principal countries, of the total exports of domestic products to Argentina 98.6 per cent was manufactures; of those to China, 96 per cent; to Australia, 88.7 per cent; to Brazil, 83.2 per cent; to Mexico, 70.4 per cent; to Canada, 61.9 per cent; to Cuba, 55.2 per cent; and even in the exports to the United Kingdom and Germany the share which manufactures formed of the total was over 23 per cent in each case.

The table which follows, just completed by the Bureau of Statistics, shows the exports of domestic products to each of the principal countries and the share which manufactures formed thereof in the fiscal year 1906.

Total exports and exports of manufactures from the United States to each of the principal countries of the world and the share which manufactures formed of the exports to the countries named, in the year ending June 30, 1906.

COUNTRIES.	Exports of domestic products.	Exports of manufactures.	Share which manufactures formed of exports to each country.
	Dollars.	*Dollars.*	*Per cent.*
United Kingdom	578,023,505	133,459,935	23.09
Germany	232,403,778	55,632,220	23.93
Canada	146,175,015	90,485,933	61.90

INLAND EMPIRE IMPLEMENT AND HARDWARE DEALERS' ASS'N

The second annual convention of the Inland Empire Implement and Hardware Dealers Association was held at the Hotel Spokane, Spokane, Wash., on the 16th and 17th inst. It was one of the best and most enthusiastic conventions ever held in that city. The attendance was double that of former years, and many dealers came from long distances to attend the convention, some even coming from southern Idaho and some from Seattle. It was probably the largest convention of a trade organization ever held in the Pacific Northwest. The attendance numbered nearly 500, and at the banquet about four hundred persons participated, the remainder leaving on the evening trains.

Vice president E. E. Lucas, of Davenport, Wash., called the gathering to order on Wednesday morning, when Mr. Goodall, president of the Spokane Chamber of Commerce was introduced and made the visitors welcome to the city. I. C. Hattabaugh, of Grangeville, Idaho, eloquently responded on behalf of the Association.

A number of eloquent and thoughtful addresses were delivered in the course of the proceedings, among which was one by Johnson D. Campbell, secretary of the Spokane Jobbers' Assosociation, on

CREDITS OR THE CREDIT SYSTEM.

which we give in part, as follows:

I am very glad to be with you to-day: Not so much on my account or on your account, but because it shows, I believe, the feeling of good fellowship which exists between the retailers and the Spokane Jobbers' Association. When we commenced business here, about three years ago, there was a misconception as to our Association all over this Inland Empire. It was believed by many, that we were organized for the purpose of oppressing the retailer: but I am very happy to say that after three years of work the best friends we have to-day are among the retailers. And I want to say further that

THE WORDS OF GOOD CHEER AND COMMENDATION

which we receive from day to day come more often from the retailer than from the jobber, to our office.

I have been asked to speak to you to-day upon "Credits," or The Credit System; and I want to say to you in the way of a beginning that none of you here present to-day have a more valuable asset, either on your shelves or in the bank, than your credit. Startling as it may seem, it is a fact nevertheless that over ninety per cent of the business done in the United States is done on credit. Last year, the year 1905 rather—the 1906 statistics not yet being compiled, but during the year 1905—the manufacturers of the United States did a business of over thirteen billions of dollars, upon an actual cash investment of five hundred million, or rather, ninety-six per cent of all the business done by the manufacturers of the United States was done upon credit. Now that seems startling, and yet sit down some day with a pencil and figure up yourselves the amount of business you do on time,—on credit,—and the amount you do on cash, and see if it does not startle you.

So I say

THE MOST VALUABLE ASSET YOU HAVE IN YOUR BUSINESS

to-day, gentlemen, is your credit: an asset which should be most carefully taken care of: an asset which should be nurtured and not abused. I think also, that I can say without fear of contradiction there is no asset you have which is more often abused than that of credit: not perhaps, your own, but the man who buys from you: because you sell on credit, you must do business on credit. If you do not take care of the credits that are due you, sooner or later you are going to have trouble with those you owe. At least fifty per cent of the failures reported in one year

CAN BE TRACED DIRECTLY TO BAD CREDITS.

Now I want to give you just a little illustration of that:

Just about a month ago we had occasion to close an unfortunate debtor and take over his business. We hope and believe that we will pay out that business,—pay out the debts,—and still have several thousand dollars to turn back to the debtor. But in going over his books, and I worked until nearly 2 o'clock in the morning doing so—I found this was the cause of his failure: He started in business about three years before with an invested capital of $4,000.00. That was all the cash he had. He has on his books to-day over $7,500.00,—

NEARLY DOUBLE THE AMOUNT OF HIS INVESTED CAPITAL,

—standing out on his books. In going over his business for the month of November, we found he did $1,200.00 in cash business, and that he did $1,000.00 in credit for November. He had collected on his accounts, during the month of November, $800.00. So for the month of November, he was $500.00 behind on his credit business. And I said to him, "How soon can you get in the $1,300.00 of credit in the month of November?" He says, "I cannot hope to get in a dollar of that until next Fall." Now just think of that, gentlemen. How could that man expect to do business and succeed in that manner. He had some notes, it is true, but he had not tried to collect them, and the great majority of his accounts were standing there without drawing any interest and without anything coming from them.

Now, gentlemen, I believe that a farmer, or other person buying goods of you, has no more right to ask you to carry him for a year

WITHOUT INTEREST AND WITHOUT SECURITY

than you have to go to your home bank and ask them to advance you money to pay your bills, without interest and without security. And I believe the credit system that has been worked up in this Inland Empire, is largely the fault of the retailer. I know the farmers can be induced to pay their debts promptly just as well as anyone else. The strange thing to me is that some of the largest accounts on your books are of men who are absolutely good. Who can go to the bank and get their note and get the money and pay you. But you have not asked them to do that for fear they will get mad and leave you and go to that man across the street and buy his goods. Isn't that a fact? But I want to say if this Association will pass a hard and fast rule that any man who came to you for credit should be required to give his note,

BEARING THE LEGAL RATE OF INTEREST

which you have to give at the bank, and make that a bankable note, that it would be only a little while until the whole credit system of the Inland Empire would be changed, and changed for the better, so you could meet your bills promptly and discount them if you pleased by taking the farmers' note to the bank and getting the money.

Why, it is astonishing—as I have gone over the books of various retailers at various times to find out the man's condition, it is astonishing to see the amount of money standing there on the books not drawing interest, while you, gentlemen, are having interest added up on your past due accounts for them. It is only a question of time when those principles carried out as they have been in the past, are going to involve all of you if you do a credit business. You cannot help it.

It has been in the past a fact without doubt, that if you crowded some of your collections, some of your good farmers, or neighbors in town, they would get huffed and go across the street to buy. But if you all combined and made the same rule when he gets mad and goes across the street; if the man across the street will hold up a stiff upper lip, and say to him, "I do not want to sell you on any different terms than Tom Jones would, across the street," you would find out he would be mighty glad to give you his note and pay his bills when they became due.

THE VERY SYSTEM OF CREDIT IS A MATTER OF EDUCATION.

It is so in all lines of business.

The credit system is more prevalent in the farming districts than in the cities, because the large stores, in the cities, do practically a cash business. But you who have to carry your neighbor from one year's end to another, have to do the credit system; but there is no reason why you cannot inaugurate the system that if you carry a man he must give you good, bankable paper, and that you carry him in that manner.

I believe the wholesaler and retailer should work together to this end. I believe, and always have believed, it would be a kindness to the retailers if the wholesalers always insisted on bills being met when due according to the terms of sale. If that was done, you would push the man owing you, and he would settle up so you could pay.

Last Spring I had occasion to go to a certain retailer in an outlying town. I had at the tme about $3,000.00 of claims against him in my pocket, I went there and spent a whole day

Digitized by Google

with him, going carefully over his books. I found he was perfectly solvent, but I found that every dollar that he had in the world was past due,—something like $8,000.00 or $9,000.00. I said to him, "What are you going to do?" He says, "I don't know. I cannot pay a dollar at this time of the year. It is simply all I can do to keep up my stock, without paying any old bills." He had charged between $15,000.00 and $16,000.00 on his books; not one dollar, practically speaking, could be collected until this Fall. I said to him, "I will tell you what I will do: I will promise you that I will gather the claims in Spokane and I will see to it that you will not be required to pay any of this indebtedness until next Fall. I will do further than that. If you will write me when any of your outside creditors write you and threaten suit or place a claim in the hands of an attorney, I will write to them and say that I believe you are perfectly responsible and will pay every dollar this Fall. But if I do, I am going to tell every one of these men to absolutely insist this Fall on getting their money." He thought it might pinch him this Fall to get his money, and did not know about that. I said that that was the only condition that I would help him out on now; and he agreed. I wrote forty letters with reference to that man's business. There was not one that crowded him. And to-day, I do not believe that he owes one dollar. He paid every dollar that was in my hands; and I have heard he paid every debt outstanding against him. What would have been the result if I had crowded him at that time, and allowed others to do the same. He would be broke and his creditors could not get their money until this Fall out of those debts, and he would be out of business, and in all probability without a dollar. But I think it has taught him a lesson, and I venture to say he has not anything near as much on his books to-day as he had some six or eight months ago, and his indebtedness is practically all cleared off. I got a letter from him yesterday. I had one small claim of some $200.00 that he had overlooked, and he wrote me and said he had taken care of practically all of his indebtedness and this little claim was overlooked.

I believe, gentlemen,

WHAT YOU WANT IS CO-OPERATION IN THIS MATTER;

and you must show people dealing with you that you must have your money. That you have your bills to pay, and that if you must carry them to the next Fall, you must get a bankable paper so that you can take it to the bank and get your discounts, instead of paying eight per cent on your past due accounts. (Applause.)

Thomas H. Brewer, vice president of the Fidelity National Bank of Spokane, who was listened to attentively, delivered an address on

THE MERCHANT AS A BANKER.

We present his address herewith:

For the past ten years I have been a country banker, but for several years sold implements and other things at Genesee, Idaho, in the good old days from '93 to '97, when nobody got any credit worth mentioning and when the manufacturers were very easy to trade with; they were glad to have you take their goods on consignment and pay any old time after the goods were sold.

IN THOSE DAYS WHEN ALMOST ALL WAS LOST BUT HONOR.

and that sometimes, and there was no cash, such Populism and very little else, except that hope that springs "eternal in the human breast," we didn't have the volume of trade to scrap over that you have now, and the implement man wasn't much of a banker, because he had all he could do to get along without crediting anybody.

To-day, the average implement dealer does a very large banking business; he doesn't maintain a credit bureau and keep an accurate tab on the farmers of his vicinity, get a financial statement from the prospective credit buyer and get reports from other dealers as to whether he has always paid his debts promptly in the past; how much his present debts foot up; find out his reputation for truth and veracity and look carefully into his prospects for a crop to pay his debts and his farming ability, but fearing that the other fellow will sell him, if he doesn't, hurries to make the sale, trusting to luck, or that when the rancher's crop is threshed he may get his first, leaving the other creditors in the lurch.

I have frequently seen scrubby, every-day sort of renters, with

WELL ESTABLISHED REPUTATIONS AS FINANCIAL FAILURES,

men who couldn't borrow $100.00 of any bank in the country, by putting up all their present chattels and crops and prospects for future happiness—by carefully playing the implement dealers of a small town against each other, buy from $1,000.00 to $2,0000.00 worth of implements and vehicles on time and not give a particle of security, and to look at these fellows, you would never take them to be hypnotists either.

The excuse that the "other fellow will sell him if I don't," that the implement dealer must take these chances to sell goods, isn't a good one; it has very often been proved that if the merchant is shrewd and watches his credit sales closely, taking no undue chances, he does practically as much business as the trust-everybody-man and comes out at the end of the year very much better. I will give one instance that came under my own observation illustrating this point. Two firms opened stores in a small town about the same time one Spring. The one sold goods right and left to practically everyone who applied, consulting nobody as to the party's past record, present indebtedness or ability to pay and soon had their pouch full of paper and most of their stock sold; the other firm made credit sales very slowly, looking up each applicant carefully at the bank and elsewhere, sending the doubtful ones, whom the banker couldn't recommend to his free and easy competitor across the street. This firm kept a nice balance at the bank, and consequently got all the influence and information the banker had; they never let a good customer get away and by keeping a sharp lookout for business, managed to sell almost as many goods as the other firm and kept their note pouch light and their bank account heavy. What

NOTES THEY TOOK WERE EASILY SOLD TO THE BANK.

and they made it a practice to give the bank almost all of them. The first Fall the conservative firm had no trouble making their collctions and took all their discounts. The other firm rustled night and day and Sundays and only got enough money to pay their most pressing obligations, standing off all the others. The next Spring, Summer and Fall, they were so heavily loaded with poor paper and had to hustle so hard to get in enough money to keep running that they had no time or energy left to sell goods; they couldn't sell their paper to the bank, because it wasn't worth anything, and they were not able to borrow any money on their notes, because they had never carried enough balance at the bank to "wad a shotgun," and naturally were not extended any particular favors. They left the town the next Winter, howling that it and its people were no good. The conservative firm all this time had their pick of the trade and went quietly ahead selling lots of goods on their own terms and putting aside a nice profit each year and are still doing it.

If the implement dealer would try to get his customers to borrow the money for their purchases at the bank, or take the same security the bank would insist on and sell all his paper to the bank, he would get along very much easier for a number of reasons. In the first place,

HE COULD TAKE ALL HIS REGULAR AND SPECIAL DISCOUNTS

and thus keep his credit good, get the lowest prices going and save more money from the discounts than the interests on the notes he sold the bank would amount to. Then, he could get a great deal of valuable information regarding prospective customers from the bank, for the banker certainly knows the financial history and condition of almost all the people in his community; then, the banker would make a special effort to collect the paper the dealer turns in, and I think no one will dispute the fact that the majority of men will pay the bank and let the merchant's bill go over when they are pinched, because they want to keep their credit good at the bank for future occasions and they know by experience that it is easy to stand off the merchant. Finally by giving the bank all his business he could get the banker to assist him in his fight against his inveterate foe, the Grinnell, or other buggy concerns. The banker has no love for these concerns. They ask him for detailed information regarding the standing of the farmers to whom they sell, for which they pay nothing and send him for collection a lot of notes on his best customers, and if he tries to collect the exchange and collection charges from the farmer, as the notes always provide, the farmer goes right into the air and hollers; if he tries to collect the charges from the Grinnell concern they say "Obey instructions," so in most cases the bank is out.

If the merchants here would take concerted action I believe they could get the banks, not only to refuse information to these concerns, but to refuse to collect their notes, which would help quite a bit in "tangling the grass" for them.

I am sure the banks in almost every town here represented would do this if they could get all your business instead of a small unprofitable part of it. Another thing. In my experience with different banks I have very, very seldom known the Grinnell people to take their note, while I have frequently seen a renter, who was turned down by the Grinnell people, who found out that he was doubtful, come into town and not only buy a hack or buggy on time, but a drill, harrow and three sets of harness, at the urgent insistance of the implement dealer.

THE BANKER AND THE IMPLEMENT DEALER SHOULD WORK TOGETHER

and present a solid front against their common enemy, the dis-

MUTUAL INSURANCE.

In his report on mutual insurance, Secretary Frederick Neudorff referred to a not encouraging condition, a loyal support on the part of the members being lacking. He continued as follows:

In my judgment there are only three ways open for our insurance branch: 1, to liquidate and quit, by collecting assessments; 2, for the members, as many as will, but less than forty, to put up cash in the sum of $100 each, and do away with the premium note and try to win that way; 3, to underwrite our policies with the Minnesota company, that company to credit assessment account with the 45 per cent. rebate they contract to repay during 1907, and that portion of the rebate to be paid during 1908, until losses are paid and fee for underwriting is paid, they to hold our premium notes as guaranteed for our adherence to terms of contract.

If we do this the company will put four or five trained solicitors in the field and no doubt treble our membership, permitting honest, lazy or indifferent debtor, and if there was more cooperation, both the banker and the dealer would have less poor paper in their pouches, there would be a better feeling all around and larger dividends, which is certainly a "consummation devoutly to be wished."

An implement dealer once said, "the farmer farms the farm, and we farm the farmer," but I don't know where you could find a pleasanter, jollier bunch of men, or men who will work harder through all kinds of weather and financial reverses and keep a smiling countenance than the implement dealers of the Inland Empire, and I certainly wish you the greatest success in your business and in this Association, which is being managed so energetically and ably.

MUTUAL FIRE INSURANCE.

One of the sessions of the convention was devoted to the affairs of the Washington Hardware & Implement Dealers' Mutual Fire Insurance Company, which is conducted under the auspices of the Inland Empire Association. W. P. Lucas, president of the company, made an address, from which we give the following extracts, which indicate that the company has made a very creditable showing during its first year of business:

This matter of mutual fire insurance is of the utmost importance to us all and should have our most careful study and attention. It is a matter which means a saving of money to us all, the dividends going to those who patronize us rather than to high salaried officers and stockholders, as is the case in old-line insurance. We are nearing the close of our first year's business, and we have made a most favorable showing. We have met with many obstacles, but thus far we have handled them

WITHOUT MAKING ANY GREAT OR EXPENSIVE MISTAKES.

We are able to come before you at this time and tell you what we have done, as well as what we expect to do during the coming year. Our records show that the receipts of the past year have been used as follows: Expense of organizing and operating the company to date, 15 per cent.; loss ratio, 26½ per cent.; reinsurance, 16 per cent.; passed to reserve fund, 10 per cent.; return premiums, 25 per cent.; on hand for current expenses, 7½ per cent.

As our receipts grow larger the expense ratio will grow less, and we can safely promise you better results for the coming year. As we grow larger and stronger

WE CAN CARRY A LARGER LINE OF INSURANCE

and thereby reduce the amount paid for reinsurance. We hope to be able to make arrangements for an exchange of reinsurance with other companies of this nature, and in this manner it will help us grow to the extent that we can with safety carry the full $3000 risks, as provided in our by-laws. At the present time we can with safety carry but $1000 on each risk, and all amounts of policies above that amount are covered by reinsurance. We will be able to carry $2000 on a single risk after we have a line of $750,000 in force, but before we can reach that amount it will be necessary for us to secure $325,000 of new business, which I feel confident we can secure before our June meeting.

We have reached a point where we can afford to go out after business and feel that the money so expended will be well spent, as it is like all other good things, once a member gets a taste of it he likes it, and h is with us for keeps and we will be certain of his renewal of policies as he needs the insurance. We have made arrangements whereby

WE CAN WRITE EACH MEMBER FOR THE FULL AMOUNT

of their insurance regardless of whether the risk is for $1000 or $10,000.

At the present time if we were to write a risk for $10,000 we would immediately reinsure $9000 of it, dividing that amount among the different companies of this kind with which we reinsure and the remaining $1,000 we would carry ourselves.

Our firm has decided that we will place every dollar of our insurance with this company, as we feel that it is the safest and cheapest insurance we can get.

The requirements of the insurance laws of some of our neighboring States are such that it makes it next to impossible for a company of this kind to start, and we have only to go after their business and show them the advantages of doing business with us; thus giving us new business which will enable us to grow at a rate and make a showing equaled by no other company of this kind.

At the present time we have a line of $428,850, of which we have $273,050 at risk and the balance of $155,800 is reinsurance in four different companies writing reinsurance for us.

OTHER ADDRESSES.

J. H. Abrams, of the Winona Wagon Co., delivered an address on the subject of "The Value of an Agency," G. H. Patrick, of Battle Creek, Mich., read a paper on the subject of "Side Lights on Selling Threshing Machines." There was also a discussion on the subject of "Does a Threshing Machine Agency Pay."

NEW OFFICERS.

The following officers and directors were elected for the ensuing year:

PRESIDENT, R. L. Spiker, Lewiston, Idaho.
FIRST VICE-PRESIDENT, A. Urbahn, Spokane, Wash.
SECOND VICE-PRESIDENT, A. B. Salmon, Wilbur, Wash.
SECRETARY-TREASURER, E. W. Evenson, Spokane, Wash.

DIRECTORS for three years: J. Smith, John Smith Company, Walla Walla, Wash.; J. H. Berge, Davenport, Wash.; E. E. Plough, Plough Hardware Company, Wilbur, Wash.; John Raymer, Reardon, Wash.; I. C. Hattabaugh, Grangeville Implement Company, Grangeville, Idaho; A. Z. Wells, Wells & Morris, Wenatchee, Wash.; F. J. Guth, Odessa Hardware & Implement Company, Odessa, Wash.

For one year: G. J. Tompkins, Tompkins & Co., Republic, Wash.

INSURANCE OFFICERS.

The following persons were chosen as officers of the Washington Hardware & Implement Dealers Mutual Fire Insurance Association for the year to come. President, W. P. Lucas, Davenport, Wash.; vice-president, C. A. Loy, Fairfeld, Wash.; Treasurer, E. L. Scott, Oakesdale, Wash.; secretary E. W. Evenson, Spokane, Wash.

It was determined to pay a return premium of 25 per cent. on all policies expiring during 1907.

BANQUET AND SMOKER.

The meeting was brought to a close with a very enjoyable banquet and smoker arranged by Edward F. Waggoner, J. A. Fridaker, A. Urbahn and E. W. Evenson. The Elks' Quartette furnished the music. Mr. Waggoner presided efficiently as toastmaster, the list of toasts being as follows: "Our Wives and Sweethearts," F. W. Evenson, Spokane; "The Association," J. N. Nankervis, Moscow; "Goodfellowship," F. W. Dewart, Spokane; "The Commercial Traveler," J. H. Abrams, Spokane; "The Merchant," G. J. Tompkins, Republic; "The Manufacturer," E. M. Brannock, Portland, Ore.; "Our Empire," N. W. Durham, Spokane; "Opportunities," I. C. Hattabaugh, Grangeville; "Concentrated Efforts," F. E. Goodall, Spokane; "Our Country," Rev. W. J. Hindley, Spokane; "Spokane," H. W. Allen.

STANDARD MFG. CO., Shelby, Ohio, are distributing a little pamphlet devoted to a description of their "New Home" Washing Machine. On the front cover is a portrait of the Father of his Country, and the company claim their product represents in its construction the strength, simplicity and purity of character so much admired in the one whose portrait is given. Regarding this machine, the company state: "Louisiana cypress used in the wood construction is the lightest and most durable washing machine wood known. Impervious to acids and alkalies, not affected by hot water and gives off no odor. The quality of the wood we use is clear and takes on a beautiful finish in the natural. The joints are tongued and grooved and the tub bound with three electric-welded, galvanized spring-steel hoops; patent crimped, perfect adjustment to expansion and contraction. Machine always water tight, hoops never break, loosen or fall off and bottom of machine never forced to heave up."

PURE SPIRITS OF TURPENTINE FOR THE PAINTER.

In the movement that is sweeping the country for greater purity of foods, drugs, beverages and for more intimate knowledge of all purchases, it is a pity that we have not as yet a National Law controlling the purity of Paint Products.

The falsifications and sophistications and adulterations practised in connection with Linseed Oil are very bad, but those in connection with Spirits of Turpentine are indescribably worse.

Until satisfactory governmental regulations are in force, which shall put the paint business on the same basis as the new law places the drug business, we can look only to the honesty of the Seller and the intelligence and common sense of the Buyer for any bettering of the conditions.

On account of enormous variety and varying quality of Turpentines, Wood Turpentines, and Turpentine Substitutes that are being offered everywhere and at all sorts of prices a large number of producers, under the leadership of The Charles E. Sholes Company of No. 164 Front Street, New York City, are making vigorous efforts to standardize the industry and to educate the users regarding the composition of the many kinds of turpentines.

The idea at the bottom of the organization is that the Turpentine has many uses, first, in the manufacture of Paints, and Varnishes of all grades and second in a great variety of industries, as a solvent, cleanser, thinner, dryer, drug, and chemical. It is natural that these many uses do not all require the same qualities of the Turpentine. Some will need a quick dryer, others slow, the boiling point most suitable in a given case may be 160%, 170%, or 180% C.; the specific gravity desired may be anywhere from .862 to .900.

So these gentlemen have attempted to standardize the industry by establishing different grades of Turpentine, each grade is guaranteed as to its source, method of production, boiling point, specific gravity, drying properties, insoluble residue, solvent properties and freedom from adulteration with Rosin Oil, Petroleum Products, Turpentine Substitutes, or anything whatsoever.

This puts the intelligent purchaser in a position to know exactly what he is buying, to learn what grade has heretofore proved most suitable for his purpose and to save money.

Whenever a salesman offers you pure gum spirits of turpentine at less that the market price, it is an absolutely safe bet that a chemical analysis would show adulteration.

The Chemical Company mentioned above assure us that every barrel of turpentine sold by them is first sampled and analyzed by The Industrial Laboratories, unless its manufacture, and testing previous to barreling has been entirely under their control. This is the only way to insure uniform products and uniform results.

We are glad to aid by the influence of our journal any movement to raise the standard of any products handled by Hardwaremen, or to bring about a more frank and intelligent connection between the buyer and seller.

ADAMS & ELTING CO.'S ANNUAL CONVENTION AND BANQUET.

For several years it has been the custom of the Adams & Elting Co., of Chicago, to call in its entire force of traveling men at the end of each year, so that the members of the firm, department heads and salesmen might get together for the discussion of manufacturing, selling and the future of the "Ad-el-ite" line, and all other matters of importance which arises from time to time. This custom takes the form of an Annual Convention, lasting two or three days, in which all the men participate, or more in fact, one of those little "heart to heart" talks, which are so beneficial to employer and employee, and so necessary to promote perfect harmony and mutual understanding.

The Fourth Annual Convention was held on January 4-5th in the Assembly Hall of the new offices of the Adams & Elting Co. Many new employees were present and it was pronounced in many ways to be far ahead of any former convention of this company. Mr. Philip L. F. Elting presided, and after a brief address of greeting spoke of the extremely gratifying results accomplished by the salesmen and other employees of the company during the past year, and attributed the enormous increase in business to the progressive methods of the firm and its employees.

The first day of the convention was given over to practical talks and demonstrations of Fillers and Stains, Enamels, Penetrating Reducers and other wood finishing material, and it was shown by comparative tests of competing lines that the "Ad-el-ite" brand leads all others in point of quality. Of the many brands of wood finishing material on the market "Ad-el-ite" is the most universally used among the furniture manufacturers and the constantly increasing demand for high grade material will eventually make it the leading brand for all purposes.

The second day was taken up with a general discussion of ways and means and practical talks on selling by many of the salesmen. Mr. Elting spoke of the high quality of the "Ad-el-ite" Paints and Paint Specialties and mentioned that the phenomenal increase in sales last year was due to the superior merits of the goods alone, inasmuch as they sold at a uniformly higher price than other brands. The announcement that the company would continue their strenuous advertising with a very much increased appropriation for 1907 met with hearty applause from everybody.

The convention concluded Saturday evening with a banquet at the Hamilton Club, of Chicago, with the rooms decorated for the occasion and covers laid for many guests. Mr. W. P. Adams, president of the company, acted as toastmaster, and there was much enthusiasm and many good resolutions for the new year. The banquet broke up about midnight with three cheers for "Ad-el-ite" and the Adams & Elting Co.

SOUTH DAKOTA RETAIL HARDWARE ASSN.

The second annual convention of the South Dakota Retail Hardware Association will be held at Mitchell, S. D., February 12, 13, 14, 1907. The programme is as follows:

TUESDAY, FEBRUARY 12, 1907.

11 A. M.

Meeting of Executive Committee.

2 P. M.

Welcome to the City of Mitchell—Mayor O. L. Branson.
Response—E. I. Gregory, Alexandria.
Address—President E. D. Hawkins, Vermillion.
Announcement of Committees by President Hawkins.
- Committee on Legislation.
- Committee on Nominations.
- Committee on Resolutions.
- Finance Committee.

7.30 P. M.

Address by Fred J. Vetsch representing the Traveling Men's Association and representatives of South Dakota Jobbers.
General discussions for the welfare of the Association.

WEDNESDAY, FEBRUARY 13,

9 A. M.

Report of Secretary, Noah Keller.
Report of Treasurer, B. G. Wattson.
Address by H. E. Johnson, Redfield.
Addresses by
- J. H. Roper, Parker, "Office System."
- Wm. M. Pratt, of the Goodell-Pratt Co., Evolution of the Hardware Trade, or The Hardware World.

Intermission, 20 minutes.
Payment of dues and enrollment of new members. Distribution of Badges.

2 P. M.

Address (in executive session) by Mr. S. R. Miles, 1st Vice-President of the National Retail Hardware Association.
Question Box.
Some of the questions to be discussed are:
- Are Stove Prices too high?
- Does it pay to give presents to customers?
- Does it pay to borrow money to discount bills?
- Does it pay to weigh freight and check freight bills?
- Do 5 and 10 cent counters pay?
- Does it pay to confine your purchases to a few houses?
- Do we approve of advertising Catalog Houses in Fraternal papers?

Discussion of the Pure Paint Law—S. O. Steensland, Beresford; F. I. Pixley, Montrose.

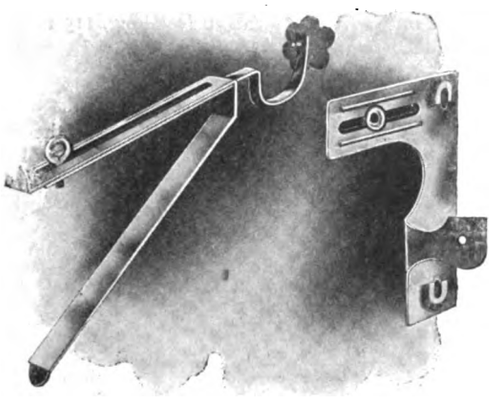
THURSDAY, FEBRUARY 14,

9:30 A. M.

Address by George M. Evenson, of the Knapp & Spencer Co. "Salesmanship."
Reports of Committees.
Election of Officers.

2:30 P. M.

Report of Delegates to National Convention.
Meeting of Executive Committee.
Arrangements for place and date of next Annual Convention.



OFFICERS, 1906.

PRESIDENT—E. D. Hawkins, Vermillion, S. D.
FIRST VICE-PRESIDENT—Otto E. Mueller, Aberdeen, S. D.
SECOND VICE-PRESIDENT—F. I. Pixley, Montrose, S. D.
SECRETARY—Noah Keller, Woonsocket, S. D.
TREASURER—B. G. Wattson, Chamberlain, S. D.

MASCOT COMBINATION WINDOW SHADE AND CURTAIN BRACKET.

Kenvin & Cummings Co., 1408 Pennsylvania Building, Philadelphia, Pa., are the manufacturers of the Combination Bracket shown in the accompanying illustrations. These Brackets are made from the best grades of cold rolled steel, and finished in a handsome manner. They are especially strong and durable. The

PARTS OF CONSTRUCTION.

shade holder is fastened to window frame with screw eyes, which are inserted in the two inch slot at the top of shade holder, permitting a side adjustment of four inches. The curtain pole arm is so fastened that it can be removed from the shade plate

WINDOW SHADE AND CURTAIN HOLDER.

if desired, without disturbing the window shade. The pole arm has an extension adjustment of seven to eleven inches. No tacks, nails, screws, hammer or screw driver are required with this bracket. It can be put upon any window frame or taken down easily and quickly. This bracket eliminates the nailing up of blocks or cutting of shades, and where it is used takes the place of the ordinary fixtures entirely.

SOME MISTAKES WE MAKE.

By B. A. CHAMBEAU.

We make mistakes when we—

Keep a systemless arrangement of stock.
Notify the trade that we are the cheapest in town.
Allow loafers to monopolize the store.
Seek to get trade on that plan.
Ask a customer what he paid for an article around the corner.
Sell at a cut price.
Seem to be what we are not.
Always complain about dull business and hard times.
Sell an article otherwise than on its own merits.
Or claim more for it than we can live up to.
Charge one patron more for an article than another.
Intimate that the other fellow charged too much for an article.
Talk politics in the store.
Answer a foolish question gruffly.
Increase the price of an article because the other stores are out of it.
Ornament the front part of the store and leave the rear in confusion.
Nauseate a customer with effusive claims.
Force anything on him he does not want.
Only seem to wait on him because we have to.
Postpone until tomorrow what should be done to-day.
Handle more stock than our trade demands.
Make a patron wait unnecessarily for attention.
Regard our competitor as a personal enemy.
Can make a sale and don't.
Ask questions just to make talk.
Insist unduly to accomplish it.
Show partiality in the treatment of customers.

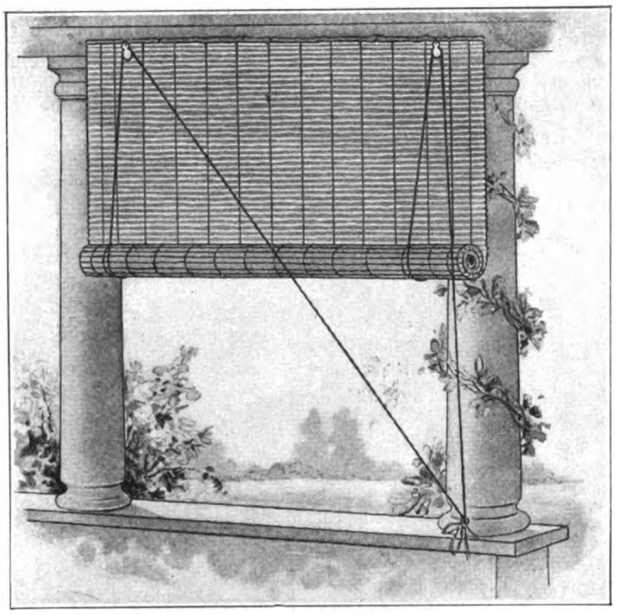
HYGIENIC KITCHEN CABINET.

Hygiene Cabinet Co., Carlisle, Ind., are the makers of the Enameled Steel Kitchen Cabinet, of which we present a fine illustration, showing its great utility in the domestic economy of the kitchen. It is made entirely of metal, enameled inside and out with the exception of a bread board 15 by 24 inches in size. There is a French-plate mirror with scollop edge in the upper middle door. It makes a very attractive appearance on the floor, and it is stated that none but the best material is used in the cabinets, and that the metal work and enameling are done

HYGIENIC KITCHEN CABINET.

by workmen of skill and experience. It is attractively enameled. Four colors are obtainable: Brown, olive, maroon and wine color, with the interior in light blue. Three coats of enamel are used, each being baked on from four to six hours. The Cabinet is claimed to be mouse and vermin proof and absolutely sanitary, as it will not harbor germs or certain taints from impure or decayed foods. It can be thoroughly sterilized at any time, being washed, scalded, sunned and aired without the least injury. It is ..ot susceptible to atmospheric changes, and therefore will not warp, swell or shrink under any conditions.

♣



It will take some power greater than the national pure food law to repress the New England manufacturer. The adulteration instinct seems to penetrate all classes of life there. According to the newspapers a Rhode Island hen has laid an egg which had a pin in it. This is about as fowl a case of food adulteration as has yet been brought to the attention of the public.

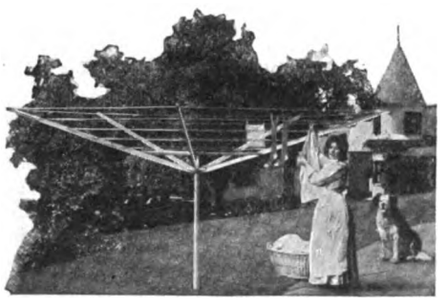
NEW GOODS AND SPECIALTIES

KOMI GREEN PAINTED PORCH CURTAIN.

R. H. Comey Co., Camden, N. J., are the manufacturers of the Komi Green Painted Porch Curtain represented in the accompanying illustration. The stock used in its manufacture is carefully selected bamboo. The slats are 5/8 inch wide, and neatly bound together by strong cord. The green color with which it is painted has been adopted because it is restful to the eye and harmonizes with any surroundings. It is brush-painted,



KOMI GREEN PAINTED PORCH CURTAIN.

instead of simply stained, and is guaranteed to stand the weather. The pulleys used in its construction are made of galvanized iron and will not rust. The manufacturers claim the important fact that as it is always in stock in eleven sizes of width and drop, proper screens for any porch are obtainable without delay, and without the necessity of putting customers off waiting for factory deliveries, or selling them an odd size with jagged edge cut down from a larger size. The manufacturers state the Komi Curtain when properly hung and cared for will be a pleasure to operate and will last many seasons.

THE CHAMPION CLOTHES DRYER.

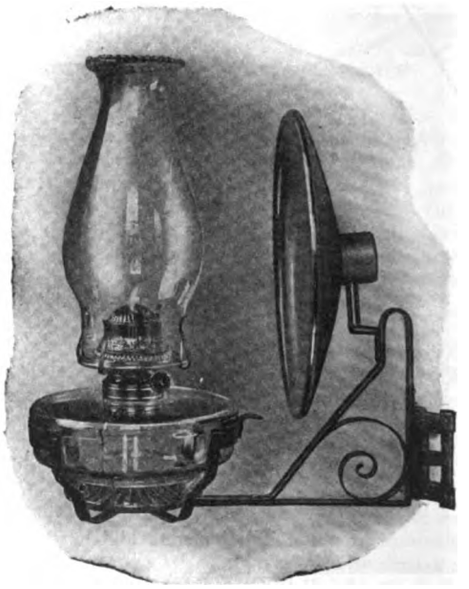
Hill's Champion Clothes Dryer, made by the Hill Dryer Co., Worcester, Mass., and 1133 Broadway, New York, has been before the Hardware trade for a number of years as the most pop-

THE CHAMPION CLOTHES DRYER.

ular Clothes Dryer offered by them. It is made of the best material throughout, all castings being of the best refined malleable iron, and thoroughly galvanized. It is self-fastening, and locks to post the same as the Balcony or Roof Dryers, when in use, and being made in seperate parts, when not in use can be readily removed. They are fitted either with wood post, painted, or steel tubing post, galvanized. The post is so constructed it sets in a socket placed in the ground, and after use may be put away, leaving no obstruction at all on the lawn between one wash-day and another. It is made in three sizes: No. 1, 4 arms, 6 feet long, 100 feet line. No. 2, 5 arms, 6 feet long, 115 feet line. No. 3, 5 arms, 7 feet long, 150 feet line.

THE HUSTLER ASH SIFTER.

The Hill Dryer Co., Worcester, Mass., are the makers of the Hustler Ash Sifter, which we illustrate the use of in the cut herewith. It is a rotary Ash Sifter, that can be relied upon to sift the coal clean, avoiding the usual dust and dirt which makes

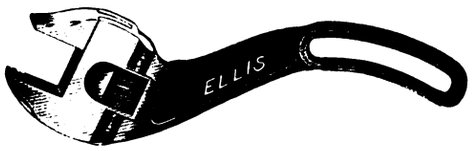


THE HUSTLER ASH SIFTER.

the ordinary sifter so unpleasant to use. The "Hustler" Sifter is made of galvanized iron with a heavy galvanized wire cylinder sieve, and is made in two sizes. No. 1 holds a hoodful of ashes, and is designed for stove and small furnace use. It is made to fit an 18-inch iron can or a flour barrel. No. 2 for furnace in private residences, stores or public buildings, is made to fit a 20-inch can or sugar barrel. Otherwise same as the smaller sizes.

MASCOT LAMP BRACKET NO. 219.

Kenvin & Cummings Co., 1408 Pennsylvania Building, Philadelphia, Pa., are placing upon the market the Mascot Lamp Bracket No. 219 illustrated herewith. It is made entirely from the best grade of Bessemer steel, is an especially strong and dur-



MASCOT LAMP BRACKET NO. 219.

able fixture, though light in weight. It is fitted with their improved Mascot Self-Locking Fount Cup with thumb piece. The wall plates are detachable. The Lamp can be set upon any flat surface, or carried, if desired. It is finished in black enamel, projects ten inches, and will take a ten-inch silvered glass reflector.

THE ELLIS WRENCH.

Hardware dealers are apt to look askance at any new wrench which is brought on the market, claiming that while a new wrench may sell for a time, after the novelty is worn off, the sales are very few and far between. While this is undoubtedly the fate of many new tools, we learn that the Ellis Adjustable Wrench shown in Fig. 1, is as popular as when it was first brought out.

THE ELLIS WRENCH.

Patterson, Gottfried & Hunter, Limited, 146 Centre Street, New York, who are marketing this wrench, had great success with it in their exhibit at the Madison Square Garden Automobile Show New York, in January. They sold many Ellis Wrenches to people who had not come to buy, but were so stuck with the good points of the Ellis Wrench that they wished to take one home with them. That is the kind of an article the up-to-date Hard-

WITH THE JAW OFF-SET.

ware dealer is looking for. From the illustrations, given here, the advantages of this wrench can readily be seen. Fig. 2 shows the Ellis Wrench with the jaw off-set, as used for working in out-of-the-way places, such as behind a pipe, or close to the floor, etc., where the ordinary wrench will not work. This off-set feature is a very valuable one and makes a great many sales for the Ellis Wrench.

"BABY" GASOLINE TORCH.

The Zeidler Lamp & Brass Co., Lomira, Wis., are the manufacturers of the "Baby" Torch, an illustration of which we give in the accompanying cut. This "Baby" Gasoline Torch is claimed to be the smallest torch made which gives perfect results and fills the universal want of a torch which fits the hand and can be used in contracted places and corners. It can be turned in

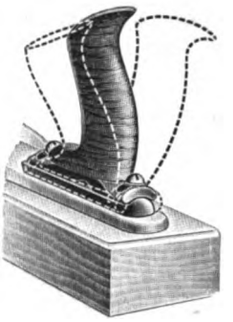
"BABY" GASOLINE TORCH.

any position as it burns equally well in all positions. It is perfectly automatic; has no cocks or valves to get out of order; lights with a match; self feeding; requires no pumping of air and is always ready for use. It is indispensable to telephone and telegraph linemen, electricians, owners of gasoline engines, plumbers, repair shop men, jewelers, dentists, and as a laboratory torch for schools, doctors and chemists. It affords the best cheapest and quickest means of lighting all kinds of gasoline lamps. It burns about two hours from one filling.

THE SARGENT ADJUSTABLE PLANE HANDLE.

Sargent & Co., New Haven, Conn., and 149 Leonard Street, New York, are introducing to the trade the Adjustable Rosewood Plane Handle No. 400 shown in the accompanying illustra-

FIG. 1.



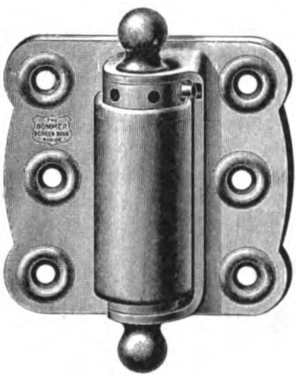


FIG. 2.

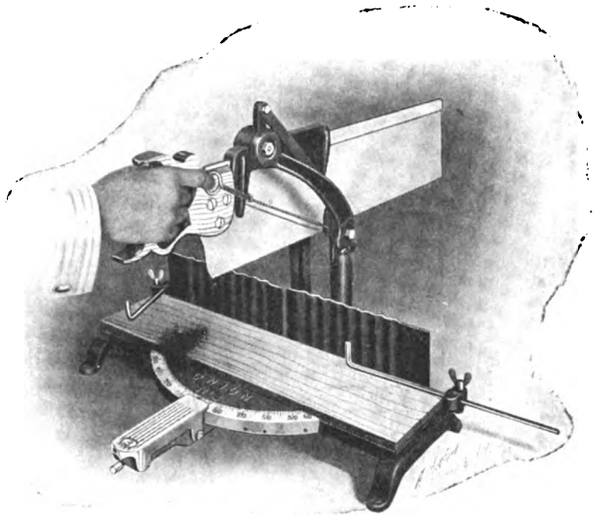
tion. Fig 1 shows the Handle, while Fig. 2 shows the adjustable feature of the Handle, which allows the plane to be used in corners, on floors around baseboards, on stairs, etc., without fear of barking the knuckles or injuring the hand. It is particularly valuable for stair-builders, cabinet-makers, etc. It is adjustable to either right or left hand, and when once applied it may be used equally well as a straight handle.

BOMMER'S NEW SPRING HINGE.

Bommer Brothers, 255-271 Classon Avenue, Brooklyn, N. Y., are putting on the market a new line of screen door hinges, with adjustable tension and covered springs for high-class work, where

BOMMER'S NEW SPRING HINGE.

appearance, finish and enduring quality count. There has never before been anything on the market which fills this particular want. These hinges are made of steel, bronze and brass in all finishes. They are without exception the best goods ever produced for the purpose, and are not too high in price.



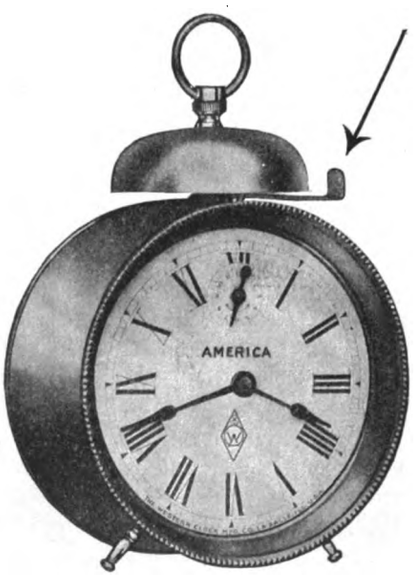
THE UNION MITRE BOX.

The Dosch Mfg. Co., Bridgeport, Conn., is offering the Union Mitre Box, illustrated in the accompanying cut. This machine has just been patented and has a number of features which give it many advantages over the present style of mitre boxes. The most notable feature is the strictly open front. The awkward standards usually employed to hold the saw are entirely dispensed with and the saw is held by means of a saw guide supported in swinging arms. The many advantages of the open front are readily apparent. It saves time for the operator and admits of greatly increased widths of square and mitre cuts. All the mechanic has to do is walk up to the machine, place his work and commence to saw. The largest size, No. 3, will cut off square to 18 inch and mitre up to 14 inch. The saw is held out of the way by means of a simple locking devce. When sawing the operator locks his saw by lifting up and, when desired, the saw is released by a slight pressure on the locking pawl rod, as illustrated.

Probably one of the most valuable adjustments is that for cutting to a given depth, for tenons, etc. The mechanic marks

Digitized by Google

on the end of the wood the depth to which he wishes to cut. He then lowers the saw to the table and a few turns of a thumb screw in the rear of the vertical post raises the saw until the teeth are even with the mark. The saw will then cut that deep and no deeper. The saw is set to any desired degree or fraction of a degree by merely pressing down on the handle and moving to the desired point. At the main degrees the lever is held by a pin lock and at other degrees by a friction lock which holds



THE UNION MITRE BOX.

firmly without slipping. The adjusting rods, one of which is shown at each end of the box, can be easily set to cut a number of boards of a definite length or for holding crown mouldings. The saw guide and swinging arms assist the operating in sawing as their weight feeds the saw into the wood. The saw is easily inserted or removed from the saw guide and is held firmly in it until pulled clear through. This feature admits of a greatly increased length of stroke.

The saw guide is milled its entire length, the graduated plate is nickeled brass, the back of the box is pressed steel, the swinging arms and vertical posts are malleable iron and the whole construction is correct and exceptionally strong for a tool of its kind. On account of the ease and rapidity with which the Union can be manipulated, the manufacturers claim that it will do a fourth more work than any other mitre box.

THE AMERICA ALARM CLOCK, '07 MODEL.

The Western Clock Mfg. Co., La Salle, Ill., are placing on the market their American Alarm Clock '07 Model, of which we

THE AMERICA ALARM CLOCK, '07 MODEL.

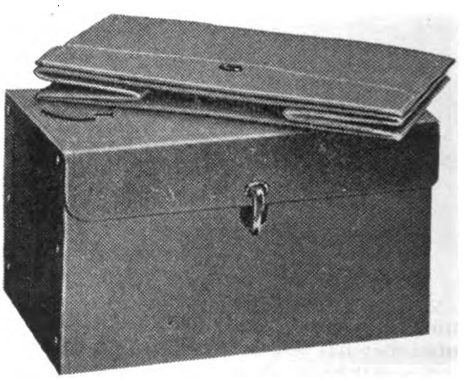
give an illustration. This clock has a brass switch attached to the bell which permits the shutting off of the alarm at will, a novel feature which is proving very popular with the trade. The American Alarm is made with pivots of very hard steel piano wire and hard steel pallet escapement, lantern pinions and barreled springs.

AMERICAN BOLT AND SCREW CASES.

American Bolt and Screw Case Co., Dayton, Ohio, are the manufacturers of these Revolving Cases for Bolts, Screws, Plumbers' Supplies, Bicycle Repairs, Tools, etc., etc. They have

AMERICAN SCREW CASE.

been in general use for a number of years and have given entire satisfaction to the trade using the same. In fact, no Hardware store can consider its equipment complete without one or more of these useful cases. They are substantially made and well finished, and are calculated to last a long time.



"CAMERA" FOLDING LUNCH BOX.

Rochester Lunch Box Mfg. Co., Cox Building, Rochester, N. Y., are placing upon the market the "Camera" folding Lunch

TO CARRY IN POCKET.

Box, which has been greatly improved in every respect, and now commends itself to the trade for its utility and convenience. It is made from one entire piece of material of the best fibre-

"CAMERA" FOLDING LUNCH BOX.

board, and is easily folded to fit any pocket, and exceedingly attractive in appearance. This Lunch Box is made in two sizes: 8x5x4¾ and 7½x4¼x4½, and made in three grades at varying cost.

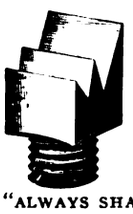
"ALWAYS SHARP" CALKS.

The accompanying illustration presents an almost daily spectacle on asphalt-paved streets, in almost every large city of the country. After a sleet storm or rain, followed by freezing, as is so often the case, we may witness the downfall of many a



horse, because its shoes are unprotected by calks. If a record were kept of the number of horses that fall down in New York City, or any other city, on slippery asphalt streets, their number would be surprisingly large.

SAFEGUARD, TRADE MARK, "ALWAYS SHARP."

A horse may rise easily after such a fall, but is the horse as sound as it was before? It may have sustained permanent injuries showing later on, ruining its usefulness for all time.

"ALWAYS SHARP" TOE CALK.

WEAR AFTER 3 MONTHS.

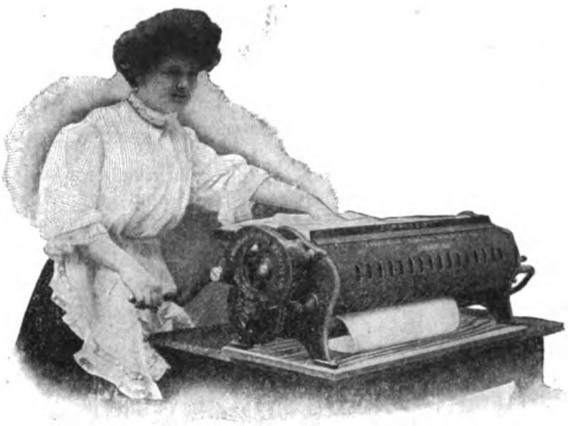
WEAR AFTER 5 MONTHS.

It is still more surprising that truck drivers and merchants, owning a number of trucks and horses, should fail to protect their slipping feet with "Always Sharp" Calks which, without doubt, are the best preventative of such accidents. Fire companies in all the large cities use them. Why should not individual owners of horses, or business firms do likewise?

Uncle Sam uses them. After the most extensive tests made in various Army Posts, the Government decided that "Always Sharp" Calks are the most practical and reliable of any removable calks made. It is using thousands of pairs every year. Preference is given by it to the "Always Sharp" Calks over all others because of their unique construction.

The "Always Sharp" has points of different lengths progressively arranged, whereby when the edge of one point becomes worn, the edge of the next comes into play and so on, thereby obviating frequent sharpening, and at the same time always having a sharp edge to make positive engagement with the slippery surface and insure a firm footing. "Always Sharp" Calks can be put on or taken off with an ordinary wrench without removing the shoe. Its threaded shank is slightly tapered, and binds tightly, making it wholly unnecessary to screw the calk in flush with shoulder to prevent it from turning. Being only case-hardened the shank will not break off in the shoe.

There is no question in the minds of horse owners that the old-fashioned wedge-shape calk is the best, and it is this feature in the "Always Sharp"—three wedge-shaped blades to one calk or 48 cutting edges to one set of calks, which enhances its value in slippery places as well as economically; it makes the shoe last longer.



The "Always Sharp" has also hygienic value in so far as it lessens injury to the horse's hoofs caused by frequent removal of its shoes.

Hardware dealers will do well to investigate the merits of the "Always Sharp" Calks. They can be sold at a good profit during the Fall and Winter months.

"Always Sharp Calks" are made by the Always Sharp Calk Mfg. Company, 34 Essex Street, Jersey City,, N. J., who will on application furnish any dealer with the necessary information how to sell "Always Sharp" Calks in their own town at a profit.

"SIMPLEX" IRONING MACHINE.

American Ironing Machine Co., 96 Fifth Avenue, Chicago, Ill., are the manufacturers of the "Simplex" Ironing Machine illustrated herewith, which consists of a large, wide, padded roller which takes the place of the ironing board; a highly polished iron as wide as the roller, with a gas burner inside of it, that does the work of a flat iron; a cog wheel turned by a handle, which makes the roller work so easy that it is claimed a mere child can do it without fatigue. This Ironing Machine possesses many advantages, among which may be mentioned: When used in the house there is no tramping to and from the range, no bending over a hot stove, no fierce blaze to add to the

"SIMPLEX" IRONING MACHINE.

ninety-in-the-shade temperature. This Machine irons all flat work, sheets, pillow slips, table clothes, towels, etc., and all the big, heavy pieces which consume so much time, strength and gas when ironed with a sad iron. The operator stands or sits comfortably in one place and feeds the dampened clothes through the machine, which will put ten times more pressure on them than could be done with a flat iron, and the clothes come out ironed better than an experienced laundress could do it by hand. The "Simplex" is not a cumbersome, unwieldy affair, but on the contrary compact and easily disposed of when not in use. It is designed to stand on the kitchen table. The only connection required is an inexpensive piece of rubber tubing to connect with the nearest gas pipe. First, light the gas in the iron; then wait about ten minutes for the iron to get hot enough to sizzle; then feed the clothes in straight, turn the handle and each piece will leave the machine ironed. Large pieces, such as sheets, are folded once or twice before being put into the machine. The manufacturers call attention to the fact that the "Simplex" Ironing Machine should not be compared with ordinary cold roll mangles now on the market, and cheap ironing machines built in the foundry. The "Simplex" embodies the principle of the more expensive steam mangles used in the commercial laundries, and on account of the intense heat possible by the use of gas is claimed to produce a better finish than these large machines.

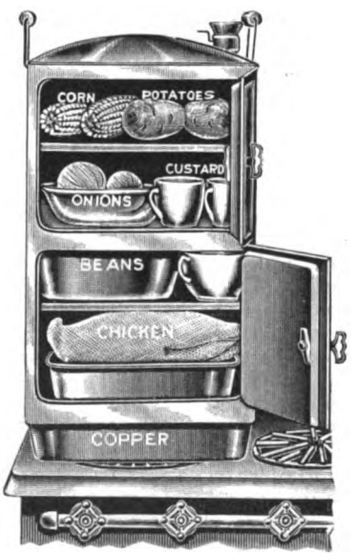
TOLEDO COOKER COMPANY

IDEAL SQUARE STEAM COOKERS.



The Toledo Cooker Co., 1336-1342 West Bancroft Street, Toledo, Ohio, are the manufacturers of the 1905 patterns of Ideal Square Steam Cookers with double doors and whistle. This is something entirely new, and they are positively the only perfect and practical Square Steam Cookers on the market.

Special and exclusive advantages found only in 1905 Square Steam Cookers.

First.—It is the only practical Square Cooker made with a whistle. The whistle is made of brass, nickeled, and will never rust out. This whistle serves at the same time as a replenishing tube when more water is needed, without removing it. *A Whistle* on a steam cooker is *absolutely essential* to its perfect working, as it obviates entirely the necessity of watching it to see that the water does not run low.

WHERE THE IDEAL SQUARE STEAM COOKERS ARE MADE.

THE IDEAL SQUARE STEAM COOKER.

Second.—It is the only square steam cooker that has seamless round corner door frame and drawn round corner doors.

Third.—It has a self-regulating valve that holds the steam under pressure, causing the food to cook quickly and condensing the steam so that the water is replenished and will last more than twice as long as in the ordinary steam cooker or kettle. This valve needs no attention.

Fourth.—The valve and steam escape are so arranged as not to be obstructed by food or any other substance.

Fifth.—It has a pressed seamless copper tank bottom 2½ inches deep.

Sixth.—It has a pressed seamless dome top so constructed that the condensed steam will immediately run to the sides and down the bottom into the water. Steam cookers without this feature permit the water to condense and drip back on to the food in the cooker.

Seventh.—The entire body of the cooker is made of one piece of metal with seamless round corners, which makes it very easy to clean. It does away entirely with raw edges—others have a seam at each corner.

Eighth.—The pressed seamless round corner door frames and the pressed seamless doors are a very important feature. You will notice the doors are perfectly tight and make a very handsome neat appearance. This is a very important feature and cannot be found in any other cooker.

Ninth.—The other so-called square cookers do not possess any of these valuable features. In a word, we have, in the 1905 pattern of the Ideal Steam Cooker, overcome every objection found in other square cookers.

One article will not flavor another, no matter how delicate or how strong, so long as they are cooked in separate dishes. The water tank holds five quarts and will last three hours in cooking. The pans sent with the cooker hold four quarts each. You will find the Ideal Steam Cooker simply indispensable for canning fruit.

Remember the Ideal Square Steam Cooker will enable you to cook an entire meal, consisting of five or six different articles, over the burner of any stove that will boil two quarts of water. It will, therefore, pay for itself in a short time.

OUR PUBLIC DEBT.

The public debt of the United States amounts to about $875,000,000, which is $11.91 for every man, woman and child in the country. The decrease in the debt during the last forty years has been very rapid. In 1870 the per capita was $60.46 for every man, woman and child in the United States, and the total was $2,046,455,722. The debt of the United States is smaller in comparison to our population than that of any other great nation.

The annual interest charged is about $24,000,000, and it costs every man, woman and child in the United States about 30 cents a year.

The pension bill now amounts to about $140,000,000 a year, but is growing less and less annually. High tide was reached in 1905, and from this time on, unless Congress passes some new legislation extending the pension system, there will be an annual decrease.

OUR CANADIAN LETTER

TORONTO, Feb. 5, 1907.

HEAVY WINTER THROUGHOUT CANADA.

All parts of Canada have suffered considerably from the heavy winter but the chief complaints have come from the North Western Provinces, where extreme cold weather, snow blockades and a scarcity of coal have combined to make the winter a memorable one. In Ontario there has been no suffering except in the natural gas districts owing to the temporary freezing of supply pipes. In Quebec and the Maritime Provinces conditions have been similar—a long stretch of cold weather but no snow blockades. The Pacific Coast has, however, suffered greatly owing to the long period of zero weather. With the temperature seldom going below 20 above zero, frozen water pipes, etc., have hitherto been unknown and East Indians and others could stand the winter weather, but the change this year has caused considerable hardship and the demand for heating apparatus has been abnormal. The coal miners' strike last Fall left Alberta, Saskatchewan and Manitoba short of fuel. The hay crop was smaller than usual. The temperature has hovered between zero and 40 below for two months and the snow fall has been much heavier than usual, while trains have been unable to keep the tracks clear, the wind filling the roads in as soon as the train passes. Towns on both main and branch lines have run short of fuel and in some cases of food supplies. Cattle have died by thousands, being unable to graze on the grass under the snow. Without doubt the winter will mean heavy loss to many but the country is too rich and too far advanced for it to be hurt much by one such winter. Ontario has suffered snow blockades, the Western States have had their blizzards and survived. Just so will Western Canada overcome the growing pains incidental to a country which has grown faster than its railroad facilities.

ASSOCIATION NEWS.

At a convention recently held at Halifax the Nova Scotia Retail Hardware Association was organized with 24 members to commence with.

The annual meeting of the St. John Iron and Hardware Association of N. B., was held on January 8, and the following officers were elected: President, W. S. Fisher; vice-president, J. M. Robertson; secretary-treasurer, John J. Barry; directors, W. H. Thorne, Thomas McAvity, M. E. Agar.

It is understood that the Postmaster General has decided to drop the C. O. D. feature in his proposed revision of the parcels post legislation. Owing to the thousands of letters sent the members of Parliament and the Postmaster General the proposal is anything but popular in Parliament, and while the P. M. G., has the power to revise the postal regulations without reference to Parliament it is scarcely possible that he will attempt to do so. The fight will now be carried on by the Retail Hardware Associations against any further extensions of the parcels post system.

The Western Canada Retail Hardware Association will hold its annual convention at Winnipeg on February 12. An exciting time is expected, as many dealers have come out in opposition to the regulation of prices, a feature which has been prominent in the work of the Association.

BUSINESS CHANGES.

James Young has purchased the Hardware business of James T. Stewart, Manchester, Ontario.

The F. Hamilton Hardware Co., Hamilton, Ont., will in future be known as the Alexander Hardware Co.

Chesney & Smiley's business at Seaforth, Ont., will be carried on in future by Chesney & Wilson. Mr. Smiley has bought out W. H. Rumball, Aylmer.

T. A. Whetstone and M. Franklin have opened Hardware stores at Toronto.

The Schultz Manufacturing Co., Hamilton, has been incorporated with $50,000 capital. They will continue to make lanterns and similar goods.

The Sherbrooke (Que.) Novelty Company has been incorporated with $20,000 capital to manufacture household utensils.

The Safety Explosives Company, Montreal, has been organized, capitalized at $300,000, to make explosives.

L. I. Hunt & Son, Alvinston, Ont., have sold their Hardware business to Telford Bros., Blenheim.

Bishop & Ball, Hardware merchants, Wingham, Ont., have dissolved partnership.

W. T. Walker has taken over the business recently conducted by McKinnon & Walker, Cobalt, Ont.

J. H. Bell & Co., Haileybury, Ont., have sold their business to J. H. Bell and G. H. Rochester.

The Dominion Asbestos Company, has been organized at Montreal with H. H. Robertson as president.

Morency & Cote have taken over the Hardware business of P. Morency, Montreal.

W. E. Staneland has purchased the Dominion Paint Company, Victoria, B. C., and will take up the manufacturing of mixed paints.

Tufts Brothers have purchased the business of C. D. Sparrow, Fairfax, Man.

W. P. Landon has taken over the tinsmithing business of Landon, Hellier and Hartnell, Saskatoon, Sask.

Oliver & Kempthorne's Hardware store at Saskatoon, Sask., was destroyed by fire on Jan. 17.

HARDWARE TRADE HAPPENINGS.

G. A. Britton, of the J. H. Ashdown Hardware Company, and R. J. McKay, formerly with the Hingston-Smith Arms Company, Winnipeg, have formed the Western Sporting Goods Company and have opened a store in the Western metropolis.

T. H. Brenton, formerly Western manager at Winnipeg for the James Stewart Manufacturing Company, Woodstock, Ont., has accepted a position on the traveling staff of F. W. Lamplough & Company, Montreal.

The St. Lawrence Saw & Steel Works Company has been incorporated at Sorel, Que., to manufacture saws and other tools. The capitalization is $40,000.

Gordon Ritchie, formerly with the Sherwin-Williams Company, Montreal, has joined the Quebec traveling staff of the McClary Manfacturing Co., London, Ontario.

The Canadian factory of the Gillette Safety Razor Company at Montreal was destroyed by fire recently. They have opened new offices and will rebuild.

Frank Adams, for thirteen years secretary of the Peterboro Lock Manufacturing Co., Peterboro, Ont., has resigned his position.

George McAvity, Hardware jobber, St. John, N. B., is one of the incorporators of the new Dominion Car & Foundry Company, Montreal.

The E. T. Fairbanks Company, St. Johnsbury, Vermont, are establishing a Canadian plant at Beebe Plains, Quebec, 40 miles from the parent factory, to manufacture scales and valves. The Dart Union Company, Providence, R. I., are also to establish a plant at Toronto. The Canadian Fairbanks Company, Montreal, represent these concerns in Canada.

A. C. Leslie & Company, Montreal, a metal firm of 40 years standing, has been incorporated with a capital of $250,000.

The new plant of the Blanchite Process Paint Company, Toronto, is now in operation.

Leonard McGlashan, a well-known manufacturer of cutlery and plated ware at Niagara Falls, Ont., died in California recently. His son is head of the new McGlashan-Clarke cutlery business at the Falls.

Nearly $2,000,000 is involved in the deal covering the amalgamation of the Canada Screw Company and the Ontario Tack Company, Hamilton. Cyrus A. Birge, Hamilton, will be president and the works of the company enlarged.

The Munro Wire Works, Winnipeg, have enlarged their plant by erecting a $30,000 building.

R. J. McConnell, Carmen, Man., has erected a modernly equipped Hardware store.

It is said American capitalists will spend $200,000 on a new wire manufacturing plant at Montreal.

The William Rogers Company, have commenced the plating of silverware at Niagara Falls, Ont.

The Ontario Lamp & Lantern Company, Hamilton, are extending their factory buildings.

The Metal Shingle & Siding Company, Preston, are erecting a two story office building at their plant.

The Canada Nut & Bolt Company are to establish a plant at Niagara Falls, Ont.

The Standard Paint Company, have established a paint factory at Highlands, near Montreal.

(Concluded on page 44.)

RECENT TRADE PUBLICATIONS.

HOHLFELD MFG. CO., Eighth and Dauphin streets, Philadelphia, Pa., have issued one of the most artistic catalogues that have come to our attention this season, covering their line of "Eclat" Hammocks. The illustrations are all in colors, and a complete description is given of each pattern shown. The various weaves are of an exceedingly tasteful character, being of Persian, Oriental, Bagdad and Indian design; golf or plaid colorings; corduroy, jacquard, running scroll, damask striping and lace design; Grecian, ribbon and bowknot; continuous scroll; oval, French Empire, poppy, chrysanthemum, autumn leaf and lily designs. In preparing this line, the company have borne in mind every point of strength and every selling advantage, and they have set the pace that has made the hammock an article of attractive furnishing, having brought about by their up-to-date ideas, new fabrics, designs and colors, new conditions in the hammock business.

R. M. CLOUGH, Tolland, Conn. Catalogue and price list of Gear and Milling Cutters and Small Tools, including Duplex, Involute, Special and Bevel Gear Cutters and Metal Slitting Saws; Straddle Mills, Angular Cutters, Round and Concave Edge Cutters, Counterborers, Adjustable Hand and Shell Reamers, Plug and Ring Gauges, Chucking Reamers, etc.

DOMINION CARTRIDGE CO., LTD., Montreal, Canada, with distributing depots in New York and St. Louis, have sent out a price list of Metallic Cartridges for sporting, military and target rifles, revolvers, primers, etc.

WILLIAM PETER ESTATE, Toledo, Ohio. Catalogue of Door and Window Screens. The lumber used in the construction of these Door Screens is manufactured from all kinds of wood that experience has taught the manufacturers is the best. All the lumber is thoroughly seasoned and dried in their new modern steam kilns, insuring a first-class article that will not become loose at the joints, and that will last for many years. The wire cloth used is 12-mesh highest-grade steel, black, double selvedge, stretched tight and tacked before moulding is nailed on. Attention is called in this catalogue to two new doors for this season; also to an improvement in their Window Screens by placing the metal centre bars, so that when the Screen is open they strike together, making it absolutely fly-proof.

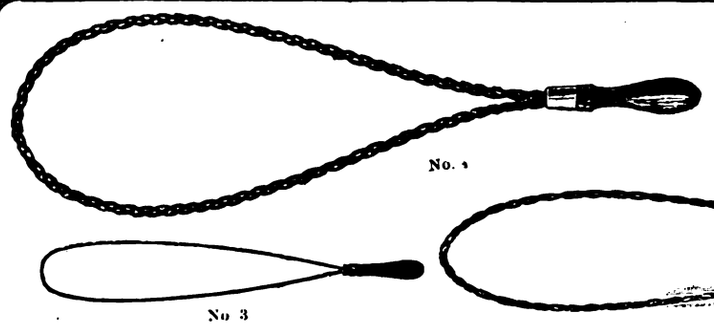
CHARLES E. MILLER, 97-101 Reade Street, New York, has distributed to the trade a Special Catalogue of Automobile Specialties, stating that his complete 1907 catalogue will be ready early in February 1907, and will be mailed upon request. Included in the contents will be found everything indisppensable to the automobilist, such as Speedmeters, Chains, Horns and Horn Parts, Watches and cases for same, Motor Clocks, Automobile Jewelry, Vulcanizing Substitute, French Talc, Tire Holders, Pedals, Goggles, Caps, Muffiers, Gauntlet Gloves, Spark Plugs, Jacks, etc.

ROBERTS & MANDER STOVE CO., S. 11th Street, Washington Ave., and Clinton Street, Philadelphia, Pa., have recently gotten out a catalogue of their Quality Gas Ranges, Heaters and Appliances. Fine half-tone engravings are given of the several patterns manufactured by this company, complete descriptions accompanying the same. They also manufacture Ventilating Canopies or Hoods for erection over ranges and other cooking appliances; also Warming Shelves and Closets. Special appliances, ranges, ovens, etc., will be constructed to suit all requirements, according to specifications. A variety of Hot Plates is included in the contents, as well as Gas Radiators and Oyster Cookers. Special attention is called by loose leaflets to a Bakers' Oven and an Ice Cream Cone Baker.

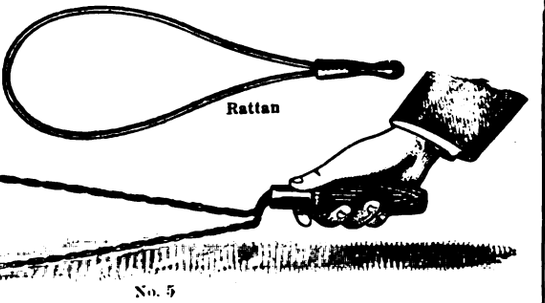
AMERICAN SHEET AND TIN PLATE COMPANY, Frick Building, Pittsburgh, Pa., have issued a booklet with the imprint "From Underfoot to Overhead," handsomely printed in colors on a fine quality of paper, with superior half-tone engravings. This booklet has been prepared with a desire to give the architect, builder, roofer and property owner an idea of the many processes through which a piece of ore must pass before it becomes the base of an MF Terne Plate. Statistics have been carefully omitted from this book, because of the desire of the Company to have the recipient consider its reading a pastime and not a study. However, the terms and the descriptions given are accurate to the letter, and the photographs have been added that a clearer understanding of every process can be gained. This handsome booklet will be sent free to anyone applying for the same.

THE AVERY STAMPING CO., Cleveland, Ohio, have distributed to the trade an entertaining booklet entitled "Spiders for Insiders," in which will be found a number of receipts written especially for this Company by Mrs. Alice Gitchel Kirk, Cleveland, the well known instructor and lecturer on domestic science. Interpersed are some remarks on the subject of "Never-Break" Seamless Steel Cooking Utensils. Illustrations are given of their Spiders, Griddles, Scotch Bowls, Flat and Round Bottom Kettles, Stew Pans and Maslin Kettles. These booklets will be furnished in quantities to the trade, with merchant's imprint, for free distribution, on request.

UNITED STATES CLOTHES PIN CO., Montpelier, Vt. Catalogue of Spring Clothes Pins, Clips, Tube Holders, etc. Regarding their products, the Company say: "All of our pins and clips are covered by patent and can be manufactured only by ourselves. We employ none but skilled labor, and our stock is carefully selected and tested. Each part of the work requires specially constructed machinery, which has been invented by us, and made from our own designs."



STAR EXPANSION BOLT CO., 147-149 Cedar Street, New York. Catalogue No. 16 of Star Expansion Toggle Bolts, and allied lines. Regarding this catalogue, the company say: "In offering our latest complete catalogue we would especially impress upon you that the Star Expansion Bolt, both lag screw and machine bolt types, are standard, and are the kind used by the government and by most builders, plumbers, electricians, telephone companies, fire door manufacturers and the like. For dealers they are most desirable as the shields can be used with all regular lag screws, machine bolts, wood screws and machine screws. This enables a stock of all diameter of shields to be carried at very little outlay and requires but small space. The shields of course to be used in connection with your regular stock of bolts and screws. For users of expansion bolts the Star has a distinct advantage as the holes required for their insertion are smaller than for any other style and there are no superfluous parts to become lost or broken, either before or after insertion; both the lag screw and machine bolt types are the standard of strength and utility." On all styles of expansion bolts they sell either the bolts complete or the shields only. Every article is carefully inspected before shipment, so that the quality and condition of their goods can always be relied upon. Prices will be quoted and samples furnished on request.



JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., have published a very attractive book entitled "The Horse," which contains suggestions for the proper care of the horse in and out of the stable This book will be found of real value to those interested, as the matter has been carefully selected and culled from authoritative sources. It will be sent free to those requesting a copy.

AMERICAN FORK & HOE CO., Cleveland, Ohio, who are always to the front in conducting an advertising campaign, are mailing to all the retail Hardware dealers in the United States a large circular, showing how this Company can increase both sales and profits for the dealer on Farm and Garden Hand-Tools. Several advertisements, representing the great number they are publishing this season, are displayed, and their new plan to increase the Hardwareman's sales is discussed in detail. A number of little books published by them, and intended as sales aids, are mentioned, showing how the dealer can get the business the company create, all of which will be sent for the asking.

CONSOLIDATED HANDLE CO., Memphis, Tenn., with New York office at 25 Whitehall Street, have issued their No. 60 Domestic Price List on Axe, Pick, Sledge, Hatchet and Hammer Handles, all of which are manufactured from high-grade second-growth hickory at their factories in Memphis, Tenn., Huntsville and Bridgeport, Ala., Harrisburg, Ark. and Manor, Pa. This company have a capacity of 1200 dozen handles per day. These lists are also issued for use among foreign nations, being printed in the respective languages.

REVIEW OF THE MARKETS.

WIRE NAILS: The condition of the market is practically unchanged, except as the inclement weather in some sections has interfered with the movement of trade. The demand keeps about even with the capacity of the mills to produce, and Nails that were ordered 60 days ago are now being received by the jobbers. The market is firm. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$2.00
Carload lots to retailers	2.05

New York.—The severe weather has been the cause of a marked falling off in the moderate demand which has been a feature of the market recently. New York quotations are on the following basis:

To retailers, carloads on dock	$2.19
Less than carloads on dock	2.33
Small lots at store	2.30

CUT NAILS: The supply on hand at the mills is light, on certain sizes particularly, some mills refusing to accept export orders for delivery earlier than April 1. The mills are kept busy on contract specifications, and new business is only fair in proportions. The market is firm. Quotations are as follows, f.o.b. Pittsburgh:

Carload lots to Jobbers	$2.05
Less than carloads to Jobbers	2.10
Less than carloads to Retailers	2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—The market is quiet and without interest. Quotations from jobbers are on the basis of $2.30 for small lots from store.

BABB WIRE: Specifications are coming in freely on contracts given previous to the last advance in price. Prompt shipments are urged by jobbers, so that they may fill the retailers' orders when the Spring demand commences. New business is quite light. The tone of the market is still strong, and it is understood that some mills are asking premiums over regular prices. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: New business is only moderate in demand, but buyers are specifying freely on contract orders, the mills having a large amount of these on their books. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.85
Retailers, carloads	1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

SHOT: Under date of February 1 the following prices representing an advance of 5 cents per 25-lb. bag were announced on Shot:

Drop Shot, sizes smaller than B, 25-lb. bags, $1.95 per bag; 5-lb. bags, 45 cents per bag.

Drop Shot, B and larger sizes, 25-lb. bags, $2.20 per bag; 5-lb. bags, 50 cents per bag.

Buck and Chilled Shot, 25-lb. bags, $2.20 per bag; 5-lb. bags, 50 cents per bag.

Dust Shot, 25-lb. bags, $2.40 per bag; 5-lb. bags, 55 cents per bag.

On ton lots and over there is the usual discount of 10 cents per bag of 25 pounds.

REVOLVERS: The manufacturers of Revolvers, who recently advanced their prices, state that it has not had the effect of reducing the volume of business. The advance amounted to 15 cents a piece on Double Action and 25 cents on Automatic Revolvers of the competitive grade, which may now be quoted in a general way on a base of $2 and $3.75, respectively.

C. A. PECK HARDWARE CO.: C. A. Peck Hardware Co., Berlin, Wis., manufacturer of the Gem and Jewel Rural Mail Boxes, announces an advance of 50 cents per dozen on the Gem and 25 cents per dozen on the Jewel line. Owing to the increased cost of sheet metal, the company makes this change rather than reduce the quality of its product. Prices on the company's Automatic Trucks and Gem Sliding Barn Door Latches remain the same.

STEWARD & ROMAINE MFG. CO.: Steward & Romaine Mfg. Co., Philadelphia, Pa., manufacturers of Expansion and Toggle Bolts, announces that on January 15 prices were advanced 5 per cent. on its entire line.

BRASS COCKS: The market on Hardware grades may be represented in a general way by discounts of from 60 and 10 to 65 per cent., and on Compression Bibs, 55 and 10 to 60 per cent.

JACK AND SAFETY CHAIN: The market on Jack and Safety Chain may now be represented by the following discounts: Iron Jack Chain, 60 and 10 per cent.; Brass Jack Chain, 50 and 10 per cent.; Safety Chain, 60 and 10 per cent. Beyond these figures there are the usual concessions to the jobbing trade and on quantity orders.

IRON PLANES: A revision in list prices on many numbers of Iron Block Planes has been made by concerted action of Sargent & Co., Union Mfg. Co., and Ohio Tool Co. The changes represent advances of from 10 to 20 cents per Plane. The discounts of these manufacturers remain the same.

SCREWS: At a meeting of the manufacturers of Screws, held in New York City recently, the whole line of Screws was advanced in price 5 per cent. The regularly printed discounts on Flat Head Iron and Flat Head Brass Screws are now 87½ and 5 and 82½ and 5 per cent., respectively, instead of 87½ and 10 and 82½ and 10 per cent., as heretofore, subject to the usual extras.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	13 to 13½
B Quality Manila	12 to 12½
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8½ to 8¾
No. 1 Jute, ¼ and larger	9
No. 2 Jute, ¼ and larger	8½

Less ¼ cent to the large trade.

LINSEED OIL: The following prices are quoted on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.

Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.

Calcutta Oil.....70 cents per gallon.

SAVAGE ARMS COMPANY.

Sportsmen who prefer an open sight will be glad to learn that the Savage Arms Company of Utica, N. Y., are now in a position to furnish their Model 1904 Junior Rifle with an open rear sight specially designed by them in place of the regular peep, if so desired. Owing to the many inquiries received for a sight of this nature the above company took steps to meet the demand, as it is their policy to do everything in their power to meet the wishes of their patrons.

MANUFACTURED — BY — **NICHOLSON FILE CO., - Providence, R. I.**

THE CLEVELAND TRADE.

We are approaching a condition when a danger signal may be needed. Present conditions tend to produce a panic. The tendency to flock together in times of prosperity and adversity prevent sagacity to discern causes, but effect still follows cause and we must pay the penalty for indifference to history. The continued advance in prices is encouraging liberal buying and some, perhaps many, are buying too freely. But now is a good time to dispose of them before they are cheaper. Manufactured goods will be higher unless material declines, which is not probable in the first half of the year. The advance in pig iron has been fifty per cent more than on bars, nails, wire, etc., and the demand for that is unabated. Yet a change may come suddenly and surprise us. And it is the part of wisdom to avoid such surprises.

Caution in purchasing more goods than can be paid for will do much to prevent a panic, and forbid its being a disaster if it comes. We can do much to suppress the boom spirit by careful buying, close collecting and prompt paying, and none of these can be safely neglected if we wish our influence to be on the conservative side. No alarm is necessary but preparation for a change is wise. Business will be good with plenty of opportunity to adjust matters if only one can escape from the optimism that prosperity creates. The talk of business being injured by the clamor against corporation reminds one of the escaping pickpocket, crying "thief" to aid himself in escaping. The protest that has been so long smothered against the lawlessness of corporations having found a voice, hope is revived that government is to resume its mission of governing for the people. Patriotism had seemed in danger of being submerged by anarchy. Many were losing faith in ability of the government to control them. The vast amount of money used in elections enabled the large corporations to keep special representatives in Congress, furnish lobbyists and endow attorneys so that despair was dispelling hope, until a voice was heard that revived it. Then the "danger to business" cry was heard. Danger to the kind of business they were doing, yes. No legitimate business is endangered by justice. As one extreme is likely to follow another, the illegal and unjust action long endured begot a spirit of revenge, but when it is fully realized that the government can and will compel corporations to obey the law, joy will modify that spirit. It is not the stockholders who are responsible for the prejudice against corporations. It is the manipulatins of the officers. An inside history of official maladmnistration in overcapitalization and speculation would astonish stockholders and public alike, and the government could do no greater service than to investigate the actual investments to furnish a basis for rate making by the railroad commissioners and to meet the cry of confiscation which is sure to be made.

THE LOCKWOOD-TAYLOR HARDWARE CO.
C. B. LOCKWOOD, *President.*

THE PITTSBURGH TRADE.

January proved to be a better month in the way of sales than the same month of 1906.

Advance shipment of Spring goods, however, form quite a large part of the total, but as this is the same every year the comparison is a fair one.

Manufacturing interests have their order-books filled for their capacity during most of the year. Coke making is expanding; each month new companies starting up and building thousands of new ovens. The railroad demand for cars and rails is beyond the capacity of makers.

Under these conditions we can afford to look philosophically upon the decline in the stock market. Stock traders seem to have worked themselves into the opinion that government oversight will reduce earnings of railroads to a minimum, but the growth of business and equal treatment of all shippers is more likely to increase earnings.

We are still having advanced prices for Hardware quoted us, and it looks as though the limit has been reached in some items. Copper and wood goods have had greatest advance.

LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

Conditions have not changed materially in this section. We have been busy with our annual inventory the past month and are now busy shipping goods that were sold in the Fall. We find that we never had as many orders for Spring shipment in any former year. The slowness in deliveries last year admonished dealers to place their orders for Spring goods early. There is some complaint as to the volume of business with retail dealers. The weather has been anything but favorable for Winter goods. Just at the time Winter goods should have been selling freely, the weather was warm and roads almost impassable. Farmers could not move timber or grain and the result was a dropping off in sales. This, of course, means some goods will be carried over to another season. It is hard to have things just to our liking always, but as a rule the final outcome is better than it would be had we had our own way. We have no reason for changing our opinion that trade will be good through the year. Farmers had good crops, got good prices and have good money. Think of one county in Ohio producing over one million dollars' worth of tobacco, and this same county (Darke) is one of the best corn-producing counties in the State. With every county in the State especially adapted to some product, why shouldn't Ohio be all right? The coming Ohio Hardware Convention will be the greatest in its history, if all signs do not fail, and as Columbus is the proper place, why should it not be?

THE SMITH BROS. HARDWARE CO.,
J. H. Smith.

THE SAN FRANCISCO TRADE.

In the issue of HARDWARE preceding this it was reported that the Hardware wholesalers and strong Hardware retailers of Spokane and the inland coast territory were buckling on their armor for a royal battle a day or two later when the Interstate Commerce Commission would there convene to know their demands and reasons therefor relating to readjustment of transcontinental freight rates so that the Spokane country will be on a parity with Portland and Puget Sound terminals. A vigorous fight was made and the Commerce Commission moved on 400 miles to hear what the Hardware jobbers and retailers and other interested merchants of Portland-Puget Sound terminals might have to say. When the commission made record of what they heard here, it moved again to San Francisco, where it now is hearing from the railroads, the trade, and other large shippers. From Spokane a couple of prominent merchants and Chamber of Commerce men accompanied the Interstate Commissioners to this city. One of these, H. B. Smith, very prominent as an inland coast territory Hardware jobber and shipper, was seen by the interviewer at his hotel yesterday, and said:

"All Spokane wants is a square deal. It has been fighting this thing for many years, but has not as yet gotten much of a result. Our merchants are paying freight to the coast, plus the local rate back to Spokane. Now there is absolutely no reason why they should not get the same, if not better, rates, since they are 400 miles nearer to the East. But they are not demanding the same tariff as the terminals. They are asking that they pay the regular coast rate plus one-fourth the local rate back. This arrangement would allow Portland and Seattle merchants to compete for the jobbing trade, with an advantage up to within 100 miles of our city, and would enable our jobbers to retain their own territory. There is no good reason, except an arbitrary arrangement by the railroad companies, why Spokane should not be a terminal point. There are five trunk lines running through the city—more than any other town on the coast, and about eighty trains a day, or as many as those to Portland and Seattle together. Of course, our demand is being bitterly fought, as our success would be a precedent for other inland points to follow. I am a bit doubtful whether any material benefit will be derived from the present investigation."

The excessively rainy weather of the last two weeks of January slacked store trade sufficient to enable Hardware dealers to complete stock taking, the resulting showing being that San Francisco's disaster year, 1906, was the most prosperous the trade ever experienced; in fact, something enormous, as no tradesman reports an increased business of less than from fifty to seventy-five per cent. as compared with that of a year ago. Since the city's paralytic stroke last April some Hardware firms report an increase of two hundred per cent. over the same period in 1905, but these are exceptions to the general rule.

Measures regulating peddlers and itinerant dealers, for which legislation will be sought from the incoming legislatures of Washington, Idaho and Oregon, were discussed at last week's second annual convention of the Inland Empire Implement and Hardware Dealers' Association which was in session January 16 and 17. E. E. Lucas of Davenport, Wash., president of the Association, presided, being supported by R. L. Spiker of Lewiston, Ida., and W. H. Urbahn of Spokane, vice-presidents, and J. A. Fridaker and E. W. Evenson of Spokane, treasurer-secretary. For diversion, drives, a theatre party and a reception and banquet were given the meeting's large attendance.

The Dunham, Carrigan & Hayden Co. are meeting with marked success in sales of the "Red Injun" Razor and the "Mars" Razor Strops they placed on the Coast market early last year. The razors are made of the best selected steel, perfectly ground and with round and square points, and the strops are made of especially-selected and tanned leather and are handsomely trimmed and finished.

Joost Bros.' Hardware Co. will furnish the new eighteen-story Humboldt Savings Bank Building with the Russwin Unit Locks and Door Checks.

The Putnam-McKnight Co. has purchased the Hardware and implement stocks of the Peacock Mill Co. at Milton, Ore.

The Montgomery Hardware Co., Oakland, succeeds the Montgomery-White Hardware Co. Mr. White has withdrawn from the firm.

January 15, the Sunnyside Hardware Co. was established at Sunnyvale, Cal., by Fournier Bros.

J. W. White, formerly with the Pacific Hardware & Steel Co., is now manager of the Hardware department of the Oakland Carriage & Implement Co.

INDUSTRIAL PRESS ASSOCIATION.

THE GRAPHITE TRADE.

Concerning the present condition of trade, there is nothing special to mention this month. The lines lie about the same as a month ago. We are oversold along all lines, and there seems to be no let-up in the steadiness with which new and increased orders are coming in.

JOSEPH DIXON CRUCIBLE CO.,
JOHN A. WALKER, *Vice-Pres.*

THE ADVERTISING CONTEST OF THE J. STEVENS ARMS & TOOL CO.

The J. Stevens Arms & Tool Co., Chicopee Falls, Mass., have advised us that the Prize Winning Advertising Contest which they inaugurated has been concluded, and the following are the names of the Hardwaremen who have been the successful competitors. The rules of the contest, it will be remembered, were such as to make it possible that the dealers who competed should send in as many specimens of Stevens Arms advertisements as they wished. This resulted in the same party or firm taking several of the prizes, making it quite an interesting contest.

Trade Meetings

OHIO HARDWARE ASSOCIATION.

Frank A. Bare, secretary, imparts the following:

The Hardware merchants of Ohio are showing unusual interest in our approaching meeting by sending to this office a large number of questions for the Question Box. We are to have with us National Secretary Corey and National President E. M. Bush. Nearly all the space in Memorial Hall has been taken. The indications now are that we shall have with us over a thousand Ohio retail Hardware merchants.

The secretary is receiving a large number of letters from Hardwaremen all over the State, expressing their approval of the exhibit feature, and saying they expect to take advantage of this opportunity to buy goods and add new lines. A theatre party is being arranged for Tuesday night. The entertainment in Board of Trade Auditorium on Wednesday night will be of a high order.

All the committees are working hard for the success of the coming meeting. Ohio expects to have the greatest convention in her history at Columbus, February 26, 27, and 28th.

NORTH DAKOTA RETAIL HARDWARE ASSN.

Several severe storms have prevailed during the past two weeks in North Dakota, and completely tied up the railroad traffic throughout the State, making travel dangerous and in some cases impossible, so that it has been deemed advisable to postpone the conventions of the Hardware, Implement and Furniture Dealers' Associations, which were scheduled to be held successively in the town of Minot February 4th to 6th. No dates have been as yet selected for the deferred meetings, but just as soon as the weather is such that it seems safe to name new dates, announcement will be made officially.

NEW YORK STATE RETAIL HARDWARE ASSOCIATION.

The following are among the speakers who will address the convention of the New York State Association: George H. Sargent, Sargent & Co., New York; W. P. Bogardus, ex-president of the National Retail Hardware Association, Mt. Vernon, Ohio; Giles H. Stillwell, president of the Syracuse Chamber of Commerce; W. P. Foster, president of the Rochester Commercial Travelers' Association, and L. B. Elliott, advertising agent, Rochester. The Question Box Committee, consisting of L. G. Matt cn, Newark; Irving Van Voorhis, Cobleskill and William Fowler, White Plains, wish to make the general discussion of trade matters as interesting and instructive as possible, and solicit suggestions as to topics from Hardware merchants generally throughout the State.

ILLINOIS RETAIL HARDWARE ASSOCIATION.

As announced in the formal programme of the convention, which is in contemplation, the Question Box discussion at the annual meeting of the Illinois Retail Hardware Association will be in charge of Charles H. Williams, of Streator, a former president of the Association. An interesting feature of the meeting will be an address by E. M. Bush, president of the National Retail Hardware Association. A well-written paper on the subject of Window Dressing is also expected from an expert in that line. The convention it is thought will be the largest and most interesting in the history of this Association, which now comprises a membership of over 1100. On Wednesday evening, February 13, the Chicago Retail Hardware Association will give a complimentary ball and reception to the delegates and exhibitors attending the convention.

PROGRAMME
of the Iowa Retail Hardware Association.

ALLEN-SPARKS GAS LIGHT CO., formerly of Grand Ledge, Mich., and now at 414-416 Michigan Avenue, East, Lansing, Mich., are sending to the trade a taking booklet on the subject of the Princess Lighting Systems. This is their Catalogue No. 20. This Lighting System produces a fixed gas, gives a perfect light, with no flickering or smoking. One feature of the system is that when it is shut down, the construction is such that the mantles consume all the gas in the pipes, instead of leaving it to condense. Full particulars as to cost of systems will be furnished on application. Every prospectus on lighting devotes a page or more to explanation as to the cheapness of operating. Look into them all. electric arc, electric incandescent and gas, with or without mantles, or any known form of light, figure them according to their own statements (they do not figure too high) or according to the conditions that exist where the light is to be used, as they vary all over the country, and then make your own comparisons of cost. Numerous testimonials are given from those using this system, and several illustrations of the interiors of stores, etc., where the company's product is installed.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

LIABILITY FOR BROKEN WINDOWS.

QUESTION: Four small boys about fourteen years old broke all the windows in the rear of a store with snowballs. Can their parents be made to pay and how much is each liable for?

REPLY: The parents of the boys cannot be made to pay. A parent is not responsible for the wrongful acts of his children unless done with his authority. The boys themselves are liable, however, for whatever damage they have done. If the boys joined in breaking windows, each one is responsible for the entire damage. The law does not attempt to apportion the liability between wrongdoers. If several persons unite to injure another's property, the person injured may sue one, any or all of them, and may recover and collect all the damages from any one.

NO LIABILITY FOR INJURIES PURELY ACCIDENTAL.

QUESTION: Two dogs belonging to A and B got into a fight A tried to separate them and began beating them with a stick. B was standing near by and A was engaged with the dogs. With his back turned to B he raised his stick over his shoulder to strike the dogs, and unintentionally struck B's eye. Is A liable for this injury?

REPLY: In our opinion he is not. If in the prosecution of a lawful act, a casualty purely accidental happens, no action can be supported for the injury. A's act in trying to part the fighting dogs, one of which was his own, was a lawful and proper act which he might do by proper and safe means. If in doing this, using due care to avoid injuring others, in raising the stick, he accidentally hit the plaintiff in the eye, this was the result of pure accident, for which he would not be legally responsible.

CONTRACT BINDING THOUGH LETTER OF ACCEPTANCE LOST.

QUESTION: A sends a letter to B offering to buy a hundred kegs of nails at $2 per keg f.o.b., place of shipment, asking him to answer by return mail. B answers accepting the order by return mail, but B's letter is lost in the mail and never reaches A. When the nails are shipped, A refuses to take them, because, not hearing from B, he has bought his supply elsewhere. Is he justified in doing this?

REPLY: He is not. A contract is made by offer and acceptance. An offer by mail authorizes an acceptance by mail. Just as soon as the letter of acceptance is mailed, so as to be out of control of the person accepting the offer, the contract is complete. It makes no difference that the letter of acceptance is lost or never reaches destination. The person making the offer takes the risk of that. As soon as the letter of acceptance is delivered to the post office the contract is as binding and complete as if the acceptor had put his letter into the hands of a messenger sent by the offerer as his agent to receive it. A contrary rule has been adopted in a few States, as in Massachusetts, but the rule we have stated is that supported by the great weight of English and American authority. It follows that there was a valid contract, and if A refuses to take the nails, B can sue him for damages.

◆

KLAUER MFG. CO., Dubuque, Iowa, have distributed an exhaustive catalogue of their line of Sheet Metal Goods, Tin Plate and Tinners' Supplies and Galvanized Sheets. The catalogue is so voluminous a one that adequate mention of the same cannot be found room for in these pages, but everything that can be mentioned in the above lines is contained in the contents, such as Elbows, Conductor Hooks, Pipe Hangers, Eaves Trough, Roof Gutters, Roof Crestings and Finials, Cornices, etc., etc.

OUR CANADIAN LETTER.

(Concluded from page 35.)

J. Lewis Brothers, Montreal, are making extensive alterations at their Toronto sample rooms. M. A. Adams, clerk for A. W. Moore, St. Catharines, and C. Overholt, of the Prince Hardware Company, Toronto, have joined the firm's Ontario staff.

A. A. Wilson, an old time Hardware merchant at Montreal, died on January 18.

Chas. Array, has resigned as traveling salesman for the United Factories, Toronto, to accept a position with J. J. Adams & Co., brush manufacturers, New York.

In the recent Board of Trade elections at Montreal, George Caverhill, of Caverhill, Learmont & Co., Hardware jobbers, was elected president; T. J. Drummond, of Drummond, McCall & Co., metal merchants, first vice-president; F. Robertson of James Robertson & Co., paint and plumbing manufacturers, second vice president; and J. S. N. Dougall, of McCaskill, Dougall & Co., varnish makers, member of Executive Board. The president of the Toronto Board of Trade, Peleg Howland, is also a Hardware jobber.

The Toronto & Belleville Rolling Mills at Belleville have commenced the manufacture of horse shoes.

The King Radiator Company is to be organized at Toronto with a capitalization of $250,000.

Geo. D. Wood, wholesale Hardware merchant, Winnipeg, is at Hot Springs, Arkansas, for his health.

The Jas. Walker Hardware Company of Montreal, have celebrated their 50th anniversary by adopting the profit-sharing system in the running of their business. There will not be any material difference in the business itself, with the exception that Messrs. Jas. and D. S. Walker will give over the management to F. Max Hill, who for several years was one of the managers of Weed & Co., of Buffalo, N. Y., and, previous to that, connected with the Yale & Towne Manufacturing Company, of New York City. Mr. Hill has the reputation of being one of the best posted Hardware men in the country, and the addition of his experience is counted on being quite a factor to the concern.

Amongst the Hardwaremen elected as mayors or aldermen in the recent municipal elections in Ontario were: Andrew Riddell, mayor, St. Catharines; J. H. Crow, mayor, Welland; J. T. Claret, mayor, Port Arthur; John Kelly, mayor, Oakville; G. A. Binns, alderman, Newmarket; J. J. Coffee, alderman, Barrie; T. M. Hodgson, Dominion Wire Company, Toronto, alderman, East Toronto; F. W. Moffatt, stove manufacturer, councillor, Weston; Samuel Steveley, alderman, London, and Wm. Scarlett, of Wortman & Ward, woodware manufacturers, alderman, London.

The incorporators of the recently organized Hanbury Hardware Company, Brandon, are: John Hanbury, J. Brown, E. Johnson, J. Caldwell, and A. E. Carmichael. The last named was with Marshall-Wells Company since their incorporation at Winnipeg and is now manager of the Hanbury Hardware Company. The new company will do wholesale business and have a modern warehouse almost ready for occupancy. The building has five stories, 80 by 100 feet, being on a spur track. They expect to be open for business March 1st.

HUMOROUS LOGIC.

A legal technicality is a means of evading justice. Why not do away with the legal technicality? What class does it protect?

George Shearer has engaged in the Hardware business in Mulberry, Ark. Shears will be a part of his stock in trade.

B. D. Wood & Sons have just been incorporated in New Orleans, La., to engage in the coal business What do you think of that combination?

John Pickerel has opened a meat market in Wauneta, Neb. Considering the name, it is natural to suppose that he will sell fish as well as meat.

Possibly it might do to change the name of the governor of Jamaica to Sweating Ham instead of Swettenham. There is nothing so fitting as an appropriate name.

The positive assurance of Mrs. Stuyvesant Fish that a woman can dress on $5,000 per year will be splendid news to many young men who are contemplating matrimony.

The only pension which should be acceptable to an American citizen is one given in consideration of risk to life and limb while engaged in active defense of the nation. Where do the school teachers line up with this bunch?

When school teachers begin to draw pensions, why not put all people who work for hire on the pension list? Where is there any argument which applies to the teacher which does not apply to all other workers?

Science is great. A scientist has at last come to the relief of the poor devil who has to live in a boarding house. He says that music gives one an appetite. The knowledge of this fact will insure the early closing of the boarding house piano.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Belleville, Ill.—Hucke Hardware Co. has been incorporated; capital stock, $30,000. Incorporators: Albert and Walter A. Hucke, and Philip Ros.

Bruning, Neb.—O. L. Van Buren has engaged in the Hardware business.

Canton, Ohio.—The W. A. Kennedy Hardware Co., of this city, has been incorporated for $100,000, by W. A. Kennedy, Harry S. Renkert, J. A. Kennedy, A. H. Elliott and J. G. Barbour. The new company will take over the W. A. Kennedy Hardware store at 227-231 North Market Street.

Cottonwood Falls, Idaho.—W. G. Brust has added a Hardware stock to his other lines.

Fort Smith, Ark.—The Yantis-Kinkead Hardware Company, with $15,000 capital stock, have filed articles. The incorporators are A. B. Yantis, B. W. Yantis, D. C. Kinkead and H. Strother.

Frankford, Pa.—The well-known Hardware firm of Kinkerter & Sheppard has been incorporated under the name of Kinkerter & Sheppard Company. The incorporators are Robert L. Sheppard, Josephine Kinkerter, William M. Jones and John M. Craig.

Hawley, Texas.—Hawley Hardware Co. has been incorporated with a capital stock of $120,000. The incorporators are: D. L. Wright, C. H. Day and Mat H. Glover.

Iron River, Wis.—The Farmers' Hardware Company has been incorporated; capital, $10,000. Incorporators: Ernest Sauve, Joseph Doucette and M. F. Doucette.

Janesville, Wis.—The Burdick-Murray Hardware Company has been incorporated; capital, $10,000. Incorporators, E. C. Burdick, G. L. Burdick and L. H. Murray.

Lebanon, Ore.—Walker & Green have engaged in the Hardware business.

Marinette, Wis.—Simcox-Gowen Hardware Co. has been incorporated; capital stock, $20,000. Incorporators: Bert C. Gowen, Martha E. Gowen.

Mercersburg, Pa.—C. E. Hoffeditz and J. F. Snyder have formed a partnership and will engage in the Hardware business and the handling of machinery and farming implements, on North Main Street.

Nampa, Idaho.—Lawson & Badger are opening a new Hardware store.

Oakman, Ala.—The Jackson Hardware Company has filed articles of incorporation. The new company, which is to conduct a mercantile business at Oakman, has a capital stock of $7,500. The incorporators are R. W. Jackson, E. A. Jackson and W. W. Earnest.

Pensacola, Fla.—Gibbs, Quigley & Morgan have incorporated for the sum of $20,000 and will begin business in the early part of next month with a full line of Hardware. The personnel of the new firm is Harry W. Gibbs, E. J. Quigley and Willie L. Morgan, Jr., all of whom are well and prominently known in Pensacola, and each one of whom will actively engage in the business.

Phillipsburg, N. J.—Jere Woodring Co. have incorporated to deal in heavy and shelf Hardware, railroad and mill supplies; capital, $100,000. Incorporators: J. Woodring, R. U. Marsh, Hazleton, Pa.; S. C. Smith, Phillipsburg.

San Antonio, Tex.—The San Antonio Hardware Co., with a capitalization of $150,000, has started business with temporary offices at the San Antonio Drug Co. As soon as the remodeling of the building will permit, they will occupy the stores known as 238-240 West Commerce Street, with its three floors and basement. The officers of the new concern are: S. L. Jeffers, president; J. A. Brownlee, vice-president; C. Ganahl Walker, secretary, and W. W. Sanger, treasurer. They will do a wholesale business only, and will carry a complete stock of shelf and heavy Hardware to supply the trade. The new establishment will give employment to about fifty people. They will also erect an immense warehouse on the tracks of one of the railroads leading into San Antonio.

Selma, Ala.—The Alabama Hardware Co. has been organized with a capital of $75,000. It has been formed by the firm of Carothers, Rogers & Fowlkes, incorporated, whose capital stock was $25,000.

South McAlester, I. T.—The Howard Hardware Co. has been incorporated with a capital stock of $25,000.

St. Paul, Neb.—Mathias Peterson has opened a new Hardware store.

Yacolt, Wash.—George Curtis has opened a new Hardware store.

Changes and Improvements.

Adams, Neb.—Damrow & Babb have sold their Hardware stock and building to H. J. Merrick, and have purchased the business of W. E. Hall & Co.

Adams, Neb.—Johnson & Booth have sold their Hardware and implement business to G. J. Klein.

Auburn, Wash.—Harper & Hooper have purchased the Hardware business of R. C. Kinleyside.

Beloit, Wis.—A. M. Andrae, of the Hardware firm of Watson & Andrae, East Grand Avenue, has sold his interests in the business to Fred Bittle, who has long been in the employ of the company.

Belpre, Kan.—Skalsky Bros. have purchased the Hardware business of Etling & Sprigg.

Bowling Green, Ohio.—J. J. Hopper of the Hopper Hardware Co., has sold his interest in the concern to his son Charles, and nephew, Herbert Clague. The new firm will retain the old firm name.

Bremerton, Wash.—B. F. Harrison has purchased the business of the Pickard Hardware Co.

Burwell, Neb.—The Burwell Hardware Co. has succeeded to the business of T. H. Doran.

Cambridge, Neb.—G. M. Evans has sold his Hardware store to J. H. Carroll.

Cambridge, Ohio.—M. W. Petty of Cumberland has purchased half interest in the Hardware store which has been conducted by J. E. Laughey for a number of years.

Cedar Rapids, Iowa.—Owing to the retirement of Mr. Boynton, the Gadd-Boynton Hardware Company will be changed to the George H. Gadd Hardware Company. Mr. Gadd president and treasurer and Stanley Novotny, secretary. The stock will be greatly increased and many changes made in the store.

Charlottesville, Va.—The Hardware establishment of W. T. Martin, which has been located in the Walters Building, 213 East Main Street, for the past twelve years, is now being moved into the large new building one door east from the old stand, the new location being 215 East Main Street. This building was recently erected by Mr. Martin for his special purpose. It is now being fitted with modern appliances for handling his large Hardware business.

Chincoteague, Va.—William N. Conant, of the firm of W. N. Conant & Son, has recently sold out his interest in the Hardware store to his sons, Henry and William.

Columbia City, Ind.—Daniel Tschantz, Daniel F. Sauer and Edward Berger, three successful farmers and business men of Jefferson township, have purchased the Edward Schoenauer Hardware and implement store at Laud and will continue the business under the firm name of Daniel Tschantz & Co. The inventory of the large stock of the Schoenauer store will be completed within a few days and the new owners will take possession at once.

Crawfordsville, Ind.—T. J. Houlahan has sold his Hardware store to William G. Moon of Hillsboro.

Davenport, Iowa.—Gerken Bros. & Co., of ths city, have bought the Refslange-Noble Hardware store of Cedar Falls. The new firm will take possession as soon as an account of stock is taken.

Deer Creek, Ill.—H. C. O'Brien & Co. have sold their Hardware and implement business to Mr. Hexamer of Secor, who will take possession about March 1.

Eddy, Texas.—Beard & Webb have succeeded to the Hardware business of C. B. Webb.

Edgar, Neb.—The Stoddard Hardware Co. has sold its business to the Richards Hardware Co.

Effingham, Kan.—A. E. Mayhew has sold his Hardware store to F. W. Swaler.

Falls City, Ore.—J. P. Gilbert & Co. have sold their Hardware business to J. C. Talbot.

Findlay, Ohio.—The Hardware firm of Thomas & Thomas from now on will be known as the Buckeye Hardware Co. Recently Frank Lake and Marion Vaughan purchased an interest in the firm, and has gave rise to the new name. The old firm consisted of A. S. Thomas and David Thomas. The members of the new firm are A. S. Thomas, David Thomas, Frank A. Lake and Marion Vaughan.

Garrison, Iowa.—The Hardware firm of Hart & Haines have traded their stock for Texas land.

Hamilton, Ont.—The Hardware business formerly carried on by the F. Hamilton Co., Limited, will cease to be known by that name. The change which brought P. H. Alexander in possession took place about six months ago. The new name is the Alexander Hardware Company, Limited. The new company intends to carry on a strictly up-to-date Hardware business on broader lines than formerly.

Buffalo, N. Y.—A certificate of incorporation for the B. T. Couch Glue Co. has been filed. The capital stock is $50,000. The directors are Bayard T. Couch, Stephen B. Couch and Lydia J. Couch.

Buffalo, N. Y.—Lyman Mfg. Co. has been incorporated to manufacture metal specialties and devices; capital, $50,000. Incorporators: Richard B. Lyman, Vreeland B. Lyman, John D. Squiers, Buffalo.

Camden, N. J.—Mount Pleasant Stamping & Mfg. Co. has been incorporated to manufacture window fixtures and devices; capital, $75,000. Incorporators: A. D. Miller, H. McWhitner, T. McCormick, Camden.

Chattanooga, Tenn.—The S. D. Chambers Mfg. Co. have applied for a charter, the incorporators being S. D. Chambers, W. W. Daniels, James Abraham, J. N. Shopley and G. W. Burchfield. The company will engage in the manufacture of agricultural implements and machinery, and will organize and commence operations as soon as the charter is received.

Chicago, Ill.—Fireless Cooker Range Co. has been incorporated; capital stock, $15,000. Incorporators, Alfred W. Bays, Frank M. South and L. J. Pomeroy.

Detroit, Mich.—Robertson & Wilson Scale and Supply Co. have, with a capital stock of $2,000, filed articles of association. The stockholders are Donald Robertson, Thomas L. Wilson, James Swan.

Elkhart, Ind.—The Fountaine Gas Steam Radiator Attachment Co., incorporated for $30,000, has filed articles of incorporation. O. C. Vernon, Robert H. Hotchkin, Dana H. Hotchkin, Charles W. Pitt, Thomas A. Fountaine and Max Bass, are the directors.

Ellisville, Miss.—Bradshaw & Whitehurst have started the operation of their plant for making a particular plow and harrow on which they have patents. They have a very substantial plant.

Lancaster, Pa.—The charter of the J. Walter Miller Company has been received. The purpose of the company is to manufacture castings, locks, Hardware and ornamental goods, the plating of metal articles, etc. The capital stock is $50,000.

Memphis, Tenn.—Application for a charter for the Hartzell Handle Company has been filed. The capital stock is placed at $10,000. The incorporators are Irvin Hartzell, B. W. Mann, J. W. Canada, L. B. McFarland and A. L. Foster.

New York, N. Y.—Kalla Mfg. Co. has been incorporated to manufacture tools; capital, $50,000. Directors: Alexander Kalla, 187 East Seventh Street; Joseph Cibular, O. J. Hackett, New York.

New York, N. Y.—Wolfe Rolling Grille and Burglar Proofing Co. has been incorporated for the purpose of manufacturing window grating, door and window fasteners, etc.; Hardware; capital, $20,000. Incorporators: C. L. Wolfe, Brooklyn; E. L. Crandall, A. T. S. Williams, J. E. O'Brien, E. L. Abbett, New York City.

Niagara Falls, N. Y.—J. Pleyter, of Boston, has acquired, on behalf of the Canada Steel Nut & Bolt Company, the building and plot of ground formerly occupied by the Gerner Ice Cream Freezer Mfg. Co. at the North End. The company will, as soon as practicable, begin the manufacture of steel nuts and bolts, employing nearly 100 men. The Ramapo's old plant across the river has also been acquired by the same company. The local plant is situated near Sugar Street and the Lockport Road in proximity to the New York Central tracks.

Rockford, Ill.—Automatic Water Heater Co. has been incorporated; capital, $10,000; manufacturing Hardware specialties. Incorporators: Thomas Pitcher, Richard F. Locke and Ernest C. Stokburger.

Rockford, Ill.—Rockford Lathe & Tool Company has been incorporated; capital, $2,500; manufacturing. Incorporators: C. Strickland, J. B. Whitehead and F. A. Carpenter.

Sorel, Quebec.—The St. Lawrence Saw & Steel Works Co., Ltd., has been incorporated with $40,000 capital by C. D. Pontbriand, Joseph Pontbriand, Henri M. Pontbriand, Francois D. Pontbriand and Tolentin D. Pontbriand.

Syracuse, N. Y.—The O. K. Fastener Co. has been organized to manufacture metal articles. The capital stock is $125,000, and the incorporators are Emil Laass, John Laass and B. B. Aylesworth, all of the above address.

Youngstown, Ohio.—The Ohio File Renewing Co., a subsidiary corporation of the American File Renewing Co., New York, has been formed and a branch plant will soon be established at Youngstown. Claude Calvin, formerly connected with the First National Bank, of the latter city, will be general manager, secretary and treasurer of the company.

Changes and Improvements.

Allentown, Pa.—The officials of the American Steel & Wire Co. are erecting a club house at their Allentown works. The first floor will be used for a laboratory, while the upstairs will have meeting and dining rooms for the mill foremen, where conferences between all departments of the mill may be held during the dinner hour to discuss improvements in the plant.

Carnegie, Pa.—The H. Adler Co. is about to build an addition to its plant, including a stove mounting room 50 by 200 feet, and press room 50 by 175 feet, of brick and concrete construction. The company manufactures gas stoves, ranges, etc.

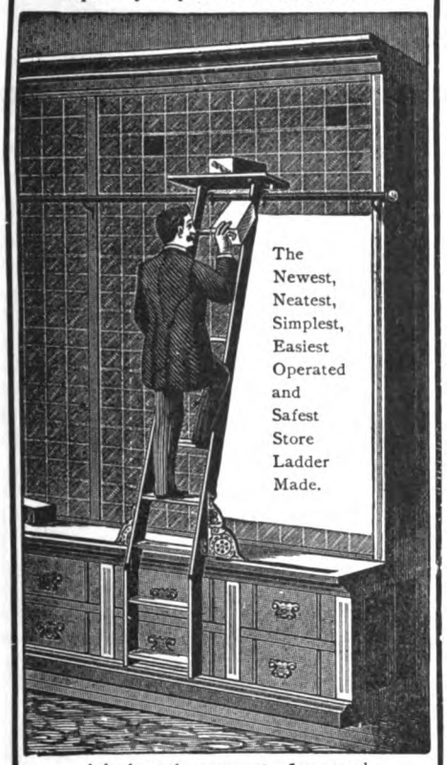
Carrollton, Mo.—The Horizontal Swing Co. has been re-organized and new directors elected as follows: J. R. Robertson, J. N. Tuley, E. R. Forlet, Bedford Hudson, Thomas Archibald, Charles Wright and W. T. Plumb. These directors elected the following officers: J. N. Tuley, president; Thomas Archibald, vice-president; E. R. Forlet, secretary; Bedford Hudson, treasurer; W. T. Plumb, manager.

Chicago, Ill.—The Independent Pneumatic Co. has purchased a large four-story brick building adjoining its plant at Aurora, Ill., which will give it approximately 100,000 square feet of additional floor space. The company states that it expects to install in the new building at the earliest possible date about $65,000 worth of new machinery which will double its capacity.

Chicago, Ill.—The International Harvester Co. has broken ground for the erection of a new blast furnace of 400 tons daily capacity at its South Chicago plant.

Cleveland, Ohio.—The Cleveland Hardware Co. has just put in operation its plant No. 2 at East Fifty-third Street and Hamilton Avenue, which it was compelled to erect on account of its rapidly expanding business. The new plant consists of a forge building 120 by 260 feet in addition to a power house, and is located upon a site of twenty acres, which will be built up as the trade demands. The main plant of the company at Forty-fifth Street and Lake Side Avenue has been so enlarged as to entirely fill the company's grounds at that point, necessitating the purchase of the additional site.

Detroit, Mich.—The Detroit Register Co., whose entire plant, 200 by 700 feet, was completely destroyed by fire a few days ago, will rebuild at once and will be in the market for considerable new machinery.



Greencastle, Ind.—The Western Tin Plate & Sheet Co. is preparing plans for extensive improvements to its plant, which will include a scrap furnace and bar mill and galvanizing plant. The work on these new departments will be under way within a few weeks, and it is reported that between $50,000 and $60,000 will be expended in the extensions contemplated.

Greenfield, Mass.—The Goodell-Pratt Co., manufacturers of machinists' tools, will further enlarge its plant in the early Spring. A foundry building 121 by 75, part one-story, and part two-story, will be erected. There will also be two large additions to present buildings, toward the north, both three stories. One of these additions will be 40 by 38, while the other will be 22 by 53. Cement and brick will be used. The large storehouse across the street from the present shop, commenced last Fall, will be completed about the first of next April.

Jamestown, N. Y.—A new plant will be erected by the American Metal Door Co., which has been incorporated with a capital of $100,000. Nels Sjohrings and others are interested.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Lawrence, Mass.—Fish Line Clip Co. has been incorporated to manufacture fishing tackle, etc.; capital, $5,000. President, E. W. Hildreth, Melrose; treasurer, P. R. Clay, Lawrence.

Towson, Md.—The Dean-Rullman Co. has been incorporated by George R. Dean, Elmer E. Rullman, William J. Newman, August H. Rullman and Stanley Rullman. It is formed for the purpose of dealing in bicycles, graphophones, incandescent gas light supplies and general merchandise. The office is to be at Highlandtown. The capital stock is fixed at $1,000.

Utica, N. Y.—The Mott Wheel Works has been incorporated to manufacture bicycles, carriages, etc.; capital, $25,000. Incorporators: C. S. Mott, William G. Doolittle, C. W. Mott, A. E. Swartout, F. H. Doolittle, Utica.

Changes and Improvements.

Catskill, N. Y.—Theodore Wynkoop, who has bought out the Sportsmen's Emporium and Bicycle Inn of Nelson Mattice, writes that he will be glad to receive manufacturers' and jobbers' catalogues of guns, sporting goods, etc. He carries a stock consisting of bicycles, fishing tackle, guns, ammunition and other lines of outdoor sporting goods.

Gloversville, N. Y.—To meet the demands of its rapidly increasing business, the Consolidated Sporting Goods Company is to make a large addition to its present factory on Bleecker Street. The company makes a specialty of baseball catchers' gloves and when the enlargement of the plant has been erected the daily output will be increased from 50 to 150 dozens of gloves per day. The present working force of thirty is also to be increased. John A. Beach is manager of the local branch.

Indianapolis, Ind.—C. H. Semple, secretary of the G & J Tire Co., has resigned that office, and his resignation has been reluctantly accepted. He has become president of a new automobile tire company which just has been organized in New Jersey. His successor has not yet been chosen. At the same meeting at which Mr. Semple's resignation was accepted, H. O. Smith also retired as a director of the G & J Tire Co., of which he once was president.

Philadelphia, Pa.—In order to meet the demands of a rapidly growing business and having outgrown their old location, the A. H. Fox Gun Company, Wayne and Bristol Streets, Philadelphia, Pa., makers of "The Finest Gun in the World," have been compelled to find a larger factory. Some weeks ago they purchased the complete plant of the Philadelphia Arms Co., said to be one of the finest and best equipped gun factories in the United States. With these additional facilities the company will now be able to manufacture the Ansley H. Fox gun in sufficient quantities to fill their orders promptly.

Embarrassments.

Dunkirk, N. Y.—Stephen R. Cale, a bicycle dealer, has filed a petition in bankruptcy. His debts are $3,081.02; assets, $1,707.37.

Greystone, Conn.—Augustus I. Goodrich, of Waterbury, has been appointed as temporary receiver of the Greystone Mfg. Co., which makes wire chains and light Hardware. It is expected that the property will be sold and the affairs of the corporation wound up. A new company may be organized to take over and continue the business.

Fires.

Passaic, N. J.—Fire caused $300 damage in the bicycle shop occupied by Harry Mintz at 154 Passaic Street.

Miscellaneous.

At its annual meeting the Providence (R. I.) Motorcycle Club elected officers as follows: President, E. L. Buffington; vice-president, F. E. Domina; treasurer, B. A. Swenson; secretary, W. L. Medhurst; captain, J. L. Pickering; first lieutenant, James Nisbett; second lieutenant, D. V. Rieley.

❖

The Los Angeles Motorcycle Club has elected the following officers for the ensuing year: W. G. Collins, president; Edward Kehl, vice-president; G. J. Swinnerton, recording secretary; J. H. Shafer, financial secretary; F. B. Brunner, treasurer, and E. M. Clinton, director.

❖

These officials have been elected by the Detroit (Mich.) Wheelmen for the 1907 term: President, Robert L. Weyhing; first vice-president, Charles Schermerhorn; second vice-president, A. S. Burkart; secretary, M. A. Clark; treasurer, W. I. Lefler. Directors: W. I. Bristow, Irving Swan, H. B. Paige, Fred Richmond, J. W. Weitzel, Louis Schneider, William Steger, Dr. E. B. Smith, Charles Berdan and C. H. Lisch.

❖

GUN FIRM'S NEW DEPARTURE.

The Birmingham Small Arms Co., Birmingham, England, are making a new departure with regard to the direction of legal matters arising in the course of business. A special legal department has been established for the purpose of dealing efficiently and promptly with all questions of this kind, directing and supplying information to the various professional advisers of the company, and relieving department heads of matters in which legal difficulties are likely to arise.

❖

WANT BIDS ON SMALL ARMS.

Announcement is made in the Consular Trade Reports that the Government of Roumania has opened bids for 250,000 small arms. Address Inspectoratul Militar Scolar, Bucharest, Roumania.

Swanton, Vt.—At a meeting of the directors of the Robin Hood Ammunition Co., who were recently organized and incorporated to purchase the Robin Hood Powder Co., the following officers were elected: Edward C. Smith, president; E. H. Richardson, vice-president and secretary; C. E. Schoff, treasurer and general manager. The new organization has taken over the property of the old company and will continue the business as heretofore with more or less important increase of manufacturing facilities and extension of variety and amount of product to meet the requirements of a steadily growing trade.

MANUFACTURERS RECORD
(Continued.)

Changes.

Philadelphia, Pa.—The North Bros. Mfg. Co. will soon begin the construction of a one-story fireproof addition 9 by 50 feet, to its foundry.

Toronto, Ont.—Architect Mills has prepared plans for a big addition to the Canada Screw Works, which recently amalgamated with the Ontario Tack Company. The new building will be the size of the present premises.

Valley Falls, R. I.—The Standard Nut & Bolt Co. has awarded the contract for a new one-story factory building, 40 by 112 feet, with a wing, 40 by 72 feet.

Miscellaneous.

Bradford, Pa.—The Crandall Cutlery Co. has elected H. E. Crandall, president; S. A. Ansell, secretary, and George H. Mills, treasurer.

Canal Dover, Ohio.—At the annual meeting of the stockholders of the Ohio Shovel & Stamping Co., the firm was partially reorganized. The officers chosen are as follows: O. C. Eben, president and general manager; D. Defenbacher, vice-president and assistant manager; J. F. Defenbacher, secretary and treasurer.

Canandaigua, N. Y.—The Lisk Mfg. Co. contemplates in the near future to commence the erection of an immense new building to accommodate its growing business. The officers of the company, as re-elected at the annual meeting are: President, J. R. McLaughlin; vice-presidents, T. W. Martin and J. L. McLaughlin; secretary and treasurer, L. A. Parkhurst; Western manager, C. D. McLaughlin.

Columbus, Ohio.—At the annual meeting of the Columbus Wire & Iron Works, the old directors and officers were re-elected. The officers are: F. H. Howe, president, treasurer and manager, and H. B. Gatch, secretary. These, with J. J. Bennett and David S. Ireland, form the board of directors.

Crawfordsville, Ind.—The stockholders of the Crawfordsville Wire & Nail Co. have elected the following directors for the ensuing term: W. P. Herron, I. A. Detchon, H. H. Ristine, P. C. Sommerville, H. E. Greene, Benjamin Crane and C. D. Voris. The directors have elected officers as follows: President and treasurer, W. P. Herron; vice-president, I. A. Detchon; secretary and general manager, C. D. Voris.

Rochester, N. Y.—Frank Robinson was elected president and Arthur Adams, treasurer of the Rochester Varnish Company at the first directors' meeting held at the company's offices in the German Insurance Building.

AUTOMOBILE SUNDRIES RECORD.

AUTOMOBILE SUNDRIES.

The Manhattan Screw and Stamping Works, Seventh Avenue and Eleventh Street, New York, are the manufacturers of an increased line of Auto accessories of great utilty and of improved styles. We call attention to a few of them, showing the interest taken in this class of up-to-date goods by the Hardware trade, giving evidence of an increased demand on the part of the consumer of these superior appliances. They issue a new catalogue of Auto products for the season of 1907, from which we select the illustrations which we give in this editorial mention.

FIG. 1.

Fig. 1 is their Phoebus Model D, which is a mirror-back headlight without parabolens, having a 10½ inch front. This lamp is constructed to meet the existing demand for a headlight without parabolens. In appearance, construction and durability it is a fac-simile of Phoebus Lamp Model B, which is of heavy-gauge brass throughout, joined with massive hinges and catches.

FIG. 2.

Fig. 2 is their Phoebus Model L, which is a Limousine type square side oil lamp, 14 inches high, with side glass of either crystal, green or ruby. This type of oil lamp is meeting with marked approval by the buying public, and is equally adapted to all styles of cars, especially the Limousine type. It is made of heavy-gauge brass, of perfect workmanship, and gives a steady and smokeless light.

Fig. 3 is the Phoebus "Tattle-Tale" Lamp, which is of unique and striking design, practical and up-to-date in its application. As a tail lamp, it combines the three most desirable features, viz.: Ruby glass, which shows red light behind; side glass, which illuminates the number of the car, as this is required by law in almost all the States; and a light thrown forward to dashboard by means of a special mirror prism. This advantage enables the driver to see whether the light is burning without necessitating his getting off the car. The three features enumerated here fill a want in this direction. Every autoist has had more or less

FIG. 3.

FIG. 4.

experience with tail lamps, and can therefore readily appreciate the advantage of this new device. Another point to consider is the bottom of this lamp, which is so constructed that it will not allow an overflow of oil. The "Tattle-Tale" Lamp is claimed to outshine the ordinary tail lamp in design, durability, construction and intensity of rays. Mirrors are supplied with every lamp, the lamp being attached like ordinary tail lamps.

Fig. 4, Model 80, is an inexpensive yet very substantial and reliable generator. It is automatic in its action, and positively non-explosive. When the generator is in action, there is no communication of the gas with the water, so that none of the gas escapes, and therefore there is no waste. The light extinguishes as soon as the water is shut off, and whatever gas there is in the tank escapes instantaneously through an outlet provided for the purpose. It is made of heavy brass, highly polished, is six inches in diameter, and ten inches high. It is fitted with two-way cocks and brackets to attach to car. Each generator is thoroughly tested.

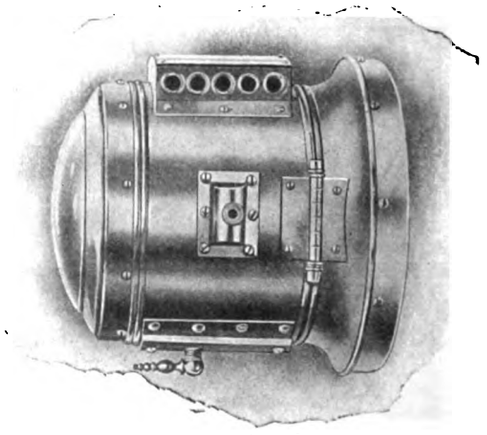

FIG. 5.

Fig. 5 is presented as one of their latest models of Flare Front Searchlights, the handsomest and most practical headlights. It has a short-focus optically-ground lens mirror, which gives the best result. The body is made of seamless heavy-gauge brass, the outer rims are reinforced by massive brass bands ⅛ inch thick, which strengthen the lamp materially. The burner has adjustable focus attachments, and is often found very convenient to set one lamp for short reach, to illuminate objects in the near proximity of the car, and the other set for long reach for distant objects. They use the famous Von Schwartz burner. The utmost care is taken in the construction of the lamp, all parts being substantially riveted and no solder whatever is used. The lamp is very highly-polished, and the interior painted a durable black.

STOVE MANUFACTURERS' RECORD

THE "OAK" DAMPER.

George H. Cole & Son, Troy, N. Y., are the manufacturers of the "Oak" Damper shown in the accompanying illustration.

It baffles and retards the combustion without danger of gas escaping from the stove, thus allowing the smoke and gases to become heated sufficiently to ignite, thereby producing a large amount of heat which, otherwise would pass through the smoke pipe and be wasted, hence a great fuel saver.

THE "OAK" DAMPER.

It is a positive safe-guard against "down draft."

It makes a direct draft stove equal to a base burner.

It is the easiest damper to put in the pipe.

It can be used where other dampers have been taken out without making new holes.

It is made in four sizes, 5, 6, 7 and 8 inch.

GIBLIN & COMPANY.

GIBLIN & COMPANY, Utica, N. Y. manufacturers of high grade heating apparatus, report for 1907 salesmen with territory as described:

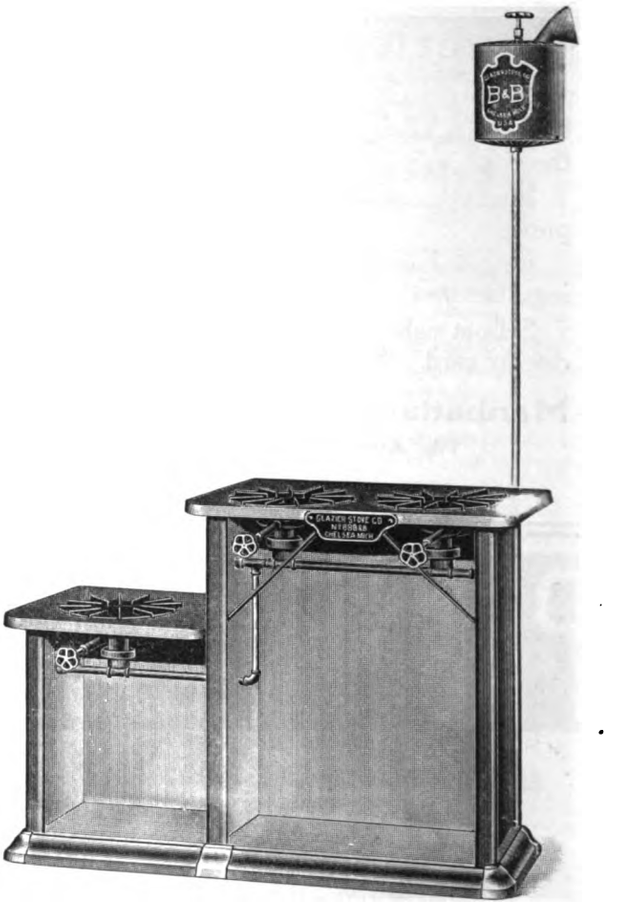
New York and Atlantic Coast States, John H. Winters; Central and Western New York and Northern Penna., Henry Cowles; Ohio, Michigan, Western Penna., Indiana, Eastern Illinois and Eastern Wisconsin, Geo. J. Giblin. Wisconsin, Illinois, Missouri and Iowa, T. A. Beal; Nebraska, Kansas, Western Iowa, F. G. Wells. General Sales Agent, F. L. Nesbit.

PIERCE, BUTLER & PIERCE MFG. CO.

The Annual Meeting of the stockholders of the Pierce, Butler & Pierce Mfg. Co., was held at their office at Syracuse, N. Y., on Feby. 4th., 1907, and the following Directors were elected. Wm. K. Pierce, Wm. R. Pierce, H. C. Pierce, Wm. M. Butler, Thos. Wheatley, and the following officers: Wm. K. Pierce, president and general manager; Thomas Wheatley, vice-president and treasurer; P. M. Beecher, secretary; F. W. Fix, Jr., assistant treasurer.

Wm. K. Pierce reported very satisfactory business and perfectly harmonious relations with labor in the various manufacturing departments of the Company.

Many new projects are in view for the further development of this business and the Company look forward to a most prosp rous year.



ROYAL MFG. CO.

Royal Manufacturing Co., Lancaster, Pa., manufacturers of Hand and Foot Power Grinders, etc., have issued a new catalogue, and say that

"In addition to our foreign agencies mentioned in the catalogue, we have established a selling agency at San Francisco, Cal., Messrs. S. L. Bigelow & Company being our representatives on the Pacific Coast. Our salesman for Illinois, Indiana, Michigan, Wisconsin, Iowa, Nebraska is Mr. J. C. Murfey of Chicago. For the New England States our salesman is Mr. J. Dean Wheeler of Keene,N. H. In the export line, besides the Foreign Agencies mntiond in our catalogue, the New York Export and Import Company represent us in the Orient, China, Japan and Philippine Islands, Australia, New Zealand, Strait Settlement, Java India, Persia, Siam."

"BRIGHTEST AND BEST" GASOLINE STOVES.

Glazier Stove Co., Chelsea, Mich., in calling attention to their "Brightest and Best" Gasoline Stoves, which we illustrate herewith, state as follows: "All gasoline burners except the B & B produce a single circle of blue flame, which spreads to the outside of the dish, leaving a cold centre. We alone have overcome this serious defect with a design which produces a second inner ring of flame. This burns a much larger quantity of gas than is possible in other burners, and gives on the bottom of the cooking utensil a solid mass of clean blue flame. The intense heat produced by this double flame is unequalled by any other

"BRIGHTEST AND BEST" GASOLINE STOVE.

gasoline burner. Do you wonder that we emphasize this great advantage? The numerous improvements which we have introduced on the B & B Stove make it for all practical purposes an independent gas plant. After the generating burner is started in the morning, it is in every way just as convenient and efficient as the finest gas range operated by city gas. The heating power of the burners is just as great. They can be lighted just as quickly, and in addition, our stove has a very decided advantage of being much more economically operated." The accompanying cut illustrates their line. This stands about the same height as a range, thus being very convenient to work over. In the accompanying cut the stove is shown with three burners, two located on the top and one on the step. The step burner is very convenient for heating boilers of water, etc. It is fitted with our low-down safety tank, which cannot be filled while the stove is lighted. The B & B Burner can be generated without a trace of smoke, which makes it exceedingly popular with housekeepers. This stove is finished in black enamel and aluminum bronze, with a beautiful nickel name-plate. It is strong enough to carry any load. All parts of the stove are very accurately machined with tools designed especially for this work.

STOVE RECORD, Continued on page 56.

The Barstow Stove Co., Providence, R. I., are the manufacturers of the line of Richmond Ranges to which we desire to call attention.

THE "RICHMOND" RANGE.

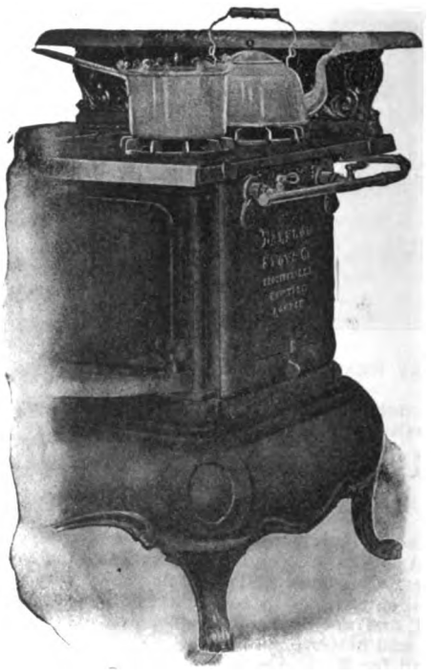
With high shelf—1905 style—the oven food rake extends across the oven bottom, and is operated by a nickel pull in front. With it the contents of the oven can be drawn forward without danger of scorching the hand. Each range is furnished with the "Richmond" heat indicator. Simple in construction, and always

WITH HIGH SHELF.

reliable. All the nickel parts lift off to clean or blacken the range. The nickel ornamentation is not as objectionable to the tidy housewife as when these parts were securely bolted on.

THE HIGH WARMING CLOSET,

with automatic Russia iron roll front, furnishes generous space for warming dishes, and is very desirable. The reservoir is large, and contains a heavy copper tank lined with pure tin. The tank is instantly removable for cleaning or repairing. The



WITH HIGH WARMING CLOSET.

20th century simmering or slow-cooking cover is a new feature that is appreciated. The ring-reducing cover is very convenient when it is desired to use small vessels over the fire. All Richmonds are furnished with the famous "Dighton Rock" linings, considered the best that can be produced.

Cast water fronts or brass coils can be furnished for either size, and ranges are equipped for burning coal or wood as desired. The triangular grate is sent in each range, unless the plain flat grate is specified, and either style is removable through the fire door opening without disturbing the brick, water front or other firebox parts.

THE GAS ATTACHMENT

is an ideal appliance for Summer cooking. This feature consists of two gas cooking lids that replace the ordinary covers on the back end of the range. They take up no extra room, are always ready for use, and perform all the lighter duties of a gas range, while the coal fire is at the same time doing the heavier work of baking and water heating. The attachment in no wise interferes with the coal fire, and is readily attached and detached when desired.

THE GAS ATTACHMENT FOR THE RICHMOND RANGE.

Our patent gas cooking lids are adapted to the "Richmond" when ordered, and the gas and coal fire can be used at the same time without the slightest danger. This is a great convenience in the Summer time, and especially during the night, when hot water is wanted quickly. A portable oven can be used in connection with the gas attachment.

UTICA HEATER CO.

Utica Heater Co., Utica, N. Y., have made a 1907 addition to the "Superior" line in their

NEW SUPERIOR FURNACE

with deep, Crescent-shaped steel radiator and double feed doors, 12½ by 14½ inch opening. Points of advantage: Heavy steel plate radiator. Immense combustion dome. Heavy two-piece fire-pot. Anti-Clinker revolving grate. Deep ash-pit.

THE 300 SERIES,

with deep, Crescent-shaped steel radiator, the latest addition to the Superior line, is the 300 series. This series of furnaces was specially designed to meet the demand for a strong, powerful, up-to-date heater, capable of burning either coal or wood, and sold at a moderate price. We believe they have succeeded in their efforts, as this line is meeting with a ready sale, and they are receiving letters of recommendation from customers in all parts of the country. The radiator is crescent, or horseshoe-shape, made of very heavy sheet steel, with triple heating surfaces. The joints are all riveted, same as in a steel boiler, and the radiator encloses an immense dome or combustion chamber. Both the dome and the radiator are very deep, affording exceptionally large heating surfaces. The ash pit is large and deep, and equipped with our anti-clinker duplex grate. The furnace when cased is especially low in height, making it very desirable for use in shallow cellars. This series can be supplied with single or double feed doors, the latter measuring 12½ by 14½ inches, inside opening. This furnace is especially adapted for purposes requiring a quick and powerful heater.

PROGRESSIVE DEALERS

Always handle the best — The "EXCELSIOR CARPET STRETCHER and TACK HAMMER COMBINED" satisfies the most exacting customer. Housekeepers instantly recognize its merits as a time, labor and temper saving device, making sales easy. Light, Strong, Easily Operated, folds compactly, each in a neat box with instructions and fully WARRANTED. Teeth will not tear carpet. Stretcher locks in any position and can be instantly released for new setting without bother of backing up Tooth Bar, as with some others, or re-adjusting in any way. Stretches 16 inches of carpet each time set, more than any other. A Tack Hammer is part of the machine and therefore always at hand. NOT SOLD TO CATALOG HOUSES, hence a PROFITABLE specialty for the Dealer. Ask your Jobber for the "EXCELSIOR" and accept no other "just as good".

What is Roofing Tin?---How is it Made?

As a Property Owner or Architect did you ever ask these questions and receive a satisfactory reply?

We know there are many men who would like some definite information along these lines, and have, therefore, compiled a book entitled "FROM UNDERFOOT TO OVERHEAD" which carefully describes the process of making Roofing Tin from start to finish. The information it contains is invaluable to you if you are interested in building, and we will promptly send you a copy if you will write for it and mention this publication.

By using any of the Brands shown below you can procure the very best protection from the elements. These stencils appear in the corner of the sheet, and you will notice the amount of coating carried per box of 20x28–112 sheets is clearly shown. This protects you from substitution—a point which we believe you will fully appreciate.

"Bristol" TRADE MARK

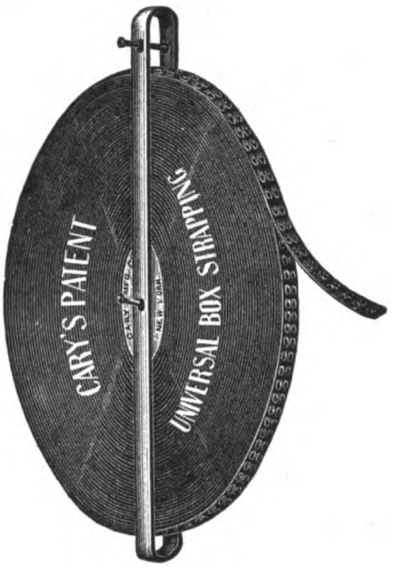
STEEL FISHING RODS

"WHAT LUCK?"

The fraternal cry of anglers. Luck should be good, for times are good, and more money will be spent over sport this year than ever before. Dealers had better lay in a full line of "BRISTOL" STEEL RODS now. Get ready! If any suggestions from us will help business--ask for them. Printed matter you can have, and welcome. Keep in mind that **WE** originated the Steel Rod, have manufactured it for nearly twenty years, and that

SUCH IS OUR FAITH

in it, that *we give the unprecedented guarantee, in time, of THREE YEARS,* from the date of a rod leaving our factory, against breakage from defect of material or workmanship. That is our "1907 good word to dealers." It should prove a strong selling card. Business was never better--nor the RODS. May your "LUCK" be good--*and* your order, for which we are waiting.



Look for our name and trade mark, "BRISTOL", on every reel seat. That stamps it genuine.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Quality Tells
When Henry Disston was asked the question:
"What do you put in your saws?"
He replied:
"Good steel and honest work."
UPON THIS FOUNDATION IS BUILT
DISSTON QUALITY
"If you want a saw it is best to get one with a name on it that has a reputation. A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."

A REMINDER

That our big advertising campaign on Pitkin's Barn Paint in the foremost Farm journals of this country is creating the greatest demand our dealers have ever known.

That it is very *profitable* for *you* to have a stock on hand and supply this demand.

That we will help you advertise locally in just as effective ways as our big general campaign.

That your orders and inquiries should be sent direct to our office as we discontinued distributing our goods through Hibbard, Spencer, Bartlett & Co. last year, finding that we could give our dealers very much better service and prices when dealing direct.

Write for our best prices and discounts on Barn Paint.

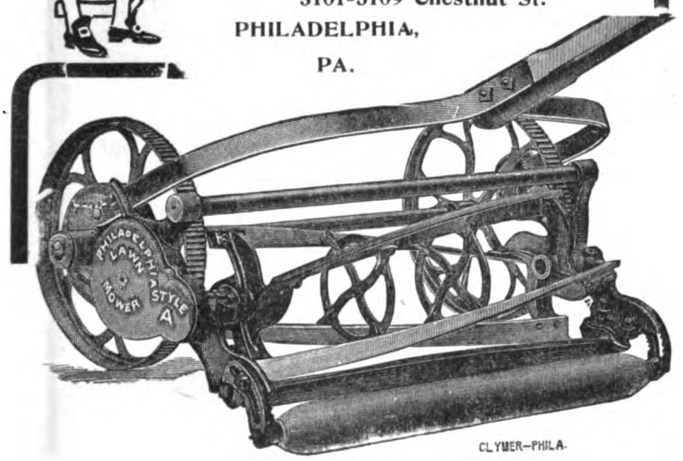
"A Look Behind The Scenes"

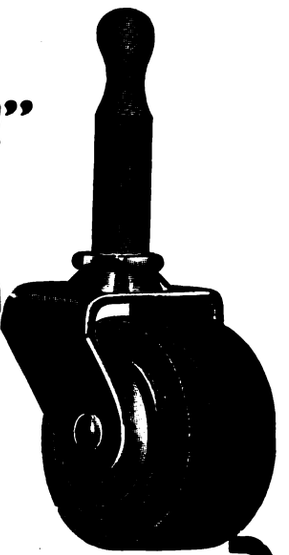
will prove to any dealer that

Genuine Philadelphia Lawn Mowers



have a knack of winning customers which is easily explained by their up-to-date excellence.

Philadelphia Mowers have led for 37 years They are still at the head of the procession.



Our 1907 Catalog

tells a convincing tale. It shows our complete line. Shall we send you a copy? Answer at once

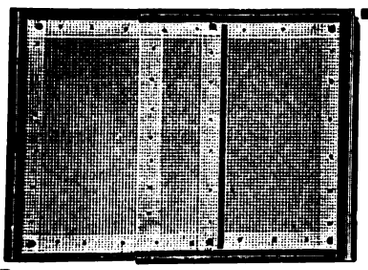
Philadelphia Lawn Mower Co.
3101-3109 Chestnut St.
PHILADELPHIA,
PA.

The "Faultless!" Why?

Because it is "the CASTER that never refuses to turn."

That's pretty near perfection, isn't it? Especially when we remember what we get with the ordinary kind.

It's all owing to our little patent pivot bearing socket. By the way, that same little socket won us the **Highest Award** at the World's Fair in St. Louis, in 1904.



Then notice the **Leather Wheels**, they give ease and steadiness in rolling and turning.

We make them with interchangeable sockets so they can be used on any kind of furniture.

If you want a seller, a money maker, carry the **"FAULTLESS"** line. Our illustrated catalogue will show you what we make.

PROGRESSIVE DEALERS

Always handle the best — The "EXCELSIOR CARPET STRETCHER and TACK HAMMER COMBINED" satisfies the most exacting customer. Housekeepers instantly recognize its merits as a time, labor and temper saving device, making sales easy. Light, Strong, Easily Operated, folds compactly, each in a neat box with instructions and fully WARRANTED. Teeth will not tear carpet. Stretcher locks in any position and can be instantly released for new setting without bother of backing up Tooth Bar, as with some others, or re-adjusting in any way. Stretches 16 inches of carpet each time set, more than any other. A Tack Hammer is part of the machine and therefore always at hand. NOT SOLD TO CATALOG HOUSES, hence a PROFITABLE specialty for the Dealer. Ask your Jobber for the "EXCELSIOR" and accept no other "just as good".

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

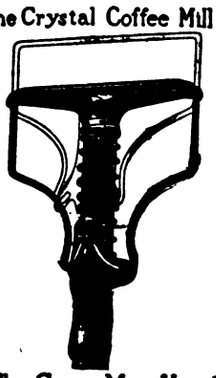
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 800 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

I HAVE NOTICED

By B. A. CHAMBEAU.

That the fellow who is always late in coming is usually the first one to go.

That the clock watcher gets let out first when trade gets a little slow.

That the clerk who passes things to his patrons makes friends for the store, while those that throw or tumble them out drive trade away.

That the clerk that always has the cash register in balance has a good friend in the head of the house.

That the well-kept want-book is found only in successful stores. The "just-out" fellow does not know its value. His customers do, however.

That the boss is proud of every clerk who helps him, and soon gets rid of those who don't.

That the clerk who talks with his customer, and not at him, always has a customer to talk with.

That the fellow who thinks he controls the trade soon finds out he can't even control himself.

That a polite "thank you" should complete every transaction. It satisfies the patron, and costs nothing.

That the man who never argues with a customer is the most successful.

That the clerk who always remembers that he represents the store to the customer is the one who always has a job.

That cheerfulness is catching, and that there is always room in the store for a smiling countenance.

That in successful stores the floor is not used as a waste-basket, nor the counter for a catch-all.

That it's a mighty good time to look pleasant when the patron comes in.

That the salesman who gets the customer's attention gives his.

That there is no substitute or anything else just as good as the truth.

That clean hands and clean linen make a favorable impression, while the other kind doesn't.

ACTUAL LOSS TO MICHIGAN STOVE COMPANY IS ABOUT $300,000.

There has been much speculation as to the actual loss of the Michigan Stove Co., Detroit, Mich., from the fire, and as to whether, in view of the conflagration, the company would not pass the dividends.

"The actual loss to the company as near as can be ascertained, over and above insurance, is between $250,000 and $300,000. It is likely to be nearer $300,000," said George H. Barbour last night when asked about the matter.

"No, sir!" he continued emphatically, "the company will not pass the dividends. They will be paid as usual."

These dividends are seven per cent. cumulative on $1,500,000 preferred and three per cent on $1,500,000 common, making annual disbursement to stockholders of $300,000.

MAN'S LIFE

is a "game" of cards. First it is "Cribbage," next he tries to "go it alone," at a sort of "cut," "shuffle" and "deal" pace. Then he "raises" the "deuce" when his mother "takes a hand" and contrary to "Hoyle" "beats" the "little joker" with her "five." Then with his "diamonds" he "wins" the "queen of hearts." Tired of playing a "lone" hand, he expresses a desire to "assist" his fair "partner," "throws out" his cards, and the clergyman takes a "ten" dollar bill out of his "on a pair." She "orders him up" to build the fires. Like a "knave," he joins the "clubs," where he often gets the "high," which is "low," too. If he keeps "straight," he is often "flush." He grows old and "sees" a "deal" of trouble, when at last he "shuffles" off his mortal coil and "passes in his checks," and is "raked in" by a "spade."—Life's fitful "game" is ended, and he waits the summons of Gabriel's "trump," which shall "order him up" or turn him down.—*Ex.*

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

RIGHT TO CHANGE GRADE OF LAWN.

QUESTION.—A owns a house and lawn in a village. His neighbor also has a lawn immediately adjoining. The neighbor decides to fill in and grade his lawn so as to raise it several feet. This will of course cause the surface water to drain upon A's lawn and injure the value of A's property. Has the neighbor any right to do this?

REPLY: According to the law of New York, Massachusetts, New Jersey, New Hampshire and most of our American States, a man has the right to change the grade of his premises and fill in his lawn, although the effect may be to cause surface water to drain upon the land of his neighbor. The rule is that surface water is a common enemy which every land owner may fight and get rid of as best he may. Of course he has no right to dig drains or ditches which empty upon his neighbor's land, but he has the right to change the grade of his own land, even though this may incidentally cause damage to his neighbor's property. In a few of the States, such as Illinois, California and Louisiana a contrary doctrine has been established. But the law of most of our States is as above stated.

BOND AND MORTGAGE IN NEW JERSEY.

QUESTION.—I owned a house and lot in the State of New Jersey. In 1897 I borrowed $2,000 on bond and mortgage giving the house as security. I afterwards sold the house for $3,000, subject to the mortgage. Afterwards the house was again sold, subject to the mortgage, for a price which I do not know. The interest on the mortgage has not been paid for nearly a year. The mortgagee is now threatening to sue me. Can he collect anything from me when I have sold the house and lot?

REPLY: Although you sold the mortgaged premises, you remained liable on the bond. But the New Jersey statute provides that the remedy against the land must first be exhausted before an action can be brought upon the bond. The mortgage must first be foreclosed. But if the land does not yield enough on foreclosure to satisfy the debt and interest, you can be held personally liable for the deficiency.

DUTY OF LAND OWNER TO LICENSEE.

QUESTION.—A man was building a house upon his land. A carpenter went there to see if he could get a job. One of the floors was only partly boarded over, and the carpenter accidentally fell through to the cellar, injuring himself severely. Can he make the owner of the house pay damages?

REPLY: We think not. The carpenter who went on the premises to look for work was not there by the invitation, express or implied, of the owner. At most he was there by the owner's mere sufferance or license. The owner of land in general may use it as he pleases and leave it in whatever condition he wishes. A licensee must take the premises as he finds them. So far as he is concerned, the owner's duties are simply to refrain from willful wrong, and perhaps from active negligence as well. The owner being under no duty to the person seeking for work to board up the openings in the floor, it follows that he is not liable for the injuries sustained.

✦

ATLAS SHEAR CO., Bridgeport, Conn., with Export Department at 7-9 Warren Street, New York, in charge of U. J. Ulery, have published their Catalogue No. 17 of "Atlas Brand" Shears and Scissors. Cast Shears and Scissors of every description for domestic and export trade will be found illustrated and described, such as Straight and Bent Trimmers, German, Red Star, Royal Blue, Clyde and Magic Pattern Shears; Barbers', Bankers' and Paper-Hangers' Shears; Ladies' Embroidery and Button-Hole Scissors; Pocket, School and Kindergarten Scissors; Tinners' Snips, etc. Assortments mounted on cards are also shown, as well as some examples of their new plate etchings. The catalogue will be sent upon application.

FEBRUARY 25, 1907

Editorial Trade Review

Various reasons combine to prevent February sales of Hardware from being so far in advance of conditions prevailing a year ago as those of January were, and yet they hold their own pretty well. Last year almost everything in the way of Builders' Hardware swelled the sales, more particularly on account of the Winter being so open, and the opportunities for pressing forward the construction of buildings were susceptible of the greatest development. This year the changes in the weather were more radical, and compulsory inactivity was more noticeable. Then again, prices are more uniformly firm, and the jobbers who had large stocks have already given the retailer the benefit of the sagacious purchases, their fortunate contracts, and are beginning to look for the reward, and gradually advancing their prices; with the view as much as anything, of forcing the retailer to do something of the kind himself. The jobbers have no price understanding beyond the display of business acumen and common-sense conditions, and cannot continue this philanthropic procedure when many goods command a premium because of their actual scarcity.

Spring trade is opening up well and safely; so far developing no pessimism to succeed the sanguine, optimistic views regarding trade, with which the year opened. Manufacturers are holding prices firmly, even where they are not sold largely ahead. There are no doubts of the unexampled prosperity of the future; contentment reigns supreme, and the future is full of promise. There are no radical changes affecting general lines, and the recession in price noted in the pig-iron market cannot be repeated in the prices of goods, unless long continued; but it may have a tendency to make some lines of specialties not already moved along the lines of activity, pause on the threshold, realizing that an advance would be difficult to retain in the face of a selling market. Cut Nails are in strong demand, and the feeling that they can hold the price and even command a premium for prompt delivery at times, will sustain the entire market, and brace up effectually any doubting Thomas who is looking for trouble.

The advances that have already occurred on so many lines of goods seem only to stimulate orders for the future, both for immediate and for stipulated deliveries. The Southern houses have actually initiated night-work already, to keep the dealers supplied with the goods they need. In the country, stocks are not abundantly large, and the active movement noticeable among retail houses arises as much from that fact as anything else. Many goods are as scarce as one could realize, and cannot be had even at a premium; and under the circumstances, taking this state of affairs into consideration, the jobbers take advantage of this situation and hold firm at the latest prices. If any favors are extended to the progressive trade that are most urgent in their demands, it is to those houses who are the most responsive to the consideration that money talks. The manufacturers depend upon prompt payments from jobbing customers, who are in the habit of having large bills fall due almost daily; so that it behooves the retailer to pay promptly at terms given, and establish a record for prompt payment which in times of stress can be relied on, meeting demands which it would be unwise to neglect, even taking goods at a slight advance over the mill price, if the stock is uncomfortably short.

Our pages are full of the proceedings of the State Associations that are holding their stated conventions, where the business methods are extolled by the members, who are proud of the records they daily make, seeking by every legitimate means to grease the wheels of general traffic, and make possible a greater harmony in the business transacted "between ourselves and the other man" in the field. This does a good deal toward knocking the selfishness out of daily transactions, and enables all the dealers to make a fair profit. These Associations are increasing in their number of delegates, although in each State there are enough dealers who fail to take advantage of their opportunities, thinking they are masters of the home situation and need no assistance. They can learn from convention proceedings how the elements of a continued success have been coralled by a broad-gauged policy of a "live and let live" course of proceedings do most of the work; and one's worst competitor be found his best friend, a course in which cut prices without any profit need not prevail, but each man shall reap the emolument he deserves from his personal efforts to accomplish results.

A JEST.

Numerous stories are always in demand but there may come a time when they are dangerous to toy with. Jest or humorous situation told against some customer may, in the beginning, be mirth-provoking enough without offense; by the time it goes the rounds of a neighborhood back to its victim it is so altered in its import as to arouse the liveliest anger against the dealer who set it going.

Even though the victim's name is suppressed the sting has not been removed; indeed, in many instances, the danger is actually increased. Some one to whom the story goes may set his wits to work and supply the name of some one he believes the story refers to and then hand it along with the addition as "told him by the Hardware dealer." However innocent the joke, the man whose name is wrongly coupled with it is at once indignant at the falsehood, which he brands as such without hesitation.

Old newspapermen, who are supposed to be out for the express purpose of finding out and publishing things about people, agree that the things they suppress always exceed in quantity and sometimes in lively interest the things that they give out for publication. If every Hardware dealer would adopt a similar rule and keep upon himself the jest or accident, however laughable, that might, in an altered form appear offensive to some customer, it might in the course of a year save quite a number of his otherwise lost sales.

NEBRASKA RETAIL HARDWARE ASSOCIATION

The Sixth Annual Convention of the Nebraska Retail Hardware Association was held at the Auditorium, Omaha, on Tuesday to Thursday, February 5, 6 and 7.

TUESDAY AFTERNOON SESSION.

The meeting was called to order by Nathan Roberts, of Omaha, president of the Association.

Mayor J. C. Dahlman delivered an Address of Welcome, which was ably responded to by Max Uhlig of Holdrege.

President Roberts then delivered his annual address.

ANNUAL ADDRESS OF PRESIDENT ROBERTS.

Brother Hardwaremen of Nebraska:

I greet you and extend to you the right hand of fellowship bidding you welcome to this our sixth annual conference.

Another year has been relegated to the past. A year of business experience, rich in all that goes to make a successful life and business career. We have all enjoyed many blessings, foremost of which are health, happiness and prosperity, and so far as I know none of our members have passed to "that bourne from whence no traveler returns." We would not forget at this time to render thanks with grateful hearts to the Giver of all good.

FRANK HACKER, PRESIDENT.

The past year has left its lessons for us to learn and profit by. We have all made mistakes in our business affairs; mistakes which might have proven disastrous have been tempered by the conditions surrounding us on every hand. The man of true business ability will profit by these experiences and when the times of adversity in the cycle of things shall arrive, as they surely will, he will be prepared through these very experiences to guide his ship into less turbulent waters.

We meet this year under favorable circumstances. Our membership, although conditions were unfavorable, shows a wholesome increase, something over fifty per cent., and before this session is closed we will have reached an enrollment of double that a year ago, for which we are largely indebted to the rustling ability of Secretary J. Frank Barr.

You will remember that Mr. Barr resigned from the office of secretary at the beginning of this last year. His resignation compelled us to break in a new man. Mr. Smith proved a worthy successor in so far as the routine of the office work was concerned, but it being an entirely new field of operation for him he had all of Mr. Barr's experience in the work to gain. Seven months had passed and results were not apparent. In August we learned that Mr. Barr could be induced to again take hold of the work. We lost no time in availing ourselves of his services. We may safely say, without any disparagement to Mr. Smith's efforts, that the gain in our membership is largely due to Secretary Barr's work in the past five months. What the results would have been in twelve months' work goes without saying.

We are proud to present to you in this building an exhibition of many lines handled by us, which we think is second to no other exhibition in the United States, considering it is our first experience in this line and that we had it all to learn and unlearn. Permit me at this time to urge upon everyone that we give it the place in our convention which will result in the greatest good to the members and exhibitors. To accomplish this much-sought-for object there is a rule we must adopt which will safely carry with it that result; namely, let every member be in his seat ready for business at the hour scheduled; then avoid all dilatory measures, pushing our business through in the best manner and the shortest possible time, giving the exhibitors our attention in the interim of our sessions. One thing at a time, done well, will net us the largest possible returns.

I am sure you will all agree with me that Secretary Barr presents us with the best programme we have yet accomplished. In point of merit, composition and arrangement it cannot be excelled by any association.

The patrons of the advertising features are our friends. Shall we do our duty, so far as in us lies, and patronize them for this fact (that they are friends), which we can and return them profit on their investment, proving that Nebraskans are no ingrates.

Peace again reigns within our borders. The two great chiefs have buried the hatchet. Let us sing a requiem to the lost cause. Perhaps I ought to modify this a little and state that while peace does reign within our camp, the Saracens are upon us and are even now attacking our outer works. However, this is not yet our fight. As a body of associated Hardwaremen we are safely ensconced behind the impregnable fortress of conservative thought and action.

J. FRANK BARR, SECRETARY.

Brethren, let us in the future, as in the past, guard well our tongues and keep careful and inviolate all our sayings and doings, thereby defeating any ulterior motive of our common enemy. However, should they in their bombastic make-up think they have reason to believe that much free advertising can be had at our expense we are amply prepared with the handsome balance in our treasury to ward off any impending danger.

We may be seared with the hot shot of fake advertising, yea, bucked clear over the fence into another field of operation, but we will stay with them. The keen blade of honest and legitimate trade has entered their vitals; they squirm and squeal and in the words of Shakespeare we say "Lay on Macduff, and damned be he that first cries, hold, enough." Moral fear never won a battle.

The catalogue house question in the view of transpiring events naturally holds an uppermost place in our minds. However, I scarcely think it will pay us to give much of our valuable time to so mooted a subject. "Whom the gods would destroy they first make mad."

The leaven is working. I hope to very soon see the consummation of my desires, namely, the federation of all lines of retail business. To illustrate: An admission was made by the head of one of the largest mail-order houses in Chicago. In an interview a short time ago he said that if all lines made as aggressive a fight as the Hardwaremen they might well look to their laurels. In this connection I would have you carefully read an article under the caption of "Traitors to Retailers," on page 54, January Bulletin, showing what can be accomplished by a complete federation of all retail lines.

Our association, so far as I have knowledge, is enjoying the most pleasant relations with our friends and co-workers, the

Digitized by Google

jobbers. During the past year a few unpleasant occurrences arose, but we found when the jobbers were given the opportunity to explain, their sins were found to be of the head rather than the heart.

There are many good subjects to be handled at this convention. However, there are a few very important ones that seem to have been crowded out for lack of time. I would recommend for your consideration, if time will permit, the question of delayed freight deliveries. This subject was ably handled at the Atlantic City Convention but without any decided action looking toward relief.

I have a copy of the proceedings if any of the members desire to take up the subject at this session.

Federation of all lines of retail merchandising, while yet in its infancy, is a step in the right direction, and I am glad to say that our own State is among the first to take the initiative. I hope you will also find time to express some thoughts along this line.

Postal legislation is at the present time being considered by Congress. Our hope is in Chairman Overstreet and his colleagues of the House Committee, that the interests of the retailers of the country will not be jeopardized for the sole benefit of the very few. Certain postal reformers are arduously at work along the lines of a so-called "Postal Check Currency System," and as retailers we must be prepared for any moves in this direction.

The National Retail Hardware Association, through its officers, is alive to all these issues and is watching zealously the interests of every retail Hardware merchant in the country.

Our growth has been phenomenal. Upwards of ten thousand of retail merchants are connected with the State Association and through them with the National Association.

I had the honor, together with Mr. Hall, to represent you at the last meeting of the National Association, and I assure you that your interests were paramount in all their deliberations. Your representatives upheld the honor of our State to the best of their ability and as you are already aware did not come home empty-handed. Nebraska is represented in the councils of the National body by no less a person than our worthy treasurer.

There are many themes of interest to our welfare which I would like to touch upon, but I have already encroached upon your valuable time.

In closing I will say that I hope the efforts of your officers were not in vain in their endeavor to make this gathering useful and beneficial.

That the membership of the Association will find that the coming together gives them practical help in the conduct of their business, justifving the time and money thus expended and that the efforts put forth for the best interest of our friends, the exhibitors, will be regarded with general approval.

And now permit me to use the thoughts of the President of the National Jobbers' Association in his closing address at the last convention. Their fitness at this time is apparent beyond anything I am capable of framing. He says: "What we all need is to cultivate more back-bone, more square-toed fairness, more disposition to help our legitimate competitors, which is indirectly a greater help to us than aggressive selfishness. When we all uphold and practice the Association platform of a high standard of business methods, we shall prosper as an Association and as individuals to a greater extent than we have in the past, and our influence will grow broader and stronger with the passing years."

This was followed by the annual report of the secretary, J. Frank Barr, of Lincoln, which was as follows:

SECRETARY'S ANNUAL REPORT.

Most of you are probably aware that with the close of our last convention a year ago, that I severed my connection with the association as secretary on account of having received and accepted the offer of a more lucrative position in another line of business. My successor, for some reason or other, resigned, and I was prevailed upon to accept my old position again, September 1st, and I am sure it is again a pleasure to look into the faces of so many old friends.

Holding the office jointly as Secretary of the Retail Hardware Association and the Hardware Mutual Insurance Company, I am thrown into contact with many new Hardware merchants that are not members of the Association and in calling upon them in the interests of the insurance company, I have prevailed upon many to see the advantage of a membership in the Association. At the close of the year 1905 we had 298 members. During the past year we have gained 120 new members, making a total of 418. We have lost by death or gone out of business, 17, leaving a membership of 401. Of this number 381 have paid their dues, and twenty have not paid dues.

Since the first of October my time has been largely taken up in preparing the programme for this convention, and it has taken an enormous amount of correspondence to prepare the same, especially the advertisements, which if you have ever gone up against an experience like this, you will realize the difficulties in an effort of this. You will note, however, by my financial report, that we have been fairly successful in this feature, and you will probably note that the souvenir programme this year is more attractive in appearance than ever before.

Another undertaking this year, being a new one, is the Hardware Exhibition, which we undertook at considerable risk, on account of the expense of rental of the Auditorium for the week, but we did not seem to have so much difficulty here, as the jobbers and manufacturers seem to think it is a good place to meet you here to interest you in their respective lines, and you will note the large and attractive number of exhibits, to which I trust you will give us as much of your time as you can spare out of the hours of the convention.

We have on our programme for the three days some very valuable subjects, that will be discussed, and I hope each of you will make a note of what is said and lend your help to make this the most profitable and enjoyable convention we have ever had.

TREASURER'S REPORT.

The report of the treasurer, H. J. Hall, of Lincoln, which was especially gratifying to all the members, shows that the balance on hand at the date of the last convention, including receipts for the year was $2,864.54; expenditures, $1 535.25, leaving a balance of $1,329.29. The report which included an itemized list of the receipts and expenditures was, on motion, referred to the Finance Committee for the purpose of auditing.

At the conclusion of his report, Mr. Hall said, that in view of the splendid financial showing of the Association, every Hardware merchant of this State, who is now a member, will doubtless want to associate himself with a body of men, that is composed of wide-awake business men who have made a success of this undertaking; and as we usually gauge a business man by his success, our Association therefore is all that a successful business implies, because it is the united effort of every man who has been, and is now, a member of our Association.

Mr. F. C. Harrington of Pawnee then moved that during this convention all persons who are the principal speakers on a subject be limited to fifteen minutes, and all that speak on that subject five minutes each, a longer time being left to the discretion of the chair, which was seconded and unanimously declared.

The next number on the programme was a report of the delegates of the National Convention, which was responded to by H. J. Hall, of Lincoln, a member of said committee. He spoke as follows:

REPORT OF COMMITTEE TO NATIONAL CONVENTION.

The Seventh Annual Convention of the National Retail Hardware Association held in Chicago, March 20, 1906, was the largest and most enthusiastic ever held by that body. There were eighty-two accredited delegates representing twenty-six different States with twenty associations. The total number of members at this time will reach over ten thousand. More gratifying than the rapid growth in numbers is the influence which the association is bringing to bear in advancing the interests of the retail Hardware merchants. The letter of greeting and words of congratulation from the Manufacturers' Association was a manifestation of the interest taken by the manufacturers in the work accomplished by the Retail Association.

The address of President Bogardus, in addition to being a resume of past work, impressed upon the delegates the importance of continued effort on the part of every association to educate the people in relation to the Parcels Post and other bills that are being presented to change the present postal laws. He also urged the holding of exhibitions such as we have at this meeting. While we are not a political body he urged us to take a stand as separate associations on some things that are coming before Congress on which we can all make a united effort. Unfair discrimination between shipments, rate legislation and other subjects are matters on which we should express our views in no uncertain way. It was at this last National meeting that the Bulletin was changed from a quarterly to a monthly publication. This meant more of an undertaking than the average member would realize, but it has certainly proven a wise move. One of the resolutions adopted was in favor of the National Pure Food Law which has, since our meeting, become one of our national laws. Another matter that was brought before the National Association was the effort that the Nebraska Association was making against the unjust advertising that was being carried in the various journals published by the fraternal organizations, that was detrimental to our business. In view of the work that is accomplished along this line it is my pleasure to read to you a personal letter recently received from Honorable A. R. Talbot, head consul of the Modern Woodmen of America. The Modern Woodmen of America journal has a circulation of almost 800,000 each month. This shows that the Modern Woodmen of America are our friends and is certainly a step in the right direction.

The next National meeting will be held in Boston and it has been suggested that the expenses of the delegates to this convention be limited. This matter will, of course, be decided by your executive committee and reported on at this meeting.

It was an unexpected honor to me to be elected a member of the National Executive Committee and in this connection I wish to state that the work of your worthy president, Nathan Roberts, was responsible for placing Nebraska among the States which were thus honored.

The National Convention is characterized by the hard work done by every member in attendance.

The president then appointed the following committees:

NOMINATING COMMITTEE: J. S. Cornell, Ord; C. A. Newbury, Alliance; C. P. Schneider, Syracuse.

PRESS COMMITTEE: C. F. Schram, Omaha; E. S. Hayhurst, Loup City; A. Hansen, Upland.

RESOLUTION COMMITTEE: S. A. Sanderson, Lincoln; C. F. Montgomery, Creighton; P. G. Satt, Wausa; P. F. Conant, Benedict; F. E. Lahr, Lincoln.

Digitized by Google

SERGEANTS-AT-ARMS: A. E. Small, Crete; F. Pettengill, Omaha.

GRIEVANCE COMMITTEE: Max Uhlig, Holdrege, R. W. Weaverling, Peru.

After the president made several announcements, the convention adjourned till Wednesday morning at 9 o'clock.

WEDNESDAY MORNING SESSION.

The first article on the programme was on

PENNY POSTAGE VS. PARCELS POST

which was handled in a very able and exhaustive manner by R. W. Weaverling, of Peru.

This was followed on the programme by a paper on the subject of

KEEPING A RECORD ON BUSINESS

which was to have been delivered by H. C. Leggett, of Ord, who was detained by illness in his family, so that Harry Fischer, secretary of the Nebraska Retail Grocers' and Merchants' Association, was called upon to give a synopsis of the present bill known as "House Roll No. 261," which is an enlargement of the exemption law, very much needed in that State at this time. This address was quite lengthy, and was listened to with a great deal of attention and the members were requested individually to see their representatives and senators and urge them to use their influence favoring the passage of this bill.

The convention was then favored with an address by F. W. Arndt, of Blair, on

MERCHANTS NOT DEALERS.

As we note the names or terms as commonly known by several of the other lines of business, we wonder why such an everyday name (you might call it) as Hardware Dealers was ever given to our profession. Is it not up in this world to other lines and deserving of the best? A business that takes more brains and more years of experience to carry on successfully than the average trades. We speak of Dry Goods Merchants, not Dry Goods Dealers, Grocers, not Grocery Dealers. In the larger cities we find the term used in business closely related as Iron Merchants, not Iron Dealers. Let us rise to a little more dignity in our calling. Hardwareman is good, but Hardware Merchant is better. We find that Lumber Dealers are changing to Lumbermen and Implement Dealers to Implement Men, while we in our chosen business called Hardware Dealers, seem to be classed in name similar to Junk Dealers, Rag Dealers, etc. I think you will all agree with me that the name merchant is more applicable and carries with it more dignity and meaning than the term dealer. We find among the class of men engaged in the Hardware trade, some of our very best business men. Men who have ability, good judgment and sound business principles that average up fully to the best in other lines of business.

I fully believe that you will find among the Hardware merchants more upright and honest men, as it is very seldom we hear of one in our trade selling out in some way to beat his creditors. Of course we have some of them also, as every organization has its black sheep. We often have mysterious fires occurring in different business houses, and happening quite often, but such is rare in our line compared with others.

There are men in the Hardware business who, we may say, have missed their calling, judging from the looks of their stores, and noticing their business ways, they are about twenty-five years behind the times. They are not up-to-date in business methods, but going along in the same old rut as their forefathers did. There are others who see that they are losing ground, they are fully aware of it, but they are too stubborn to change from their old accustomed way of doing business, while their competitors in the next block or so, full of vim and tact, and alert whenever opportunity presents itself, are getting the business and drawing the people. Such a back number man as first mentioned, may be designated as a "dealer," while his competitor whose store and its workers improve their time and show it by the looks of the place all working in perfect harmony and precision of modern business methods. One would say that the man at the helm shows his skillful ability and enterprise and is entitled to the more elevating name of Hardware merchant. I am glad to say that to-day we find very few of these "moss back" Hardware dealers in this State of Nebraska.

Perhaps some of you can recall some years ago, in the new-settled portions of the State, of seeing stoves sampled on the floor unblacked, and Hardware to correspond. An effort should be made along the line to get this change of name fixed upon the minds of the people, through the trade papers, and on our stationery, that the reform may be more quickly brought about. Of course the old habits and customs will have to be dropped. Hardware merchants can very much assist by eliminating from their advertisements the word "Dealer" or "Dealers," which is superfluous. We find the different State Hardware Associations are one after another dropping the word "Dealer" as they seem to agree that the term Hardware Merchant is more proper.

Permit me to add my personal experience on business names: After a good number of years partnership I assumed four years ago by purchase the entire business. For change of name, I adopted from then on, "The Arndt Hardware." My object at that time in making this choice was to connect the name with the business. Among our people nowadays, instead of hearing them speak of "Arndt's Store," we hear the common saying, "The Arndt's Hardware," which states the kind of business when spoken, and is that much advertising. Since then, two of my competitors began to advertise their business in the same way.

The difference between keeping store and being a merchant, is the difference between merely existing and truly living.

The next order of business was the opening of the Question Box. "Does it pay to dress windows in small towns?" M. A. Hargelroad of Holstein suggested that the merchants dress their windows every week and place in them one or two leaders that would attract the public, such as hammers and hatchets, and if necessary, sewing machines. F. W. Arndt of Blair said that he is a crank on window display and said that he changed his windows at least once a week with some attractive specialty at the best price that could be made, which was always attractive to people who came in and inquired about it.

The next question, "Should the merchant sell at the same price to everybody alike or make different prices to customers?" G. C. Veich of Bancroft created much excitement in leading the discussion of two prices to customers, which he said was one price to credit customers and another price of 10 or 15 per cent. less for cash customers, with the result that his business is practically all cash and he has few bad accounts. He said he had an attractive sign in his window as follows: "Remember my two prices," which served to call the attention of his customers. He said by means of this sign, he had educated his customers to pay cash. At twelve o'clock the convention adjourned till 2 o'clock P. M.

Frank Hacker, of Friend, handled the next question in an admirable manner.

HOW IS THE BEST WAY TO ADVERTISE.

and spoke as follows:

In advertising I take something different from the ordinary and I pick up ideas in passing along the streets of cities. The best way to advertise: I write letters to my customers and other prospective customers. In January I ran an ad in our paper headed "A Stimulator," stating that on January 31st I would give to the person holding the lucky number on a $1.00 purchase, a $20.00 tailor-made suit of clothes, and if the holder of the lucky number was a lady, I would give a silk skirt. During the month I made 1600 one dollar purchases, and it is needless to say, I was pleased with the result. Then, about a week before Feb. 1st, I placed a Stevens rifle in the window with a card, stating that "Will be given free to some bright boy," and for them to call on Saturday at 4 o'clock, and I would tell them about it. This brought pretty nearly every boy in town to the store. When they came I told them I had printed a card with my name and business on it, also a blank space for purchaser's name, and for them to distribute the cards among their friends and parents. The result was very gratifying. I also arranged a similar contest for the girls whereby they took the blank cards, and the girl who got the greatest number of ladies' signatures, secured a doll, and I got all the ladies of the town in my store, wondering what Hacker had up his sleeve, and in the meantime I made numerous sales from ladies who otherwise would never have come to my store. My object in this was to secure a revised and complete mailing list.

The president then announced that we had to-day with us, W. C. Wright of Omaha, president of the National Hardware Jobbers Association, the best friend of the retailer and that he would tell us something of the work of the National Association. Mr. Wright paid a high compliment to the Hardware merchant, saying that they were the most upright and able class of merchants in the United States, which was illustrated by the fight they were making against the Parcels Post. He stated as far as Omaha was concerned, not another city in the United States had taken the stand Omaha had to protect the retailer, and that the Omaha jobbers had always used their influence to drive out the mail order houses, and are further trying to protect the merchants by driving out the catalogue houses and preventing them from increasing their business. He also thought the Association had taken the right stand in reference to its members purchasing good Hardware from jobbers and manufacturers. He also urged the Association and its officers to give their undivided support in regard to the unfair competition. He stated that the National Association was unalterably opposed to the parcels post as it would injure the great body of merchants in the United States.

The president then introduced Mr. Miles of Mason City, Iowa, vice-president of the National Retail Hardware Association, and stated that Mr. Miles, having appeared before us on a previous occasion, being himself a prominent retailer in Iowa, was not altogether a stranger, and spoke for Mr. Miles words of cheer for their own association. Mr. Miles said it gave him great pleasure to bring to us the greeting of the National Hardware Association. He stated that all the suits that have been brought before the association had been amicably settled. He also spoke encouragingly of the National Bulletin and hoped that every Hardware merchant in Nebraska would read it and send it any news items they had from time to time, as through it our work can be circulated. He said we must be aggressive and never stand still. Mr. Miles having been assigned the subject of "Hardware Mutual Fire Insurance," made an extremely interesting address on the subject.

Albert Denger, of Norfolk, delivered an address on

"LOYALTY TO OUR ASSOCIATION AND HARDWARE MUTUAL INSURANCE COMPANY"

which was as follows:

Digitized by Google

When a man joins an organization or society, he does so with the idea and purpose of thereby benefiting himself. It may be an honorary organization, or it may be one through and in which the new member will gain material benefits. But, whatever kind of an organization it may be, some benefits should be derived from the membership, or the purpose of the organization is lost. If then, this organization confers benefits upon the member, from the fact that he is such, what is the duty of the member of the organization? There is but one answer. "Loyalty to the Association." This is the very foundation of the structure of voluntary organizations, and without it the structure will crumble and fall into deep ruins of failure. It is required from every member and officer of the Nebraska Retail Hardware Association. I am glad to say that they have all shown loyalty by helping to strengthen our organization in membership. But, we can still more show our loyalty in aiding our officers to get more of the Hardware merchants to join, so that before another convention time rolls around, at least fifty per cent. of the Hardware merchants of our State will be members of our Association.

Let us show our loyalty to our officers, especially the President and the Secretary, who so loyally work for all of our interests. When our Secretary writes to us, or sends us any communication of any kind, let us answer him by return mail and show him we appreciate hearing from him and let us comply with his request, whatever it may be.

Let us be loyal to our National Association, as it is doing such a world of good for us in combating with our enemies, the mail order houses.

Let us show our loyalty to our friends, the Jobbers. I mean by them, the Hardware Jobbers, who so loyally stand by us and say: "We do not sell to catalogue houses and every grocery house there is in the country, but only to the legitimate Hardware trade."

Last, but not least, let us be loyal to the traveling men, as they are the "traveling missionaries" of our Association and do lots of good for it. They are not "knockers" but "pushers" and our "friends."

As to the benefits derived by being a member of the Association, it is hardly necessary for me to say much on this subject as the members are well aware of the benefits. I for myself, can say that I feel amply re-paid for the time and money spent to come to these conventions and personally meet and get acquainted with my brother Hardware merchants, who are almost neighbors of ours, but have never had the pleasure to meet them personally, and have a hearty hand-shake and can sincerely say, "I am glad to meet you." And, we know by past experience, that little local differences that existed between members, have been adjusted at our conventions and before they went home they have been the best of friends, slept in the same bed and have been friends ever since, so we all derive benefits in one way and in another.

Now, allow me to say a few words in regard to our Nebraska Hardware Mutual Insurance Company. It must certainly be gratifying to the officers of our Mutual Insurance Company that the members have shown their loyalty to it. A year ago, so the secretary informs me, we had 117 policies in force and this year we have over 300, which shows a very nice gain. Last year, we received a rebate of 20% and it may perhaps reach 25% this year, and if all members will come into the "band-wagon" and take out policies, this can be brought up to 30% or 35%. It is certainly a nice saving on the expense of insurance. But I know that some of the brothers don't agree with me on Mutual Insurance. The one objection that some of the dealers have to our Mutual Insurance Company is the fact that they are getting some business from the local agents, and they feel obliged to give them their insurance business. However, though this may be true, I doubt, if their customer could buy goods from their competitor at 26% less, whether they would endeavor very hard to get their insurance business on a saving of this kind to themselves.

Another objection that some of the dealers have is that they have already been so thoroughly solicited by the old-line companies, on the theory that they do not know what it is going to cost them in the mutual company on account of some of the disastrous failures that we have had within the past ten years. But, upon investigation, I find that the cause of their failures is due to the fact that three officers individually, in each of these companies, voted themselves high compensation and took such hazardous risks, being desirous of obtaining those that had the highest premiums on account of the money that it would produce for them, and when the fires occurred, as they usually do in a risk of that kind, on account of the high expense that they were under and the character of the risks, they were unable to meet their obligations, with the result that they went into a receiver's hands.

It is directly opposite in our company—we take no risks except on property owned by Hardware dealers, and as you know, the liability for a loss in Hardware stock is much below that of the indiscriminate risk on everything from a livery barn to a saloon or millinery shop, which are considered the worst class of risks in existence. Then the expense of our company is small on account of the total expense being borne jointly by the State Association and the Insurance Company.

As to the responsibility, there cannot be any question as to its management, as it is managed by our own members and policy holders, and the money that we pay out goes to our own company and not to some Eastern stockholders, and we keep it in our own State.

THURSDAY MORNING SESSION, FEBRUARY 7TH.

The president stated that before he took up the regular program of the morning we would call E. B. Hirschman of Hartington on the subject of

KEEPING A RECORD OF BUSINESS.

This was one of the regular numbers on yesterday's program, but on account of H. D. Leggett's inability to be with us, Mr. Hirschman was called to speak in his place. Mr. Hirschman spoke as follows:—

The question of the keeping of records is an important one. I would rather talk off-hand on this subject than to read, but anyone talking on this subject may dwell long on the matter in deed. Therefore, I have jotted down a brief outline of the way we keep our records. One member made the remark that he was a crank on certain lines. This may mean that he is determined to do his work in a certain way. There is no natural-born book-keeper. I admit that one party may handle numbers more clearly and quickly than others, but there is no need to post $2.80 for $4.50. Keeping a record of business is one of the most important subjects in my mind. If merchants would keep a good account of their business they would not have so much trouble in the settlement of accounts with their customers and their jobbers. If the merchant would have a system and try to imitate the large concerns, for example, the wholesaler or jobber, they would find it would save them much time and trouble and at the same time the amount of business would be the same that they are now doing.

Some of you may say that you do not have any trouble in the settlement of accounts with your customers and jobbers. This may be true, but I know many who do have trouble and have had for the past eighteen or twenty years in balancing up accounts with the different firms in different places, and have opened up for them a new and practical set of books. Our business is on an extensive credit business, but I am safe to say that we have very few doubtful accounts. One way that we try to follow in making the change is to give the number of items or pounds with full description of articles and prices of each item in original charge. In questions of dispute, original entry is only to be considered. Before making a change you should know that the party is O. K., and refer to the credit man at once.

Never accept an order for goods from anyone unless the order is signed by the party who does the paying.

We have a few rules to go by in doing business with jobbers. We do not mean to insinuate for one moment that the jobber would wrong us in any way, for we consider him our friend, but anyone of us is liable to make an error and if the error is made it is well to know who makes it, therefore we insist on getting a duplicate of each and every purchase, as we ought to know at all times for our own satisfaction what we have bought, terms of discount and when goods are to be shipped. We keep a copy of all orders sent by mail and all correspondence, as it would be an impossibility to remember the contents of 15 or 20 letters per day.

When merchants do not keep a copy of their correspondence and there is any trouble, they generally blame the party at the other end.

We try to arrange our business so we can easily find any certain charge, any deal, any correspondence, any receipt, etc. We have seen merchants in other houses hunt for hours for certain receipts turning over all the pages that have accumulated for years. We find it necessary in the Hardware business to have many catalogues. We have tried many ways to arrange same; for instance, in finding what we want readily. Our present plan is this:—An arrangement of shelves or pigeon-holes, which is a very satisfactory arrangement, an idea of our own, as we have never seen anyone else using it. We have the catalogues assorted so as to have all catalogues of Hot Water Furnaces in one pigeon-hole, all catalogues of Hot Water, Steam, etc., in another, the work of Lighting Plants in another, of Hay Tools in another, and Bath Fixtures in another.

They are all placed; then we have each catalogue number to correspond with number of pigeon-hole We have a record of the catalogues and when we take out 30 or 40 accounts and they are all mixed up, and we can put them back in their respective places on account of their being numbered.

Mr. Lewis Worth of Falls City then read a very attractive paper on

AIMS OF THE HARDWARE MERCHANT, AND WHAT THEY SHOULD BE.

The Association then went into executive session for the balance of the day, at which time the following officers were elected for the ensuing year.

OFFICERS ELECTED.

The following officers were elected for the ensuing year:

PRESIDENT, Frank Hacker, Friend.

FIRST VICE-PRESIDENT, A. F. Meyer.

SECOND VICE-PRESIDENT, W. Wisda.

THIRD VICE-PRESIDENT, Fred Ebinger.

SECRETARY, J. Frank Barr, Lincoln.

EXECUTIVE COMMITTEE: Dan Kavanaugh, Fairbury; E. S Hayhurst, Loup City; J. W. Armstrong, Auburn.

The invitation of Lincoln was accepted and next year's convention will be held in that city.

Digitized by Google

ILLINOIS RETAIL HARDWARE ASSOCIATION

The Tenth Annual Convention of the Illinois Retail Hardware Association was held at Chicago on Wednesday, Thursday and Friday, February 13, 14 and 15, 1907.

The plans that had been made by the local committee and the officers of the Association were somewhat disarranged by a fire which broke out in the basement of the Annex of the Chicago Coliseum on Monday evening, February 11th, which totally destroyed the Annex. This was a building joining the Coliseum on the south, and connected with it. The sessions of the convention were to have been held on the second floor of the Annex, and the Chicago dealers had planned also to give a complimentary reception and dance to the visiting Hardwaremen, exhibitors and ladies on Wednesday evening, but this event necessarily had to be abandoned, so Memorial Hall in the Armory of the First Regiment, close to the Coliseum, was secured for the sessions of the convention. The Hardware Show in connection with the convention in the main Coliseum Building was conceded to be the largest exhibition of Hardware ever held or attempted. The entire floor space of the great building was occupied with exhibits of a comprehensive and valuable character, well arranged and displayed, and interested all visitors.

WEDNESDAY AFTERNOON SESSION, FEB. 13.

The convention assembled in the Assembly Room of the Third Regiment Armory at 1.30 P. M.

President, Frank B. McKenney, of Rockford, called the meeting to order.

Rev. J. P. Brushingham was introduced and he invoked the Divine blessing.

FRANK B. M'KEENEY, EX-PRESIDENT.

L. D. NISH, SECRETARY.

President McKenney stated that Mayor Dunne had found it impossible to attend the Convention personally and welcome them to Chicago, but in his stead had sent Col. J. Hamilton Lewis, the Corporation Counsel of the City, to welcome the Delegates.

ADDRESS OF WELCOME BY COLONEL J. LEWIS.

Colonel Lewis introduced his remarks by saying that he had been unexpectedly called upon by W. H. Bennett to address the Convention, and in spite of the fact that he was engaged in the trial of an important lawsuit he felt called upon to meet the request of the Mayor and Mr. Bennett. After telling a humorous story illustrating the incident of Mr. Bennett calling upon him he said:

I had nothing to do with your Hardware men, except, I remember once I was a student of a lawyer and I was told by the lawyer of the experience of a little fellow who went downtown to a neighboring Hardware store. This little fellow asked the Hardware man if they had any files. The Hardware man immediately said: "Yes," they had these files. The boy said he would like to have a great many, and the Hardware man says to the boy, "How many?" He says, "Well, I will go back and find out," and he went back to the lawyer and says, "How many shall I get?" The lawyer says "How many what?" "Files?" "Files, for what, what do you mean, in the Hardware store?" The boy says, "You told me to file away all these papers, didn't you?"

Colonel Lewis said that was the first experience in the Hardware line. Continuing he said:

I think from that time on the only experience I had with Hardware men was that which I have had in my official life, and which I desire at this time to say has been exceedingly pleasant. I am glad to hear from Mr. Bennett a fact which I had not thought of at all before, and that is that the Hardware men more correctly illustrate the general pulse of the public than probably any other line of business there is, for the reason that people when prosperous demand a great deal of iron and steel, and the products of those industries that depend upon iron and steel, and when they are not prosperous the Hardware men, particularly the retailers, are the very first to feel the change in the commercial world.

I had not a knowledge of that fact until your distinguished member brought it to my attention.

I know nothing of the Hardware business as a special business, gentlemen, save as a young fellow struggling with the adversities of the world. It was my intention in a few words to refer to your Hardware business specifically, but since as the Corporation Counsel of the City and acting Mayor I am permitted to come and welcome you here in a Convention which you have chosen to hold here in the city of Chicago, there are a few words I would like to say to men of your kind—to the work of men who represent the kind of business you follow. I would like to speak to the spirit you represent and I would like to say to you that you have never lived in your life in the past nor will you live in the future when there was so much necessity for what you really represent as in the present hour. There never was a time in the history of this, our Government, where men of your kind were so needed to preserve all of the things for which your fathers fought and died and all the things your children hope for the future.

The City of Chicago has been built up to the splendid proportions that it has through the exertions of such men as yourselves. You can understand that she owes much to you business men. The men of your class gave their time to Chicago. They gave their swear and toil to Chicago and gave the sacrifice of business to Chicago. Gentlemen, I know you will not do me the injustice to think that I am a man who will indulge in flattery. The men you represent are the class of men who started with small capital; whose greatest capital was not their money, but the honor they had in their business; the credit they obtained from other men vested and rested not upon material property they had, but upon the soul of honor they possessed; a class of men who are credited by the manufacturers not upon the property he possessed, but upon the name he possessed; the men who were credited by the communities in which they lived not for the house they lived in but for the atmosphere they lived in; a class of men who are credited by their whole community not for their bank account but for the count of respectability they possessed in the community in which they resided.

In conclusion, he said: I am glad to bid you welcome to the City of Chicago, and all she represents, because she has been built up more out of such a class of men that you represent than any others. We trust you will find the city agreeable, and our boulevards and parks entertaining. I extend to you the welcome of the city of Chicago—to you retail Hardware men of the great State of Illinois.

RESPONSE BY H. G. CORMICK.

H. G. Cormick of Centralia responded to the welcome of Colonel Lewis. He said:

Colonel Lewis, Mr. President and Gentlemen of the Convention: When the Committee selected me to appar before you on this occasion I was somewhat annoyed, as I did not deem it fit that I should follow such a distinguished speaker as we have just listened to. The beautiful sentiments of patriotism that have been voiced from this platform are the peer of any of the kind that I have ever listened to.

On thinking over this occasion I was reminded of the German who missed his boy. He says: "I lost my boy, when I tell you he must have run away: I dont know where to find him. As I looked all around for that boy everywhere and I could not find him at all. Well, I found him, and where do you think I found him? I found him sitting on a curbstone and I looked at him and he looked at me. Then I said to him, 'Stood up,' and he stood up. I put my arms around his neck and he put his arms around my neck, and I cried and he cried. Then I looked at the boy and it was not him." That illustrates my position exactly.

Colonel Lewis, I would desire that you convey to the Mayor that we have appreciated the heartiness of the welcome. While we are not all of one political faith, yet we believe in the honest purpose of his honor in spite of any difference in political faith.

We rejoice that we have with us to-day representatives from the various cities dotting the fertile prairies of our corn belt, richer than which there is none on the face of the earth. We have with us now

Digitized by Google

representatives of that beautiful city, the chemical laboratories of which produce more revenue to Uncle Sam than any other. We have men here from the home of the Elgin Watch and the Creamery Butter, which is everywhere sold to the department stores. Last, but not least, we come to you from "Egypt" the home of the luscious strawberry and the bright red apple and the excellent coal that makes the city of Chicago inhabitable.

The tendency of the times has been towards consolidation. This Association, therefore, became a necessity, and to those of us who have been in close touch with this organization since it began it is apparent that our organization has made its members more liberal in their dealings with each other and bettered their own condition by our Association; But let us remember that our business in only an incident in our lives. Don't forget that the strength and greatness of a nation does not lie in the sinews of its people or in the money-bags of its traders, but that it is in the devotion of its citizens to all that is true, good and beautiful, to the hatred of all that is evil, false and ignoble. Thanking you again, sir, for your hearty welcome.

PRESIDENT'S ANNUAL ADDRESS.

Pres. McKenney: I see the Secretary has fixed the program so that the next thing is an address by the President. I hardly know what to say to you, boys. Last year I was in the Hardware business when I appeared before you for the first time in public. This year I am out of it, and I hardly know what to tell you. I have been asked a great many times what I intended to do. I have been in the Hardware business twenty-six or twenty-seven years, and thirty-seven years behind the counter. If I had the ability that Mr. Lewis has to talk, and I imagine to write, I would like to write a book or publish a book on the experience of thirty-seven years behind the counter. I don't know whether it would sell or not.

I want to tell you that thirty-seven years behind the counter is a long time, and you that have been there that many, more or less of you, all know that there are a great many tribulations and a great many kicks, hard to overcome, and a great many dollars that go into the till, and if your business has been like mine you would always have more to go out than to come in. Now, I can probably talk to you fellows a little different now that I am not in the business.

There are only a few "don'ts" that I would like to mention to you, boys, and one of them is this: that all of our troubles with our competitors are a blessing in a way, because they teach us a great many things we do not know: and there is quite a number of us that think we have not enough business to attend to ourselves and once in a while we will butt in and try to help that fellow out—try to tell him what he ought to do with his business; that his prices are not right and all this and that: they are too low, or too high. Now, don't do that. I have always found it

BETTER TO BE PRETTY BUSY AND MIND MY OWN BUSINESS.

I don't say that I always do—I have always tried to, and I made up my mind in the past few years in my business that when I don't have enough of my own to attend to and I wanted more, I will go to my competitor and I will say, "Fellows, I have not got enough to do and I want something more to do. I don't want to tell you what to do; I want to buy you out—you are not running your business just right." If you can ot do anything with him, go at your business and work a little harder. Don't mind your competitor, but mind your own business. You will like yourself better and like your competitor better.

Now, there are a few other things that I have experienced in closing out my business. I have what you all, I think, have, or I hope you have not, severa' book accounts. Now, I have tried for the last year to keep my book accounts down and I have been unsuccessful, and I find that in settling up my business that if I ever go into the retail business again that I will keep just as few book accounts as I possibly can.

Now, boys,

DON'T EXTEND CREDITS TO EVERYBODY BECAUSE YOUR COMPETITOR DOES.

or because other folks do, or because they can get the goods at the other follow's. Let them get them. Use your own judgment and get your money. Do your business on a cash basis. Your customer will like you better. You have all got customers that after you get settled up with them who will want additional credit. You have a good customer again until he gets some more goods. Now, just cut that fellow out. Those people have cost me lots of money. Don't have anything to do with them. Just tell them you are doing a cash business; and there are a great many other things that I might tell you what to do and I presume there are a great many things you could tell me what to do and what not to do. But there is one thing that I would like to instruct the Secretary is to have the President make his address first, because when you get men up here like Mr. Lewis to make an address, when the President comes on he isn't anything.

I don't expect boys, to meet with you again in this State, but I want to thank you all for the courtesies that you have shown me, and I want to thank you all for the increase that has come to this Association both in finances and in members. A year ago at this time in this same room, I think when our meeting wound up, we had something like 375 members. To-day, we have over 1,000 in good standing. (Applause.) We had, I think, a very few dollars in the treasury, not over a hundred dollars—I don't know just how much there is—the Secretary will tell you, but I know after all debts are paid up-to-date, that we must have something in the neighborhood of fifteen hundred dollars in the treasury. Now,

THIS ASSOCIATION IS ON A GOOD FINANCIAL BASIS.

This State has in it eligible members to the number of 1800, and I hope by a year from this time wherever you meet that you will be able to count those eighteen hundred members with dues all paid and with $10,000 in your treasury. Where there is union there is strength, boys, and when there is a little money in the treasury there is a better feeling.

You have a great many things to contend with in your trade and I have here a piece out of the newspaper that I read of a certain concern in a certain city that did during the year last past seventy-five million dollars' worth of business through this country, and that business was distributed between ten million customers, and if my information is correct, over four millions of dollars of this seventy-five millions was in your line. Now, what are you going to do about it? I cannot tell you what to do. I am not going to tell you what to do; that is up to you.

NEVER BOYCOTT ANYBODY.

Don't tell any man in any line of business that he can't do business; that he has no right to do business. He has that right, and has the right to do business according to his ideas the same as you have. Now, it is up to you in your own individual way to curtail that four million dollars in your line; but don't boycott anybody, or tell them they must not do this or must not do that, because the minute you do that you antagonize not only one but several people, and antagonism is not a good thing in business. It is not a good thing anywhere. It is not good in the family, not even the daughter, but use your own judgment, boys, and use it well.

I want to thank you all again for the attention and attendance under the circumstances. We have a larger attendance than I expected to see.

The Chicago Show, as you have all seen, is a grand success in spite of the difficulties they have had to contend with in the way of an unfortunate fire there, which has forced us to meet here; and Mr. Lott and his assistants have done the best they could possibly, and I want you all to appreciate that fact by being at every meeting and being here on time, because we are going to be called on time. I think that the people that are exhibiting their wares to you in the Coliseum are entitled to all the courtesies that you can extend to them, because it is a benefit to them and it is beneficial to you, and most of you will see things there in all lines that you probably did not know were made. President McKenney then appointed the following Committee:

Press Committee: H. C. Peppler, Chicago; M. Fahay, Decatur; Frank F. Porter, Chicago.

Location of next place of meeting—Committee: William Bittel, Peoria; Tony Engelhardt, Chicago; C. N. Howell, Dixon; Fred Winner, Carmi; O. F. Tuxhorn, Edwardsville.

Committee on Resolutions: Grant Porter, Chicago; Charles Williams, Streator: H. G. Cormick, Centralia.

Nominating Committee: C. M. Hurst, Decatur; W. F. Gormley, Chicago; O. H. Howe, Streator; J. H. Vawter, Salem; Mr. Gilbert, Oregon.

Auditing Committee: Leo Krueger, Chicago; E. C. Kerth, Anna: R. G. Scheurer, Vandalia.

Secretary Nish read an invitation from the Mayor of Peoria to the Association for them to make Peoria their next meeting place.

The Secretary also read a message of congratulation from the Merchants' Association then in session at Peoria.

Mr. Williams, of Streator, moved that a telegram be sent by the Secretary of congratulation and thanks to the Illinois Retail Merchants' Association then in session at Peoria.

Motion seconded and carried.

Mr. Cormick of Centralia addressed the Convention and said that he was a member of the Board of Directors of the Illinois Retail Merchants' Association, and that the Association appreciated the Hardware Association of Illinois more than any other one thing in the State of Illinois. Mr. Cormick said they had requested him to extend to the Hardware Association the best wishes of their organization.

President McKenney extended an invitation to anyone present to address the Convention.

Mr. McLaughlin, of Chicago called the attention of the Convention to the fact that Secretary Peck of the Wisconsin Association was in the room and moved that a Committee be appointed to escort him to the platform. President McKenney invited Mr. Peck to address the Convention.

C. A. PECK'S ADDRESS.

Mr. Peck said:

Gentlemen, I fell highly honored not only in occupying a place upon this platform and also in having such an escort to the platform. I came down to bring you the greetings of the Wisconsin Association to your Association assembled, notwithstanding you have knocked us out of the first place. We do not hold it against you. A year ago we numbered 618, which I think was the largest Association, except Minnesota. We stood second, but I think to-day Wisconsin stands away behind, fourth or fifth, possibly sixth, because unfortunately we have not got so many dealers. We have only about 950 dealers in Wisconsin. We have 640 of them in the Association—perhaps 65 per cent. So I guess there is only one State—that is North Dakota—that excels us in the percentage of membership.

There are many ways we can win out in this Association. If we only had the back-bone, grit and pluck. Mr. Peck then described the advertising means adopted by a member of the Wisconsin Association to secure business, which was related by a delegate to the Wisconsin meeting. Mr. Peck said that one of the most successful grocerymen he knew of was a man that never disagreed with his customers, no matter what they said to him. He said the best way to win was to keep on the right side, have grit and spit on your hand and go ahead?

Mr Peck told a humorous story to illustrate this point:

I suppose I might say something about insurance. Mr. Mathews is sitting over there and I suppose he would like to say something upon that. Mathews is a royal good fellow. I don't know why every last one of you have not got your full lines of fire insurance with the Hardware company. Minnesota paid back this year forty-five per cent—just like finding it. Iowa is paying thirty-five per cent. The National is paying back a good liberal dividend and I am too modest to say in anything but a whisper that Wisconsin is paying back forty. While we may not solicit you at your store you know where these different Secretaries live. They have allowed me to rustle around in the Secretary's chair for ten years and I feel at home now. If there is anyone of you that has any objections I am here to answer them.

I wish that I might say something that would cement every one of you members so that you would go home and get your competitor into the association if he is not already in. It makes a better competitor out of him; it makes a better merchant and a better dealer in every respect—these associations do. Let us stand shoulder to shoulder and victory is ours just as sure as fate.

President McKenney invited "Uncle" Charles Smith to address the Convention, which he did briefly.

Mr. Williams of Streator called the attention of the convention to the question-box and urged every delegate to prepare a question on some subject for discussion.

The Convention then adjourned until the next morning, at 9.30 o'clock, Thursday.

THURSDAY MORNING, FEBRUARY 14.

President McKenney called the meeting to order in executive session at 10 A. M. The convention hall was well filled with delegates at the opening.

President McKenney: The first thing on the program, gentlemen, is the report of the secretary.

Secretary L. D. Nish, made the following report:

SECRETARY'S REPORT.

Mr. Nish: Gentlemen and members of the Illinois Retail Hardware Association, in coming before you this year I do so with considerable pride from the fact that we are the largest retail Hardware association in the United States. (Applause) and I believe from the letters that I have received during the past year, that our membership is growing more enthusiastic than ever. We now number a membership in good standing of 943, and a membership enrolled of approximately 1050. We have taken in during the past year 343 new members. Yesterday I noticed that we added between 20 and 25 new members.

Of course with increased membership the business of the office of secretary has also increased. I was looking over my filing cases before I came to the convention this year, and I find that you can multiply the cases by five over that of any previous year. So you will understand, gentlemen, the correspondence the secretary has had to take care of. I have issued from my office between 16,000 and 20,000 letters. This does not include the issuing of the program.

For the secretary to make a report it would be a sort of a re-hash

Digitized by Google

of what he has tried to give you during the year in the confidential letters, and also as the National Bulletin is issued each month and contains the news items and information that I might have given if this was not in the field.

Secretary Nish then gave a detailed report of the amount collected in dues from the membership, from the program and other minor items, making a total of receipts of $3,561.73. He also gave a list of the expenditures on account of his office.

Continuing, he said: I spoke of the correspondence. The membership have been very good in keeping the secretary informed on matters that were of vital interest to the association, but I assure you, gentlemen, that each of you should make it a personal matter to send all the information that you are able to pick up. You may think "Well, the other fellow will do that." Don't stop for them, just mail it in. Also there is no harm done for the secretary to receive a dozen or more items on the same subject. It will show your interest, and I have arranged for a classification of these subjects. I am in constant touch with the national organization, and it proposes to systematize the work that it may be more effective. These plans are in embryo at the present time, but I am convinced that they will result in much good.

Of the complaints that have come to the secretary I will say that most of them have not conformed to the regulations of the by-laws. Complaints sent in should be the facts and substantiated as far as possible by affidavits—something that is substantial evidence. Notwithstanding this, I have gone into a great many subjects and have some very pleasant correspondence with manufacturers and jobbers which I believe has resulted in great good to the retail Hardware interests, and I will assure you that these letters from manufacturers and jobbers are of a different tone and character from what they were four years ago. They are more anxious, I should say, to get into the bandwagon and be with us and work along the lines that we are endeavoring to work out for the interests of the Hardware dealers.

Such complaints as have been properly submitted I have turned over to the investigating committee, and I presume the investigating committee will report later on in the convention.

Gentlemen, I can think of nothing more that will cover the year's work, and I thank you for the compliments and kindness and courtesy that I have received at your hands during the past year.

On motion the report of the secretary was received and placed on file.

President McKenney called for the report of H. E. Gnadt, Treasurer.

Treasurer Gnadt made a detailed report of the receipts and expenditures during the year. He reported total receipts of $3,147.53, and total disbursements of $2,245.28, with a balance in the treasury of $902.25.

On motion the report was received and referred to the auditing committee.

President McKenney invited all visiting delegates from other State associations to take seats on the platform.

D. B. Carter, of Indianapolis, a member of the Indiana association came forward and addressed the meeting briefly saying it gave him pleasure to meet so many delegates of the Illinois association.

Reports of committees were called for.

O. A. Howe, of Streator, chairman of the Investigating Committee, made the report of that committee. He said a great many complaints had come in, but very few were in proper shape for investigation—properly prepared with affidavits, etc. He said that Secretary Nish had gone into the matters and his report on the subject would be more in detail.

Mr. Howe said he had a few suggestions to make to the meeting. Among the suggestions made were that additional arrangements should be made so that the secretary could handle the correspondence coming to him more expeditiously. He assured the delegates that it was quite heavy. He also suggested various subjects for discussion in executive session. He suggested a legislative committee for the amendment of the pure food law—some way to force honest advertising of the article advertised.

It was moved that the discussion of the report of the investigating committee be taken up at the afternoon session.

Thereupon the convention took a recess until 1 o'clock P. M.

EXECUTIVE SESSION.

THURSDAY AFTERNOON, FEBRUARY 14.

President McKenney called the meeting to order at 1:30. He introduced William M. Pratt, the vice-president of the American Hardware Manufacturers' Association.

ADDRESS OF WILLIAM M. PRATT.

Mr. President and Gentlemen of the Illinois Retail Hardware Association: Two Jews in New York once engaged in a law suit—Mr. Moses and Mr. Hoggenheimer. Moses was a rather bright fellow, and thought he would employ Mr. Choate—he thought his chances might be better, so he went to Mr. Choate's office and arranged with him to take the case, and after some conversation, he addressed him as follows: "Mr. Choate, Mr. Choate, what you think about my case?" "Well, Mr. Moses, I have not given it much consideration, but I think you have a strong case." He says, "I think you will win it." "Mr. Choate, what you think of sending the Judge a box of cigars?" "Oh, Mr. Moses, that will not do at all, the Judge is not that kind of a man, that would queer your case at once." "All right, Mr. Choate, I do as you say, but I don't know about that box of cigars, Mr. Choate." The case came off and Moses won. He betook himself to Choate's office in order to make settlement, and he said to him: "Mr. Choate, me win that case, what you think about that box of cigars, Mr. Choate?" "You know what I told you, if you had sent the box of cigars you would not have won that case." "But, Mr. Choate, I did send that box of cigars." He says, "What?" "I sent the box of cigars, Mr. Choate, but I put in Mr. Hoggenheimer's card." (Applause.)

Now, gentlemen, I feel as if I had some other fellow's card upon this occasion. The gentleman who was delegated to represent the American Hardware Manufacturers' Association was so bashful about appearing before an audience when he did not enjoy the acquaintance of any of the members present that he saddled it off o to me. No one knows Mr. Bennett, and therefore, you are relieved from any embarrassment under the circumstances.

However, seriously, it gives me great pleasure to appear here as vice-president of the American Hardware Manufacturers' Association, and to extend the right hand of fellowship and to say to you that we are interested in your welfare, that we rejoice in your prosperity, and to express the hope that as you know us better, you will love us more. Gentlemen, we are both the servants of a common cause, and that cause is the consuming public. We make and you sell, but we are both at the beck and call of the man behind the gun who uses the goods.

Gentlemen, when you render the consumer most excellent service we are undoubtedly benefited and we appreciate it, and when we make excellent goods for you to sell we have indirectly added to your prestige. The theory that is sometimes advanced that the manufacturer is not interested in your welfare is absolutely false.

THE MANUFACTURER SHOULD BE THE RETAILER'S FIRM ALLY,

and the connection should be both offensive and defensive.

I am a great believer, also, gentlemen, in organization. It would not be possible to accomplish much without organization. In this way, it is possible to accomplish much that it would not be possible to accomplish in any other way. There are some matters which we cannot legislate upon as organizations any more than Congress can legislate upon matters that are purely State or municipal, but the discussion of those matters, gentlemen, is of the utmost importance, in order that individual decisions may be reached with a full knowledge of all the facts. A peer of England once said that the most a government could do was to make vice difficult and virtue easy. I say to you that

THE MOST AN ORGANIZATION CAN DO IS TO MAKE SUCCESS EASIER

and failure more difficult.

The greatest room in the world is the room for improvement, and the contents of that room, as applied to us, is regulated by the space required to hold not only our defects, but our undeveloped resources and undiscovered opportunities. The old saying that if we take care of the little things the larger ones will take care of themselves is as true in business life as it is in our social and home life, and if we take care of the little things in our room for improvement we

SHALL UNCOVER THOSE UNDEVELOPED OPPORTUNITIES

which will give the opportunity of our lives. I say to you, gentlemen, that we do not any of us realize half as much as we should the opportunities that are around about us waiting to be developed.

The speaker then referred to an instance of a Hardware dealer in Antwerp, Belgium, who died leaving his son in charge of the business. The business of the father had been slow and somewhat unsatisfactory. The young man conceived the idea of establishing booths in his store in which were displayed various kinds of Hardware. This idea proved so successful that his business was very prosperous and the young man was now one of the most successful Hardware dealers in Antwerp. Mr. Pratt referred to this as a case where an opportunity was taken advantage of. He also mentioned a Hardware dealer in a small town in Germany who adopted similar methods and was successful.

In conclusion Mr. Pratt said: I don't think that I can say very much more to you. I have just returned from a trip away out West where I went to convey greetings to an association in South Dakota. I just returned this afternoon in order to make arrangements to go to the New York State Convention next week. I am very glad to have been here; very glad to have the pleasure of saying these few words to you, and I want to tell you that the success of your organization depends largely upon you. It does not make any difference who you have for officers, and it does not make any difference what they do unless you will come out and take an interest in the proceedings and discuss these questions that come up before you.

Now, gentlemen, I want to thank you for your courteous attention and I want to say that if you are dissatisfied you can charge it up to my friend Bennett and if there is any credit accruing I want it. (Applause.)

President McKenney introduced Mr. Mathews, the Secretary of the Minnesota Mutual Retail Hardware Dealers' Association.

SECRETARY MATHEWS' ADDRESS.

Mr. Mathews said before leaving home he noticed in the Minneapolis paper the account of the disastrous fire at the Coliseum Annex and was fearful that it would seriously interfere with the success of the convention, but he was surprised on reaching Chicago to find that the exhibitors had replaced their damaged stocks and there was very little to show the exhibitors had suffered a severe loss.

Mr. Mathews said further: I have been very much pleased with the work of the convention and the exposition down there—something we have never been able to have in Minnesota yet, not having been able to secure the necessary halls, but we hope to have that after this coming convention which will be held in two weeks.

Mr. Mathews then gave a brief history of the formation and rise of the mutual fire insurance organization of the Hardware dealers of Minnesota. He said it was the first Hardware mutual fire insurance company that was formed. He said the business had steadily grown from year to year and that the business increased last year 65 per cent.; that the dividends had been increased five per cent. a year, so that at the present time all policyholders having policies expiring during 1907 would get a rebate of nearly one-half—the actual figures being forty-five per cent. of the amount of the premium paid in on writing the policy. That the amount of those dividends payable this year was quite a snug sum, amounting to something more than forty-one thousand dollars on the policies expiring this year.

You said that one of the points of strength in a mutual fire insurance company of this kind was in the low expense account, the expense being less than one-third of the average expense of old line companies; that the expense last year averaged about twelve per cent., while the expense of carrying insurance with an old line company is thirty to forty per cent.

Mr. Mathews spoke of the fire insurance companies that had failed on account of the San Francisco disaster, which previous to that time, were considered the strongest in the country. He said such disasters could not befall a mutual company of this kind on account of the manner of the mutuals in scattering their risks.

President McKenney introduced William H. Hahn, president of the Missouri Retail Hardware Dealers' Association.

ADDRESS OF W. H. HAHN.

Mr. President and fellow neighbors: I can assure you it is a pleasure to me to meet with you this afternoon. I came all the way from St. Louis. I come from Missouri, and I came here to be shown. We had a convention there a few weeks ago and I was elected as president. Now, I came here mostly to see how you ran your convention. With one feature, especially that Show feature, I want to congratulate you. It is certainly a success, and you have only had one mishap and that was that fire. Another thing, I think, a Show of this kind should be run for about one week, in order to make it a success for the manufacturers and the jobbers, because they have no doubt gone to a great expense. I have attended a great many Hardware conventions and I have never seen such splendid exhibits as are shown here to-day. I was certainly surprised.

Next year, if the Almighty will save us, we intend to have a new coliseum in St. Louis that will eclipse anything in the country, and that will be completed, I think, in time for our State convention in Missouri, and we want to make it as great a success as yours.

I want to extend to the Illinoisians a hearty welcome at our next convention in St. Louis. Again, I thank you, and I am glad to see this magnificent gathering. We had a meeting in Kansas City two weeks ago and we certainly had a good time and we discussed a great many things.

I have been a crank on fighting department stores. I will show you how we stand in St. Louis: To-day we can say one thing, that there is not a jobber in the city today that retails. We are making a strenuous fight all through the State with the country dealers and we are doing all we can to protect them as far as their catalogue houses are concerned. It is the duty of the jobbers to look after you retailers.

President McKenney called the attention of the meeting to the fact that it was an executive meeting of the Association and he asked all who were not members in good standing of the Association, or who were not visiting delegates from other State Associations, to retire from the room.

The Association then took up the consideration of the subjects of an executive character.

Digitized by Google

The Association proceeded to discuss the points suggested in the report of the Investigating Committee at the morning session. One of the questions taken up was that of excluding jobbers who were also retailers from the Association. A delegate from Decatur moved that hereafter they be excluded from membership in the Association. The motion was seconded and considerable time was consumed in discussing the proposition.

A delegate from Chicago offered an amendment to the motion that it should not refer to those retailing jobbers who were already members of the Association.

A delegate from Rock Island moved that the whole matter be laid on the table. A standing vote was taken on the motion to lay on the table and owing to the difficulty in making the count a vote by ballot was taken, which resulted in 101 votes in favor of the motion to lay on the table and 104 votes in the negative, and the motion was declared lost to lay the question on the table.

Thereupon the Chicago delegate offered the substitute for his amendment that the subject be referred to the Executive Committee with a request that that committee report back to the Convention the next morning their approval or disapproval of the proposition.

This motion being seconded and put, resulted in it being unanimously adopted, and the matter went over for consideration until the next morning.

The Auditing Committee reported that they had examined the books of the secretary and treasurer and found the same correct.

Mr. Johnson, of Kewanee, was placed on the Nominating Committee in place of Mr. Howe, who was unable to serve.

Reports of Committees were called for.

The question of sending the entire delegation, which the Illinois Association were entitled to, of eleven delegates, to the National Meeting in Boston in June, was discussed. On motion this question was laid on the table until the next morning.

The convention then adjourned until 9.30 A. M. Friday, February 15, 1907.

EXECUTIVE SESSION.

FRIDAY MORNING, FEBRUARY 15.

The convention was called to order by the president at 10 A. M. The first business was the report of the Executive Committee on the subject of excluding retailing jobbers from the Association. The secretary read the report as follows: The Executive Committee find that the question involved is contrary to Section 1, Article II, of the constitution as follows: "Any person, firm or corporation which is engaged in the retail Hardware business in the State of Illinois, in good standing and carrying a general assortment of Hardware, may become a member of this Association by subscribing to the constitution and paying the annual dues required by the by-laws." President McKenney said: "The only ruling that the chair sees he can make upon the question is that it is entirely out of order, and there will have to be something else done before you can change the constitution in the matter."

On motion, it was decided that the Association send the required number of delegates to which they are entitled to the Boston convention, and pay their expenses.

On motion, the city of Peoria was decided upon in which to hold the next convention.

The report of the Committee on Resolutions was called for, and Grant Porter of that committee presented a number of resolutions which had been prepared for the recommendation of the Association, among which were the following:

WHEREAS, It has pleased an all-wise Providence to remove from this earthly life and from the family of A. H. Abbe a most beloved daughter, thereby bowing down in grief a most worthy member of a neighboring association, and an honored member of the joint committee of wholesale and retail Hardwaremen; therefore, be it

Resolved, That as an Association, we express the sympathy we feel, and the kind regard we have for our brother dealer in this affliction, and it is hereby resolved that a copy of this resolution be placed on our records and a copy prepared for publication.

REPORT OF THE SPECIAL FREIGHT COMMITTEE.

C. M. Hurst, chairman of the Special Freight Committee, presented the report of that committee. He said: "This committee has fallen into innocuous desuetude, for there is nothing more for it to do. On the first of July, 1906, the Railroad Warehouse Commission made a horizontal reduction in the freight rates. An effort was made to secure a forty per cent. reduction in freight rates within the State of Illinois, but it could not be done. I guess you all know when it comes to legislation it is generally a compromise between the two opposing factions. In this case, where one side demanded forty or fifty per cent., we were only able to obtain twenty. With an entire new board, and the rise in the value of labor and everything that goes to operate a railroad, I do not believe it is advisable to go back and try to get what we think is our due. A better plan is to wait a year or two. I believe you noticed yesterday that the railroads were talking of advancing the rates. There is one thing that I want the country members especially to do, and that is, to write to the secretary of the Railroad Warehouse Commission, Springfield, and get a copy of the little book that I have here. It will not cost but a postal card: "State of Illinois Railroad Warehouse Commission, Classification No. 10, Effective July 1, 1906." That is when the new rates went into effect. You have the classification here of every item. You have the mileage table. It will show you what you ought to pay exactly on every article that you handle for a given number of miles; that is, up to 300 miles. On motion, the report of the Special Freight Committee was adopted.

Mr. Williams, chairman of the Question Box Committee, proceeded to read the questions which had been handed him by various members for discussion. There were quite a number of them discussed and argued to the fullest extent, giving an opportunity for all the members to speak upon the subject.

Prof. Glessing read a paper on the subject, "What should be the relation of the retailers toward the jobber and manufacturer who supplies catalogue houses?" Mr. Glessing said in part:

Patronize our friends, namely, those who do not sell catalogue houses. It is a very difficult problem for the average retailer to tell where to draw the line or in which column to place the various wholesalers and manufacturers. We should also not forget the fact that the catalogue house trade is very nice and easy business, usually large sales and prompt payments, and is most naturally a serious proposition for the wholesaler to sacrifice such a large and profitable business, and while many jobbers stamp or print on their stationery the fact that they do not sell catalogue houses, it is a question in my mind whether very many of them adhere strictly to the rule, but when a manufacturer or jobber surrenders this large trade for the interest of the retailer he is surely entitled to loyal support in return.

There are a few widely advertised catalogue houses that carry no stocks whatever. They issue large catalogues and when an order is sent in to them it is taken to the jobbing house and it matters not how small it may be it is filled at the lowest jobbing prices. Thus we find the big jobbers helping along what is technically an illegitimate business—a trade secured by misrepresentation to the public. But it is not these small concerns that are the most odious and the most harmful to the small retailers of the land. It is the great houses—the ones with capital running up into the millions.

The fact that the retailers of this country handle about ninety-five per cent. of the goods manufactured and supplied by the jobbers should entitle them to a very serious consideration by the manufacturer and jobber, and they should do everything in their power to protect the legitimate dealers as against the upbuilding of illegitimate concerns whose ultimate purpose is not only to destroy the retailer but the jobber as well. Let jobbers refuse to sell the catalogue houses and refuse to handle the products of manufacturers who sell to them and let the retailers show their loyalty. That in my opinion would relieve the situation very much, if not effect a complete remedy.

President McKenney called for the report of the Committee on Nominations, who presented the following report, and recommended the selection of the members' names as officers for the ensuing year:

PRESIDENT—T. J. Matthews, Mt. Vernon.

VICE-PRESIDENT—E. L. Sommers.

EXECUTIVE COMMITTEE—C. N. Howell, Dixon; David Refior, Ottawa; E. L. Douling, Danville.

LEGISLATIVE COMMITTEE—C. H. Williams, Streator, H. P. Harris, Monticello; Charles Albright, Newton; J. L. Smith, Chicago; John T. Noftsker, Rock Island.

INVESTIGATION COMMITTEE—O. H. Howe, Streator; E. B. Johnson, Kewanee; C. G. Gilbert, Oregon; C. L. Austin, Georgetown; George Tomlinson, Kinmundy.

DELEGATES TO NATIONAL CONVENTION—T. J. Matthews, E. L. Sommers, L. D. Nish, H. G. Cormick, C. H. Williams, G. R. Lott, E. H. Hauss, Grant Porter, William Bittel, L. D. Ray, Mr. Cole.

The report of the committee was accepted, and on motion the secretary was instructed to cast a ballot for the members of the Association for the officers named. This was done, and they were declared duly elected.

PRESIDENT MCKENNEY: Mr. Matthews, I wish to congratulate you upon your success to succeed me in this office, and I wish to tell you, gentlemen, that I feel it an honor to be succeeded by a gentleman of Mr. Matthews' character, influence and ability. You have got a good president who can always be trusted.

Mr. Matthews came upon the platform and took the chair.

Mr. Matthews addressed the convention and said:

ADDRESS OF PRESIDENT MATTHEWS.

Mr. Chairman and Gentlemen of the Convention: I am not a speaker and I have never made an extemporaneous public speech in my life and I am unable to do so now. This honor has come to me unsolicited, and being a surprise to me, I have not had time to prepare anything for it, but I want to assure you, gentlemen, that I appreciate this honor, because it is a great honor to be president of the great Illinois Retail Hardware Dealers' Association. I thank you for the confidence you show me in electing me to this position. I also desire to thank Brother McKenney for the kind words he has spoken in my behalf, and it shall be my endeavor to live up to them and try to deserve them, although I fear you have set me at a big task. I am proud to be able to succeed such a worthy chairman of this convention. I thank you.

S. Westerfield, of the Illinois Retail Merchants' Association, being called upon by President Matthews, addressed the convention briefly upon the feasibility of having a committee appointed to confer with the central body of the Combined Retail Merchants, asking the manufacturers of all lines to refuse to sell catalogue houses.

The convention then adjourned *sine die*.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

The convention of the North Dakota Retail Hardware Association has been postponed until March 12, 13 and 14, concerning which C. N. Barnes, the hard-working secretary, has this to say:

"We take pleasure in advising you that we have had almost perfect weather in the Northwest for the past ten days and with every indication at this time that the backbone of winter is broken and that this pleasant weather will continue from now on.

At all events feeling such to be the case we have selected March 12, 13 and 14 as dates for our postponed meeting. One of the objects in selecting these dates was to permit those who desired to be with us that have had engagements at the other meetings. As we anticipate quite a number of exhibits, these dates will allow sufficient time for freight shipment. The railroads have granted the same rate for our new dates as heretofore made us.

As several new features of especial interest to the trade have been arranged for in addition to our first program we anticipate a larger attendance at this time than we anticipated we would have at our postponed meeting.

A GREATER AND BETTER LINE.

Announcement is made that the H. F. Brammer Mfg. Co., of Davenport, Iowa, the extensive manufacturers of Family Washing Machines, have recently acquired under a royalty basis, the exclusive right for the manufacture and sale of the entire line of washing machines heretofore placed on the market by the Benbow-Brammer Mfg. Co., of St. Louis and Davenport.

With this well-known and superior line of machines added to the "O. K." line of machines, it places the H. F. Brammer Mfg. Co. in an enviable position, as that company no doubt now possesses the largest and most desirable line of Family Washing Machines placed on the market by any manufacturer of the United States. Their line now comprises fifteen different styles of rotary and lever machines and new types will shortly be added. It is evident from the above that any one interested in washing machines may be quite certain of being able to obtain what is desired in this line from this well-known concern.

WISCONSIN RETAIL HARDWARE ASSOCIATION

The Eleventh Annual Convention of the Wisconsin Retail Hardware Association was held at Milwaukee February 6, 7 and 8. The members assembled at 10 A. M. Wednesday, February 6, in the large assembly hall of the new Public Service Building. Out of a membership which, with recent accessions, now totals not less than 625, more than one-half were present.

After calling the meeting to order at the opening session on Wednesday morning, President Emil Teitgen, of Manitowoc, introduced Milwaukee's young mayor, S. M. Becker, who welcomed the Association to Milwaukee in a characteristic address of some length. President Teitgen thanked the mayor in behalf of the Association, and said: "We have held our meetings in your city for ten years, and always look forward to these gatherings with pleasant anticipation. It is the hospitality of your people and the enterprise of your business men, headed by just such men as you, that has made Milwaukee famous as a great convention centre. Now we have incorporated in our by-laws that our annual meetings shall be held in the city of Milwaukee on the first Wednesday in February of each year, and I hope that we shall with increased membership gather here from year to year, and that it will be the pleasure of our members to have you greet us as mayor of Milwaukee many more times."

The president then delivered his annual address. He spoke in part as follows:

THE PRESIDENT'S ADDRESS.

Gentlemen of the Wisconsin Retail Hardware Association: I beg to welcome you to this our eleventh annual convention in our magnificent new quarters. It affords me great pleasure to note the progress we have made within the last ten years. I believe exactly ten

EMIL TEITGEN, EX-PRESIDENT.

years ago forty of us met at the Republican House. We had our first convention there in a small room. To-day we occupy the largest hall in the city of Milwaukee with a representation of six hundred or more.

Regarding the past year I wish to say that

WE HAVE MADE GREAT GAINS.

We have increased in membership, importance and influence. Our National Association has the confidence of the jobbers and the manufacturers.

We have, at least for the time being, defeated the Parcels Post Bill, the passage of which threatened the destruction of the present economic conditions of this country; and we have made other gains too numerous to mention. But as the years roll by we are confronted by

NEW CONDITIONS AND PROBLEMS.

which must be met and solved, many of them of such magnitude that the individual cannot cope with them and they can be brought to a successful issue only through associated effort. Here, gentlemen, lies the strength of our Association, but this strength and benefit—the measure of it—depends entirely on the loyalty of our members—perfect concert of effort, unbroken unity, going hand in hand in all our business relations, reaching down to the most unimportant item we purchase. This in time will bring the best results to our members, for this translated into French would mean, "We must together sticken, each by each, and we will get there."

Gentlemen, I would recommend that more stringent efforts should be made that we may be

MORE LARGELY REPRESENTED IN THE LEGISLATIVE AFFAIRS

of this country by men of commercial training instead of legal training. To-day our law-making bodies are too largely composed of men in the legal profession and naturally the laws that appeal to them are the ones by which they profit most. We want more laws that apply to us for the same reason.

I should further recommend that some attention be given the matter of transportation, to the end that we may have some rate reform, and more particularly improvement in service. Delays in transit have become a serious proposition to us all. I have had stoves on the way this past Fall eleven weeks, and when they came they were rusted so that I could not accept them. The company will not take them back and the railroad company will not pay for them. Some remedy should be devised. Gentlemen, this is a matter of importance.

I should further recommend—and I would urge this—that more persistent efforts should be made towards the organization of local associations in cities and towns; the perfection of the idea that we are in business for a living and not to kill off our competitors;

THE BUILDING UP OF A SPIRIT OF FRIENDLINESS

and good will towards our competitors, a willingness to join hands and help one another, instead of destroying, thus broadening our views, broadening our business and broadening our life and affairs at home. Life is but short and we should make the best of it.

Gentlemen, one of the very important and most direct benefits that our Association offers its members is our mutual fire insurance.

OUR INSURANCE IS POSITIVELY SAFE.

Our company is founded upon correct and sound business principles. It is managed by safe and conservative business men—as good as we have got anywhere in the world, and it is furnished to you at cost.

To conclude, gentlemen, I wish to say that, besides seeing the exhibits, I hope you will make good use of your time in visiting one another, and I hope, gentlemen, that by the time this convention closes each of you will become personally acquainted with every member here, including your competitors.

CONVENTION COMMITTEES.

At the conclusion of the president's address, Secretary Peck announced the list of committees prepared by the Executive Committee, as follows:

C. A. PECK, SECRETARY-TREASURER.

COMMITTEE ON TRANSPORTATION—E. H. Ram, New London; R. Puchner, Wittenberg.

AUDITING COMMITTEE—J. C. Lewis, Antigo; William Rothsack, Manitowoc.

PRESS COMMITTEE—J. L. McNamara, Janesville; I. B. Weinschenk, Plymouth.

COMMITTEE ON RESOLUTIONS—O. A. La Budde, Oconto; Mr. Murdock of Murdock & Jones, Union Grove.

QUESTION BOX COMMITTEE—J. Murphy, Racine; Fred Herrenbruck, Milwaukee.

LEGISLATIVE COMMITTEE—L. M. Nash, Grand Rapids; E. A. Dewey, Kenosha; A. Heins, Tigerton; C. Pflugardt, Milwaukee.

COMMITTEE ON GRIEVANCES—O. P. Schlafer, Appleton City; J. Montgomery, Wausau; L. Findesen, Green Bay; J. W. Jones, Racine.

SERGEANT-AT-ARMS—A. Schupinsky, Milwaukee.

SECRETARY'S ANNUAL REPORT.

The annual report of Secretary-Treasurer C. A. Peck, Berlin, was filled with rare facts and figures, which furnished the best evidence of the Association's successful growth and achievement, and was presented with the enthusiastic interest that characterizes this official's untiring efforts for the advancement of the general welfare of the organization. We give the following extracts from the report:

One year ago I reported 531 members, 32 of which have in the meantime either gone out of business, sold out, or dropped their membership. We have taken in 119 new members, so that to-day (January 19) we number 618 members upon our rolls. Complaints have been few and far between, and so far as I know have been satisfactorily adjusted.

On February 26 of last year I mailed 325 petitions to Senator Spooner protesting against the passage of the Parcels Post Bill, then pending, and twice since then I have circularized the State—viz., June 1 and October 16. On January 1 of this year I mailed 998 copies of our present programme.

In regard to dues, there were on March 5th 164 in arrears, which by July 5 was whittled down to 27. I then made drafts on these and 24 of them were paid.

My work for the insurance company has brought me in close con-

Digitized by Google

tact with many of our members all the way from Sturgeon Bay to Kenosha, and I have enjoyed meeting them on their own stamping grounds. Our insurance report shows that ten of our members suffered to a greater or lesser extent by fire, and I think one or two losers who were not insured with us should be added to our number. I have made eighteen trips to different parts of the State and have taken in many new members largely because of the benefits offered by our fire insurance company. That we have made a great success of this feature is not so much due to your secretary's efforts as to your own hearty co-operation. When I tell you that I wrote over $120,000 in January and have on file in our office $36,000 more to write at this time, I think you will agree with me that our work has not been entirely in vain. I confidently expect to pass the two million mark the present year, but that will depend very largely upon you.

FINANCIAL EXHIBIT.

The Association's financial exhibit as shown in the Treasurer's Report represents a measure of prosperity that bespeaks good management and substantial co-operation on the part of the membership. With all liabilities liquidated, including salaries, expenses and National Association dues for 1906, there remains in the treasury a surplus of $2,215.92. It is estimated that this sum will be augmented by approximately $1,000 from dues and other sources received from the meeting just held.

Secretary Peck read an invitation from certain jobbers and manufacturers of Milwaukee to the Association to attend the Alhambra Theatre on Thursday evening, February 7. The invitation was signed by the leading Milwaukee business establishments. An invitation was also extended by the Schlitz Brewing Co. for the delegates to visit their plant. On motion, the invitations was accepted.

ADVERTISING.

An address by O. B. James, of Richland Centre, on the subject of "Advertising," proved a very attractive, instructive and original presentation of this much talked-of subject. Mr. James spoke in part as follows:

What is advertising? To the retailer it is that science of publicity which will bring prospective purchasers into his store. This is accomplished by handling a good line of goods at right prices, honest and courteous treatment of your customers, the proper display of goods, and the

JUDICIOUS USE OF PRINTERS' INK.

In most of these elements of success you are adepts or you would not be here to-day. It is in the last mentioned, the judicious use of printers' ink, where many of us fall down. It is the printer and the brain behind the printer that has made the catalogue house what it is to-day. We have both the brain and access to the ink. Why not use them? Let us make a study of newspaper publicity. Emulate what is good in the catalogue house advertisements and eradicate that which is bad. Read the best that we find treating on the subject, but not accepting as gospel all that is written.

I noticed in *Printer's Ink* of November 28 an excellent article in which appeared this statement: "The moment you begin to talk price, you take the reader's mind off what he is going to receive and center his attention on what he is going to give for it." This is a beautiful psychological theory, but does it apply to the retailer? Doesn't the retailer want to appeal to a man's pocketbook? What more direct route will you find to his heart?

What would our big department store advertisements amount to if they did not advertise prices? What is it that the bargain seeker first looks for? Price. A priced ad. is the only ad. that will sell goods. The price quoted and the text of an advertisement are its most important features. In composing the text avoid mentioning too many good points of the article in the same ad., as you would avoid mentioning too many articles. The reader is apt to become confused. Better mention one article at a time—its principal point of superiority—and let your arguments emphasize that one point. This, of course, would not apply to advertisements of special sales, or holiday advertisements, in which you wish to mention several items. In that case have each article ruled off by itself, making the appearance of distinct and separate advertisements. There might, too, be an objection to quoting prices, at least specific prices, on holiday goods. A prospective purchaser might prefer to choose an article the value of which was not generally known, especially to the recipient of the gift.

* * * *

UPPER RIGHT HAND CORNER ON FIRST PAGE.

The first thing of importance after selecting the paper or papers in which you wish to advertise is the proper selection of space. Now, the best space obtainable in a country newspaper is the upper right hand corner. In the large cities, however, that space is not for sale, though it can be had in most of the country papers. The reason that this space is the best is because the paper is folded with that page out. This page is always out, and it is always laid down with the upper right hand corner up. The newsdealer places it with that page up because it is always upon that portion of the page that the name of the paper appears, also its date.

I think it is advisable as a rule to advertise one thing at a time, and to advertise it in several ways; that is, have that

ONE ARTICLE IN YOUR DISPLAY

and then refer to it in the local news. When you make a contract with the publisher for this space it is a good idea to have the privilege of using six to twelve lines local space each week. If you are advertising a Steel Range, for instance, have the local notices read something like this:

> Mr. John Johnson, a prominent citizen of the town of Clyde, was in town last Saturday after one of those famous Ranges sold by Jones & Co.

Farmers like to see their names in print, and a notice like this each week helps wonderfully.

* * * *

WRITE SOMETHING WORTH READING.

In conclusion, there is one thing I wish to emphasize, and that is that people are reading advertisements; you do yourself. You pick up a magazine and you find the advertisements in these magazines almost as interesting as the reading matter. We must meet the readers half way; we must write something worth reading.

MUTUAL FIRE INSURANCE.

O. P. Schlafer, president of the Wisconsin Hardware Dealers' Mutual Fire Insurance Co., in a short address called the attention of the members to the remarkable growth the company had enjoyed and the sound financial basis on which it now rests. Starting three years ago with the smallest amount of business permitted under the State laws, the company now has policies in force of nearly $1,250,000. Despite exceptionally large losses during last year, which aggregated $7,600, the stockholders at their last meeting were able to pass a resolution under which forty per cent. will be returnable on all policies expiring during the year 1907. Over $1,000,000 additional insurance was pledged at this meeting.

STOVE SALESMANSHIP.

A paper on "Stove Salesmanship" was read by Henry Wernecke, of Manitowoc, in which he emphasized the necessity of the salesman having a perfect knowledge of his line, and the ability to demonstrate his goods in an effective way.

M. L. Corey, secretary of the National Association, having just arrived from attendance on the Kentucky Retail Hardware Dealers' Convention, held at Louisville, was introduced and made a brief address.

Mr. Nash, of Grand Rapids, addressed the convention on the subject of the manufacture of Binder Twine by convicts in the State Penitentiary. He expressed himself as favoring legislation providing for such manufacture, and recommended that where such bills are introduced, members of the Retail Hardware Associations should use their influence to secure their passage, and co-operate with the Implement Dealers' Associations to that end. Mr. Fink, speaking on the same subject, took the ground that such employment of Penitentiary convicts was desirable not only for economic reasons, but also from a humanitarian standpoint, as the confinement of prisoners in idleness is the refinement of cruelty and punishment.

NEW OFFICERS.

The election of officers for the ensuing year, resulted in the unanimous choice of the following:

PRESIDENT—J. Kornely, Milwaukee.
VICE-PRESIDENT—James Murphy, Racine.
SECRETARY-TREASURER—C. A. Peck, Berlin.

O. A. La Budde, Oconto, and O. B. James, Richland Centre, were elected members of the Executive Committee to fill the vacancies of the expired terms of James Murphy, of Racine, and H. F. Krueger, Neenah.

RESOLUTIONS.

The following resolution recommended by the Committee on Resolutions was among those which were adopted:

WHEREAS, It is represented that the railroads enforce the rule of charging demurrage after an expiration of forty-eight hours, and that said railroads do not guarantee service of deliveries at a specified time; therefore, be it

Resolved, That it is the sentiment of this Association that a rule or law binding only one of the parties is unjust, and that we believe demurrage charges are just, and also believe that the railroads should pay to, or rebate, us for not delivering goods within a reasonable time. We are in hearty sympathy with the National Association in its efforts to adjust this inequality, and we request our Congressmen to favor any legislation in securing a remedy for said unjust ruling.

A large number of exhibitors took advantage of the opportunities afforded by the Convention to display their products, a fine display of them being a popular part of the whole affair.

HARDWARE DEALERS' FIRE INSURANCE COMPANY OF WISCONSIN.

The annual meeting of the Hardware Dealers' Fire Insurance Company of Wisconsin was held in the assembly room at the Republican House, Milwaukee, on Tuesday, February 5, at 2:30 p. m., and brought out a large number of interested dealers, over one hundred being in attendance.

President O. P. Schlafer called the meeting to order and the reports of the officers showed the company to be in an excellent condition. The amount of business written in 1905 practically doubled that of the previous year, which was the first of the company's existence, and the business was again doubled last year, making an admirable showing.

The officers of the company were all re-elected, as follows: President, O. P. Schlafer; vice-president, R. C. Murdoch; secretary, C. A. Peck; treasurer, H. L. McNamara. Messrs. Schlafer, Peck and McNamara were also re-elected directors for three years

STEVENS ACCURACY.

We are gratified to say that at the third annual tournament of the Indoor .22 Caliber Rifle League of the United States, held at Rochester, N. Y., January 28-February 2, Stevens and Stevens-Pope Rifles and Stevens Rifle Telescopes made an unparalleled showing and practically won everything in sight. This annual tournament is of great importance and crackshots from all sections of the country competed.

1st.—L. P. Ittel, shooting a Stevens-Pope Rifle, fitted with Stevens Telescope—score—2465.

2nd.—A. Hubelek, shooting a Stevens, equipped with Stevens Telescope—score—2464.

3rd.—R. Gute, shooting a Stevens-Pope, fitted with Stevens Telescope—score—2461.

In the Continuous Match, full scores were made by L. P. Ittel, A. Hubelek and R. Gute—*all using Stevens Rifles.*

Telescopes were used in this event as in all other matches of the tournament and were decided factors in raising records and making top notch scores.

First honors on the Bull's Eye Target were won by T. H. Keller, who shot a Stevens Rifle, equipped with Stevens Telescope. The Honorary Target was also a Stevens victory, as was the J. R. White & Co's special prize. This was secured by L. P. Ittel, who shot a Stevens-Pope Rifle. The remarkable series of triumphs on every target, illustrates anew that for best results, the Stevens are absolutely indispensable. Expert marksmen shooting their popular make, and using in addition a Stevens Telescope, cannot be defeated. Stevens Rifles and Pistols hold more records for accuracy than all other makes combined.

DINNER OF THE NEW YORK WHOLESALE HARDWARE SALESMEN.

The wholesale Hardware salesmen of Greater New York participated in the first banquet of the kind given in this city in the rooms of the Hardware Club, Saturday evening, February 9. There was a reception from 6 o'clock until the announcement of dinner, about 7.30 P. M. This customary function was thoroughly appreciated by the salesmen and guests present, who while long acquainted in many instances, yet availed themselves of this occasion as an enjoyable opportunity for renewing and initiating friendships. It was realized by the Dinner Committee that such a gathering would serve to stimulate and perpetuate the spirit of good fellowship along the same lines as actuated the promoters of the Hardware dinner in 1892, which brought together the leaders in the trade and made possible the Hardware Club.

THE COMPANY.

While the company, nearly 170 in all, was primarily an assemblage of Hardware salesmen, there was a goodly representation of principals of leading Hardware houses. A flashlight photograph was taken of the company as soon as the guests were seated, after which an excellent dinner was enjoyed.

DINNER COMMITTEE.

The Committee of Arrangements was as follows:

Fred L. Stellwagen, Sargent & Co.
E. S. Massey, Sargent & Co.
George W. Eadie, Harmon & Dixon.
Sol. Schoenhof, P. & F. Corbin.
Charles H. Naylor, Yale & Towne Mfg. Company.
E. T. Lanterman, Russell & Erwin Mfg. Company.
George L. Swartwout, Corbin Cabinet Lock Company.
W. W. Crowell, Benjamin S. Alder Company.
W. H. Van Kuren, Reading Hardware Company.
E. A. Tissot, Underhill, Clinch & Co.
Benjamin S. Alder, chairman.

GUESTS.

The guests at the speakers' table included the following gentlemen: Edward C. Van Glahn, Henry R. Towne, George H. Sargent, Webster R. Walkley, R. R. Williams, George W. Corbin, J. Leonard Varick, William A. Graham, Harry W. Harmon, Arthur G. Sherman, Frederic E. Underhill, R. Lamb, W. Ludeke, Edward H. Darville and A. H. Chamberlain.

TOASTS.

After coffee and cigars the toastmaster, Edward C. Van Glahn, a former president of the Hardware Club and head of White, Van Glahn & Co., called the assemblage to order and in an apt and humorous vein paved the way for the stated addresses of the evening. He then introduced Henry R. Towne, to whom was assigned the toast, "Contrasts."

Mr. Towne made comparisons between manufacturing and business, as now conducted, with a period nearly two score years ago, when the speaker entered the Hardware field. He emphasized the greater opportunities of the present, as contrasted with the earlier years, referring to the increase in population, wealth, development and buying power, to the expanded markets, both domestic and foreign, and the higher levels possible in placing products. He dwelt especially on the enhanced spirit of *camaraderie* among Hardwaremen of all stations, as compared with the ultra conservatism of the '60's and '70's. Mr. Towne paid a warm tribute to "the dean of Hardware manufacturers," George H. Sargent, who was present as a guest and whose health was drunk at a later hour by the entire company. Mr. Sargent, it should be said, was greatly interested in the plans for the occasion, and rendered the Dinner Committee much assistance, both of an advisory character and in a more material way.

The next toast was "Salesmanship," which was responded to by Webster R. Walkley, who closed his address by reciting one of his own poems. The last formal address was given by Richard R. Williams, Hardware Editor of *The Iron Age*, who was called upon for "The Editor's Views." In addition to the regular toasts, George W. Corbin, of P. & F. Corbin, was introduced by the toastmaster and responded with characteristic ability and humor. The speeches were interspersed with music, both instrumental and vocal, the latter including quartettes and solos.

An alphabetical list of the entire company, in the form of a table index, and accompanied by a souvenir menu and programme, was presented with the compliments of *The Iron Age*, to which we are indebted for the above report.

✤

Both wise men and fools shake their heads over the danger of some other man handling a cold bottle, and Elbert James, of Enid, Okla., is a living example of the danger, as he suffered a four inch cut in his arm the other day from handling a pop bottle.

DOG TOGGERY FOR THE HARDWARE STORE.

BY FRANK A. GANNON.

The Hardwareman finds a good friend in "man's best friend," the dog. In other words, many Hardware dealers are making money on toggery for dogs, such as collars, leashes, whips, boots and blankets. And let not muzzles be forgotten, for the State of Massachusetts has recently ordered that every dog within its precincts be muzzled, confined or killed, so that the muzzle makers have been enjoying a season of unexampled prosperity.

There are big possibilities in the dog collar business, not of the variety of Col. Sellers' dreams, but strictly legitimate and inviting opportunities. Some men love their dog so much that they would share their last crust with him, and some women are so foolish that they want their pets to look as handsome and stylish as themselves, consequently a sum of money, of size even sufficient to interest Wall Street, is spent on dog collars and toggery every year.

Witness a particular case: A Boston dog lover, rejoicing over the record of his favorite bull terrier, had made for him a collar of finest leather, adorned with gold studs, at a cost of $132. This collar he took to the jeweler's and had set with diamonds, and the collar, worthy of a princess, was displayed on the dog at a New York Show. The dog, by the way, was worth money, and his life was insured for $5,000, straight life policy, no endowments.

Gold and jeweled dog collars are by no means scarce, so there is a chance for the Hardwareman to throw his nails into the dump, and to put in a keg of gold, and a box of diamonds and other jewels, and make money in the dog collar business.

But, seriously speaking, many Hardwaremen in the dog toggery business are turning an honest penny, if not an honest dollar. The Hardwareman finds that the demand increases and styles change in dog furnishings just as the haberdasher finds that the demand increases and styles change in men's attire. "Like man like dog" is true. In days when men went uncollared, so did dogs; but, to-day, the fashionable man puts on an immaculate collar every morning, and the fashionable dog has his collar shined every morning. Man keeps up with the latest fashions in collars; so does the dog.

The styles and varieties of dog collars in the market to-day would surprise many persons. Representative Hardware firms carry thousands of dog collars in their stock. One manufacturing firm catalogues 2,500 different styles in dog collars, and makes some styles in four sizes and others in eight sizes. This firm keeps two men busy designing new styles and novelties.

Sizes range from dainty little collars, small enough for a bracelet for my lady's wrist, to collars that would encircle the waist even of the lady who fearfully admits that she is getting a little bit stout. The popular summer girl, who wishes a sporty dog collar for a belt, can get fitted at the Hardware store, for experienced young men say that she has but a twenty-two inch waist, while dog collars are made even to thirty-inch measurements.

Prices of dog collars range from a quarter of a dollar up to as much as a person wishes to pay. A dog lover paid $58 for three collars a while ago, and, recently, a Hardwareman got an order for a collar of white enamel leather, adorned with silver and gold studs, to be made according to the buyer's original design. The Hardwareman is now getting up his courage to fix a price for the creation.

Dog collars are made of all kinds of leather, of strap leather at sixty cents a pound, of a cream tanned leather at seventy-nine cents a pound, of imported patent and other leathers. Stout leather is used for the strap proper, and a soft sheepskin skiver is used for a lining. Special machinery and specially trained men make the collars. Just now, much brass is used for buckles, locks and studs.

Besides handling collars, the Hardwareman may sell dog whips, quirts, or Mexican whips, braided by Mexicans; chains as high as $35 apiece, dog blankets, moccasins and boots and other toggery, at various prices, and l t it be hoped, at a just profit. The Hardwareman who handles guns, cartridges and sporting goods certainly has an open chance for selling dog toggery, for, in the sports of the field and forest, the dog preceded the gun by centuries.

Dogs are more prized to-day than ever before, despite stingy landlords who class both dogs and babies among things forbidden in their flats. Every dog has his day and there are happy days for dogs, for proud and prosperous owners spend freely of their wealth for their pets, protectors, aids or friends. "Like man like dog." Correct attire for men—correct toggery for dogs is the demand of fashion.

And it's business for the Hardwareman.

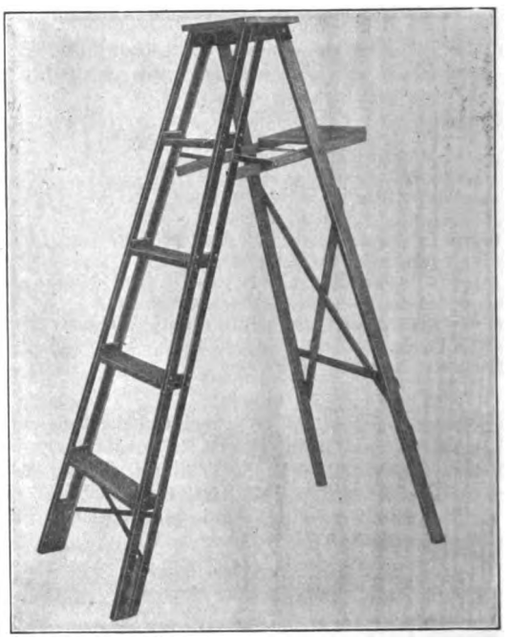
NEW GOODS AND SPECIALTIES

BUFFALO ELECTRIC BLACKSMITH BLOWER NO. 202.

Buffalo Forge Co., Buffalo, N. Y., have recently placed on the market the Electric Hand Blower No. 202, shown in the accompanying cut. It is designed especially for small shops, etc., on country circuits where the current cannot be depended upon with certainty, and where, if an electric blower were installed, it would also be necessary to have a hand-driven one to insure against emergencies. This machine comprises the manufacturers' well-known Buffalo Hand Blower No. 200, with an electric motor



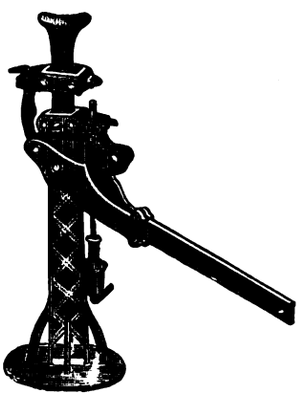
BUFFALO ELECTRIC BLACKSMITH BLOWER NO. 202.

mounted on a small platform within the tripod legs of the machine. This places the motor in an out-of-the-way, yet readily accessible, position. The fan spindle is continued through the dust-proof oil-case containing the gearing for the hand drive, and terminates in a small pulley, which connects with the motor by means of a round belt. The motors usually supplied are either 104-volt, 60-cycle induction type for alternating current or for 110-volt direct current, and are attachable by "lamp cord" to an ordinary 16-c. p. lamp socket as a source of power. If at any time it is desirous to run the blower by hand, the belt is removed and the machine becomes at once an easy-running, powerful blast blower. The power for the hand-drive passes through only two sets of helical and spur-cut gears finished on special machines, and running in an oil bath with the attendant minimum loss by friction. All bearings are bored and reamed in the solid metal, no liners being used. All machine work is done on jigs, and parts are interchangeable. The outlet of the fan casing may be turned at any angle desired, and the gear and fan case are also adjustable as to height. The Blower is furnished with blast piping, air gate and the Buffalo No. H. H. side and center blast tuyere. The application of the electric driven hand blowers is not confined to forge fires, however, as they are suitable for use in systems for driving out smoke or fumes through piping where exhaust fans are not practicable, furnishing air at moderate pressures up to 3 or 4 ounces through short piping systems, etc. A feature of the outfit is the low cost as well as the small weight and consequent saving in freight charges.

THE IMPERIAL STEEL STEP LADDER.

Shoecraft-Smith Mfg. Co., Sturgis, Mich., are the manufacturers of the Imperial Steel Step Ladder, which is constructed in a very strong and safe manner, making it extremely durable.

The front steel risers are made of Cold Rolled Bessemer Steel Bands, formed in angles. The Steel Head is made from same gauge of steel, and one piece forms three sides, which is also formed in angles. The Steel Risers are secured to the steel head by rivets, giving a much stronger construction than is possible to secure in all wood ladder. The Steel Saddles, as shown in cut of Steel Frame, are securely riveted to the Steel Risers, and into these saddles we place the steps. The Steps are held in position by four large screws which enter the steps from the under side. These screws in no manner support any weight that is placed on the step, which is invariably the case in all wood ladder. All steps are made of well seasoned stock three and one half inches wide. All wood parts are secured to the Steel



THE IMPERIAL STEEL STEP LADDER.

frame by rivets and machine bolts. The ladder is well braced so as to give greater strength and prevent any chance of lateral motion. All ladders are supplied with shelf and self-adjusting lock. Steel parts are enameled black and the wood parts a lemon yellow. These ladders are made only in lengths of 4, 5, 6, 7 and 8 ft. They are represented to the jobbing trade by W. R. T. Bush of Detroit, and C. M. Avery of Chicago.

EUREKA AUTO JACK NO. 3.

Eureka Mower Co., Utica, N. Y., are the manufacturers of the Eureka Auto Jack No. 3, which we illustrate as an important automobile sundry for the trade to handle. It weighs only four

EUREKA AUTO JACK NO. 3.

pounds, but has a lifting capacity of 2000 pounds. The handle, which is used to either raise or lower when in operation, is readily adjusted. To pump down, it must be under a weight of at least twenty-five pounds. To raise a weight, press down on the little steel lever and lock it out by turning to the right or left. To pump down, release the little spring lever.

BEMIS & CALL IMPROVED "S" WRENCH.

Bemis & Call Hardware and Tool Co., Springfield, Mass., in their constant endeavor to improve their goods and maintain the high quality in material and workmanship which enters into them, are now placing before the Hardware trade their Adjustable "S" Wrench, which has been greatly improved, and has become the standard among tools of this description, being a very useful device. It possesses all the advantages of the drop-forged

BEMIL & CALL IMPROVED "S' WRENCH.

"S" end wrench with the added advantage of having its jaws adjustable for different sized nuts. It can be used in cramped or awkward places on work when the ordinary monkey wrench would not answer. Among the noted improvements they have made in this wrench has been to make it thinner to adapt it better for use on thin nuts and check nuts. To easily distinguish it from wrenches of other makes, they have cast on the reverse side the raised letters "B. & C." The parts are all strong and durable, and carefully hardened and tempered, and when the old parts become worn out new ones can be supplied.

STEVENS' PISTOL-CLEANING RODS.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are placing on the market Pistol-cleaning Rods with bristle tops in fancy boxes of one dozen, as in the accompanying illustration.

STEVENS' PISTOL-CLEANING RODS.

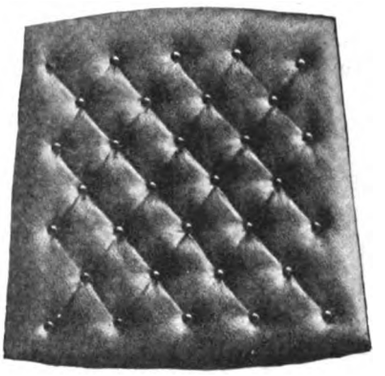
They are assorted, 22, 32 and 38 calibre in a box, thus supplying the retailer with a small assortment, arranged in a convenient manner, enabling him to have them in stock, know where they are, and to keep the goods clean and in perfect condition. The Company believe this will be appreciated by every retailer handling this class of goods, as they can be retailed at five cents each, at a very satisfactory profit.

TUFTED CHAIR SEATS AND PORCH CUSHIONS.

W. A. Busse & Co., 36-38 Union Park Court, Chicago, for whom H. Berkele, 43 Leonard Street, is New York representative, have added to their assortment a line of patented upholstered adjustable chair seats in the styles here illustrated, the peculiarity of which is in the fact that they are intended to be nailed permanently to the chair, and sold at a low price. The illustrations show their line. They are made of artificial leather and enamel cloth, stitched to cardboard faced with enamel cloth,

FIG. 1.

making it impervious to dampness. The filling is a cotton and jute felt, soft and pliable. The edge of cushion is bound all around with artificial leather gimp. This article can also be used for other purposes, but Fig. 1, which is a Porch Seat, should not to be nailed to a chair over an open seat frame. Fig. 2 is the Tufted Seat, and is covered with a fine quality of imitation leather, padded with cotton felt, is mounted on a strong 3-ply 3-20 inch veneer, tufted with pronged japanned rivets, which



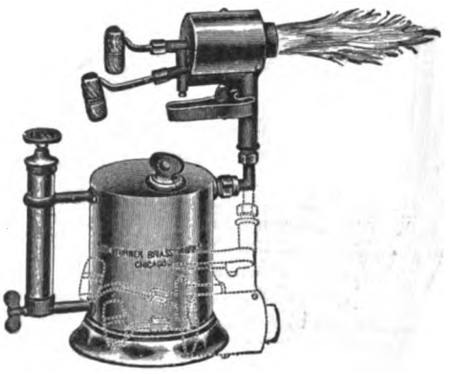


FIG. 2.

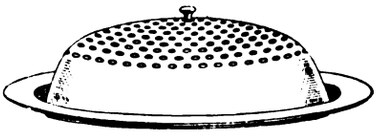
cannot pull out. This seat is to be nailed to chair with japanned metaline nails. Nails sufficient for each seat are sent with them.

THE TURNER NO. 96 DOUBLE-JET TORCH.

The Turner Brass Works, Franklin and Michigan Streets, Chicago, Ill., are the makers of the Turner No. 96 Double-Jet Torch, of which we give an illustration. It generates the maximum amount of heat possible to be obtained by mechanical means. The secret of the intense heat-producing power is found

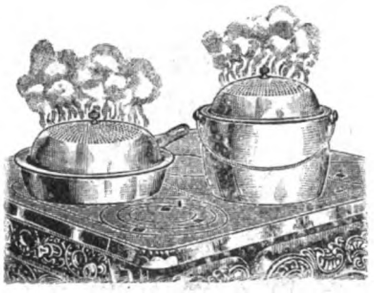


THE TURNER NO. 96 DOUBLE JET-TORCH.

in the capacity of the double-jet burner for doing work which has been deemed hitherto impossible. About 3,000 degrees F. of heat can be obtained from this Torch, which is claimed to be nearly double the capacity of single-jet burners. As illustrated, the burner is fitted with a wind-shield, which makes this Torch an ideal appliance for heavy outdoor work in windy or stormy weather. By the use of this Torch, brazing and other work of that character can be done out of doors, and the strongest wind affects it but slightly, as in this respect the Double-Jet Torch occupies a field entirely its own. The use of 74 degrees gasoline is recommended with this Torch. It is 11¼ inches high, and four inches in diameter; has a capacity of one quart, and a consumption of 1¼ pints per hour.

THE PERFORATED FRYING-PAN COVER.

The Kitchen Specialty Mfg. Co., Reading Pa., among their numerous popular specialties, are manufacturing the Perforated

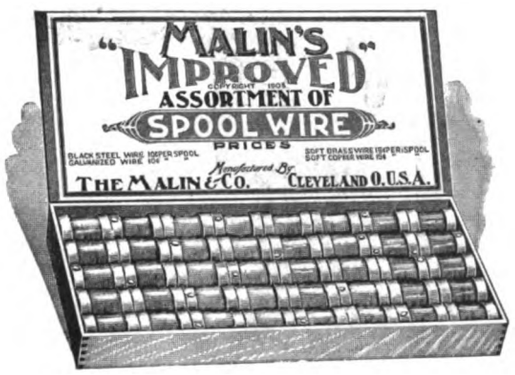


THE PERFORATED FRYING-PAN COVER.

Frying-Pan Cover, shown in the accompanying illustrations. It is constructed from the best material for the purpose, so that it is claimed to be the only lid that will prevent the sputtering of grease on the stove and surrounding surfaces without steaming

Digitized by Google

the article in the pan. By the peculiar construction of this cover, the heat, juices and other nourishing properties of the meats, etc., are retained in cooking, making the meat juicy, tender and



MODE OF USING IT.

digestible. By the free escape of the steam the article in the pan is not smothered and the article fried is neither tough nor watery. The cover being dome-shaped, it serves as an excellent colander, flour sieve, etc. It is made in four sizes. 8¾, 10⅛, 11¼ and 13 inches.

THE MALIN & CO.'S "IMPROVED" ASSORTMENT OF SPOOLED WIRE.

For a number of years The Malin & Co., Cleveland, Ohio, have been relied upon to furnish Wire in small lots nicely spooled, so that the consumer could obtain a small spool of wire covering his requirements upon demand, and at small expense. They have supplemented the old style by placing on the market their "Improved" Assortment of Spooled Wire, which has superseded to a great extent the old assortment. The "Improved" Assort-

THE MALIN & CO.'S "IMPROVED" ASSORTMENT OF SPOOLED WIRE.

ment contains a much larger percentage of brass and copper than the old retail stock. Spools are a new and excellent size. The retailer is insured a profit of not less than 100 per cent. This assortment contains 40 2-ounce spools, as follows: 2 spools each, Nos. 18, 20, 22, 24, 26 of annealed and tinned wire, soft brass and copper wire. Packed one dozen stocks to the case. Shipping weight, 100 pounds per dozen stocks. The trade is supplied through jobbers.

THE DIME SCREEN-DOOR CHECK.

Caldwell Mfg. Co., Rochester, N. Y., are the manufacturers of the Dime Screen-Door Check, shown in the accompanying illus-

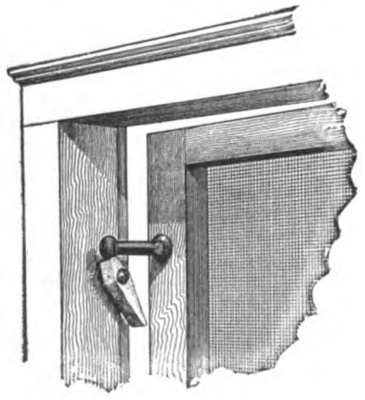


FIG. 1.

trations. Fig. No. 1 illustrates the closing door bringing the plunger on the door in contact with the top of the rubber bumper, throwing it up to position, as in Fig. 2. The door rebounds from the concussion and the rubber drops by gravity to the position as shown in Fig. 2, allowing the door to close. The bumper is molded rubber, tapered to give the greatest amount of

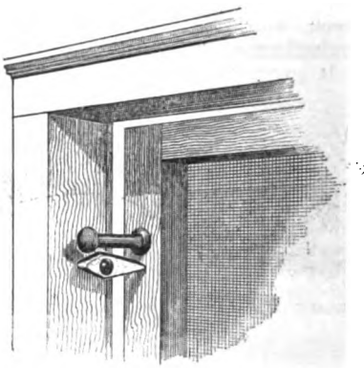

FIG. 2.

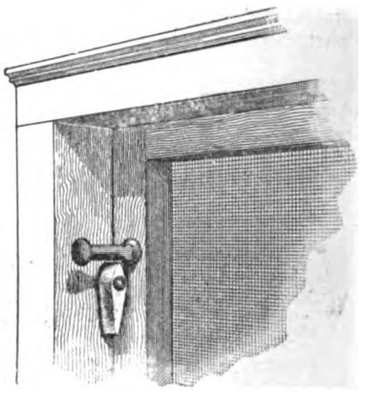
spring. It checks the door three inches from the closing point. The operation does not depend on the momentum of the door. It must always work, whether the door is opened wide or partly



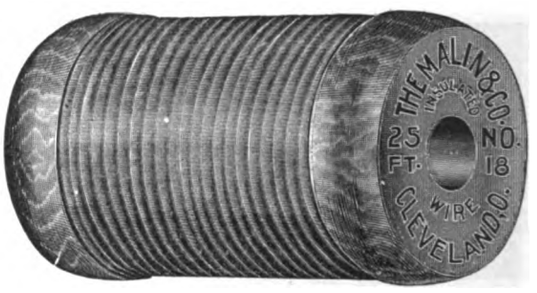


FIG. 3.

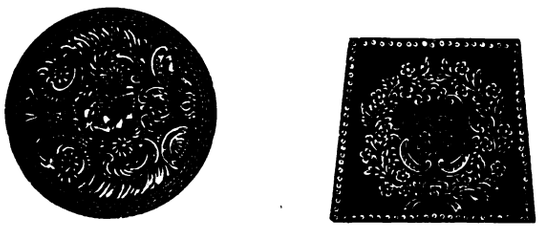
open. It is an extremely effective device, and prevents the great annoyance of screen doors slamming. Packed in attractive display boxes, ready for retailing. A card of directions exactly locating both screw-holes is packed with each Check.

SPOOLED INSULATED WIRE.

The Malin & Co, Cleveland, Ohio, among the wire which they put up in convenient quantities, are supplying Insulated Wire in assorted colors in twenty-five, fifty and one hundred feet spools, a convenience greatly desired by the trade. The small consumer of Insulated Wire always wishes to purchase



SPOOLED INSULATED WIRE.

it by the foot. He knows that he wants twenty-five, fifty or one hundred feet, but he knows nothing about the weight. Unless Spooled Wire is handled, the dealer must measure off the quantity wanted, roll it into a coil and weigh it before delivering. Insulated Wire on Spools obviates this trouble, pleases the buyer, for in using it he finds it easy to manage (it can be pulled from the spool as if it were thread) and it is more profitable to the dealer because he can get a much higher price for so neat a package than he can for an unsightly coil. Although these goods are manufactured for the convenience of the retailer, the jobber is depended on for their distribution.

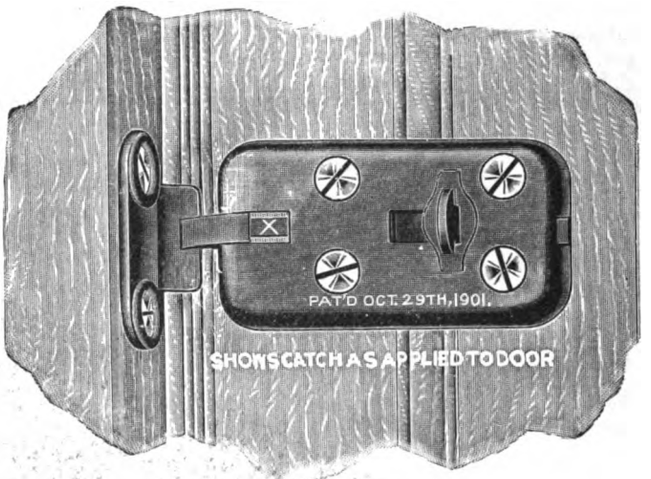
UNIVERSAL CHAIR SEATS.

The Universal Chair Seat Co., Syracuse, N. Y., are the manufacturers of the Universal Chair Seat, which we illustrate herewith. It is made from a composition substitute for leather, which it closely resembles, but it is always of the same color throughout, and is fadeless. Unlike leather, it will not scratch

UNIVERSAL CHAIR SEATS.

easily, and is free from many imperfections found in other seats. They are made of three kinds: The regular flat seats generally for repair work; round seats for stools, and cobblers' seats. A pair of shears is the only tool necessary, as the material easily cuts to fit any size of seat. The flat and round seats are made



"NEVER TOO LATE TO MEND."

in four colors: Red, black, olive and walnut, with a handsome design embossed in the centre of each seat. Cobbler seats are furnished in twelve and thirteen inch sizes. Three colors are supplied: Green, oak and mahogany finish. In addition, special sizes of the flat seats are made to order, provided the sizes are made up of straight lines, and the corners are either angular or rounded. In fact, a Universal Chair Seat can be put on a chair by anyone who can use a pair of shears and drive a tack. No. 43 gilt nails or leatherine upholstery nails should be used.

"UNIVERSAL" SCREEN-DOOR CATCH.

The Peck, Stow & Wilcox Co., Cleveland, Ohio, and 27 Murray Street, New York, are placing upon the market the "Universal" Screen-Door Catch, which is claimed to be the lowest-priced Locking Screen-Door Catch made. It is shown in the accompanying cut. Being made entirely of stamped wrought steel, it has an automatic friction catch with stop, and locks from the inside. It is automatic in action when closing door, and automatically releases itself by pressure of opening door, either from inside or outside. The latch bolt is so made that when secured by stop on the inside it cannot be unlocked from the outside; is placed upon the inside of the door, requiring no mortising or cutting for either lock or striker; is made in old copper finish and packed in boxes of one dozen each, complete with screws. Neat and attractive models showing the device, pocket size for salesmen's use, and larger size for store display, will be supplied, if wanted, without charge, with all initial or-

"UNIVERSAL" SCREEN-DOOR CATCH.

ders, to the extent of one model for each gross of catches. Electrotypes for newspaper or other advertising furnished on request without charge.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED FEBRUARY 4, 1907.

420,431. ATTACHMENT FOR SCREW DRIVERS. Marcus J. Bartlett, Providence, R. I.
420,459. SOLDERING APPARATUS. George W. Melcotte, Ithaca, N. Y.
420,461. SHUTTER FASTENER. Lyman W. Merriam, Fitchburg, Mass.
420,479. CROSSCUT SAW HANDLE. Moses E. True, Batavia, N. Y.
420,528. COMBINATION LOCK. Frank E. Young, Canton, Ohio.
420,558. LOCK. Thomas F. Keating, New York, N. Y.
420,564. SAD IRON. Joseph Rist, Kansas City, Mo.
420,589. WASHING MACHINE. Harlow W. Cook, Ottawa, Kan.

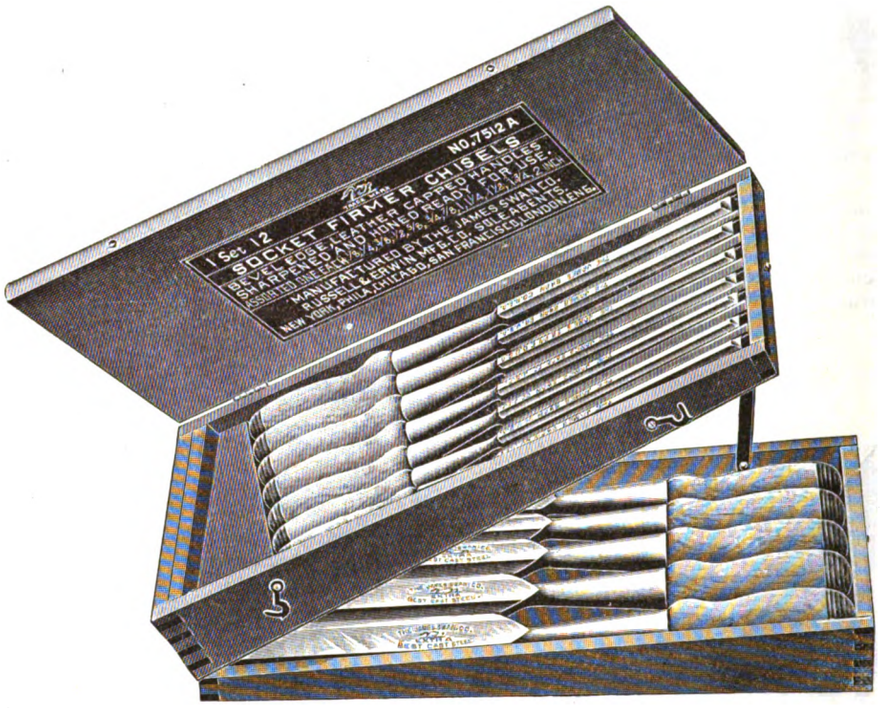
PATENTS ISSUED FEBRUARY 5, 1907.

842,946. FOLDING DUSTPAN. J. A. Delaney and J. Lawson, Orange, Mass.
842,964. WASH BOARD. F. Martin, Columbus, Ohio.
842,965. BRUSH OR MOP HOLDER. E. E. Masters, Columbus, Ohio.
843,047. KNOB OPERABLE LATCH MECHANISM. H. G. Voight, New Britain, Conn.
843,048. LOCK AND LATCH. H. G. Voight, New Britain, Conn.
843,081. HINGE. W. H. Fitzgerald, near Watertown, N. Y.
843,109. PIE PAN. B. C. Sabin, Chicago, Ill.
843,204. EXTENSION LADDER. J. R. Goddard, New Bedford, Mass.

PATENTS EXPIRED FEBRUARY 11, 1907.

420,956. WINDOW ATTACHMENT. Charles F. Ilcese, Chicago, Ill.
420,962. FASTNER FOR CLOTHES-LINES. Gerhard Reimers,, New York, N. Y.
420,997. HINGE. Christian C. Hess, Conestoga Center, Pa.
421,015. GATE LATCH. James Ramsey, Moon, Allegheny County, Pa.
421,023. PIPE WRENCH. William G. Bartlett and John W. McCoy, Camp Charlotte, Tex.
421,154. WRENCH. James H. Baker and George F. Shevlin, Saratoga Springs, N. Y.
421,197. CAN-OPENER. Albert B. Schofield, New York, N. Y.

PATENTS ISSUED FEBRUARY 12, 1907.



843,581. HINGE. C. J. Caley, New Britain, Conn.
843,585. WASHING APPARATUS. F. H. Cole, Groveton, N. H.
843,607. LOCK. N. B. Hurd, New Britain, Conn.
843,645. SOLDERING IRON. E. L. Veith, Chicago, Ill.
843,693. CYLINDER WRENCH. C. T. O'Hara, Deep Creek, Wash.
843,734. WASHING MACHINE. J. R. Carter, Augusta, Ky.
843,772. WAGON JACK. I. Shupe, Newmarket, Ontario, Canada.
844,043. COMPOUND TOOL AND TOOL HOLDER. O. S. Perkins, Newbern, N. C.

THE JAMES SWAN COMPANY'S NEW CATALOGUE.

The James Swan Company, Seymour, Conn., have issued a new catalogue of their goods under date of January, 1907. This catalogue contains twenty-five pages more than their last catalogue, and includes many new goods. The principal new items and features are sets of Chisels in patented Duplex Boxes and sets of Bits in patented Extension Boxes. Illustrations of these boxes ars shown herewith and illustrate their distinctive features.

A full line of Single Twist Auger Bits and Car Bits are shown, and also Ship Augers, Ship Car Bits and Ship Bits, both of which lines are of late manufacture by this company. Other new items added are: Belt and Lace Awls, a Combination Boring Machine and an Improved Expansive Bit, Superior Bit Holder, Protected Folding Handle Drawing Knife, and an Improved line of Screw Drivers. A comprehensive collection of Tools and Tool Cabinets is shwn, and the manufacturers claim that the line of Chisels, Gauges, Augers, Bits, Drawing Knives, Gimlets, Screw Drivers, Auger Handles, etc., is the largest under any one brand presented by any manufacturer to the trade. Russel & Erwin Mfg. Co., New Britain and New York are sole agents for the sale of above goods.

SWAN'S SOCKET FIRMER CHISELS IN SETS.

USE OF THE TERM "BORE."

In reply to a correspondent, the *Scientific American* explains the meaning of the word "bore" as applied to shotguns; more particularly when it is used in conjunction with a numeral as in speaking of a 10-bore, 13-bore or 16-bore shotgun. At the first reading, anyone who is familiar with modern rifles and heavy ordnance might think that the word "bore" was used as a unit of length, as when we say that a 50-caliber, 16-inch rifle is a rifle 25 feet, or 50 times the caliber (diameter of the bore) in length. But as a matter of fact, the term "bore," when applied to shotguns, is never used to indicate length, but always refers to the diameter of the bore. There is, by the way quite an interesting scrap of history attached to the term, which carries us back to an early period in the history of firearms. In the days of our forefathers, when rifle balls were spherical, and long, cylindrical, conicalheaded bullets and rifled barrels were undreamed of, the gunsmith adopted a curious but convenient method of designating the gauge or diameter of the bore. He expressed it by stating how many bullets, of a size that would fit a particular musket, would go to make a pound. Thus, a 10-bore musket would be one of such a bore that 10 of its bullets would go to make a pound weight; a 16-bore gun would be one whose bullets would run 16 to the pound, and so on. Hence we get the anomaly, that the larger denomination musket has the smaller bore. Although the day of the spherical bullet has passed away, and the only smoothbore remaining is the shotgun, the old method of designation has been retained.

BUSINESS BRISK IN BALTIMORE.

Real estate values have very much increased in Baltimore since the fire. The burned district is practically rebuilt. And the new buildings are, hardly without an exception, finer and better than those that were destroyed by the great fire three years ago. More business of every description is being carried on now than before the fire—new concerns have been established and business that formerly went to other cities is now coming to Baltimore. New business activity is manifest in every line of trade. A big demand for homes is being met by a great many houses being built. Thus it is that the Hardware dealers are all exceedingly busy and are doing more business this winter than ever before in the history of the city.

COUNTRY TRADE GOOD.

The Wilcox Hardware & Iron Co., with double store and warehouse on Gay Street, do an extensive retail trade and also look for jobbing business in Maryland and Virginia. In speaking of trade conditions, Mr. Wilcox of the concern, said: "Our business is very largely a country supply trade and I've never known of the general outlook or present conditions as satisfactory as at this time. Our salesmen have taken more orders for Spring goods than ever before by February 1st. ...l reports that come in from the country are of a very satisfactory nature. The farmers are in an exceedingly prosperous condition. The advance prices at which we are obliged to sell many lines of goods do not in the least retard sales. Collections are somewhat slow, due no doubt to the large increase in trade—every one seems to be buying Hardware—in all the country round about Baltimore the building trade is very active, and this of course is tying up a large amount of capital. But, everything considered, the prospects are very satisfactory."

CARPENTERS' AND MECHANICS' TOOL TRADE GOOD.

The big demand that came after the fire for all kinds of tools has not abated in the least. A splendid stock is carried by J. R. M. Adams, whose store is located on the corner of Franklin and Eutaw Streets, and who is catering to the best class of trade. A very satisfactory condition of the tool trade is that the demand for higher grade tools is very marked. In speaking of this fact one of the Baltimore Hardwaremen said: "The men who buy these goods seem to be of a more intelligent class and apparently realize that the best are the cheapest in the end. Those goods most in demand to-day are of standard make, and I find that it is becoming more difficult each year to sell a saw, or any tool in fact, that does not carry the manufacturer's full brand and name. The same saw with a jobber's trade mark will not sell within twenty per cent. of the price it will if it has the maker's brand or name on it."

HAMMERNAIL.

RECENT TRADE PUBLICATIONS.

H. F. BRAMMER MFG. CO., Davenport, Iowa, are distributing a taking little booklet, describing the merits of the O. K. Washer. Regarding these Washers the company say: "Louisiana red cypress lumber is used for making the tub. Four staves are made of extra length, forming legs to the machine. Thus there is no possibility of their getting loose, causing the machine to become weak and wobbly. The inside surface of the tub is corrugated similar to a washboard, thus affording the largest possible amount of rubbing surface. The lid on the tub is made steam tight. In consequence the hot suds do not cool nearly as quickly as in open machines. Hot water dissolves dirt much more quickly than cold. Thus the lid is one feature that contributes to the rapid washing qualities of the O. K. Washing Machine. The O. K. has the steel ball-bearing gearing, which makes it so easy running and almost noiseless. The fly-wheel turns either right or left and the dasher reverses automatically, turning the clothes forward and back in the machine." This company has recently acquired the exclusive right for the manufacture and sale of the entire line of Washers heretofore placed on the market by the Benbow-Brammer Mfg. Co., of St. Louis.

SOUTH ERIE IRON WORKS, Erie, Pa. Catalogue of Ruby Stoves and Ranges. This line of goods is shown to be a very artistic one, and includes the Colonial Ruby, Germania, Ideal, Famous and B Ruby Ranges; the Melrose, Family, Home Pride and Faithful Cook Stoves. A line of high-grade base-burners is also shown, named the Oriental, Oak, Liberty and Star. This company also manufacture Sugar or Wash Kettles and Butchers' Furnaces and Caldrons.

J. L. MOTT IRON WORKS, 5th Avenue and 17th Street, New York. Large-size catalogue No. 1 of Cooking Ranges and Furnaces. A full line of this class of goods is shown, in a great variety of styles and shapes, with complete descriptions accompanying the same. The company issue three other catalogues: No. 2—Cooking and Heating Stoves and Ranges; No. 3—Laundry Stoves and Ranges and Iron Heaters; No. 4—Furnaces and Caldrons, Steam Kettles, etc., and state they will be pleased to mail any of these on application. The product of this company is universally known, they having been established since 1828.

WABASH MFG. CO., Wabash, Ind., have issued a folder entitled "Fun for All the Year," in which they state: "The Wabash Coaster Wagon will give more real downright fun than any other toy we know of. What a host of ways to use it. Errands are turned into pleasure trips by this splendid little vehicle. Any wide-awake boy will develop mind as well as body, in planning new ways in which to utilize it in his games and sports. Your girls, as well as boys, will find in it numerous forms of amusement and pleasure. Not a mere toy, to be broken and cast aside, the Wabash Coaster, with its strong substantial qualities will become one of the most valued possessions of the household. It provides outdoor fun—'Wabash Fun'—fun that means ruddy cheeks, laughing faces, sturdy boys and girls with firm, well-developed bodies and happy, self-reliant dispositions."

WYETH HARDWARE & MFG. CO., St. Joseph, Mo., are sending out their Spring catalogue and price list for 1907 relating to the immense line of goods carried by them as jobbers and importers of Hardware, Cutlery, Tin Plate, Metals, Tinners' Stock, Stoves, Sporting Goods, Bicycles, Saddlery and Saddlery Hardware. A large assortment of Enameled Ware is shown in colors, as well as the Wyeth Sewing Machines. The company call special attention to their Mail Order Department, stating that those who have never ordered goods from them by mail cannot fully understand how thoroughly organized and systematized this department is. This catalogue should be applied for, as it covers every line of goods to be thought of in connection with a complete Hardware stock.

GOODELL-PRATT CO., Toolsmiths, Greenfield, Mass., have favored us with a copy of their new No. 8 catalogue, handsomely bound in red, with cover illuminated in gold and black, and containing 208 pages, devoted entirely to tools. In addition to the extensive line they have heretofore manufactured, there will be found 50 new tools. Each article is warranted against imperfections of material or defects in workmanship. The company will be glad to supply this catalogue as well as supply their customers with such quantities of their pocket catalogues as they can distribute to advantage, entirely without charge. A full line of Drills, Chucks, Interchangeable Screw Drivers, Saws and Blades, Bench Levels, Polishing Heads and Lathes, Ratchet Handles, etc., will be found within the contents.

JAMES L. TAYLOR MFG. CO., Bloomfield, N. J., have sent out their revised price list and catalogue No. 7 of the Taylor Quick-Adjusting, Self-Locking, High-Grade Screw Clamps. These Clamps present several new features. The sliding heads can be instantly opened or closed the full length of the bars, and yet they are positively locked for clamping purposes wherever they are left. The clamping action is positive, as the greater the strain the tighter it grips. The contents include Carpenters', Boat Builders', Machinists', Cabinet Makers', Pattern Makers' and Wagon Spring Clamps; also a Saw Jointing and Filing Clamp and Clamp Supports for securing clamps on benches or horses.

BURLINGTON BLANKET CO., Burlington, Wis., have issued two price lists, one of Summer goods for 1907, and one of Winter goods for 1907-08. A full line of "Stay-On" Horse Sheets is described, they being made in a variety of effects—plain and fancy woven crash, novelty, silk, etc.—and in several colors, such as brown, fawn, tan, green-dyed and printed duck. Horse Covers are also included and Fly Jowls, Fly Hoods, etc. Covers for cattle are also made by this company. The Winter goods line comprises "Stay-On" Blankets of burlap, plain duck, lined, fancy-plaid duck, etc., for horses and cattle; the Ruff Rider Combination Saddle Blanket, for the horse and for his master, when a sleeping-blanket is desired, being intended for ranchmen, prospectors and others obliged to travel in the saddle. A line of Lumbermen's Storm Blankets is also made by them. These catalogues will appeal to the trade and should be sent for by those dealing in the line of goods mentioned.

BUCK BROS., Riverlin Works, Millbury, Mass., formerly of Sheffield, England, have forwarded us their price list of Chisels, Gauges, Special Tools for Wood Turning, Plane Irons, Drawing Knives, Screw Drivers, Awls, Reamers, Countersinks, Punches, Cabinet-Makers' Burnishers, Nail Sets, Carving and Turning Tools, Handles, etc., etc. A line of Carvers' Punches for groundwork is shown, and a line of Turning Tools for the laboratory, model-maker, amateur, etc. A large assortment of Amateur's Carving and Wood-Turning Tools will be found within the contents.

WESTERN CLOCK MFG. CO., La Salle, Ill., have published a handsome booklet on the subject of Modern Clock-Making as exemplified by them in the manufacture of alarm and one-day lever clocks. The paper used, the typographical make-up and the halftone illustrations used are all of the finest quality, and the contents form exceedingly interesting reading matter. Referring to the American clock industry in general, the company say: "The growth of the American clock industry during the last fifteen years has been little short of marvelous; slightly over four million dollars in 1890, the value of the total output had increased to nearly nine millions in 1905, and the returns for 1906 approach the ten million mark. In this same lapse of time, every year with the exception of the critical '93, set a new record, and the total production of the different clock companies is estimated to-day at over thirteen million clocks a year. This remarkable success is due to the far-sighted policy of American manufacturers, which has been principally one of standardization and enormous outputs, decreased production cost and increased consumption. In clocks, as in all other lines of goods, there are two classes of consumers—the millions and the millionaires. American manufacturers were quick to see what the foreign producer did not seem to perceive; that the millionaires are a negligible quantity as consumers, and that, not chronometers—not marvels of intricacy and originality were needed, but timepieces within the reach and want of all. One has still to go to Europe for chronometers or split-second timepieces, but in the production of ordinary clocks adapted to the needs and means of the millions, America produces results of remarkable excellence."

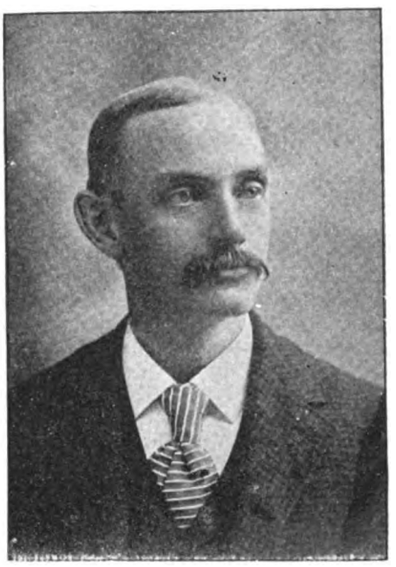
PENNSYLVANIA RETAIL HARDWARE ASS'N



The sixth annual convention of the Pennsylvania Retail Hardware Association was held in Pittsburgh on Tuesday, Wednesday and Thursday, February 12, 13 and 14, the headquarters being at the Monongahela House. The attendance was not so large as was expected, although averaging well with the numbers of the Association.

LOCAL RECOGNITION.

The place of the Mayor of Pittsburgh, who was to deliver an address of welcome, was taken by city attorney, L. S. Levin. Another address of greeting was given by J. W. Wardrop secretary of the Merchants' and Manufacturers' Association. W. H. Cochrane of the Bindley Hardware Company was also a speaker, representing the Pittsburgh Hardware Jobbers on behalf of whom he invited the members and their ladies to a theatre party arranged for Wednesday evening. Brief remarks were made by T. H. Chamberlain, representing *The Iron Age*.

RECRETARY'S REPORT.

The report of Secretary-Treasurer J. E. Digby showed the finances of the association to be in satisfactory condition and noted several additions to the membership during the past year.

J. E. DIGBY, SECRETARY-TREASURER.

NATIONAL SECRETARIES PRESENT.

The session of Wednesday afternoon was an interesting and valuable one. Secretary T. James Fernley of the National Hardware Association was present and when called on responded in his usual happy vein. He referred especially to the anti-parcels post campaign and expressed gratification at the success recently achieved in reversing the attitude of the National Board of Trade on the question. Postal problems were also discussed by M. L. Corey, secretary of the National Retail Hardware Association, who delivered an address substantially the same as that given before the Kentucky convention.

MUTUAL INSURANCE.

C. H. Miller, Huntingdon, the able and energetic president of the National and Pennsylvania mutual fire associations, was scheduled to speak on insurance, but gave place to W. B. Simpson, secretary of the same associations, who presented the subject in a most effective way. Especial interest was evoked by his report on the rule adopted last year requiring association membership on the part of merchants taking out insurance. As a result of this rule there was a decided falling off in new business within the State. The new rule was shown to have missed its object of increasing association membership.

QUESTION BOX.

The meeting concluded with the opening of the question box by Mr. Corey, who directed the subsequent discussions with the vivacity and tact for which he is well known.

RELATIONS OF JOBBERS AND RETAILERS.

Considerable criticism was voiced as to the energy with which some houses, primarily retailers, are expanding and developing their business along jobbing lines, especially where their activity brings them into competition with smaller retailers of more limited territory. In this, however, some detected rather a narrow view of a merchant's opportunities, and expressed regret that the association should seem to discourage aggressive enterprise on the part of its members.

Methods of preventing jobbers from encroaching on the trade of retail merchants were discussed at some length. It was finally resolved to be the sense of the convention that it is the duty of members to report to the secretary of the association cases of Hardware, Paint and Glass jobbers selling other than retailers. A vote was also passed that to be recognized as a Hardware retailer a merchant must carry a stock of General Hardware to the value of not less than $1000 and that jobbers be requested to confine their sales to such merchants.

THE NEED OF LOCAL ORGANIZATION

was the subject of an interesting paper, by W. V. Taylor, Allegheny, chairman of the Committee of Arrangements, who spoke in part as follews:

I am one of the few city Hardware dealers who has the honor to belong to our State Association. In this, one of the greatest cities of the United States, we have no retail Hardware dealers' organization whatever; although within the last few months a preconcerted effort has been made

TO BRING THE HARDWARE DEALERS TOGETHER.

To my sorrow, I must say that we have

MET WITH LITTLE SUCCESS,

largely for want of a leader—an active Hardwareman who can command the respect of all. To my mind if the many dealers of our city could only be brought to see the benefits of our association they would speedily get together and form a local organization; thereby coming together with us in annual convention, exchanging ideas, extending our acquaintance with each other, and meeting and enjoying the hospitality of the many representatives of the manufacturers and our good old standbys, the jobbers.

The lack of acquaintanceship was illustrated several weeks ago at a meeting of the Hardware dealers of this city with the Lumber Dealers' and Builders' Supply Credit Association. Thirty or forty of us met with them, and many of us had to be introduced to each other, showing that an organization of our local dealers is badly needed.

EFFECT ON PRICES.

Then to illustrate a few of our city prices. On Nails, the organization of supply dealers have agreed on a price to consumers of $2.30 on 1 to 14 kegs; $2.25 on 15 to 49, and on 100 or over, an open price. A few dealers

KEEPING IN TOUCH WITH THESE PRICES

on Nails and Staple Goods try to follow them; others pay no attention to established prices. A customer inquired several days ago the price of one keg of 20d Nails, on which I quoted him $2.30, the established price, and he said that he could not understand how we and another dealer whom he mentioned, quoted the same price, while he could buy them from Jones & Co., at $2.15. To me the secret was that Jones & Co. did not know of, or act with the supply men's agreement in regard to prices.

Another prevailing evil is the profit, or rather want of profit, on contracts for Builders' Hardware. Do you know, that on the average contract it is impossible to make over 10 per cent. and often less? Do you think this pays? How many of us can do business for 10 per cent? So I can heartily say Greater Pittsburgh needs a

LOCAL HARDWARE ORGANIZATION,

which in turn would add strength to our State association.

There has been much abuse here of the evils of the trade, and the jobber comes in for his full share of it. It can be said of this city, and I know whereof I speak, that some so-called jobbers are working harder and making more effort to obtain business that justly belongs to the retail trade than the latter are themselves. While I admit that

THE LEGITIMATE JOBBER, TO A CERTAIN EXTENT, IS A NECESSITY

to the retail trade, I feel that they should be careful, lest they become our worse competitors among consumers of Hardware. Much of the trouble would surely be corrected by organization, where we could all come together and discuss the existing conditions and their remedy; also decide what trade rightfully belongs to the jobber and what to the retailer. This surely would eliminate the evil of direct selling by the jobber to contractors, manufacturers, planing mills, etc., which trade, of course, belongs to us, and would, generally speaking, bring about harmonious feeling and action.

RESIGNATION OF J. A. KLINE.

A matter of more than passing importance to the association was the resignation of J. A. Kline, Williamsport, which was offered on account of the increasing expansion of his business along jobbing lines. Mr. Kline has contributed much to the success of the conventions that have been held in Williamsport. He has also given freely of his time and business ability in serving as a director of the Mutual Insurance Company, a position which it is hoped he will not feel called upon to give up. His resignation from the association was accepted with the greatest regret, and he was unanimously elected an honorary member.

ADVERTISING A RETAIL BUSINESS

was the subject of an original address by C. S. Davis, Oakland, Md., who told of his experience in the foundation and successful continuance of a house organ. Mr. Davis' interesting and practical paper is omitted in this issue, as we intend to use it later on.

STATE RETAIL MERCHANTS' ASSOCIATION.

J. E. Calderwood, secretary of the East End Merchants' Protective Association of Pittsburgh and a vice-president of the State Retail Merchants' Association, including all classes and lines of trade, was introduced as a representative of the latter organization and made an interesting address, which afforded the members much valuable information.

An important advantage in organization which he mentioned was the exchange of credit information, both locally and in the case of persons moving about the State. A lively interest was shown in the remarks of Mr. Calderwood, which called forth considerable discussion. He was asked a number of questions by various members, and was tendered a vote of thanks for his presence and address.

CONVENTION COMMITTEES.

ARRANGEMENTS: W. V. Taylor, J. E. Digby, J. H. Bowers, J. F. Howe, G. J. Rudolph.

RESOLUTIONS: H. T. Albee, C. S. Davis, E. D. Everts.

AUDITING: W. V. Taylor Theo. Backofen, G. J. Rudolph.

PLACE OF MEETING: G. V. Thompson, E. D. Everts, G. H. Hegner.

PRESS: W. V. Taylor, J. F. Howe, J. E. Howe, J. E. Digby, Theo. Backofen, G. J. Rudolph.

GRIEVANCES: G. V. Thompson, G. L. Moore, J. E. Digby.

NEW OFFICERS.

The following officers were elected for the ensuing year:

PRESIDENT, A. H. Kaufman, Lock Haven.

VICE-PRESIDENT, J. F. Howe, Freedom.

SECRETARY-TREASURER, J. E. Digby, McKee's Rocks.

EXECUTIVE COMMITTEE, G. L. Moore, J. E. Digby (for two years,) Wm. Mendenhall (for one year.)

DELEGATES TO NATIONAL CONVENTION, J. E. Digby, W. V. Taylor, G. L. Moore, Wm. Mendenhall.

NEXT PLACE OF MEETING.

The matter was left in the hands of the Executive Committee, who will make an announcement later in the year.

ENTERTAINMENT.

A theatre party tendered to the members of the association and their ladies by Bindley Hardware Company, James C. Lindsay Hardware Company and Logan-Gregg Hardware Company was given on Wednesday evening and was an enjoyable affair.

The annual banquet in the spacious dining room of the Monongahela House was a brilliant success. It was participated in by about 200 members and visitors and was graced by the presence of numerous ladies. The menu was of an attractive and appropriate design and bore the likeness of retiring President Wm. Mendenhall, who was one of the speakers. R. H. Geiger of Pittsburgh officiated as toastmaster. Among the other speakers were Geo. B. Logan, Logan-Gregg Hardware Company; Frank I. Gosser, and J. W. Wardrop. The exercises were enlivened by music and reciations.

TRIP TO STEEL AND WIRE COMPANY'S PLANT.

About 150 accepted the invitation to visit the Rankin plant of the American Steel & Wire Company. A special train was furnished for the trip, on which no one smoked anything but the cigars provided by their hosts. The party was ably conducted by W. L. Hirsch, J. D. Sankey and S. N. Lippincott, who were assisted at the works by a number of the foremen.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The February meeting of the Executive Committee of the New England Hardware Dealers' Association, held at the Boston Merchants' Association's rooms, Boston, brought out strong evidence of association prosperity, and decided interest in the annual convention of the National Association which will be held in Boston in June. First Vice-President S. H. Thompson, Lowell, presided in the absence of President John B. Hunter. The resignation of John A. Manson, Burlington, Vt., as a director was accepted, and Charles L. Underhill, Underhill Hardware Company, Somerville, Mass., was elected to fill the vacancy. Applications of membership were received from the following: S. Simons, Boston; J. and G. E. Doane, Middlesboro, Mass.; John W. Goodhue, Ipswich, Mass.; Manson Hardware Company, Burlington, Vt.; Jordan Hardware Co., Willimantic, Conn.; Rand, Ball and King Co., Claremount, N. H.; J. Edgar Mellen, Brattleboro, Vt.; J. K. and B. Sears, Middleboro, Mass.; Albert W. Tuckerman, Boston and Spencer Hardware Company, Keene, N. H. Favorable reports of progress were made by Chairman Ernest L. Davis, of the Exhibit Committee, for the National Convention, and Chairman F. Alexander Chandler, of the Publication Committee, and S. H. Thompson, of the Entertainment Committee, went into a number of details as a part of his committee's work.

MINNESOTA RETAIL HARDWARE ASSOCIATION.

The meeting of the Minnesota Retail Hardware Association at St. Paul, February 26 to March 1, should prove to be a very interesting gathering of the trade. Among the papers which will be presented will be "How to Run a Country Hardware Store," by A. Marckel; "Transportation Abuses," by George S. Loftus; "The Cash System for the Retailer," by John Costello; "Practical Advertising," by O. B. James, Richland Center, Wis.; "Meeting the Price," by F. J. Retzlaff, and "Organization of Retailers," by J. J. Ryan, secretary of the Minnesota Merchants' Association. The North Dakota Paint law will also be discussed in a paper by G. W. Wolbert, Bismarck, N. D., a prominent member of the North Dakota Retail Hardware Association, It is likely that this will be the largest meeting in the history of this association, which now embraces upwards of 700 of the Hardware retalers of the State.

J. D. WARREN MFG. CO.'S NEW FACTORY.

The new factory at Quincy, Ill., of the J. D. Warren Mfg. Co., whose officers and salesrooms are located in the Masonic Temple, Chicago, Ill., was christened in its opening on St. Valentine's Day. This factory is unsurpassed by any woodworking plant in the world in modern equipment. It occupies five acres, with ten buildings under one roof, is made of pressed brick, stone foundation, sewer drainage on all sides and underneath, and has 100,000 square feet of floor space of even level on the first floor. Private railroad trackage extends into the buildings, where all fixtures are loaded, preventing exposure in shipping. This company are large manufacturers of Patent Glass-Front Drawer Hardware Sectional Shelving, and the first order received by Mr. Warren for the new plant amounted to $11,000, coming from the Hardware firm of Weaver, Palmer & Richmond, Rochester, N. Y., in whose store it will be installed. The J. D. Warren Mfg. Co. had a splendid exhibit at the recent Hardware Show in the Chicago Coliseum, which has been purchased by Julius Campbell, Traverse City, Mich.

AN ORDER RECORD.

Whenever an order, large or small, is sent in to a house do not fail to keep tab on the promptness with which that order is filled. Too many retailers regard an incident as closed as soon as the goods are received and paid for, but such should never be the custom. Instead, a book should be set apart for the filling of all order records, big and little, and its value should be enhanced instead of diminished with the passage of time.

A rush order for some repair job comes in from a testy customer. A thought will give the name of the logical house, in point of location, that should be appealed to; perhaps a glance at the order book will tell a different story, of delay and disappointment in the filling of small orders. Some houses that are usually prompt in filling large orders are quite the reverse when dealing with the little man. Some have to ship over routes where carelessness or poor connections spoil a seemingly promising point of shipment.

Many a disappointment will be saved by this self-compiled list, showing whether orders, great or small, are promptly filled as a rule, whether goods are acknowledged, what routes can be the best depended upon to deliver goods to their destinations quickly. If jobbers found out such a record was being consulted they would be more careful in their treatment of the small order and more particular, in case of delay, to hunt it up and fix the blame. This, in some instances, might even reach those invulnerable bulwarks of commerce, the shipping lines themselves, and in the case of local agents might render them a little more satisfactory. There is nothing more efficient in the correcting of annoyances than a system of accounts that fixes the blame where it belongs and renders it a matter of permanent record.

OUR BRITISH LETTER.

LONDON, Feb. 15, 1907.

PROSPEROUS TIMES AHEAD.

Much has been written in reference to the prospect of trading in 1907, and ironmongers are getting familiar with the stories of the wonderfully prosperous year which manufacturers had in 1906, and some of them who are a little sceptical are tired of being told that 1907 will be as prosperous for the retailer as 1906 was for the manufacturer. Nevertheless there is a considerable amount of truth in the statements which have been made in reference to the bright days in store for the retail ironmonger during the present year. There is no doubt that British makers of Hardware have been exceptionally busy during the past few months, and the majority of works and factories have been running not only at full time but at high pressure, in many instances the employes working overtime, and consequently earning more wages than the usual amount of wages. All this has been very beneficial to the general trade of the country. In manufacturing districts, producers of raw material are striving with difficulty to keep pace with the demand for home and foreign markets, and the retail traders in those localities are naturally feeling some considerable benefit from the additional money which is being expended. This has been going on for some months, but a general improvement in trade circulates slowly, and the ironmongers in country districts are much longer in reaping the benefit, but as the improvement which has been steady, has now permeated throughout the whole of the manufacturing districts, it is only reasonable to expect that during the coming months country ironmongers will find a ready demand for general goods, and there are already indications that the orders which were placed during the Spring months for domestic ironmongery will be heavier than usual; indeed, in many instances the stocks have been allowed to run down, the more cautious traders hoping that the increased prices which they have to pay for the heavier lines would not be sustained, and consequently were unwilling to overload themselves with stock. Now it is felt that the upward tendency of the market will be maintained for some time to come, and ironmongers are showing greater inclination to buy not only for present consumption but also for forward delivery.

THE GENERAL EFFECT OF HIGHER PRICES.

During the past few weeks, manufacturers have issued notices of advances, and now there is scarcely any manufactured product, in the consumption of which metal forms a part, which has not been advanced some ten per cent. to fifteen per cent. Indeed in the goods where copper and brass is an important item in their manufacture, the advance has been still more. Although there have been some fluctuations in the metal market during the last few weeks, there are no indications of any permanent fall in the prices of copper, tin, or iron; and wherever these articles are used, manufacturers have found it impossible to carry on without advancing prices. It is a sign of the times to note that consumers do not appear to raise any serious objection to the advanced prices they have to pay, nor does it appear to be more difficult to effect sales in consequence. Possibly this is due to the fact that the boom in the metal trade has been widely published both in trade journals, and in the public press, so that almost every householder knows that metals have gone up both in this country and in foreign markets. Such indications of a settled state of things may be worth recording, inasmuch as they may give the manufacturers in the United States confidence in their export business, for although much is said and written in reference to the growth and extension of inter-empire trade, there is no doubt that the vast developments in the colonial possessions of this country are opening up a wide field for enterprise, which will increase rather than diminish the opportunities for foreign traders; for although Britishers are very loyal, and anxious to supply the needs of their own people and use as far as possible British-made goods, they are broad-minded, and by no means conservative when they are supplied with goods which meet their requirements. Free trade is still a quality admired by Britishers, and the merchants of Great Britain approach the world's markets with no narrow-minded policy, being always open to consider the products of other countries.

LOST GROUND BEING REGAINED.

In the previous letters I have referred to the workings of Retail Ironmongers' Associations in this country. During the past few weeks, no great movement of importance has taken place, but several of the leading Associations have met together and held gratifying meetings showing an unanimity of purpose and indicating that the ironmongers of this country are ready to pull together in their efforts to conserve trade and prevent drygoods stores, grocers and others from snatching away from them the plums of the trade. There has been a tendency to ignore the fact that some of the best selling lines have already departed from the Hardware dealer, but most of the leading ironmongers are not convinced that the loss of business to the trade as a whole has been very real, and further, the result of their deliberations appear to be that they are satisfied that much of the retail ironmongery trade which has already slipped away might have been retained had the members of the craft been more united, and now that Associations exist, they are not only anxious to prevent any further poaching upon their preserves, but are using every effort to regain some of the business which they have lost in the past. Perhaps one of the most striking examples of this forward movement is the interest shown by ironmongers in the cycle business, a branch of trade which until a few years ago was almost entirely carried on by agents, many of whom were quite irresponsible and men of straw. Now, however, ironmongers are keenly searching for good agencies, and are not content with vending accessories and sundry supplies but are anxious to secure some portion of the business in cycles and even motor-cycles —some of the more advanced ironmongers going in for "motor alities" and the supply of motor spirit; fitting up their workshops with improved plant, so as to enable them to carry on repairs to motors and bicycles. Another important branch of the trade which in the past has been allowed to drift away has been the supply to farmers of implements and machines, thereby creating a new trader, the implement agent. Many of the leading implement manufacturers, including some of the American firms, are now making efforts to appoint responsible ironmongers as district agents, and not a few of the leading Hardwaremen are stocking quite a large selection of implements and machines. This is a department in which ironmongers are well able to trade, for their knowledge of the farmers of their district, and of the special conditions under which the agriculturist works, is oftentimes far in advance of that of the ordinary implement agent or of the implement representative, who during his occasional visits to the neighborhood has not sufficient opportunity of becoming acquainted with local peculiarities. There is no doubt that it would be to the interest of American manufacturers to carefully scrutinize the class of agents the British representatives appoint, for the ironmonger with his extensive stock is often a man who has been brought up in the neighborhood, and has friends and relatives farming the land, possesses great influence and is able to control and develop an agency business far better than any other class of trader. Such a man holding an exclusive agency is a valuable coadjutor, and may be regarded as an almost indispensable feature in the proper introduction of a new implement to which the farmers of a district may be strangers. The season will shortly be here when preparations will be made for the leading agricultural shows for the 1907 season. The Royal Agricultural Society of England, who held so successful a show at Derby last year will hold its annual exhibition at Lincoln in the first week in July next, and the Bath and West and Southern Counties' Society, the second leading agricultural institution, will visit the borders of south Wales this year, holding their show at Newport, thus tapping a very large area of the Western agricultural district of England, and also conveniently situated to the Welsh counties. At both these shows, American manufacturers will have important stands, and doubtless during the harvest season many American mowing-machines and reapers will be at work in the hay and corn fields of Great Britain, their bright colors and beautifully-polished steel appointments making them conspicuous features in the summer landscape.

KENTUCKY RETAIL HARDWARE AND STOVE ASSOCIATION

The seventh annual convention of the Kentucky Retail Hardware and Stove Association was held on February 5, 6 and 7, in the parlors of the Galt House, Louisville, Ky.

After the opening exercises, J. C. Frederick, Owensboro, on behalf of John W. Rend, Hodgenville, presented the association with a beautiful gavel, made from wood grown on the farm where Abraham Lincoln was born. Later on the gavel was presented to the retiring president of the association, U. S. Shacklett, Fulton, as a token of appreciation of his able administration.

MR. COREY'S ADDRESS.

M. L. Corey, Argos, Ind., secretary of the National Retail Hardware Association, was present, and addressed the Association on

PENNY POSTAGE VS. PARCELS POST.

Mr. Corey's address was in part as follows:

I believe you will admit that whatever service the Government renders its people should be charged back to them on an equal basis as in proportion to its cost and benefits. One hundred and one million pounds or 13 per cent. of the total weight of mail carried consists of letters and postal cards and pays 78 per cent. of the entire postal revenue of $106,860,000. Four hundred and ninety-one million pounds or 66 per cent. of the balance pays only four per cent., or $5,697,000. One thousand business letters will weigh about 12 pounds, and it takes $20 in stamps to send them. Twelve pounds of cheap mail order papers pay just 12 cents for the same service. The 12 pounds of letters pay the Government $18 profit. The 12 pounds of newspapers lose the Government 75 cents. Here is discrimination for you with a capital D. No wonder the second-class matter has increased from 40,000,000 pounds in 1875 to over 663,000,000 pounds in 1905. A large part of this increase has been in the cheap mail order class of publications, all of them persistent advocates of catalogue house buying and now demanding a cheap parcels post. These

TWO THREATENING EVILS ARE MOST CLOSELY CONNECTED.

Given cheap delivery for their advertising columns, they now need cheap delivery of the goods, so that their mail order patrons can have greater advantage over the established local retail merchants.

It costs less than ¼ cent each to carry our letters and postals. We are a nation of letter writers. Every person would benefit by penny postage. It seems no further argument is necessary to prove we are entitled to it and should receive it.

Parcels Post advocates don't want it, and there is already a deficit in the postal department. The Parcels Post advocates say: "Give us low rates for carrying merchandise and this business will be so increased that the shortage will disappear." They have gone to the farmer and apparently succeeded in capturing the National Grange influence. This organization, at their last convention, voted $10,000 toward securing a Parcels Post, and to-day they have three of their leaders in Washington as a lobby and they are passing resolutions in almost every convention indorsing the measure.

We find very few who understand anything whatever about it, yet to our lawmakers at Washington it appears there is a howling demand for the bill. It is a hard question for the business man to combat, for these farms papers are doing all in their power to show we oppose the measure for selfish reasons. They continually claim that all the opposition really comes from the express companies, notwithstanding the fact that to our knowledge these companies have never made a move in opposition.

The large daily papers—many of them are against us. To combat this we have the daily press of thousands of smaller cities and towns, and the country weeklies, who are our friends, whose interests are linked closely with ours. The trouble with them is that they are not awake to the gravity of the situation. They do not fully understand the measure nor what effect it would have upon the business of the country at large.

Postmaster-General Cortelyou advocates the consolidation of third and fourth class matter, which he says really means a limited Parcels Post, the effect being to reduce the present rate for carrying merchandise to eight cents a pound, or just one-half the present rate. He says there is no doubt that there is a strong sentiment favoring the measure, although vigorous opposition comes from village merchants, who fear that the mail order houses would get advantage.

PRESIDENT SHACKLETT'S ADDRESS.

President Shacklett followed with his annual address, in which the members were congratulated upon the steady growth of the Association, at the same time making some suggestions as to its future development. We quote from his remarks as follows:

Another busy year has passed since our meeting at the Galt House in March, 1906. History will record 1906 as being one of the busiest years of this great industrial Commonwealth. Prosperity, according to Secretary Shaw's view, has gone beyond the comprehension of the American business man, which is making us an extravagant people to the extent that factories are being built continually all over this country to make every conceivable article of merchandise, and Hardware specialties as well, and the Hardwareman must be up and doing to be able to meet the growing demands of the country, as well as to protect our own interests. This year of 1907 the commercial man must drive his business instead of letting it drive him. The very question that has been uppermost in our association work, the great octopus, the catalogue house, has been driving us with a high hand, until now we are awake we must take the reins in our own hands.

I am glad to note the willingness to aid us that some manufacturers and jobbers show. It will be by their help and their help alone that we win. I do not blame some manufacturers as well as some jobbers for being slow in committing themselves to this work. It is a cautious proposition, as we see from the suit pending between the South Dakota Merchants' Association and Montgomery, Ward & Co., which was begun in order to hinder association progress. On this account I believe in caution at all times.

I have only a few words in regard to

THE PROPOSED PUBLICATION OF A GENERAL CATALOGUE

by the National Association. I believe that it would be an experiment, in the first place, and in the second place I do not believe it would be practicable for all parts of the country to price the same, as each section of the country has to adjust its business largely according to its surroundings, and the catalogue houses do not affect all parts of the country alike. I believe it would be best for each individual to have his own catalogue priced, yet that would be almost impossible.

If it is not out of place at this time, I would like to urge upon the Association the necessity of our taking some action during the next session of our Legislature in regard to our collections laws and the extremely high license on firearms. If this be not class legislation it would be impossible to get up a bill on that order. One of the objects of this Association is to help each other in such way that we shall be better able

TO GET HONEST BUSINESS AND GAIN HONEST PROFITS.

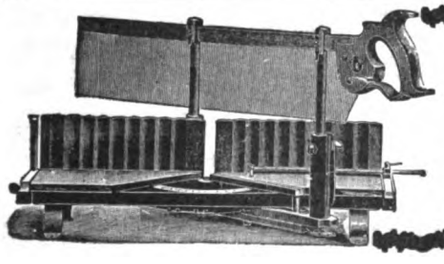
Such a course as this will infringe upon the rights of no one and I think we should be wideawake to allow no such infringements on our

U. S. SHACKLETT, EX-PRESIDENT.

own rights if we can by a clear, statesmanlike way lead our lawmakers to see matters as we do.

THE WORK OF THIS BODY IS NO CHILD'S PLAY.

We have already accomplished much, and we must by sheer force of will accomplish much more. New occasions teach new duties, and we must be watchful to meet the demands of an enterprising people. I would urge upon you, "drive your business," and when discouragements come, those of you who are sufficiently optimistic will "screw your courage to the sticking point" and will not fail. I was glad to note the interest taken by our body at our last meeting and I hope you have kept up that enthusiasm and are still in the harness. It is that co-operation of interests that makes a good president, and not the man himself. One man can do little, but when he receives the cordial support of others it inspires him to push forward the work and try to do more.



This was followed by the annual report of the indefatigable young secretary, John R. Sower, of Frankfort, whose progressiveness is the notable feature of his work. He said in part:

REPORT OF SECRETARY SOWER.

In presenting my annual report this year, I come with more courage than at any previous convention. Things have gone pleasantly this year, there have been few complaints, and I take it you have all prospered. We have added new members and some of the old ones have come back, which shows that we are going steadily forward. Kentuckians are slow, but once they decide a thing is right they never let go until they have reached success, and that our Association is a success there is not the slightest doubt.

Those whom we have called on for assistance have come forward, seemingly glad to be identified with us.

The jobbers and manufacturers have shown themselves our friends, many of whom have been untiring in their efforts to make this con-

GOODELL MITRE BOX

vention interesting and profitable to us, and I hope every one of you will be true to those who have helped us.

I had the pleasure of attending the National Convention with Mr. Ogden last year, and learned many things which have helped me in this year's work as your secretary. I have had the advice of our worthy president on all matters of importance, and have always found him able and ready to help me in advancing the best interests of our Association, and many times I have congratulated myself on having had men possessed of such sound judgment to advise and help me during my term of office.

I am glad to notice that our merchants are taking advantage of Fire Insurance with the Association, something which every one of us should take advantage of. We have several matters of great importance that will come up at this convention, and hope to have the co-operation of each member present.

I want to thank all of our members who have helped me in the past year's work, and I sincerely hope you may treat my successor with the same courtesy and kindness as you have always shown me.

From an address on

THE HARDWARE STORE.

which was on the programme to commence the second day's proceedings, by William R. Belknap, president of the Belknap Hardware and Mfg. Co., Louisville, Ky., we make the following extracts:

The scope of the typical Hardware store has expanded almost indefinitely of late years. It used to be confined, or was understood so to be, to a stock of the coarser products of the foundry and machine shop, the forge and the grindstone; but now it means almost anything, aside from eatables, which recommends itself to the comfort and convenience of mankind. From Sad Irons and Sash Weights the expanse has been gradual to Baby Carriages, Rocking Chairs, Hammocks and Lap Robes, as full of soft suggestions as a two-minute boiled egg. Take a look through any Hardware catalogue of a modern house and you will find there a bewildering variety of those things which make for the lightening of labor of the man in the workshop, the cook in the kitchen, the lady in the dining room and parlor. In so far as the people who dispense this line of goods, as wholesalers or retailers,

HAVE HAD HIGH IDEALS OF THEIR DUTY TO THE PUBLIC,

and endeavor to carry them out by exhibiting and encouraging the use of labor-saving appliances and economical utensils and tools, just so far have they been of benefit to their communities in their day and generation. These higher ideals are fostered by associations like your own in this State, like those in other States, in the combined associations, and in the combined national organizations. These cannot afford to go on record except as standing for what is best, and as the whole can only be elevated by its constituent members, each one has felt his whole responsibility to carry the good work forward.

IT SHOULD BE A MODEL OF ORDER AND NEATNESS,

swept, dusted and arranged for convenience and for the proper display and suggestion of the use of improved implements and utensils. The only files should be those who are engaged by the "Tanglefoot" sheet in the window; while the bright, inviting look which highly polished Edge Tools and the Gilded Bird Cages give should rival the jeweler's window across the street. There should be nothing suggestive of wornout, rusted or second-rate goods. All should be new and attractive, and in order to give those in the house the proper respect for the goods they should be so displayed or kept in clean, whole packages, accurately assorted as to kind and size, and lined up every day of the week.

We cannot have the best order and desirable results unless those whom we employ have the

RIGHT FEELING OF LOYALTY AND INTEREST THEMSELVES

in the business. This can be inspired by those of us who feel that we have had the experience and are willing, patiently and persistently, to pay off the debt which our advantages have given us. We cannot expect the green boy from the crossroads or hillside to come into our stores or offices and know at once how to handle goods or to realize the difference between blued and bright Screws; between Shoe Tacks and Hungarian Nails; but we can so place him and help him that he shall know all these things better than we do in the course of a year or two. Nothing is so pleasant and grateful to an employer as the feeling that the dependence which he places is not misplaced among his own people.

This brings us up to the responsibility of the proprietor himself. He may not be far advanced in years, but to the young people he is "the old man" of the institution. If his ideals are not high, if his standards are not lofty, he can hardly expect the best from those who look to him as an example of success. There is where our main responsibility comes in.

IF WE ARE GOING TO LEAVE OUR MARK FOR THE BETTER,

we must show it in our every day life, and cultivate a general kindly feeling for our fellow men, young or old, customers or employees, from the smallest office boy up to the trusted cashier.

These things are old, trite trouths. I do not bring in new stories out of the 1907 almanac or even out of the columns of the weekly papers. I assume that these are readily within your reach, but have taken advantage of the opportunity you gave me to restate some of the old fundamental truths which I feel to be at the bottom of business and character as reflected in our business life, in the sincere hope that we will, each of us, develop and realize the highest and best powers with which the Almighty has endowed us.

An admirable and well-delivered address by George D. Wright, of Hibbard, Spencer, Bartlett & Co., was given on

BUSINESS SUCCESS AND HOW TO OBTAIN SAME.

which was listened to with rapt attention. We will give it in a future issue, when we can use more of it.

"THE LORD HELPS THOSE WHO HELP THEMSELVES."

was the subject of an address by F. J. Semple, vice-president of Simmons Hardware Company, St. Louis. We extract from Mr. Semple's remarks the following:

A very prominent clergyman once said, "I use my text only as a hook to hang my thoughts upon," and my text to-day is, "The Lord Helps Those Who Help Themselves."

Experience and observation have convinced me that this world is built on the law of compensation—that we all get just about what is coming to us. We hear a great deal about this man being lucky and that man being unlucky, and while at first sight it does seem as if the one carried a rabbit's foot and the other a hoodoo, yet if you simmer it down and look into it carefully you will find that certain things happen to a man simply because it is natural that they should happen; that he is lucky because he has ambition, determination and energy, because he is farsighted and has perseverance, and that the other is unlucky because he is lazy—"follows the lines of the least resistance"—and is

INCLINED TO SIT DOWN AND WISH FOR THINGS

rather than to go out and hustle for them. We cannot hope to get anything in the world worth having without paying the price for it.

If we want anything in this world and are willing to sit up nights and work for it—concentrate our mind on it—scheme and hustle—we are liable to get it, provided we do not ask for the moon or the world with a Barbed Wire Fence around it. It is only the Trusts in these days that get the impossible things, and even they seem to have a hard time to hold them.

If there is anything that needs to be impressed upon the retail Hardware dealer at the present time it is that they should help themselves by becoming more intelligent in the conduct of their business—by learning the value of their time—by

TRYING TO MAKE THEIR TIME PROFITABLE TO THE HIGHEST DEGREE.

Never was competition so strong as it is to-day; we have it from without and within; both at home and abroad, in the sense that catalogue houses give us a great deal of competition.

To my mind there is nothing easier than to meet catalogue house competition, but it requires personal effort, personal touch and extreme watchfulness. If I were doing a retail Hardware business and there was a party within my reach who ordered goods from a catalogue house I would try to find out what he bought, I would take from my stock something similar but better in quality, I would take it to him,

NO MATTER WHAT THE COST IN THE WAY OF TIME OR TROUBLE,

and show him mine; show him why it is better; appeal to his loyalty to patronize home industry, and I would offer it to him very cheap, doing all I could to dissatisfy him with his catalogue house purchase. This can be done very easily, because it won't cost you anything to offer your goods cheap, and if perhaps he should take you up and buy, let him have it cheerfully; take it just as you would a dose of nauseous medicine—that is to say, lick the spoon after you have taken it and look pleasant.

The old saying that "Goods well bought are half sold" is entirely obsolete;

IT TAKES SALESMANSHIP TO SELL GOODS

and salesmanship is now classed as a science or profession. I believe merchants should encourage traveling salesman to give pointers to their clerks as to how to sell goods and how to sell those that are most profitable. It is far better that your clerk should make $1 for fifteen minutes of his time, which it takes to sell a Hand Saw on the average, than it is to make 50 cents selling some other kind of a saw, which does not pay as good a profit. The selling end of a retail business is where the profit is made, and for this reason every merchant should be exceedingly careful to improve in as far as he can the selling ability of his clerks.

Two interesting papers on the subject of Paint were read. One of these under the title, "Paint and Its Importance to the Hardware Merchant," was presented by C. C. Pulver of Heath & Milligan Mfg. Company, Chicago. The other paper was entitled, "Good Paint and Results," and was read by T. A. Harmon of Hanna Paint Company, Columbus, Ohio. Both papers were of a practical and instructive character and were listened to with close attention.

The "Vacation of a Hardwareman" was the subject of a very interesting and entertaining address by J. C. Frederick, Owensboro, an ex-president of the Association. "The Evils of Improper Legislation" was the title of a paper in which an able discussion of the subject was presented by B. J. Durham, Danville. J. S. Ogden, delegate to the National Convention held in Chicago last year, made a very lucid and entertaining report of the proceedings of that body.

ELECTION OF OFFICERS.

The following officers were elected to serve for the ensuing year:

PRESIDENT—John W. Read, Hodgenville.
FIRST VICE-PRESIDENT—J. E. Grubbs, Winchester.
SECOND VICE-PRESIDENT—George Cubbage, Leitchfield.
SECRETARY—John R. Sower, Frankfort.
TREASURER—A. Stettler, Jr., Owensboro.

Delegates to the National Meeting, to be held in Boston in June: J. R. Sower and B. J. Durham; alternates, J. W. Read and J. Kirchdorfer.

REVIEW OF THE MARKETS.

WIRE NAILS: In consequence of the mills being behind on shipments, Nails are being delayed on orders from retailers, and now that the Spring trade is getting into shape they are greatly disappointed, having ordered carloads in the hopes of getting a fair stock. The scarcity of Nails existing of that character, causes a mill to ask for premiums on regular quotations, which are paid rather than be out of so staple a commodity. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers.....$2.00
Carload lots to retailers..... 2.05

New York.—The jobbers are having a hard time keeping their stocks in any kind of shape for an early Spring demand. The delay of four or five weeks' duration in receiving stock makes any accumulation of Nails at all extremely problematical. The business is fair for immediate wants, and quotations are as follows:

To retailers, carloads on dock.....$2.19
Less than carloads on dock..... 2.33
Small lots at store..... 2.30

CUT NAILS: Cut Nails are extremely scarce, owing to the fact that manufacturers are unable to obtain steel promptly, especially for the orders that are already booked. As some of the mills are filled up with orders, a refusal to add any more until April 1 is heard, and premiums are frequently paid in the West on Cut Nails that are scarce in that part of the country. Quotations are as follows, f.o.b. Pittsburgh:

Carload lots to Jobbers.....$2.05
Less than carloads to Jobbers..... 2.10
Less than carloads to Retailers..... 2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—There is but a light demand locally, which is seasonable, and in accordance with immediate wants. Jobbers are suffering from delayed shipments, which prevents any full assortment being expected. Some sizes and kinds are reported as difficult to get. Jobbers' quotations for small lots at store are on the basis of $2.30.

BARB WIRE: There will undoubtedly be a heavy demand for Barb Wire when the season begins, and the mills are being urged to make prompt shipments so as to give the jobbers good quantities to commence trade. Specifications on contract orders are being liberally distributed. On new business, it is said some mills are charging premiums over regular quotations. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: Notwithstanding the mills have a large volume of business booked, they are looking forward for enough to keep them busy some time continuously, as manufacturers of Fencing have been ordering quite freely, looking for a good trade in their specialties. Prices are firm, and some of the mills are reported as wanting a premium over regular quotations for early delievries. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads $1.85
Retailers, carloads 1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

DOOR CHECKS: A change has been made in the price of Liquid Door Checks. This represents an advance in price of 10 per cent. on practically every well known brand and has been put into effect by concerted action of the manufacturers.

SHEET ZINC: A further advance of 10 cents per 100 pounds has been announced under date of February 15. This brings the base price up to $8.50 per 100 pounds in 600-lb. casks of the thicknesses from Nos. 9 to 22, inclusive, and of the widths from 32 to 58 in., inclusive, and of the lengths from 72 to 96 in. inclusive. There are the usual extras for other sizes and numbers and the usual cash and quantity discounts.

BINDER TWINE: Quotations by different manufacturers vary slightly on some grades of Twine, but the following prices fairly represent the market, Chicago delivery, with ¼ cent less in carload lots:

	Cents per Pound.
Sisal	9½ to 9⅝
Standard	9½ to 9⅝
Standard Manila	10¾
Manila (600 ft.)	12¼
Pure Manila	13¾ to 14

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	13 to 13½
B Quality Manila	12 to 12½
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8½ to 8¾
No. 1 Jute, ¼ and larger	9
No. 2 Jute, ¼ and larger	8½

Less ¼ cent to the large trade.

LINSEED OIL: The following prices are quoted on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil.....70 cents per gallon.

THE PITTSBURGH TRADE.

February has given us real winter weather, the thermometer hovering near zero quite frequently. This seasonable weather enabled retailers to work off most of their cold-weather goods, which had lain on their shelves during the mild weather of January.

In this locality February is the poorest month of the year in the way of sales, and while this year is no exception, sales compare favorably with last year.

Our manufacturing and mining interests continue very busy, and have business booked for months ahead, so that there must be almost a calamity to interfere with the general expectation of good business this year. We find collections a little slow in some sections, but not so generally, as most customers are paying about as usual.

The Convention of the Pennsylvania Hardware Retailers had a very successful meeting in this city this week, and closed their exercises with a banquet, at which some three hundred persons were present. LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

In the discussion regarding the substitution on orders, the inference that some manufacturers make, that it is for the purpose of selling some other make of goods than the ones ordered, is not a just conclusion. When the goods ordered cannot be furnished, the motive for substitution is to accommodate a customer, and in ninety per cent. of the cases that is the result. It would be much easier for the jobber to cancel such items and as a business proposition pay him better, for he understands that the purchaser is under no obligation to keep substituted goods, and the jobber must pay transportation both ways if they are returned and bear the loss of wear and tear of transportation. In proportion as a jobber is interested in the success of his customer he will assume such risk. Only the most experienced help are permitted to substitute, and as no part of work is so liable to criticism it is not done without careful consideration. It would be a relief to the jobber to ship the goods he has in stock and cancel the balance of the order, as it would prevent delays for which he is censured and an important item of care and expense. When a substitution does accommodate, it attracts little attention; when it fails, disappointment in not getting the goods wanted is turned into blame. "You seem to think we

don't know what we want," is the reply, but the ninety per cent. who make no reply keep the temper from souring, and substitution continues. It would be better for us all if we always got what we ordered, but to patiently endure our disappointments and not impute evil intentions to good purposes would immensely add to life's pleasures. But to transfer an effort to serve into an attempt to wrong is assuming the majority of men to be rascals. The remedy that some manufacturers propose, to have the retailers deal directly with manufacturers, seems like a joke to those of us who are compelled to wait from three to twelve months for goods ordered. We have unfilled orders pending for staple goods made a year ago, but it might modify the tendency to blame the jobber. We are always glad to find on an order, "Do not substitute," as it relieves us from a perplexing duty.

A manufacturer, who had recently advanced his price in acknowledging an order, said that he had discovered that his advance did not cover the increased cost, and he was compelled to make another advance. This is an illustration of the conservatism that has prevailed. The desire to prevent high prices has been almost universal and in many cases has proved detrimental to personal interest. January trade has proved excellent; the best for that month in many years, and February promises to be quite as good. If the distributers of goods will be careful in purchasing and active in collecting, it will be an antidote against panic, and if depression comes it will make it only a resting place. Speculation has not created our prosperity, but prosperity is liable to induce speculation, with a change in the mode of living. Prosperity is the time when it is easiest to change our financial condition. It was an old saying among the early Californians that a dollar saved and brought home would buy a day's work, but only the frugal profited by it. 1907 will be a good time to get ready for hard times. There is a prevalent feeling that rebates, from which some men and sections have profited at the expense of others, will no longer be a danger to business. It has never benefited general business, but has been a trick to gain unjust advantage. Investments of all kinds, including railroads, will be improved by the reform. If, as many think, we are only in the beginning of material prosperity, it is a good time to emphasize the value of the moral sentiment as an antidote to rapacity.

THE LOCKWOOD-TAYLOR HARDWARE CO.
C. B. LOCKWOOD, *President.*

THE PHILADELPHIA TRADE.

The first cog in the wheel of 1907 compared very favorably with that of a year ago—but for some reason or other, we cannot say the same thing of the volume for the present month, although we are inclined to think the falling off is purely local, occasioned by the extreme winter weather we have experienced in the past two weeks, whilst a year ago we practically had no snow at all in this vicinity, and consequently Spring goods were in early demand. We are, however, living in hopes of this coming along with a rush a little later on, and we see no reason for anyone to become alarmed, even if they do have to pay more for their Spring stocks. Prices will not be any lower for some little time to come, unless everyone with whom we talk on this subject is mistaken, and this is hardly likely, as a great majority of those to whom we refer are very closely in touch with the situation now existing.

Advances are not coming in quite as rapidly as they were a month ago, and we are very glad of this as it was a difficult matter to cope with them and get our selling force promptly posted on the many changes. We do not remember a time, in recent years, when prices on Hardware and kindred lines were so universally advanced, and summing it all up, prices to-day are not excessive, except on Copper Goods.

BIDDLE HARDWARE CO.

EMPLOYER'S LIABILITY—RISK—ASSUMPTION.

The Supreme Court of Louisiana held, in the case of Johnson vs. Christie et al., that an employer is bound to furnish his employee with a reasonably safe place and with reasonably safe appliances in and with which to do the work assigned to him; that, where, by reason of the failure of the former in these respects, or by reason of such failure combined with the negligence of another employee, the employee sustains injury, the employer is liable, and that where the defense relied on is the assumption by the employee of the risk to which he was subjected, it must appear with reasonable certainty either that he was specifically informed of such risk or that it was so obvious that it could not have escaped his attention, due regard being had for his intelligence and opportunities.

INSURANCE—AGENT—PAYMENT—WAIVER.

The Kentucky Court of Appeals held, in the recent case of Home Insurance Company of New York vs. Ballew, that where the agent of an insurer agreed with the agent of the insured to wait until the following week for the payment of an annual installment note and the house insured burned before the expiration of the week, such agreement was a waiver by the insurer, which was in consequence liable for the loss.

NEW YORK STATE RETAIL HARDWARE ASSOCIATION

NEW YORK STATE CONVENTION.

The fifth annual convention of the New York State Retail Hardware Association at Syracuse, N. Y., opened Tuesday afternoon, February 19, with a large and representative attendance. The meetings and elaborate exhibition by manufacturers and jobbers are at the Alhambra. President Louis J. Ernst, Rochester, welcomed the members and guests, and read the annual address, which contained important and interesting recommendations on subjects pertaining to the trade and the association. Acting Mayor John W. Saddler of Syracuse, extended the freedom of the city to the members, and, at the request of President Ernst, R. R. Williams of *The Iron Age*, responded for the association. There followed addresses by R. R. Williams and W. P. Foster, president of the Rochester Commercial Travelers' Mutual Benefit Association

The following address was delivered by W. M. Pratt of the Goodell-Pratt Co. of Greenfield, Mass.

TOOL TOPICS.

There is an old saying that a man never likes to discuss a subject with which he comes in daily contact, but would much prefer to talk upon the other fellow's topic; a minister is wont to talk about politics, and a politician is quite apt to drift into the subject of religion; and when I get away from home, I often feel that I should like to leave all "Tool Topics" behind. But, really, gentlemen, this is a very interesting subject, one that can be treated in so many ways, looked at in so many different phases that, were I to attempt to cover the ground fully, your convention would hardly adjourn before the close of another week; and I shall endeavor therefore to confine my remarks to such phases as will be most likely to interest you.

THE EVOLUTION OF TOOL LIFE

from the cradle to the grave can be divided into four distinct periods; their creation, this embodying the conception and development of the mechanical idea to which they owe their existence; their construction, which period commences with the perfection and finishing of the design, and ends when they are completed, inspected, and packed ready for sale; their distribution, this period covering their history from the moment they have left the factory until they are in the hands of the man who uses the goods; their consumption, which has to deal with them after they are in the hands of the consuming public; and it will be my endeavor to allude briefly to these stages.

Those of you who study patent office reports can partially conceive of the great number of ideas that are generated in the minds of mechanical men, and as these reports only represent a very small portion, and as the greater number of ideas involving changes and improvement in old tools, as well as the creation of entirely new ones, are never patented; it is fair to presume that were all these ideas developed and the multitude of different tools and devices thereby represented put upon the market, you would not be able, gentlemen, to carry one article of a kind without doubling the size of your present stores. Every mail brings us prospectuses of new ideas as applying, or as they could be applied, toward the development of new tools, or the improvement of old ones; some of these ideas are so ingenious as to excite the admiration of any critic, however critical he might be; at the same time they are of no practical value. Some of them embodying both ingenuity and practical value cannot be made commercially, because the cost of their construction would make them prohibitive.

I do not believe that in the life of my experience we have ever had at our factory one-half dozen out of thousands of designs and models that we have looked over and passed upon, that combined all three qualities; namely, ingenuity, practicability, and commercial value. By commercial value I mean tools that can be made to sell at a price that would be commercial, and when I make the statement that ninety-five per cent. of all tools that have been designed in the last fifteen years have died almost before their infancy, I believe I am making no exaggeration. We are often approached by our customers, who in turn have been interested by their customers in some new idea, or patent, and asked to take hold of it; in the great majority of cases, THE INVENTOR'S IDEA OF ITS VALUE IS BEYOND ALL BOUNDS OF REASON; they sometimes feel that a single idea upon some small insignificant tool, the profits upon which over a long period of years would not approach even a small fortune, should net them at the beginning an amount sufficient to put them, and their children, and their children's children beyond the reach of adversity or misfortune; and having found it difficult to effect a sale, they are anxious to have the article made up for them on a royalty; and hardly a day passes that we are not asked, "What is a fair royalty upon a good tool patent?"

That is a question which can hardly be answered off-hand, the nature of the patent must first be known, the character of the tool understood, its mechanism carefully gone over and analyzed, and market conditions and possibilities given due consideration; but as a general rule no patent upon a small tool, or device, is entitled to greater royalty than five per cent. upon the manufacturer's selling price. This represents the value of money, and the returns on ideas should hardly be more; the value of a patent upon a small tool is questionable until its value is demonstrated, and to demonstrate it costs time, money, and effort; and any royalty proposition made on a higher basis will have little interest for any manufacturer who is reasonably well known.

From the designing department of a factory to the work bench of the user is a journey hard and long. Few of you, who are handling tools every day directly, or indirectly, and have been handling them in your stores for the last twenty-five years or more, realize what the bringing out of new items means; there are so many things to be taken into consideration, even after the design has been approved and tested, that often times we are obliged to lay one side an article that was born, almost with a silver spoon in its mouth, simply

BECAUSE ITS COST OF CONSTRUCTION COULD NOT BE BROUGHT DOWN

to a commercial figure. That, gentlemen, is one of the great perplexities of the tool business, particularly that class of it in which the great bulk of the product is bought by the working mechanic, the man working for a wage, whose purchasing power is limited; after, however, a design has been accepted and approved, the working model made, its various parts dissected, and processes of their manufacture decided upon, the various operations found adaptable to the equipment of our plant; and although the actual processes of making have not yet commenced, the perplexities incident to the arrival at this stage are so great that it often times seems to us that the tools are about ready to sell, and we sometimes approach you, gentlemen, with photographs of the models and solicit your orders for goods we can't possibly deliver inside of six or nine months. I mention this, gentlemen, that you may know why we occasionally do this thing, there are times when we like to swell our order files, few of us have any great temptation in that direction to-day.

The construction of a tool is most interesting, few people not actually engaged in producing them realize what the construction of a small tool, made up of many component parts, means; unless all the detail was explained the majority of dealers, who have sold tools all their lives, would fall far short in their estimate of the labor involved. The knowing of just what materials to use, which must be cast iron, which malleable, which machinery or Bessemer steel, also where crucible steel is to be used, how many points of carbon are necessary, and after this has been decided upon just what degree of temper is required. Where brass must be used in place of steel, and when brass is used, whether high or low brass is best adapted; if wood is to be used in any form for handles, or otherwise, what kind of wood is best adapted; how shall it be finished after it is formed, and a thousand and one other matters that have to be settled before the construction is complete.

Gentlemen, those of you who take particular pride in your tool departments will do well to

VISIT THE FACTORIES FROM WHICH YOU PURCHASE YOUR TOOLS,

where you can learn much about the processes by which they are made; and those of you who have managers in charge of your tool departments can't spend money better than to send those department managers to the factories from which they purchase in order that they may become posted on the salient features of every tool they sell. I say to you, gentlemen, that the mechanic entering a store to purchase a tool, providing the mechanic knows his business—and some of them do—will not be induced to increase his purchases if the clerk who waits on him makes inconsistent statements, and it is awfully easy, gentlemen, to make inconsistent statements when you are talking about tools which you don't thoroughly understand. Any inconsistent statement made by a clerk to a mechanic detracts from the prestige of the house which the clerk represents, providing of course the mechanic realizes the inconsistency—and they often times do—just the same as an inconsistent statement made by the representative of a manufacturing concern to you in your offices detracts, unwittingly perhaps, but detracts nevertheless, from the prestige of the house the traveling salesman represents.

* * * *

Now, at this point I want to bring to your attention the matter of unlimited guarantee. I think I can show you that it is all wrong, and in the long run it works an injury not only to the man who makes the goods, not only to the man who sells the goods, but indirectly to the man who uses the goods as well. If, as I have noted, the old plan were in vogue, less care exercised, less inspections practised, it would be quite within the province of a maker of tools to offer and live up to an unlimited guarantee; but unlimited guarantees, gentlemen, must always be added onto the cost of the tool, and it is neither right nor fair that those mechanics who use their tools as they should be used, care for them as they should be cared for, and expect to replace them with new ones when they have grown old and feeble, worn out with honest toil, should pay for the carelessness or ignorance of some fellow-workmen. Breakage and wear and tear after tools have been put into use are not a part of the legitimate cost of the manufacturer's product, and any unlimited guarantee will always gather in a large proportion of articles of this nature.

Unlimited guarantee instead of tending to raise the standard of quality tends to let it down for the maker, knowing that he has agreed to take back anything often times takes chances on goods coming back that should never have left his plant. Unlimited guarantee deprives the dealer of legitimate sales that would otherwise be made; unlimited guarantee induces a laxity and carelessness on the part of the user instead of stimulating the idea that the

GREATEST EFFICIENCY IN THE USE OF TOOLS

can only be obtained by a thorough knowledge of their capabilities, and a careful handling of the tools themselves

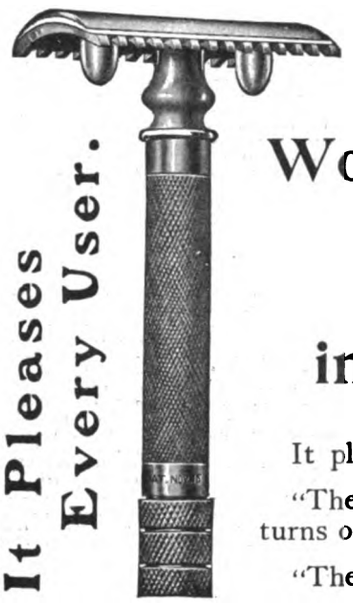
Under the modern factory practice, tools made up of many component parts, each part completed only after from two to twenty-five operations, requires individual inspection after each class of operations, as well as inspection of the finished part before the assembling process is reached. In many tools the difference between the cost of a good article, and a cheap one, is made up, not so much in the different costs of the material used, not so much in the amount of labor necessary for its production, but in the character and quality of the labor used thereon; furthermore, gentlemen, the better tools you are endeavoring to produce, the more expensive inspection departments you must maintain, the larger amount of rejected product—I mean by this product that is thrown out because it is not up to standard at inspection—you must expect, it cannot be otherwise.

In the assembling of tools where close fits are required, and close fits, gentlemen, make good tools; great care must be exercised, and in the assembling alone you can often times spend in making a tool what it should be ten times as much, gentlemen; ten times as much, as you would be obliged to spend and still get it together after a fashion. The greater efficiency a factory maintains, the higher the standard of its product, the closer must they draw the lines against the replacement of any article not showing actual defect or flaw.

Gentlemen,

UNLIMITED GUARANTEE IS BOTH A DELUSION AND A SNARE,

it does much harm, and little good; it is simply the offering of a premium for ignorance and carelessness, and you who are aiming at those high standards of efficiency and excellence should protest against the continuance of this practice. I do not mean the abolition of all guarantees, but I do mean the abolition of unlimited guarantee, and the abolition of any guarantee that implies a willingness to replace any article except in case of actual flaw or defect. There are many dealers who appreciate this matter, and are willing and anxious to serve with equal fairness both the user and the maker, realizing that this is the best policy for all concerned; but there are those among the trade who feel that the prestige of a manufacturer will be injured if he declines to replace every article that the user returns to him; I can only reiterate what I have previously expressed, that the higher the standards of efficiency maintained in producing tools of any character, the closer must the lines be drawn against the replacement of any tool because of careless breakage or ordinary wear and tear.



When it comes to the third period of tool history and we take up the subject of distribution, it seems almost unnecessary for me to refer to it, it would be like carrying coals to Newcastle for me to attempt to tell you, gentlemen, how tools should be distributed. I cannot refrain, however, from making some slight reference to matters

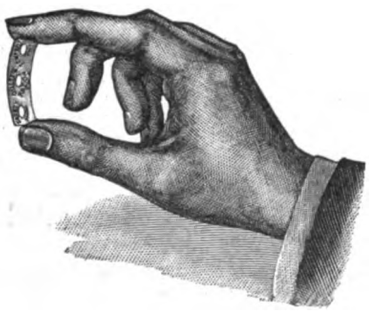
Gillette Safety Razor

NO STROPPING NO HONING

It Pleases Every User.

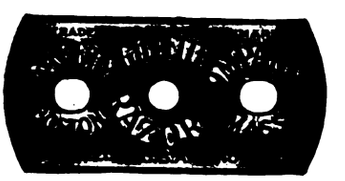
The Most Wonderful Selling Razor in the World

It pleases every customer, who in turn brings a new customer.



"The Gillette" sales are permanent, no shelf worn stock. It turns orders to money and profits.

"The Gillette" Blade is of Fine, Flexible, Wafer Steel that Shaves.



12 BLADES, 24 SHARP EDGES,

Every blade will give from 20 to 40 close, smooth, comfortable shaves.

Triple silver-plated set with 12 blades $5.00.
Quadruple gold-plated set with 12 blades $10.00.
Quadruple gold-plated set with 12 blades and monogram $12.00.
Standard combination set with shaving brush and soap in triple silver-plated holders $7.50.
Other combination sets in silver and gold, up to $50.00.

Standard packages of 10 blades with 20 sharp edges, for sale by all dealers, at the uniform price of 50 cents.

Sold by Leading Drug, Cutlery and Hardware Dealers.

We Supply all Dealers with Signs and Booklets.

Write us for facts, and for terms.

NEW YORK CONVENTION,

Continued.

of general policy, which I believe to be good practice and in vogue to quite a considerable extent among manufacturers of tools to-day; that is, in the building up of an individuality for an article, class of articles, or line complete with the consuming public who use the goods; when the goal of such an ambition is reached, gentlemen, you find it much easier to sell the goods than was the case in the earlier stages of their career; and I sometimes think that even though a popular article may be sold a little lower than it really ought to be, that the average of your profits upon the article, because of its popularity and in proportion to the time and money involved, will compare favorably with what on the face might appear to be a larger profit upon some article not so well known and in smaller demand.

The ways of bringing about such a *status quo* are many, the one tool of all tools that requires the most careful handling,

WILL PROVE THE MOST PROFITABLE INVESTMENT WHEN WISELY DIRECTED

and the greatest source of expense when unwisely directed, is the tool of advertising. By advertising we can exploit our products with the consuming public, and thereby increase our sales if not our profits; but it is so easy, gentlemen, to eat up in advertising all the profit, and more, than we can make, unless our advertising departments are wisely directed. We want your assistance in the carrying on of this campaign, it is absolutely necessary that we should have it; otherwise, gentlemen, providing we are making our distribution of commercial literature through you, we shall be sending you quantities of stuff that you have no use for and can't distribute, and fail entirely to send you what you could use and would use if you had it; and if the carrying on of such a campaign is of any value to you, as merchants, and I believe it is, we should both work together with a view of making it as effective as possibe. We are both the servants of the consuming public, let us never lose sight of the fact that he is the man who makes or breaks us, he started us in the beginning, and unless we treat him well, he will finish us in the end, without him we both go down and out.

The great problem of distribution cannot be solved except in a general way by our organizations, it is purely an individual function treating the various conditions that surround each one of our individual selves; organizations like governments have their province, but the building up of our individual affairs must of necessity be largely a matter of individual effort; because of our organizations, however, we may be able to bring to a successful conclusion and realization plans and ambitions which would otherwise not have been fraught with success. Why? Because by reason of our organization it has been possible to bring up for discussion complex problems, and through their discussion, we as individuals, glean a knowledge that it would not be possible to acquire in any other way; and we are then

IN A POSITION TO MAKE INDIVIDUAL DECISIONS INTELLIGENTLY.

One of the greatest peers of England once remarked that the most a government could do was to make virtue easy and vice difficult; the most our organizations can do for us is to make success easier and failure more difficult.

The fourth and last stage of the tool's career is its consumption; its use by the consuming public. We can drink to the toast, "May it never grow less." Having created the demand, it is up to us to carefully conserve it, aiming to make the best possible articles and to sell them at reasonable prices;

ZEALOUSLY GUARDING OUR QUALITY,

looking always toward improvement, never satisfied until our tools and methods are known throughout the confines of the whole civilized world as standards of excellence.

Standards of excellence, how much these words mean, not only to you, and to me, not only to the members of the National Retail Hardware Association, the National Hardware Association, the American Hardware Manufacturers' Association, not only to every single State Retail Association, but to every human being in this country, and in every other country, civilized or savage as well. Standards of excellence, and that we may become such is certainly a most noble aim, and if such an ambition should ever be realized, we shall not only have made our mark in this world, but have made some provision for the next as well.

We are all honestly and earnestly endeavoring to build ourselves up, it doesn't make any difference how large we are, we want to become larger, it doesn't make any difference how prosperous we may be, we desire to become more prosperous, and our affiliation with the various bodies of retailers, jobbers, and manufacturers will tend not only to conserve the general, but to aid each individual interest as well. It should therefore be our aim, it should be the aim of each and every one of us, to become standards of excellence; you, gentlemen of the Hardware trade, for the communities which you serve, our jobbing friends for the territory they cover, and the manufacturer, that is the manufacturer of mechanics' tools for the whole civilized world. It matters not what we have done, or what we are doing at the present time, if it is possible for us to effect *any* improvement, then we should strive towards such an end.

CONTRACTS.

NO. 10. CAPACITY OF MARRIED WOMEN TO MAKE CONTRACTS.

Under the common law, that is, the law inherited from our English ancestors and unaffected by our American statutes, a married woman's contract was absolutely void. In England this was the legal status of a married woman, generally speaking, up to January 1, 1883. Our American States were quicker to recognize the injustice of the common law, and in the case of nearly every one of them, statutes, sweeping in character, have been passed from time to time modifying the common law prohibition, so that at the present time in some of our States a married woman can make contracts as freely as if she were single; in others she can make contracts within certain limitations.

As a married woman's contract rights are determined by the law of the place where the contract is made, and as there are as many "places" or jurisdictions as there are States and territories in the Union, each with statutes peculiar to itself, it will be impossible in a short article to give an adequate view of the contract rights of married women in the United States. It may be of interest and profit for us to briefly outline the contract status of married women in the several States, as follows:

Alabama: Full legal capacity to contract in writing as if she were single; she cannot convey or mortgage her lands or any interest therein without the assent and concurrence of the husband; can carry on business alone as a trader and is liable for the debts of the business; cannot become surety for her husband.

Arizona: May convey her separate estate as a single woman; may become a trader and be liable for debts of the business.

Arkansas: Not liable for debts contracted by her unless the contract was made with special reference to her separate estate; may carry on business and be liable for its debts; must schedule her property or the burden of proof is on her in a contest with her husband's creditors.

California: May engage in business for herself provided she obtains from the Superior Court a permit; may convey her property without the consent of her husband; is liable on her contracts.

Colorado: May engage in business in her own name and be liable for its debts; may buy, sell, and convey personal and real property the same as if single; has every contract right that her husband has.

Connecticut: Women married since April 20, 1877, control their own property, convey it, make contracts, sue and be sued as if unmarried; women married prior to that date are of a very different legal status and cannot make contracts except under certain conditions; but the husband and wife married prior to that date may, by contract in writing with each other, come under the operation of the law of 1877.

Delaware: May carry on business and be liable for its debts; may make all kinds of contracts necessary to be made with respect to her own property as if she were single.

District of Columbia: May carry on business and be liable for its debts; may not become surety or sign accommodation paper; may convey her real or personal property; may make contracts in matters having relation to her separate estate.

Florida: May carry on business alone if permission be obtained from the Circuit Court; may bind her own estate by contract as if she were single.

Georgia: May carry on business alone and be liable for its debts; cannot bind herself by contract or suretyship; may make contracts with reference to her separate estate.

Idaho: May carry on business in her own name and be liable for its debts; all property acquired by her after marriage, excepting by gift, bequest, devise, or descent, she holds in common with her husband; wife must record inventory of separate property.

Illinois: May go into business and become liable for debts, but cannot go into partnership without her husband's consent; has the same power over her property as her husband has over his; may make contracts and control her own earnings; may hold and dispose of real and personal property in the same manner that her husband can in the case of property belonging to him.

Indiana: May become a sole trader and liable for her business debts, but cannot become surety for any one; cannot mortgage nor convey real estate without her husband joining in the conveyance; may deal with her separate property as if single; may make any contract with reference to her separate estate.

Indian Territory: May become a trader and liable for business debts; to bind her separate estate the contract must be made with reference to making it liable; must schedule her separate property.

Iowa: To become a sole trader and be liable for business debts she must file a married woman's certificate; may deal with her own property in the same way that a husband may deal with his; may make contracts the same as if unmarried.

Kansas: May become a sole trader and liable for business debts; all property acquired by her during the marriage, excepting such as she obtains by donations or inheritance, becomes joint property of both husband and wife; property owned by each separately before marriage remains separate property; by contract made before marriage the provision regarding community property may be set aside; the separate property of the wife is not responsible for community debts; the husband may sell or mortgage community real estate without the consent or assistance of the wife, and can dispose of removable property in any way he desires; a married woman can sell her separate property by the consent of her husband and, in default of his consent, by that of the court; she cannot bind herself for her husband and cannot mortgage her property except by special consent of the Court; a married woman, except she be a public merchant, cannot make any contract or bind herself in any way without the consent or assistance of her husband or of the court.

(To be continued.)

SOUTH DATOTA RETAIL HARDWARE ASSOCIATION

The second annual convention of the South Dakota Retail Hardware Dealers' Association was called to order at Mitchell at 4 o'clock Tuesday afternoon, February 12, by E. D. Hawkins, of Vermilion, president of the association. Mayor Branson, of Mitchell, upon being introduced, delivered the address of welcome.

He extended to the visitors the heartiest welcome possible and wanted the delegates to understand that Mitchell appreciated their coming, as the city wished to be in touch with all classes of business in the State. He related an experience he had in the Hardware business in California a good many years ago, and stated that he still had a very friendly feeling for those engaged in the trade today. E. I. Gregory, of Alexandria, responded to the address in behalf of the association, stating among the things that the Hardwaremen were pleased to again assemble in Mitchell where their first annual convention was held a year ago.

The annual address of E. D. Hawkins, of Vermilion, president of the association, was listened to with the closest attention. He touched upon many questions of deep interest to the members. Among other things he called attention to the fact that manufacturers should not be criticised or have any ill-feeling shown toward them should they deem it inadvisable to advertise in the programs, or to take exhibition space in the convention hall, and he expressed the opinion that a resolution to this effect should be adopted.

President Hawkins expressed regret that the association is not yet strong enough to organize an insurance company, stating that as soon as it grows large enough such a company should be established for the benefit of the Hardware dealers. He stated he was not in sympathy with the feeling that the railroads ought to be made the butt of every would-be statesman who felt it his duty to antagonize the railroads, but he thought there were some reforms which were necessary for the merchants, one of the most vital being, in his opinion, the prompt delivery of goods. There should be a law, he stated, giving them a certain length of time to make a given distance, and a penalty imposed for each day over the stipulated time.

Reforms of this kind, he pointed out, must come through the aid of the representatives in Congress, and every member of the association was urged to consider himself a committee of one to write to his representative concerning this proposed reform. President Hawkins suggested that some relief should be given the dealers who are furnishing building material in this State. As the law now stands it is possible for a man to build a house without putting a cent into it, and there is no reason why, in his opinion, the law of the State should invite men to violate universally recognized principles of justice.

Following the conclusion of the president's annual address, an interesting half hour was spent in brief addresses for the good of the association, in which a dozen or more merchants or traveling men had something of interest to offer. It proved to be a very profitable half hour

The discussions centered principally on the theme that the Hardware merchants ought to get out in greater numbers to the annual conventions, where they have the opportunities to visit the other Hardware merchants from all localities in the State, and that by an exchange of ideas and experiences the opportunity was excellent for securing information which could be profitably applied to their own locality when they returned home.

The sentiment was expressed that no merchant could remain within the narrow confines of his own store and keep in touch with the progress that was being made in his lines of business. Among those who made short addressses were W. A. Campbell, who spoke on the reciprocal demurrage question, and R. A Grimm, who spoke on the organization of Hardwaremen as a bond of fellowship to aid them in their future business.

A telegram of sincere greetings was read from Frank A. Bare, secretary of the Ohio Hardware Association, residing at Mansfield, to the South Dakota association.

EVENING SESSION—TUESDAY, FEBRUARY 12.

When the Hardwaremen gathered in the city hall for the evening session it was noticeable that the attendance was much larger than at the opening session, late trains having brought in many delegates from various parts of the State.

One of the features of the evening session was an address by Fred J. Vetsch, representing the South Dakota Traveling Men's Association, which was as follows:

THE RELATION BETWEEN THE WHOLESALER AND THE RETAILER.

"At your initial convention held in this city a year ago I had the honor to represent the South Dakota Traveling Men's Association. You were in infancy; we were but a year your senior, but since that time both of us have done a fine line of growing, which in itself is a sign of good health. A year ago we had 492 members. To-day I bring greeting from 1,048 members. When I appeared before you a year ago, I called your attention to one of the objects of our Association, namely, as regards his commercial value and his position in society.

"To this we have added our share. The closing years of the last century and the first few years of the present we have emphatically emphasized the wonderful changes in the calibre, mentally, morally and physically, of the travelers who today cover the world in the interest of American manufacturers and wholesalers. The evolution has been along lines most desired. The change has been very elevating. And I say to you, gentlemen, it has played one of the chief parts in the cast of the American prosperity play. It requires only that one should know the kind of men who to-day are advancing the commercial prosperity of America to realize the old-time days are past, never to return.

"The traveling man to-day is that medium which has brought the wholesaler closer to the retailer and the retailer closer to the wholesaler. Please note, I mention two relations as existing here. A word about the relation on the part of the wholesaler to the retailer. The wholesaler has had brought to his attention, by such organizations as yours, the evils attending the retail trade, but it has devolved upon the traveling man to back up your statements. It has become incumbent upon him to explain in detail to his house and to lay before them the evils that are robbing the retailer of his legitimate existence. In a degree, we do this from a point of self-preservation, because what hurts the retailer, hurts us; what helps him means added sales and profits to our houses and ourselves. And to you, members of the South Dakota Hardware Dealers' Association, I voice the statement of 1,048 travelers who pleaded your case before their employers, and I feel confident I could find in this room verification of my statement.

"Now, in the relation of the retailer to the wholesaler, I again voice the statement of 1,048 travelers who have placed the case of our firms before you for consideration; have explained to you the ins and outs of distributing merchandise in wholesale, and I am glad to pay you the compliment that you have proven yourselves equal to giving fair consideration in the same degree it has been extended to you, so that to-day mutual consideration for each other's welfare is the tie, next to the traveling man that binds the wholesaler and retailer. Let me give a vivid illustration of this condition, namely, what is known in business as "Policy Claims." These used to be allowed almost on demand, but you, the retailer, have ceased to demand any claims that are unjust, but you have turned to the proper channels to get relief. I refer to such claims as damage in transportation, breakage and delay in shipments.

"A word more about the traveling man. He must needs be intelligent, courteous, honest and wide-awake. These qualifications are part of his stock in trade; a premium is paid him for this stock by both the wholesaler and retailer. It is he who has put the order-taker out of business by going out with his stock in trade and creating a new business. I say create business, because the salesman who cannot create a demand and increase the business of his house soon expunges himself from that vast army of commercial men who, and I say it with reliable authority at my command, have advanced the commercial supremacy of America more in one decade than it ever gained in any previous five decades.

"A word about organization and association work. This work emphasizes the wonderful work being done in the interest of winning back trade from outside competition, of keeping the hold on the home trade and establishing the most cordial and friendly relations between men in the same line of business. Organization and association have broken down the barriers that formerly kept me in the same line of business from meeting in friendly discourse and considering matters of mutual concern, or in protecting their own interests when assailed from without. It has annihilated prejudice and thrown wide open the gates of friendly and fraternal intercourse. Men in the convention of this State association or in county gatherings have rubbed shoulders and clasped hands with men in the same line of business and been the better for the contact. The retailer who does not attend the convention of his association, be it county, city or State, has neglected an opportunity to make a better merchant of himself.

"Allow me to say that I consider the day at hand when it requires organizations instead of individuals to place their stamp of consent or disapproval upon questions of concern to make an impression: it will only be a question of time until questions of moment will come before you. I might name such matters as the parcels post, election of senators by direct vote, government ownership of railways; these are all within the range of possibilities within your life-time. That organization work is effective can be proven by numberless testimonials. I cite you the

Digitized by Google

recent case in the federal court of our State of M. W. & Company against the Retail Merchants' Association.

"Calling forth such cases and actions ought to show what is being and can be done by an association. A word to the jobbers and wholesalers why they owe it to the retailer to assist him in eliminating the evils attendant upon the retailing of merchandise. The argument advanced that a jobber can sell to whoever he sees fit and who can pay the money for the goods he has to sell, is without merit; it does not hold good under any condition. The effort being made to secure the assistance of the jobber by not selling to the mail order house is not only legitimate, but has for its backing the fact that the jobber owes his original creation and continued existence to the business given him by the retailer.

"Further, the soundest argument to my mind in favor of this contention is the fact that the retailer is a perpetual condition and the jobber must look to him for the continued life of his institution. A word to the retailer. Inasmuch as the jobber has manifested his desire to help you, you must in turn apply and inject into your business such methods as will show him your sincerity in the matter. In regard to advancing of prices, allow me your indulgence a few moments longer.

"I have a right to assure you that the advances in the last few years are by no means at the hands of arrogant and manipulating jobbers. It is mostly done by the manufacturer. But be that as it may, the advance is for you to take care of. Advancing a selling price the amount it has advanced in the buying price decreases the amount of your profit and is not commensurate with good business. Let me illustrate: Good and safe business dictates a corresponding percentage of increase of the selling price as the advance of the buying price.

"A year ago, when I appeared before you, you endorsed my advice as to how a merchant can increase his business and keep money from going to the mail order house. Such was the advice all along the line to the retailer. This has been followed out to a very large degree, and to-day in this grand State of South Dakota the business of the retailer is gradually in the ascendant and not on the decline, and much credit must be given to the progressiveness and aggressiveness of the retailer and traveling men of South Dakota."

At the conclusion of Mr. Vetsch's address it was announced by President Hawkins that the remainder of the evening session would be devoted to a question box, wherein questions of any character relating to the Hardware business would be propounded and answered. He called S. R. Miles, of Mason City, Iowa, who is one of the vice-presidents of the National Hardware Association, to the floor and placed him in charge of the question box. Mr. Miles proved himself thoroughly posted on all lines of the Hardware trade and on the conditions which the Hardwareman has to meet.

But three questions were taken up, and the discussion of these consumed the time until nearly ten o'clock. These were on methods of advertising, protection in a mechanics' lien law and setting a minimum price on goods. The topics brought forth a wide range of discussion, particularly on the methods of advertising. A number of the delegates expressed their views along this line and gave their experience in the way of success or failure.

The range of advertising covered the newspapers principally, with the addition of circular letters and displays in show windows. One Hardwareman gave his experience in advertising in newspapers as the best, and stated that he sold a dozen of a certain article at a higher price than his competitor sold for, merely from the fact that he let the people know he had the article and was selling it for a certain price. Another dealer maintained that the show window had the strongest attraction for him, and cited an instance of the display of sad-irons in his window just before Christmas, adding that he sold more sad-irons in the two weeks than he did in the previous six months.

The direct personal letter to customers found favor in many instances, and that it proved a successful trade-getter was the consensus of opinion of those who have tried it. One of the foundations for successful advertising, as set forth, was for the retaler to have unlimited confidence in the goods he was selling, and put his whole soul into the selling of the same and not be afraid of the price, for in the absence of either of these essentials a business man would be liable to "fall down" in his sale.

The discussion of the mechanics' lien law as it affected the Hardware trade brought out the fact that the Hardwaremen of the State were not protected, inasmuch as the law that was adopted some years ago was declared unconstitutional when taken before the State supreme court. Several of the Hardwaremen asserted that they had lost more in their years of business through the absence of a mechanics' lien law than could be attributed to any other one cause. It was urged that the legislative committee should call the matter to the attention of the legislature which now is in session, and strive to secure the enactment of a suitable law.

The placing of a minimum price on lines of goods was favored by some and opposed by others, the opposition being due in a measure to the addition of freight on heavy goods. Some thought that on the lighter goods the plan might be feasible.

MORNING SESSION—WEDNESDAY, FEB. 13.

Soon after the morning session was called to order the Hardwaremen went into executive session, from which all who were not members of the association were excluded. William M. Pratt, of the Goodell-Pratt company, of Greenfield, Mass., occupied an hour or more in the presentation of a paper on the "Evolution of the Hardware Trade, or the Hardware World." Mr. Pratt was a former resident of South Dakota, having for some time been engaged in business at Kimball. His address, coming from a manufacturer, was of more than ordinary interest and at its conclusion a vote of thanks was extended to him by the association.

H. E. Johnson, of Redfield, presented a paper on "Relation of the Employer to the Employe in the Retail Store." He expressed himself as not being in favor of employing cheap help, and that the ability of a clerk could not be gauged by the amount of salary paid. He believed in placing a certain amount of responsibility on the clerk and make him feel that he was a part of the business.

J. H. Roper, of Parker, presented his ideas on "Office System," explaining the methods used in his own business. Just prior to an adjournment being taken at noon, President Hawkins appointed the various committees.

Wednesday evening the Hardwaremen were the guests of the Commercial Club of Mitchell at the city hall, where cigars, music and speeches were the order. One of the features was the reading of an original poem by R. A. Grimm, of St. Paul, on "The House that Jack Built," being a parody on the catalogue house business.

MORNING SESSION—THURSDAY, FEB. 14.

When the Hardware men reassembled, the delayed reports of Secretary Noah Keller and Treasurer B. G. Wattson were presented.

Secretary Keller called attention to the fact that a year ago, when the association was organized, it started out with sixty-one members and twelve honorary members, and that M. L. Corey, of Argos, Ind. who was present, stated that the association had reason to be proud of the fact that it had started with the largest number of charter members of any State association.

Since that time, Secretary Keller, stated, nineteen regular members and one honorary member have been added, making a total of ninety-three at the opening of the second annual convention. The Secretary referred in detail to the good that had been accomplished by the ailiance and affiliation with the National Association in the effort to defeat legislation that would be detrimental to the interest of the Hardware dealers, and the aid that had been given in the passage of laws.

The annual report of Treasurer Wattson showed the association to be in good financial condition, considering that it is only about a year old. The association has a good cash balance in the treasury.

AFTERNOON (CLOSING) SESSION, THURSDAY, FEB. 11.

At the closin gsession the committee on resolutions made a report, which was in substance as follows: Thanks were extended the city of Mitchell and T. J. Spangler, of Mitchell, an attorney, the former for the hospitality extended to those who attended the convention, and the latter for the legal information given the convention on questions that were of vital importance to the association. S. R. Miles also was extended a vote of thanks for having come from Iowa for the purpose of addressing the convention; thanks were extended to President Hawkins, Secretary Keller and Treasurer Wattson for services rendered; also to the trade journals for the valuable assistance rendered during the year; the action of the Retail Merchants' Association was endorsed relative to the request that the State legislature amend the pure food laws; a demand was made that the legislature should enact a pure paint law in conformity with the North Dakota law; the representatives in Congress were urged to vote against the parcels post bill; it was recommended that a committee of two be appointed to attend the legislative session at Pierre for the purpose of endeavoring to secure the passage of a pure paint law.

The committee on nominations made the following report on officers for the ensuing year, and the report was adopted.

PRESIDENT. E. D. Hawkins, Vermilion.
FIRST VICE-PRESIDENT, Otto E. Mueller, Aberdeen,
SECOND VICE-PRESIDENT. F. I. Pixley, Montrose.
SECRETARY. H. E. Johnson, Redfield.
TREASURER. B. G. Wattson, Chamberlain.
EXECUTIVE COMMITTEE. E. L. Gregory, Alexandria; F. S. Birkenbine, Scotland; I. H. Roper, Parker; H. E. Johnson, Redfield; E. D. Hawkins, Vermilion; B. G. Wattson, Chamberlain; J. P. Rummel, Sioux Falls; W. C. Webster, Mitchell; S. O. Steensland, Beresford; C. W. French, Elk Point.

When it came to selecting a place for the next annual convention there were two or three candidates. The second annual convention was to have been held at Aberdeen, but owing to a fire which destroyed one of the leading hotels of the city, the Hardwaremen found it necessary to seek another location and the change to Mitchell was decided upon. When the selection of the place for holding the next annual convention came before the convention the candidacy of Aberdeen very naturally was favored by the Convention, and that city captured the prize for next year. The exact date for the third annual convention will be selected by the executive committee.

There being no further business, the convention adjourned *sine die*.

The delegates returned to their homes with the feeling that the convention had been a thoroughly successful and profitable one from beginning to end, and that they had been well repaid for the time expended in attending the gathering of Hardwaremen.

AUTOMOBILE SUNDRIES RECORD

BOWEN OILING DEVICES.

The Bowen Mfg. Co., Auburn, N. Y., are manufacturing a line of strong, neat-appearing but low priced Oil and Grease Cups. Lubrication requires a lubricator, a lubricant and the man. Lubricators may be divided into three classes: Those for lubricating the cylinders of motors; axles of car wheels and road vehicles; shafting and machinery in general. In olden times bearings were packed with grease or soaked in oil; later, holes

OIL CUP 5A.—OPEN VIEW.

were bored in boxes and left open to collect dust; still later, wooden plugs or iron screws were put in these holes, but lost in a day; then we had the cup with removable cap, which was soon lost, and the device seemed no better than open hole, plug or screw. Now we have the self-closing, dust-proof cups of late invention. These are practical, economical, efficient, cleanly and well-proportioned. In fact, they are the acme of perfection in the oil-cup world. Being dust-proof, they keep out the greatest

OIL CUP 4B.

enemy to machine bearings. At all times, in all places, under all conditions, oiling devices should be dust-proof. Dust is worse even than lack of lubricant. Again, we now have the plain compression cups for grease made by modern methods, pressed from sheet metal, so there is no possible chance of leakage or breakage, thus surpassing any cast cup made.

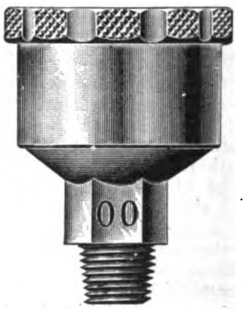
Styles "A," "B" and "D" Oil Cups are dust-proof and positively self-closing, so that bearings cannot be left exposed by care-

OIL CUP 4D.—OPEN VIEW.

less operators. Tops of styles "A" and "D" can be easily opened with point of oil can when placed where it cannot be easily reached with both hands. Style "A" sets down low for use in places where a higher cup would be likely to get broken. Style "N" is claimed to be an old favorite.

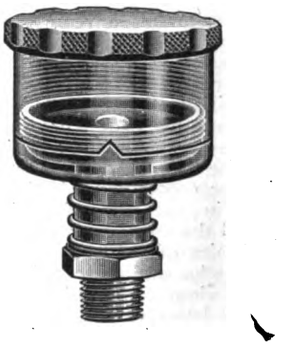
These Cups cannot be jarred open, as a small spring is placed between cap and body, which causes just enough friction to keep them closed.

Grease cups are furnished in either brass or steel, plain, fitted with leather washer or ratchet. The caps on the ratchet style are held in place by a spring ratchet locking at each half turn. No matter how much vibration there is if this ratchet is engaged the cap cannot be lost. The leather washer in a measure keeps the cap from jarring off, besides preventing the grease from leaking out between the threads when used in warm places.



Plain cups are for use where there is not much vibration, although the perfect fitting threads of those under review allow

OIL CUP 4N.—OPEN VIEW.



considerable vibration before the cap will jar off.

In conclusion, there are several good reasons for using these devices. They are economical, because their application pre-

"EMPRESS" PLAIN COMPRESSION GREASE CUP.

vents the overflow of oil. They are clean for the same reason, and because the oil is not spread on the machine, the spout of the can being inserted into the hole. They save time and labor,

"EMPRESS" RATCHET COMPRESSION GREASE CUP.

because they are handy, and allow of quick attendance. They are self-closing and dust-proof and therefore preserve the life of the machine. They improve the appearance of machinery, and people are now calling for them.

AN APT REPLY.

An interesting illustration is related of a man in Philadelphia whose desire to start in business for himself. He applied to a woolen house and got goods to the amount of $400. The salesman asked him what he manufactured.

"I mek pants," he replied.

"How do you want to buy these goods?"

"The best vey I can," was the answer.

"How will you pay for them?"

"Well, I gif you my note for four months."

"Is your note good?"

The buyer looked around, winked to the salesman, and put his finger on his nose. "My friend," he said, with an air of one who is about to impart a confidence, "if my note vas goot. I vould make notes, not pants."—*Exchange.*

STOVE MANUFACTURERS' RECORD

CHATTANOOGA STOVE COMPANY ELECTS OFFICERS FOR ENSUING YEAR.

At the annual meeting of the stockholders of the Chattanooga Stove Company, Chattanooga, Tenn., recently, the old board of directors were all re-elected. Officers elected for the ensuing year were: N. P. McKean, Cleveland, O., president; J. H. O'Brien, Cleveland, general manager, and C. D. Richmond, Chattanooga, secretary-treasurer and local manager.

EDWARD L. STOCK.

Edward L. Stock, formerly assistant manager of the Niagara Radiator Company of North Tonawanda, has been elected president and manager of the Iowa Radiator Company of Cedar Rapids, Ia. The Iowa company has just been organized. It has purchased a site of ten acres and will erect a plant at once. Mr. Stock is closing up his affairs in North Tonawanda preparatory to the removal of himself and family to the Western city.

QUAD STOVE MANUFACTURING CO.

The Quad Stove Manufacturing Company, Columbus, Ohio, held its annual meeting and reelected George B. Donovan as president; A. W. Hershey, vice president, and John Armstrong, secretary and treasurer. The company will build a new factory this year on West Second avenue, where it has purchased ground for the structure, which will be 50 by 200 feet, with three floors. The company which was organized a few years ago, has experienced a rapid growth and is now in a prosperous condition.

PITTSBURG STOVE AND RANGE CO.

The Pittsburgh Stove and Range Company, Pittsburgh, Pa., has chosen the following directors: John D. Nicholson, J. B. Jackson, H. M. Baldwin, F. R. Baldwin, A. M. Neeper, John S. Graham and George W. J. Bissell.

THE ART STOVE CO.

The Art Stove Co., Russell street and Milwaukee junction, Detroit, Mich., soon will occupy a fine new office building, and salesroom, on the east side of Russell street across from the factory. Contracts for the building have been let, the cost to be $40,000, and it is to be completed June 1. The building is to be two stories and basement, with a frontage of seventy-five feet on Russell and 120 on Milwaukee avenue. The foundation is to be of concrete and the walls of paving brick with stone trimmings. Interior construction will be steel. The ground floor will be occupied by the offices, which will be finished in modern style. On the second floor will be a lecture room, for annual meetings of commercial travelers, and for demonstrating stove construction; a sample room and a dining room for the office force.

COOKING STOVES FOR MEXICO.

Consul A. J. Lesinasse, of Tuxpan, reports that the cooking stoves in use in that part of Mexico are mostly of the cheaper grades, with occasional demand for a better quality with nickel fittings, but not to any great extent, as this increases the duties considerably. A list of firms who deal in stoves and names of farmers who might be induced to substitute stoves for the present cooking appliances at Tuxpan, Vera Cruz, San Potosi, Pueblo and Guadalajara are given by the consul and are filed for public reference at the Bureau of Manufactures, Washington, D. C.

REORGANIZATION OF THE EVANSVILLE STOVE WORKS.

At a meeting of the stockholders of the Evansville Stove Works held recently, it was announced that S. Alfred Reese of Louisville, Ky., had acquired by purchase the interest of Capt. Chas. H. Myerhoff, who has been secretary and treasurer of the company for many years.

Mr. Reese was admitted as a member of the board of directors and the following officers were elected for the ensuing year: A. H. Kahn, president; S. A. Reese, vice president and general manager; L. S. Kahn, secretary and treasurer.

Mr. Reese comes to Evansville from Louisville, where he was manager of sales of the Laib Co., jobbers of mill and plumbing supplies, and is well acquainted with the Hardware trade throughout that territory.

Asked for his plans, he stated that he would take active charge of the plant at once, and that it was the intention of the management to double the output and make many improvements during the year. He is greatly impressed with the many advantages of Evansville as a manufacturing center.

CHANGE IN THE UTICA HEATER COMPANY.

An important change in the management of the Utica Heater Company was announced at the annual meeting of the stockholders of the corporation, which was held recently. It will in the course of a short time mean the expansion and increase in the volume of an industry, the manufacture of boilers and furnaces, which has already made Utica famous in the commercial world.

Coupled with experience attained only by long work in the manufacture of products which has already given the Utica Heater Company an enviable reputation in every State and territory in the United States, there is now the energy and push of several young men who are well known in that city and who will have excellent financial backing, and the action taken at the meeting of the stockholders means the beginning of a period of prosperity for the company.

The stockholders elected John B. Jones, George C. Hodges, Campbell E. Hodges, W. C. J. Doolittle, Edward Norris, A. B. Maynard and J DeP. Lynch as a board of directors, and at the subsequent meeting of the board of directors Mr. Jones was elected as the president of the company; Mr. Doolittle, the vice-president, John Toole, second vice-president, C. E. Hodges, the secretary and Mr. Norris, the treasurer. Mr. Doolittle, C. E. Hodges and Mr. Norris were elected as the executive committee.

The acquisition of the young men to the directorate means much to the future development of the business, the manufacture of the Imperial hot water and steam boilers and the Superior warm air furnaces, which have an excellent standing in the trade. Mr. Doolittle, who is the new vice-president of the company, has the reputation in the business world of being one of the best heater salesmen in the United States. He has been interested in the Hart & Crouse Company as the assistant treasurer of the corporation, and the treasurer of the New York Radiator Company, whose plant is located in East Utica. Mr. Doolittle has spent a number of years in the manufacture of hot air furnaces, water heaters and steam boilers and he is thoroughly conversant with the details.

Associated with Mr. Doolittle will be Mr. Jones the president and the organizer of the Utica Heater Company, and Mr. Norris, who until two years ago was connected with the Hart & Crouse Company. Mr. Norris has been identified with the Roberts-Wicks Company, clothing manufacturers, for the past two years, having had charge of the credit end of that corporation. His experience will be of value to the management of the Heater Company.

Mr. Doolittle, Mr. Jones and Mr. Norris will have full charge of the selling of the product of the Utica Heater Company and, they will devote considerable time to visiting the trade. Mr. Jones, the president of the company, is now in the West.

The other young men who have been elected to the directorate of the company are all well known Uticans and they will give their time end energy to the management of the company. M. D. Waldron, the superintendent of the company, will remain under the new management.

While the details for the extension of the company's business which will follow the increase of the capitalization have not been announced, it will be the policy of the new directors to do everything possible to make the plant one of the best in the State and to put upon the market an extensive line of steam and hot water boilers and hot air furnaces. The Carton plant, which was taken over by the Utica Heater Company when it was organized in 1900, will be enlarged and greater capacity provided. The boilers and furnaces will be sold direct from the plant to retailer. There will be quite an extensive rearrangement of the foundry to meet with the demands of the company.

The changes in the stock holdings in the company were secured several months ago, but the change in the management was not made until the annual meeting of the stockholders held at the company's office recently.

CENTURY STOVE COMPANY.

The Century Stove Manufacturing Company, Johnstown, Pa., at a meeting of the stockholders elected the following board of officers: President, Roland S. Wilson; vice president and secretary, Robert Monroe, and treasurer, John H. Waters. The foregoing officers, together with Herman E. Baumer, Jr., and Samuel B. Waters, constitute the Board of Directors.

STOVE RECORD, Continued from page 48.

NORMAN PEARL STEEL RANGES.

Galusha Stove Co., Rochester, N. Y., are the manufacturers of the Norman Pearl Steel Ranges, about the merits of which they make free to discourse as follows:

The Norman Pearl Steel Range is our latest production, and is a very handsome stove. The nickel parts are all removable, having our beautiful silver nickel finish, and will always keep bright and cheerful. The stove has big capacity and is most compact. It has either duplex or dockash draw-out grate. Large ash pan, reservoir either of cast iron, enamel or copper, and of large capacity; removable nickel bands; oven thermometer; very handsome large high elevated warming oven; removable base, and is indeed a joy forever. Unlike most steel ranges, it has a cut top, the same style as is used on cast-iron ranges.

Has our full guarantee as to its baking and fuel-saving powers. We have made ranges for more than half a century, and know whereof we talk. If interested, will be very pleased to write you full particulars.

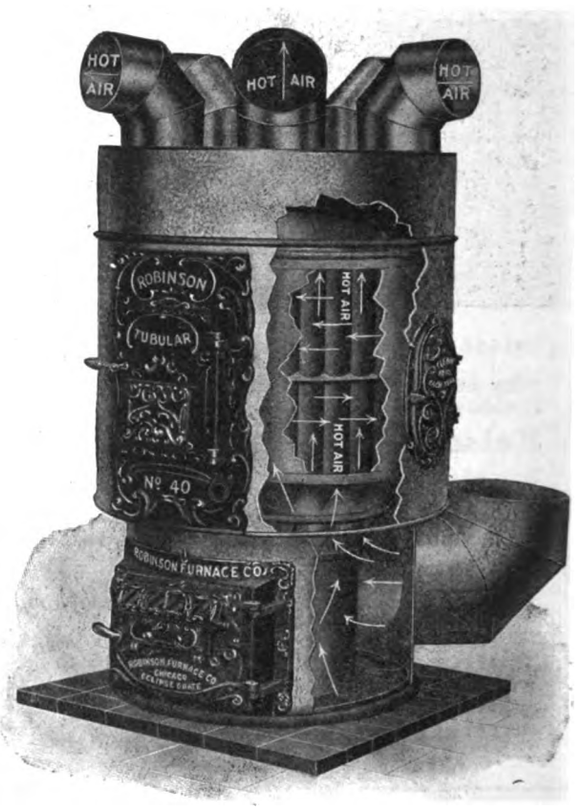
NORMAN PEARL STEEL RANGE.

MAKE YOUR SUMMER COOKING EASY.

A Norman Gas Attachment is agreeable and economical. It adds comfort to the routine of the housekeeper's busy life. Norman ranges, both cast-iron and steel, can be fitted with the Norman Gas Attachment. The Gas Attachment has a three-griddle top, a large bake oven, and a large broiler oven, most convenient to use in hot weather.

We can furnish on our Norman ranges two styles of gas attachments, one having a three-burner top, for heating and boiling, with drop shelf beneath, thus giving a six-hole range, nine large griddles. The other style has the three-burner top combined with gas oven and broiler, a complete gas range in fact, of large capacity, but taking up a minimum of space. Can be used for either natural or manufactured gas. Completely fitted for boiling, baking and broiling, with a minimum of fuel.

Our special broiler is one of the catchy points in the Norman gas combination. The broiler is at top of oven and in consequence the broiling can be done at any reasonable distance from flame. The Invincible Norman with Gas Attachment is practically one piece of furniture. The other way you have your range and gas stove separate, requiring twice the space at twice the cost.



LEBANON STOVE WORKS COMPANY.

STOCKHOLDERS MEET AND SELECT DIRECTORS AND OFFICERS.

The stockholders in the Lebanon Stove Works Company, Lebanon, Pa., the corporation operating the stove factory on Guilford Street near Eighth, met recently and elected the following directors: J. Henry Miller, John Hunsicker, John M. Allwein, Harry A. Reinoehl, D. H. Dillman, J. G. Bonewitz, John Meyer, Nathaniel Witmeyer, A. M. Stein, Moses P. Spangler and H. H. Kreider. The following officers were elected for 1907 by the board: President, J. Henry Miller; vice president, John Hunsicker; treasurer, John M. Allwein; secretary, M. P. Spangler; superintendent H. A. Reinoehl.

ROBINSON TUBULAR FURNACES.

The Robinson Furnace Co., 107-109 Lake Street, Chicago, Ill., are the manufacturers of the Robinson Tubular Furnaces, among the exclusive features of which are the following: They are the only Tubular Furnaces having direct draft and return flue with long fire travel. They have a larger heating surface than other furnaces. The Robinson Tubular has a direct draft damper, which, when turned down, allows smoke to enter pipe direct, but when closed the smoke divides at rear and makes two complete circuits of radiator around flues before entering exit.

ROBINSON TUBULAR FURNACE.

The Robinson Tubular Furnace is constructed on correct and thoroughly tested principles, with the single aim of giving the greatest amount of heat from the smallest amount of fuel. The ash-pit is broad and deep and allows a free circulation of air under grate, thus increasing life of castings. The dust flue with damper allows light ashes to pass upward into combustion chamber, and not out into basement. Robinson Furnaces are supplied with the celebrated Eclipse grate. The fire can be kept continuously. The shaker ring is mounted on ball-bearings and is easily moved from right to left. The ring slopes toward the middle, so that cinders are worked on to the dump center. When this is reversed, all consumed substance falls into the ash-pit. The grate frame has three wheels mounted into it, and wheels cannot get out of place. The grate and frame can be easily removed when repairs are needed.

QUINCY STOVE COMPANY'S ANNUAL MEETING.

The stockholders of the Quincy Stove Manufacturing Company met for their annual meeting in the offices of the foundry in Quincey, Ill. Reports for the past year were read showing the business to have been very satisfactory in every respect to those interested.

The business to be transacted was the selection of a board of directors and the election of officers for the coming year. The new board is composed of the following gentlemen: Joseph Oertle, H. Germann, Ed. Sohm, H. C. Sprick, George Keller and John Brackensieck.

The officers are: August H. Heidbreder, president, N. King, vice-president; Charles Heidbreder, treasurer; Herbert Figgen, secretary.

OFFICERS RE-ELECTED.

Officers and directors were re-elected at the annual meeting of the stockholders of the Peerless Stove Company Columbus, Ohio. The officers are: John E. Witman president; A. C. Witman, vice president; Harry Stafford, secretary, and John A. Witman, treasurer. A dividend of 6 per cent, payable next month, was declared.

WEST VIRGINIA RETAIL HARDWARE ASSOCIATION

The West Virginia Retail Hardware Association, which was organized in Wheeling in September last, held its first annual meeting in the assembly room of the Hotel Waldo, Clarksburg, on Tuesday and Wednesday, 12th and 13th inst. There was a good attendance of the members, who manifested much interest and enthusiasm in the work of the Association. At the opening session the Hon. Harvey W. Harmer, Mayor of Clarksburg, was introduced and heartily welcomed the visiting Hardwaremen to the city. President Clelland responded felicitously on behalf of the Association.

CONVENTION COMMITTEES.

The president appointed the following committees to act during the convention:

AUDITING—C. D. Barbe, W. J. Corrick and A. I. Hess.

RESOLUTIONS:—Leslie Hawker, C. S. Davis, C. W. Alderson.

NOMINATIONS—T. B. Frey, W. A. Vance, J. H. Krepps.

AMENDMENTS TO BY-LAWS—H. C. Marten, C. D. Kyle. C. D. Barbe.

A. J. Hess, Mannington, was appointed sergeant-at-arms.

PRESIDENT CLELLAND'S ADDRESS.

The annual address of F. A. Clelland, Fairmont, president of the Association, was as follows in part:

Out of perhaps 250 Hardware dealers in our State eligible to membership, two-thirds of this number have not yet affiliated with us. While the methods for securing members adopted by our organization have proven fairly successful, many have not yet been reached, and I hope to have this convention discuss this important matter at length with a view of securing better results. If it were possible to enroll even two-thirds of the eligible dealers in our State, I believe we would have started

ONE OF THE MOST INTELLIGENT AND INTERESTING

associations in the United States.

I believe if we would file our grievances more readily with our secretary, where the manufacturer or jobber has violated good trade, then we would realize more fully the benefit of our organization. Turn the unfair jobber over to the secretary. If your grievance is a just one he will line Mr. Jobber up in the name of the association. There is a way made clear by our by-laws to handle him.

CONSISTENCY IS A HARD THING TO LIVE UP TO.

Were we as enthusiastic in living up to the principles of our Association in everyday business as we are in advocating them at our convention, the beneficial influence of our organization would be largely increased. At the convention we all condemn the jobber who sells our customer goods in retail quantities at wholesale price, and to-morrow give this same jobber a liberal order for goods for our own shelves. Or we denounce the manufacturer who allows his goods to be slaughtered by the mail order houses and at the same time we give his goods prominence on our shelves, and perhaps in selling them give them preference over equally as good goods made by a manufacturer who protects us.

Or, again, we meet our own town competitor with a warm smile and hearty handshake, and tell the convention that we love our competitor, and rather than cut prices would be perfectly willing to see him get just about all the business in our town. But by the time we get a sight at our town we have made up our minds to go and see the contractor to whom we had quoted Nails the day we left home, and tell him confidentially that we will make the price 10 cents per keg less, for fear our competitor would get the order. Let us be loyal to the manufacturer or jobber who is loyal to us, and we will soon find our influence will be felt by all jobbers and manufacturers, and through such loyalty we may hope to see many more concerns falling in line with our views and the sale of Hardware through Hardware stores largely increased.

Next to retaining

THE FRIENDSHIP OF OUR CUSTOMER

we want to retain the friendship of our competitor. It pays us and it pays him, and notwithstanding that the apparent good feeling exhibited at conventions by competitors toward each other may not always be maintained in our efforts to do business in everyday life, yet I firmly believe nothing tends to

ERADICATE UNFRIENDLESS BETWEEN COMPETITORS

so completely as an organization of this kind. Sometimes such meetings present the first convenient opportunity to get acquainted with our competitors, and then we find that we are somewhat alike in our characteristics. Aside from the practical value of the association the acquaintances we form, the meeting of men engaged in the same line of business and the new ideas we absorb are all beneficial, and to me are alone worth the cost of membership were there no other benefits to be derived.

I want to refer to a few letters that I have received from jobbers and manufacturers assuring me that it was their desire to conduct their business along lines in entire harmony with the principles of our association. Such expressions are encouraging in so much as they indicate to us that the jobbers recognize that our principles are right, and that as members of the National Retail Hardware Association they cannot afford to antagonize any branch of such National Association by any violation of proper trade ethics. Let us be careful to

TEMPER ALL OUR DEMANDS WITH ABSOLUTE FAIRNESS,

with proper consideration for the rights of others, and this grand organization of our craft is bound to result in establishing the Hardware business on a higher plane.

AMENDMENTS IN BY-LAWS.

Several amendments were made in the by-laws, as submitted by the committee appointed for that purpose. One of these was the merging of the duties of secretary and treasurer in one official.

Another provides remuneration for the secretary-treasurer at the rate of $50 per annum, with $1 for each member added to the roll during his term of office.

It was also determined that the annual meeting of the Association should be held on the second Tuesday of February of each year, unless otherwise provided for by the Executive Committee.

ELECTION OF OFFICERS.

The following officers were elected for the ensuing year:

PRESIDENT—C. D. Kyle, Kyle Supply Company, Wellsburg.

FIRST VICE-PRESIDENT—Thomas B. Frey, Keyser Hardware Company, Keyser.

SECOND VICE-PRESIDENT—E. J. Kane, E. J. Kane Hardware Company, Weston.

SECRETARY-TREASURER—Leslie Hawker, Leslie Hawker & Co., Shinnston.

EXECUTIVE COMMITTEE—F. R. Clelland, W. A. Vance and E. C. Linger.

The former officers of the Association were: F. R. Clelland, Fairmont, president; J. H. Krepps, Morgantown, secretary; J. H. Morgan, Morgantown, treasurer; the Executive Committee having consisted of Messrs. Clelland, Krepps, H. C. Kalbitzer, Thomas B. Frye and C. P. Moore.

RESOLUTIONS.

Resolutions were adopted in opposition to the establishment of a parcels post and urging the reclassification of second-class matter and 1 cent letter postage.

CHARLES S. DAVIS'S PAPER.

Charles S. Davis of J. M. Davis & Sons, Oakland, Md., read an interesting paper on "The Necessity for Retailers Publishing Their Own House Organ," which, for lack of space, we have reserved for a future occasion when greater prominence can be given it.

CONVENTION NOTES.

Elkins, Randolph County, W. Va., was chosen as next year's meeting place.

F. A. Clelland, former president of the Association, was chosen as the representative of the West Virginia Association at the annual convention of the National Retail Hardware Association, which will be held in Boston next June. J. H. Krepps, former secretary, was named as alternate.

M. L. Corey, secretary of the National Retail Hardware Association, and T. James Fernley, secretary-treasurer of the National Hardware Association, were present at the convention and received a warm welcome from the members. Both gentlemen made interesting addresses, which were listened to with close attention. Among others who addressed the convention were W. P. Heiskell of the Ott-Heiskell Hardware Company, Wheeling, and M. McDonald of the Pittsburgh Stove and Range Co., Pittsburgh.

♣

The man who takes an active part in the management of a big corporation these days will do well to keep his grip already packed. Europe seems to be a fine place for travel, in case of an investigation.

A man's early education is a great factor throughout his life. This was shown again a few days ago when a Pennsylvania Russian killed his wife, and when asked why he had done so, remarked: "I have a right to kill my wife; it's nobody's business but my own."

Railroad men have just organized an "Efficiency Bureau" to clear up the car shortage. It will insist on greater promptness on the part of both shipper and consignee. When asked whether there was to be any more promptness on the part of the railroads, a shipper replied: "H-u-s-h! The King can do no wrong."

Buffalo, N. Y.—The Lyman Mfg. Co. has been organized with a capitalization of $10,000 by Richard R. Lyman, Vreeland B. Lyman and John D. Squiers. The new company will manufacture metal specialties and devices.

Chicago, Ill.—The American Metal Specialty Co. has been organized with a capitalization of $2,500 by Benjamin Samuels, Hiram R. Glick and I. B. Lipson.

East Orange, N. J.—The Torridor Power, Light and Heating Company of America has been incorporated for the purpose of manufacturing stoves, ranges, steam, and water heaters, radiators, etc.; capital $125,000. Incorporators: J. M. W. Kirchen, F. R. Wickes, H. H. Picking, Camden.

Kirkwood, Mo.—Independent Paper Cutter Company has been incorporated by William Conway, Kirkwood; P. E. Briscoe, St. Louis; John E. Hill, Old Orchard, B. N. Brown, Ironton, Mo., to manufacture and deal in roll paperholders, cutters, Hardware specialties and novelties; capital stock, fully paid, $15,000.

Lowell, Mass.—Rice & Co., Inc., has been incorporated to manufacture window guards, etc.; capital, $25,000. President, F. H. Haynes; treasurer, V. G. Barnard, Lowell.

New York, N. Y.—Compressed Fluid Appliance Co. has been incorporated for the purpose of manufacturing scales, measuring instruments, etc.; capital, $10,000. Incorporators: W. P. Hammond, D. J. Newland, New York City; P. F. Sonnck, Brooklyn.

New York, N. Y.—Hudson Wire Co. has been incorporated for the purpose of manufacturing wire and metal goods; capital, $50,000. Incorporators: W. O. Higgins, F. E. Pratt, W. B. Maynard, New York City; R. M. Atkin, Ossining; A. T. Rutter, Mt. Vernon.

New York, N. Y.—Mendel Mfg. Company has been incorporated to manufacture tools; capital, $5,000. Directors: S. P. Mendel, O. H. Mendel, M. H. Beall, New York.

New York, N. Y.—The Kalla Mfg. Co., which was recently incorporated with a capitalization of $50,000, is to erect a plant at St. George, N. Y., for the manufacture of Kalla's combination carpenters' plane and other tools. Those interested include the following: Alexander Kalla and Joseph Cibulas, 187 East Seventh Street, and Orlando J. Hackett, 49 East Twelfth Street, all of New York.

Portland, Me.—Ward Safety Razor Co. has been incorporated to manufacture razors, strops, hones, etc.; capital, $250,000. President, J. E. Manter; treasurer, C. E. Enton; clerk, M. W. Baldwin, all of Portland, Me.

Somerset, Ohio.—The Somerset Foundry Co. has been incorporated with a capital stock of $10,000. The incorporators are: Henry B. Schimpf, James E. Wilson, Edward M. Schimpf and Robert W. Howard. It is the intention of the new company to manufacture heating stoves and do a general foundry work. The plant of the old Somerset Mfg. Co., which was owned by purely Somerset capital, has been purchased by the new corporation.

Springfield, Vt.—The Jones & Lamson Machine Co. is planning a large addition to its plant. The company manufactures screw cutting machines, turret lathes and mechanics' tools. It is now working day and night to keep up with business.

St. Mary's, Ohio.—The Standard Chain Co. is building a large addition to its plant.

Taunton, Mass.—Globe Mfg. Co. has been incorporated to manufacture nails, tacks, rivets, etc.; capital, $20,000. President and treasurer, J. A. Welch, Taunton.

Wilkinsburg, Pa.—Hutchinson Electric Carpet Sweeper Company has been incorporated with a capital of $60,000. Directors: Robert B. Hutchinson, Augustus R. Smith, Edgar N. Doty, Wilkinsburg; Brainard H. Warner, Brainard H. Warner, Jr., Kensington, Md.

Changes and Improvements.

Detroit, Mich.—The Independent Stove Company has filed amended articles of incorporation increasing its capital stock from $30,000 to $60,000.

Flanders, N. J.—The Monarch Tool Co., Inc., has secured from the Board of Trade in Succasunna a factory site of fifty acres, situated on the Lackawanna Railroad in that town, and preparations are being made for the erection of a large factory that will be built of concrete, at an estimated cost of $15,000. The building will be equipped with machinery for the manufacture of mechanics' fine tools, marine and stationary engines, builders' Hardware and electrical goods, etc. The Monarch Tool Co. was organized and incorporated under the laws of the State of New York April 7, 1906.

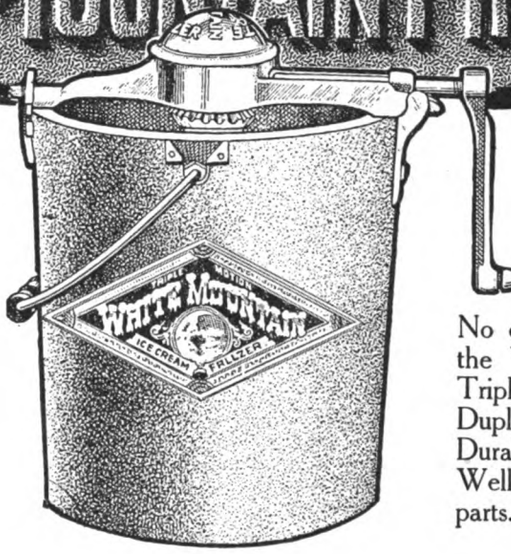
Freeport, Ill.—The directors of the Stover Mfg. Co. have authorized the erection of an additional foundry to the Hardware plant of the concern. Another large cupola will also be added. Within the past six months a building 60 by 100 has been erected for foundry purposes and the new one will be 100 feet long and over sixty feet wide. There will also be additions to the big plant, the company's business at the present time being greater than ever before.

Mt. Carmel, Conn.—Walter W. Woodruff & Sons' Company has let the contract for an addition to its factory. The addition will be one-story brick, 30 by 100 feet, and is to cost about $5,000. Work will commence at once. The addition has been made necessary by the company's increasing business in Hardware, including automobile supplies.

Palmer, Mass.—In consequence of the continued increasing demand for the products of the Wright Wire Company, and the need to buy from other companies many hundreds of tons of wire, the company has decided to increase the capacity of the mill here some 3,000 or 4,000 tons per year. An addition to the front of the present building will be built of brick, two stories high and 160 feet long. In the rear of the present mills will be built an 85 by 75 foot one-story brick annealing and cleaning building. It is also possible that another addition for another department will be found necessary later in the Summer, as new machinery for the department is now under construction at Worcester.

Sheffield, Ala.—B. E. Cohen, whose large stove plant was destroyed by fire several months ago, has arranged to construct a large plant of the same kind at Florence, where a site has already been secured, work on the foundry to commence without delay.

Springfield, Mass.—The United Whip Company is planning to build an addition to the present factory on Main Street, the new building to be about 125 feet long and 45 feet wide, and two or three stories high, with a basement. The addition will connect with the wing of the present building.



Warren, Ohio.—Under the new organization of the Penn Shovel Mfg. Co. Clay Hanna is the new shop superintendent and Charles A. Day, sales manager. The work of installing the 50-ton a day mill is progressing satisfactorily and will give employment to about seventy-five additional men.

Miscellaneous.

Louisville, Ky.—At a special meeting of the stockholders of the Turner, Day and Woolworth Handle Company, the capital stock was increased to $1,000,000. The increase was in the common stock and the common holders have the right to subscribe for the new issue at par in the proportion of one share to every five shares they now hold. The new capital is for the purpose of taking care of the company's rapidly expanding business, which is reported to have increased 50 per cent. last year over the preceding year.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bay City, Mich.—The organization of the Bay City Boat Mfg. Co. with a capital of $100,000 has been announced. L. J. Weatherwax, formerly a heavy stockholder of the Brooks Company, is president of the new company, and C. L. Fox is secretary. It is said that the company will occupy several old buildings until Spring, when a regulation shipbuilding plant will be erected. They will build pleasure boats of all sizes.

New York, N. Y.—New York Auto Sales Co. has been incorporated to manufacture vehicles and parts thereof; capital, $1,000. Incorporators: Eugene P. Billin, No. 1446 48th Street, Brooklyn; Frank McDermott, No. 1454 Wilkins Aevnue, The Bronx; Irene L. Bowden, No. 644 East 141st Street, New York.

Philadelphia, Pa.—The Philadelphia Bait Mfg. Co. have incorporated for the purpose of manufacturing and selling a complete line of sporting goods.

Winnipeg, Man.—G. A. Britton, of the Ashdown Hardware Co., and R. J. McKay, of the Hingston-Smith Arms Co., have joined in a partnership under the name of the Western Sporting Goods Co., and will do business in the Stobart block, on Portage Avenue. Messrs. Britton and McKay have been for the past few years among the foremost of Winnipeg sportsmen.

Changes and Improvements.

Albany, N. Y.—The Albany Hardware & Iron Company have added automobile supplies and accessories to their sporting goods department and are gradually increasing the variety. At present it has become an important feature of their business and has led them to import quite largely in certain lines. They also buy from the American manufacturers of accessories in the automobile line.

Baltimore, Md.—A. G. Alford, the well-known wholesaler and retailer of sporting and athletic supplies, is now located at 309 East Baltimore Street. This is back in the old quarters he occupied before the fire, and is a much finer store, being 20 by 80 feet. The establishment is fitted out in handsome style, having new dark oak fixtures with large, plate-glass show cases extending to the floor. It is heated by water system and lighted with electricity, and is considered one of the finest sporting goods stores in the South.

Bristol, Conn.—The plant and business of the Liberty Bell Co. has been purchased and taken over by the New Departure Mfg. Co. The manufacture of the New Departure bells now will be concentrated in the Liberty factory, thus affording room in the New Departure plant which is needed for the increased production of coaster brakes and other specialties. Under the new order of things, E. D. Rockwell, formerly general manager of the Liberty Bell Co., will become manager and superintendent of the New Departure bell department. Originally he was associated with his brother, A. F. Rockwell, in what was then the New Departure Bell Co., but in 1897 they separated and E. D. formed the Liberty Bell Co., which was capitalized at $50,000 and of which M. L. Peck was president. The New Departure Co. has applied to the legislature for authority to increase its capital to $1,000,000.

Brooklyn, N. Y.—The Prospect Motor Mfg. Co. is making ready to place on the market the Simplex speed indicator, an instrument specially designed for motorcycle use. It will operate by a friction wheel in contact with the front tire and will be applicable to wheels of all diameters.

Buffalo, N. Y.—F. F. Rick & Co., jobbers, have filed articles of incorporation which place their capital stock at $10,000. Frederick F., Otto R. and Thomas A. Rick are named as the corporators.

Chicago, Ill.—The Plume & Atwood Mfg. Co., whose immense factories are located at Waterbury and Thomaston, Conn., respectively, have moved their Chicago headquarters from the old stand at 199 Lake Street to the fifth floor of the new Heyworth Building, Wabash Avenue and Madison Street. The change was effected at the beginning of the year and was contemporaneous with the removal of their New York offices from their old quarters to No. 279 Broadway. Albert E. Snow, late general Western manager of the company at Chicago, has removed to New York, taking the position of general superintendent of sales. C. M. Chase, at the Heyworth Building, succeeds Mr. Snow as manager of the Chicago office of the Plume & Atwood Co., and William M. Kent, the American Ring Co., assoiated therewith.

Coldwater, Mich.—Rogers & Hunt; Mr. Rogers' interest purchased by George Wicker.

Escanaba, Mich.—L. K. Edwards has opened a new store in Masonic Block.

Freeport, Ill.—The Frazer Mercantile Co. are adding sporting goods to their line of Hardware.

Homewood, Ill.—A number of well-known professional golf players, some of them ranking among the best club makers in this country, have organized a company to manufacture clubs for the sporting goods trade. The style of the new firm is the P. G. Manufacturing Co., and it is established at Homewood. The company will make a specialty of turning out golf clubs for dealers in golf supplies. The plant is equipped with up-to-date machinery for club making and the firm has on hand a large stock of well-seasoned and selected second-growth hickory shafts. The iron head department is in charge of a first-class mechanic who has had years of experience in the largest shop in Scotland. David and James Foulis, Robert White and W. H. Way are some of the professional players interested in the new venture. They will be pleased to furnish prices and estimates.

Kawanda, Man.—Burns Bros., Hardware and sporting goods dealers, are moving their stock to Portage la Prairie, Man.

Lancaster, Pa.—E. S. Gleim of 132 North Water Street, will, about April 1, open an exclusive sporting goods store under the name of the Lancaster Sporting Goods Co., which will handle a complete line of athletic goods, guns, ammunition and fishing tackle.

Madison, Conn.—The Winchester Repeating Arms Co., of New Haven, has bought Hammonassett Point, the ground being called Island Farm, and containing about 150 acres. The purpose in purchasing it is to use the property for proving grounds.

Montreal, P. Q.—Lewis Bros., jobbers of Hardware and sporting goods, are now represented in Toronto by W. R. Tait, Max Morell, the former manager, having resigned to become sales manager for Rice Lewis & Son, Toronto.

Philadelphia, Pa.—John E. Pike, manufacturer of knit goods, shaker knit sweaters, coat sweaters and a full line of athletic hose, has now moved into larger quarters at Jasper and York Streets. The floor space is now more than double that formerly occupied and many new machines have been installed, so that henceforth the firm will be in much better shape to attend to the wants of its patrons.

Shelton, Neb.—Gumprecht Bros. & Co. have succeeded J. B. Hodge & Co., and will carry sporting and athletic goods.

Toronto, Ont.—A. Hyslop has been appointed representative of the Canada Cycle & Motor Co., Toronto Junction, in the Maritime Provinces, taking the place of F. Luke, who has become one of the company's representatives in Western Canada.

Embarrassments.

Cambridge, Mass.—George F. Schwartz, dealer in sporting goods, has made an assignment; liabilities, $766; assets, $440.

Miscellaneous.

A new application of the motorcycle to military service has been invented in Austria. It concerns the quick laying of telephone and telegraph wires. In front of the cycle is installed a cylindrical roll or reel upon which the wire is wound, and a man sitting in the moving car lays the wire by means of a long pole, either in the tops of the trees, or, if there is none, in the ditches or gutters. With the new apparatus three miles of wires may be laid in twelve minutes.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

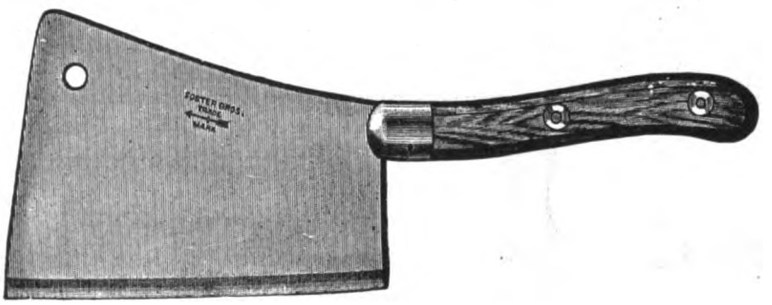
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

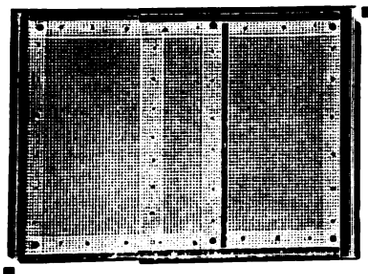
and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

85 to 93 CLIFF STREET and 12 JACOB STREET.

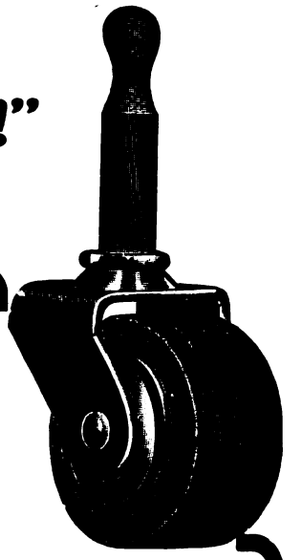
made a big hit last season

In Great Demand for the Coming Season.

They are entirely rust-proof.
They are also fly-proof.
They cannot warp or shrink.
They are strong and lasting.
They can be adapted to any shape.

Ask your Jobbers.



The METALLIC SCREEN CO.

Sole Manufacturers

COLLINS, - - - - WISCONSIN

The "Faultless!" Why?

Because it is "the CASTER that never refuses to turn."

That's pretty near perfection, isn't it? Especially when we remember what we get with the ordinary kind.

It's all owing to our little patent pivot bearing socket. By the way, that same little socket won us the **Highest Award** at the World's Fair in St. Louis, in 1904.

Then notice the **Leather Wheels**, they give ease and steadiness in rolling and turning.

We make them with interchangeable sockets so they can be used on any kind of furniture.

If you want a seller, a money maker, carry the **"FAULTLESS"** line. Our illustrated catalogue will show you what we make.

THE FAULTLESS CASTER MFG. CO.
Nebraska City, Neb.

Pure and Absolutely Safe

Cooking Utensils are those which will NOT SCALE OFF like cheap enamel; NOT SCORCH OR BURN like light fry-pans and skillets; NOT ABSORB GREASE OR FLAVORS like Cast-Iron. In a word "HYGIENIC" is the condition and "HEALTH" the result when using

"NEVER-BREAK" STEEL SPIDERS, GRIDDLES AND KETTLES.

Look for the BRAND—it is what the signature is to a bank check—you can't expect the GENUINE from more than one.

THE AVERY STAMPING CO., Cleveland, O.
Sole Mfrs. of "NEVER-BREAK" GOODS.

Consult

our catalog file for anything you need in the hardware line.

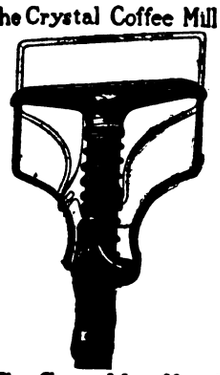
GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.



To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

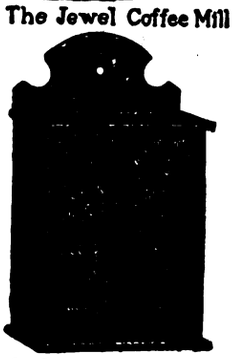
We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.



The Jewel Coffee Mill

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

The Joseph Dixon Crucible Co., Jersey City, N. J., are distributing an interesting post card, on which is depicted the City Investing Building, now in the course of construction at Broadway, Cortlandt and Church Streets, New York, in which Dixon's Silica Graphite Paint forms an important item. This Paint is manufactured in one quality and in four colors. This post card will prove a valuable addition to a collection of New York views, and incidentally keep in mind the name of the Joseph Dixon Crucible Co.

F. P. MAY HARDWARE COMPANY.

The Hardware business heretofore conducted by Frank P. May and George J. May as a co-partnership under the firm name of F. P. May & Co., Washington, has been dissolved and the assets, good will and accounts have been transferred to the F. P. May Hardware Co., a corporation duly organized under the laws of the District of Columbia, which said company assumes all outstanding liabilities and to whom all bills receivable are to be paid. The F. P. May Hardware Company will be under the same management as the old firm, and the same general policy that characterized it for so many years will be continued.

PLUMB'S ANCHOR BRAND TOOLS.

We are in receipt of a folder from Fayette R. Plumb, Inc., Philadelphia, which they have just had prepared to insert in each box of their Handled Hammers and Hatchets sent out by them, and which is entitled "Selling Points on Plumb's Anchor Brand Tools." This is in accordance with the plan which has been advocated quite extensively by the retail dealers at their conventions and is known as the Bush plan. This folder, we are sure, will be of considerable assistance to salesmen in retail stores, and is of convenient size to put in the waistcoat pocket. Owing to the fact that one of these will be placed in each box, every retailer will have quite a supply, and will find it to his interest to place the surplus on his counter where they can be read by his customers.

GAS MANTLES ONLY ASHES.

The gas mantle is nothing but ashes, and it is wonderful how science makes its particles cling together as long as they do.

The gas mantle was invented by a chemist of Vienna. He noticed the intense heat given out by a small quantity of thorium thrown into a stove in his laboratory. He realized the importance of the discovery and in 1880 began a series of experiments to utilize this remarkable quality of the element in intensifying light. He found that pure thorium would not cohere well enough to be of use, and he then began searching for a combination of elements that would answer.

In 1887 he produced his first mantles, but they were so delicate that they could not be transported and were delivered by hand. A boy was trusted to carry two, one in each hand, for delivery about the streets of Vienna. In the early '90s he found that a good mantle could be made from a combination of the two substances, thorium oxide and cerium oxide, and that a coating of collodion would give a sufficient firmness to allow it to be transported. Since then gas mantles have gone into general use in nearly all parts of the world and thousands of factories are producing them.

INCREASING USE OF COPPER IN BUILDINGS.

There is a great revolution going on in the building trade, iron, concrete and copper superseding bricks, wood and stone, a very good illustration of which can be seen in the new depots of the Delaware, Lackawanna & Western Railroad, which are being built in New York and Hoboken. It will be noticed that copper is used almost entirely for the outside walls and facing of the structure, taking the place of cut stone.

The making of bronze fittings for buildings is an industry which has doubled within three years, and is increasing at a ratio perhaps greater than that of other branches of the copper consuming industry. This is due to the enormous amounts of bronze trimmings specified by architects in the form of decorative interior work.

The new Hall of Records, in New York City, has 62,000 pounds of copper in its dome. The building contains copper in all forms to the amount of 600,000 pounds. Three office buildings under construction in the financial district will require in the aggregate 2,450,000 pounds of copper within a year, in the forms of wire, window sheathing, roofing, leaders and bronze and brass fittings.

RETAIL DEALERS' HARDWARE AND IMPLEMENT ASSOCIATION OF TEXAS.

J. W. McManus, Dallas Secretary of the Retail Dealers' Hardware and Implement Association of Texas, has recently sent out to the members the following letter announcing the establishment of offices at Dallas for the convenience of its members:

To Our Members:

After considering the proposition of the importance of the Association having headquarters located in Dallas, it has been done, and it is hoped that this move will help stimulate our members to renewed effort in interest of the upbuilding of the Association.

Convenient offices have been secured in the Slaughter Building, at the above address, opposite the St. George Hotel, for the "Dealers' Exchange." It is within easy reach of the wholesale district and the several hotels. You are urgently requested to make this your headquarters when in Dallas, and remember, please, that our Insurance Department is now in full operation and ready for your business.

The fact of lessening the cost of insurance to our members through establishing the Dealers' Exchange by the Association, should appeal to every dealer in Hardware, implements and vehicles in Texas.

To those members who subscribed at the Convention for insurance and authorized the Secretary to draw on them for the required $20.00 deposit, and who have not already paid it, or do not do so by March 1st, I will make them the draft for $20. as requested, to enable us to complete this important part of our insurance plan.

RULES FOR BUYING.

By B A. Chambeau.

The careful and conscientious buyer (and this usually means the proprietor of the store) should adopt a few rules, and as an illustration, I suggest the following:

Keep complete stock records.

Take advantage of quantity whenever possible, especially on staples.

Order in ample time to avoid running out of goods should there be a slight delay in transit.

Patronize the traveling salesman as much as possible, and have confidence in his representations.

Don't deal with a house unless you are fully convinced that it will not take advantage of whatever confidence you may repose in it, as this is one of the necessary requisites for mutually satisfactory business relations.

Make quality the prime consideration, and do not compare prices without comparing quality.

Take advantage of all cash discounts and make your remittances wherever possible direct to the jobber in ample time to reach him before the expiration of the discount period.

If you are interested in the welfare of the salesman, don't burden him with collections and claims, as his success depends upon the amount of goods he sells.

Don't hold the jobber responsible for everything that goes wrong, irrespective of whether he is to blame or not.

Don't make an arbitrary claim and threaten to "stop buying" if it is not allowed.

Select a source of supply where you can secure accuracy, completeness and just treatment.

Before writing a caustic letter of complaint to your jobber, place yourself in his position and try to think how you would feel if you would receive such a letter.

Don't fail to properly introduce yourself when opening an account with a house you have never dealt with, especially if you have only recently started in business and have no established credit rating.

Answer all business communications promptly, and extend the same courtesy in this respect to others that you exact from them.

File all price lists, catalogues and quotation sheets where they can be quickly referred to.

HENRY HOPKINS, - - - Editor.
J. W. PENTZ, - - - - - General Manager.

MARCH 10, 1907

Editorial Trade Review

The weather during the last fortnight would surely satisfy anyone that the winter was not over. The ice-making properties, so lacking previous to January 1, are more than offset by the influences that have prevailed since, and frigid atmosphere has had its innings. The orders given by men who were wise in their day and generation, and who last year ordered goods they knew they should need this Spring, and stipulated when the time would be convenient for them to be received by them, were by no means few in number, and the advanced quotations that were new at the time did not affect the goods either, and in this respect they were doubly wise, for which they have abundant reason to felicitate themselves, for pretty soon the replenished stock of the jobbers will begin to feel advanced prices, and he will go out of the philanthropic business of providing the retailer at "the same old price."

There is going to be a big business done during the first six months of 1907, and the way to do it and make some money at it is to have the goods in full supply. Far from feeling any undue anxiety about the disposal of their heavy stocks, the jobbers are felicitating themselves on the ample provision they have made that will enable them to look after their trade at the prices that prevail. They have not been hoggish in trying to get the last dollar of profit from the business of the Winter, and have suffered no little loss from having to pay higher prices for goods which were sold too low, according to the way they were invoiced. They found in consequence they did not add greatly to their wealth from the trade, and were somewhat disappointed; they had figured the percentage of profit too liberally, when the commercial activity seemed in the way of large profits to "breathe the word of promise to the ear, but break it to the hope."

The volume of trade has been very satisfactory on the whole; in fact, the East is full of promise to an extent that is surprising. The month of February is reported by some concerns to show a vigor that could not be expected would spring from the frigid conditions that characterized the weather. The factories, after paying good dividends, are working hard to turn out a product that is already ordered; in fact, the high standard of wages now prevailing in the fields of industrial activity gives evidence of present prices being well sustained and no weakness is noticeable of a lower range. In fact, were the factories only able to make their shipments of goods that are wanted on orders they have already booked, the business would show up in larger volume than it does. Manufacturers have advanced prices with rare discretion; so much so that it is thought that in regard to the market prices may be supposed to have reached their highest level.

THE LESSON FROM FRENZIED LITERATURE.

It's right enough to take an active interest in public affairs; that is one of the duties of good citizenship under popular government; but see to it that some of the very evils you decry in the mismanagement of public officers are not to be found in their worst form in your own business.

Are your own employees busy while you are decrying the shameful expenditure of public funds in salaries to men who have little to do, or are they idle half the time because you have not given your own business enough thought to keep them occupied? They may have been willing enough to work when you first hired them. See that you are not spoiling them by teaching them idle habits.

Are you sure the government officers alone are given over to graft? If not, how close to your own business does it ever get? Is there a tendency on the part of your buyer to confine his contracts to one house year after year without any good reason for it? It may be owing to the various advantages of long-continued business relationship and then again it may be—well, better investigate.

Are your own obligations met and settled promptly with good cash, or are you "kiting" checks and resorting to all sorts of hair-raising expedients after the most approved frenzied-finance methods? You know you disapprove of that in every other line of business.

After all, one of the most valuable features of the vindictive literature to which we have been treated by the magazines is one that many of us overlook entirely; the expense of an aggravated form of abuses and deficiencies that are eating holes of more or less importance in our individual affairs. There is doubtless some truth in all of this cry against present-day political methods and leaders. We do not know how much, and most of us have no particular way of finding out for certain. We have a way, however, or ought to have, of finding out what is right and what is wrong with our own commercial, or official machine, and if there is anything wrong with it, to right it. If every merchant and business man would do that, there would be a good deal less reason to find fault with general conditions, and it would be easier to expose and improve such as need the renovation. Criticism as well as charity should begin rather close at home, and the critics who should be the most alert in looking up the flaws in our own management are ourselves. We alone understand all the conditions. We understand them better than we do the conditions that control any other business, public or private. Why then should not our first attention be directed toward an improvement in our own affairs?

Again, it is wise to have an eye on public matters. It is not only a safeguard, but a business education. We have a partnership interest in this great old government, though we are heavier stockholders in the establishments of "We, Us and Company" and ought to apply our very best business ideas first of all to that. These general discussions of matters out of our control teach many lessons of what to do, what to avoid, what to condemn, what to be wary of. It is truly a wise business man who can turn the faults of the parent to the advantage of the child in every instance, but we may assert our skill to some extent by doing so as often as we can.

A QUEER ADVERTISING IDEA.

A short time ago the writer, on entering a certain retail establishment, was confronted by a sign somewhat like this:

"Our recent advance in prices was due solely to a sharp advance in raw material."

This notice made two or three distinct impressions which probably were duplicated in the case of every man whom it impressed at all. The question is, were the impressions favorable for advancing trade. Here they are:

First.—That this dealer had for some reason, either legitimate or otherwise, raised the price of his goods to a point where he was ashamed of it, and therefore wished to make some apology and shift the blame before he dare quote figures at all.

Second.—That raw material being high, it was a poor time to make the purchase at that time, if it could possibly be avoided.

All things considered, that notice was probably as good an advertisement as that merchant could possibly put up if he carried a stock of goods that he really wished to keep exclusively for his own use.

Digitized by Google

GETTING ACQUAINTED.

Do your own bookkeeping occasionally for a little while, even though you have not the slightest doubt about the man who does that part of the work for you. A close acquaintance with the details of the ledger may surprise you in many ways that will benefit the management of your business. A good many expenses will be modified if you find the items coolly winking at you in that insolent way they assume with the bookkeeper.

Be your own advertising man a little while sometimes. Find out by actual experience if the publicity department is being run in harmony with your ideas. If it is not, find out, if you can, which is in the lead, yourself or your advertising manager and bring the laggard impartially up into line, whichever it may be. Some good advertising men would be improved by getting into closer touch with the establishment they represent. A good many proprietors would manage better if brought into more direct view of the public they are trying to serve. It's a pretty easy matter for a business man to get his eyes so closely fixed upon his business that he forgets to consider the public. It's quite as easy for the publicity man to go astray from his business in his efforts to please the public, so an occasional jab from the people, such as the advertising man gets, is pretty sure to wake the management up a little if it reaches the right personage in it; while an occasional pinch in the rear will prevent the ad-man having his business instinct distracted by the plaudits of the multitude.

Be your own clerk a little while sometimes. Then you will find out more about those things that make life distasteful to the clerks in your own establishment than you can learn from books in many moons. You will find out why this stock fails to move as you expected; why that occasions discord, why something else acquires a worn and battered look so promptly after being taken out of its inconvenient shelving space and then returned to it a few times. You will learn what things require a lot of argument before their merit is appreciated; what things need little argument, and what things won't go with any amount of argument. Perhaps you will even learn to wonder, with the rest of your clerks, why the old chump who runs that store don't use a little sense in the arrangement and selection of his goods.

Even be the office boy a little while, at least, by following his various moves with close attention, sufficient to ferret out a portion of his troubles. Perhaps he isn't to blame if that old worn-out, rusty hinge will squeak whenever he approaches you; or if some portion of your room is in a howling draught. A certain degree of untidiness should be charged up to something else than the boy. He may sometimes fail to deliver important messages that you forget to give him, and may take a good deal too much time in hunting up for himself directions that you ought to have given him in language that is eligible somewhat beyond the boundaries of your own mind. Anyway, if he is much of an office boy and you have been kicking about him more or less, you will be surprised after watching him a little while to see how many aggravating things there are that he might do and doesn't, or how many duties he might shirk that he doesn't.

And after all, be your own customer sometimes, without fail or favor. See if you like the look of things as you approach the store, or does an establishment across the way seem more attractive? If it does, do what the other fellow will be pretty sure to do, go there to trade and learn something. After you get inside, do you receive the right sort of attention, or are you left to hunt around for the article you want, made to wait a quarter of an hour before any one tries to find out whether you wish to buy or borrow the article? Find out, before you abandon the experiment whether the average busy man would find life long enough to trade with you; whether he would feel like a meddling interloper or a country victim in a Baxter Street clothing shop. It's sometimes worth a little valuable time to find out why that customer doesn't come back the second time.

Finally, after having been all things until you get a better idea about most of them, go back to your manager's desk and manage. Bring into force what innovations are needed, strengthen what are weak, strike out what are wrong, whether it be in the establishment or in yourself. Strive to bring every department of the whole concern up to that stage of self-dependent pride that will consider itself it, and then proceed to make a big enough I out of yourself to capitalize the whole caboodle of personal pronouns.

HARDWARE EXPANSION AND PROFIT.

In a recent number of HARDWARE appeared an article on "Profit." The writer used an illustration of a Hardwareman who had branched out for a Mill Supply trade. This merchant had increased his trade, but the increase showed only a little profit, and according to the writer of the article in reality it netted a loss.

The case in point was that of a merchant who had been having a small part of the trade of a local mill—but by figuring down close, had been able to secure the mill's entire business, but by so doing his stock was enlarged and his profit on the small volume of trade which he had formerly was now entirely sacrificed.

The conclusion reached by this Hardwareman was that he would have been better off to have held the smaller trade and not looked for the larger business at the closer margin of profit.

Let us look at this in a practical way, seeing the other side of the question.

GROWTH IS THE LAW OF BUSINESS JUST AS SURELY AS THE LAW OF NATURE.

and the merchant to hold his place must continually grow; his business must be constantly expanded. To be content each year with the same amount of trade as in the preceding year, means untimately to lose some of that trade which the merchant has, and "dry rot" will soon set in, the merchant will soon find himself without business.

Conditions and business methods are constantly changing and are continually bringing new phases into business life, which must be taken into consideration by every wide-awake merchant, and therefore to hold his place the Hardwareman must be constantly enlarging his field.

Business is being done on a closer margin and this merchant whose experience is quoted above had not been able to meet competitors in this mill business, it would be only a question of a short time when he would have lost all of that trade.

By his own admission he purchased in larger quantities and in this way is able to sell not only this mill, but others in his town and locality.

His increased volume of trade must be on a close margin, but it is necessary for him to keep up a certain volume of trade in order to meet his regular running expenses. A certain volume of business must be maintained in order to meet the fixed charges of the store such as rent, light and heat, and a certain amount of salary must be met whether business is being done or not.

This Hardwareman quoted above being now in a position to meet other competition, can undoubtedly enlarge his trade and by so doing will be enabled to reduce his percentage of carrying on the business.

Another point to consider is that of being able to make a larger profit on the small business that does come to the store, by having these goods purchased at from ten to fifteen per cent. lower. This larger profit to other small buyers need not be sacrificed. It is just in the way that this merchant has started, that others have begun building up a business that has in time become very large and profitable.

It comes back to the proposition of what a merchant wishes to do; whether he is content to run along doing a little small retail pick up business, or whether it is his ambition to have a large business on which in time a much larger profit can be made, than with a small retail trade.

AMERICAN CONSULS AND AMERICAN FIRMS.

"Under the present system it is the merest accident if a consular officer knows what American concerns are represented abroad, and he is not in a position to answer inquiries when made concerning machinery and other supplies."

The above quotation speaks for itself. It is taken from a report made by Mr. Heaton W. Harris, American Consul at Mannheim, to the Department of Commerce and Labor in Washington and calls attention to a serious defect in American Consular practice in Germany. Consul Harris makes the suggestion that American consulates should be supplied with the names and addresses of the general agent of American goods in the country where such consulates are situated. He thinks this could best be done by such agents or the firms they represent. The consul believes that the practice of supplying consulates with lists of general agents would lead to further acquaintance and co-operation between such agents and consular officers that would be mutually helpful to both. The fact, he says, that there are in Germany alone thirty-two American consuls and consuls general, all American citizens and interested in American trade, besides a large number of subordinate consular officers, many of whom are also American citizens, would seem to suggest to those who handle American merchandise in Germany a closer co-operation with this service than has heretofore existed. Mr. Harris believes that a further extension of this plan so as to furnish each consular office in Europe with information as to general agents of American goods in the continent would be of value.—*Berlin Bulletin.*

CONNECTICUT RETAIL HARDWARE ASSOCIATION

The Connecticut Hardware Association held its fourth annual meeting at Hartford, Conn., in the rooms of the Hartford Business Men's Association on Wednesday and Thursday, February 20 and 21. The early part of the Wednesday afternoon session was devoted to the roll call, receiving reports of committees and other routine work. Appropriate greetings were wired to the Iowa Retail Hardware Association, New York State Retail Hardware Association and the Indiana Retail Hardware Association, which were holding conventions at the same time.

PRESIDENT BASSETT'S ADDRESS.

The annual address of Geo. J. Bassett, New Haven, president of the association, was in part as follows:

Our membership is large when we compare it with the size of our State and with the total number of Hardware dealers in it. But in a State like Connecticut, where the towns are so near together, there is no good reason why all the live Hardware merchants should not be with us. And I want to ask you men before you leave to-morrow to give our secretary the names of dealers in your own or neighboring towns who ought to be members of the association. And I want to further ask each one of you to act as a special committee of one to get your neighbors to join. And if you need any help you'll find the officers of our association ready to extend it. Don't put this off, but get them in now.

FIRE INSURANCE.

Another matter of much importance to us is that of fire insurance. The Business Men's Association of this State have done a good work in persuading the companies to take off the extra premium added after the San Francisco disaster. Much praise is due to their committee, of which one of our own members was a member. The high premiums of the regular companies have caused many of us to try the Hardware mutuals, with the result that we have effected a saving of from 25 to 40 per cent. on such insurance. I have within the last few weeks corresponded with five of these mutual associations in regard particularly to the limit of the stockholders' liabilities and the safeguarding of their funds. Their answers have been quite satisfactory, and I honestly believe that in all cases the probable benefit much exceeds the possible risk.

THE POSTAL RESOLUTION.

A few weeks ago a resolution was railroaded through the General Assembly endorsing a bill before Congress for the consolidation of third and fourth class postal matter under the third-class rate of 8 cents a pound. This matter was brought to our attention and as the policy of this association has always been against any revision of the postal laws that would give special privileges to any one class of people, I instructed our secretary to write the proper parties in the General Assembly asking that this matter be recalled or reconsidered. I now understand that the protests against the resolution have been so general that it has been tabled. Our association does not I think, take any narrow position on the subject of postal reform. We are opposed to any change that tends to create a large deficit in the Post O..ce Department. We would welcome a change which would give us 1-cent letter postage and which would compel publications made up largely of advertisements to pay a rate which would cover their proportionate expense of carriage and delivery. A law like that might increase the cost of advertising in some publications, but it would weed out a lot of worthless matter from the mails.

THE CATALOGUE HOUSE QUESTION

is not of such vital importance to us as it is to our Western brethren. But it is of sufficient importance to give us a lively and partisan interest in the fight. The catalogue house has undoubtedly come to stay. It can supply better than any other source a certain class of purchasers. You cannot damn it out of existence. You cannot hit it with legislation. If you hit it too hard it will hit back, and it has shown itself a hard hitter. But there are certain things we can do which will minimize the effect of mail order house competition. We can insist that our manufacturers and jobbers put us on the same purchasing level as they do the mail order house. We can decline to buy of manufacturers and jobbers who sell mail order houses or who make price concessions to them. And instead of sitting up and howling about the injustice of it all we can use our brains in meeting intelligently such competition as comes to each one of us.

A local condition which has caused us some trouble is the habit

SOME OF THE MANUFACTURERS AND JOBBERS HAVE OF SELLING THE CONSUMER

in places where they have no representation in the trade. This is a matter which can easily be remembered in most cases by our association if we have the proper data to work on. There is no use in going to a manufacturer or jobber and making a complaint unless you can prove your claims. Let me suggest that all complaints of this kind, with full particulars, be mailed to our secretary, or Grievance Committee, and if they cannot adjust the matter it can be handed up to the National Association. You will find that neither manufacturers nor jobbers will care to take too arbitrary a position if they see we are in earnest.

NEW OFFICERS.

The election of officers for the ensuing year resulted in the unanimous choice of the following:

President, I. C. Treat, Hartford.
First Vice-President, Eli C. Birdsey, Meriden.
Second Vice-President, F. T. Terry, Ansonia.
Recording Secretary, James De F. Phelps, Windsor Locks.
Financial Secretary, F. A. Farrar, So. Manchester.
Treasurer, Lewis B. Crosby, New London.

CONCERNING POSTAL MATTERS.

Resolutions similar to those adopted by other Retail Hardware Associations were adopted in opposition to the establishment of parcels post, and advocating the reclassification of second-class mail, and one-cent letter postage.

F. E. MUZZY'S ADDRESS.

F. E. Muzzy of the J. Stevens Arms & Tool Company, Chicopee Falls, Mass., representing the American Hardware Manufacturers' Association, made an interesting address in part as follows:

It affords me great pleasure to bring to you to-day greetings and good will from the American Hardware Manufacturers' Association, that I am delegated to represent. The president of our association has often expressed in no uncertain terms

HIS LOYALTY TO THE RETAILER,

and his views on this subject are in accord with the views of every member. His candor and fearlessness command the respect and admiration, I believe, of every retailer and jobber, and his bidding would be to extend to you the right hand of fellowship. We realize you are our distributers; that as you prosper we prosper, and although many of us can distribute our goods more economically through the jobber, it does not prevent our having the same interest in your welfare as though we sold to you direct. Nearly every Hardware manufacturer whose goods you distribute is trying in his own way to assist you.

HIS METHODS MAY NOT ALWAYS MEET WITH YOUR APPROVAL,

but if he makes mistakes they are of the head and not of the heart.

I am pleased to note the decided progress made in every way by the retail Hardware merchant during the last decade. The retail Hardware merchants of the United States are the best and brainiest class of retail merchants in the country—yes, in the world. Bradstreet and Dun show them the strongest financially, and especially so in the small towns and cities where they are the molders of public opinion. Your associations are better organized for work and accomplish more than any other trade organization in the field in which they work, for which you should feel justly proud. In the older associations they no longer meet for a love feast only, but to work and to do. They are fast accumulating members, and in numbers there is strength so if every member does his duty in an incredibly short time every retail Hardware merchant will belong to your association as he should, leaving the "dealers" only behind, whom you should convert into merchants, for it is the "dealers" and not the merchants who lose to the catalogue houses the 5 per cent. of this country's Hardware sales.

THIS IS AN AGE OF ORGANIZATION.

All of the larger industries, both manufacturing and mercantile, are organized for self protection and advancement of their interests. Competitors from nearby towns whom you think by foul means have stolen your legitimate trade you find, when meeting them at conventions, do not have horns and cloven feet as you imagine. You cease to cut your profits to injure them, not benefiting yourself, and all are benefited thereby. You cannot stand still. You either progress or retrograde, and it is entirely up to you to advance or recede. Every failure has its excuses justifying the failure. Business methods change and you must change with them. Because your grandfather was a successful merchant, heated his store with a fireplace and lighted it with a tallow "dip," does not signify that you to be successful must do likewise.

IN REGARD TO CASH DISCOUNTS.

Many retailers and a few jobbers have not discovered the value of cash discounts. Bills carrying a 2 per cent. cash discount that are net 30 days, mean for the 30 days of time that you have the same as 36½ per cent. annual interest. Bills carrying 2 per cent. in 10 days and net 60 days from date of invoice, mean that a merchant can afford to borrow money and pay 14 3-5 per cent. to discount his bills. It pays to borrow money at 5 per cent. to discount bills that carry a 2 per cent. cash discount in 60 days and are net five months from date. No in-

Digitized by Google

telligent merchant would think of embarking in business and borrowing a part of his capital, paying 15 per cent. for the use of the same, yet this is just what hundreds of the brightest merchants in the United States are doing to-day.

Prosperous jobbers and catalogue houses never miss a cash discount. They realize the profit that it means to them, and they figure on saving every cent. Then why not the retail merchant? It is a profit that you cannot afford to miss, besides sustaining a reputation for prompt pay which is valuable to every merchant. Do you get into the habit of taking your discount 5 or 10 days after the discount period has passed. It is odious to the one that you send it to, even if they do not complain.

PARCELS POST.

As actions speak louder than words, I would call your attention to work of the jobbers and Hardware manufacturers who were responsible for the resolution passed by the National Board of Trade at their annual convention held January 15th and 16th last at Washington, D. C.: "Resolved, That the National Board of Trade is opposed to any legislation looking to the establishment of a parcels carrying system in connection with the Post Office Department of the country at this time." This after the National Board of Trade had endorsed parcels post for 12 years in succession. Thus you see we work for your interest when you least expect it.

THE NATIONAL CONVENTION.

F. Alexander Chandler, secretary of the New England Hardware Dealers' Association, and D. Fletcher Barber, a member of the Executive Committee of the National Retail Hardware Association, were present at the Thursday morning session and spoke of the advantages and pleasure which would result to the members of the Connecticut Association by attending the annual meeting of the National Retail Hardware Association to be held in Boston in June, 1907. It was decided by a unanimous vote that the association should give up its usual summer outing and instead attend the national convention.

THE QUESTION BOX.

The Question Box brought out the fact that about three-fourths of the association membership sold Field Grass Seeds and would be interested in frequent reports of market conditions from other sources than the wholesale dealers.

It also developed the fact that a certain manufacturer was selling his "seconds," including Tools and other products, to other than the legitimate Hardware trade, in boxes without the manufacturer's labels, marked "Imperfect;" also that a portion of these goods found their way into jobbers' hands, all to the injury of the retail Hardware merchants. It was resolved that the matter be taken up by the Grievance Committee.

An interesting discussion followed the question, " Is it better to hire green boys and break them in, or to hire men?" One merchant had found it was more satisfactory to train boys in his methods.

The question, "Does it pay to allow customers 2 per cent., if they pay accounts before the first of the month, for the preceding month?" brought out the fact that one merchant billed Nails to carpenters and builders at a certain base price, and stamped on the bottom of the bill "25 cents per keg less for cash." He found that these bills were paid promptly.

A difference of opinion was expressed, owing to local conditions, "whether it is good policy for a merchant to go out of legitimate territory and quote lower prices outside than in his own town."

BANQUET.

The annual banquet of the association was held at Hotel Garde, Thursday afternoon, with about 70 persons in attendance. Mr. Treat, the newly elected president, efficiently acted as toastmaster. The speakers included Hon. Rollin Woodruff, Governor of Connecticut; Hon. Wm. F. Henney, Mayor of Hartford; Chas. H. Parsons, New Britain; D. Fletcher Barber, Boston; F. Alexander Chandler, Boston, and Geo. J. Bassett, New Haven.

GEO. W. PITKIN CO. REMOVE THEIR MANUFACTURING PLANT.

The George W. Pitkin Co., paint and color makers of Chicago, who have the distinction of selling the first bill of prepared or ready-mixed paints sold in the West and who are also the originators of a ready-mixed paint suitable in price and quality for barns and warehouses and widely advertised as Pitkin's Barn Paint, have purchased a property in Benton Harbor, Mich., and will remove their manufacturing plant and general offices there in April. A most desirable site, containing about five acres, with side track directly into the plant and conveniently situated near all railroads and boat docks, has been obtained and large and exceedingly commodious buildings are now being rapidly pushed to completion. The manufacturing, power plant, general warehouses and offices will occupy separate buildings and are constructed and arranged so as to make practically impossible any repetition of the disastrous fires which have wrought such havoc among the paint houses of Chicago during the past year.

The George W. Pitkin Co. have thoroughly investigated the shipping facilities of Benton Harbor and say that their patrons will receive the same prompt shipment service as heretofore, for it enjoys shipping advantages superior to Chicago in many ways. The greatly increased capacity and convenience of their new plant will enable them to meet every demand of their constantly increasing business.

CREDIT.

BY B. A. CHAMBEAU.

Are you doing justice to yourself in the matter of credit, both as regards your credit with the wholesalers and also in regard to extending credit to your customers? Your credit is a part of your capital; in fact, where you do not use it, or in other words, do not abuse it, it becomes a very powerful factor and lever in upbuilding and upholding your business; hence, it becomes necessary for you to guard your reputation in this respect, at all points and under all circumstances, and leave nothing undone to prevent the slightest spot from tarnishing it. Who can obtain the most credit? Naturally, the one who asks it least often and is most ready to pay cash. Prompt payments give you a commercial rating and this is worth having, no matter where you are; for some time you may need an A No. 1 rating. It is easily procured if you will only live up to your every word and promise. Prompt payments mean something else, for when you command discounts, that each year mean more profits than you probably are making on some of your side lines. When you pay promptly, or pay cash, it is you that can make terms, not the other fellow. While one or two per cent. off for cash in ten days is good, five per cent. off for cash in hand is better, and while many firms would not give the five per cent. off for cash in hand, they will sell the cash buyer certain lots of goods far below what they would accept on a credit basis.

The first incentive to prompt payments is a bank account, however small, for without a bank account you are always to a certain extent handicapped by a certain carelessness and indifference which only a bank account can obliterate. Probably the greatest incentive to pay promptly lies in the fact of being free from every cent of debt when you become owner of a store.

Another encouragement to pay promptly is: Do not order anything unless you have the money to pay for it. This does not mean the expectation of having it when the goods arrive, but the actual possession of the money at the time of ordering. Don't make the mistake of paying your large bills promptly and neglecting the smaller ones; for the smaller ones are generally due to houses who need the money more than any one else. Look upon a $2.75 account the same as you would one for $100—get the cash discount.

Failure to pay small accounts at maturity will generally prove the ruination of your credit, the same as a neglect of your larger ones, and your safety lies in meeting both promptly when they become due.

The world of business is very closely allied. There are many sources of information and a constant spying process is going on, in everyone's affairs. Very little information escapes the agent who follows this spying-out business, and if it does not cause immediate trouble for the neglectful man of business, it is remembered and will operate against him in the future.

Do not get into the habit of making promises to pay, and begin to construct hard-luck stories; your creditors want their money and care nothing whatever for you and your feelings. The sooner you realize this and act accordingly, the better for you and your credit. Get the habit of looking at it from the other side; you are not the only one concerned. This habit of delaying, from whatever cause, the payment of small accounts, always proves a source of great annoyance to the house that deals with those merchants that practice it. Such a house, having many of these small accounts (in fact all of its accounts may be small) depends upon the prompt payment of them to meet its own obligations; and failure to collect means disappointment and annoyance to themselves, their creditors and their employees. And now ask yourself the question: What right have you to keep from such house the money that you owe it? Money is a circulating medium; keep it going—at least that part that you owe—that it may continue circulating.

So much for your credit. Now, how much credit can you afford to give to your customers? This depends in a great measure upon whether you are located in the city or in the country. However, the principle should be the same—give as little as possible, and then only to such people as will guarantee the payment of their bills every month. Any customer that feels offended at you for asking him to guarantee his bills is a poor customer at best, and to lose him you are not losing much; for he is asking an accommodation of great value to himself, not to you, and he should be more than pleased to afford you every possible protection that you may lose nothing by it. A charge for Mr. Jones may be good to-day; to-morrow it may be doubtful; and next day it may be no good at all; you don't know Mr. Jones' private affairs. In introducing a cash system or a prompt monthly payment system, you must exercise some diplomacy; don't be too impulsive; prepare the public beforehand for it.

NEW YORK STATE RETAIL HARDWARE ASSOCIATION

The Fifth Annual Convention of the New York State Retail Hardware Association was held at Syracuse February 19, 20, 21 and 22. The speakers touched on subjects most pertinent to the trade, and much benefit came from the various addresses. The present membership is close to 320 Hardware houses, and from all appearances this will be materially increased before the next convention.

TUESDAY AFTERNOON SESSION.

The convention opened in the large assembly hall of The Alhambra at 2:30, President Louis J. Ernst briefly welcoming the members and guests, who had assembled in unusually large numbers for the first day's meeting. He introduced acting mayor John W. Sadler, who took the place of Mayor Alan C. Fobes, who was unavoidably absent from the city. Mr. Sadler extended a cordial greeting to the Association, and extended the freedom of the city to its members. At the request of President Ernst, R. R. Williams of *The Iron Age* responded on behalf of the Association. President Ernst then delivered his annual address, from which we give a number of extracts:

PRESIDENT ERNST'S ANNUAL ADDRESS.

He said in part:

Heretofore our conventions have been favored with the presence of representatives of manufacturers, who sought to display their goods in the narrow and insufficient quarters of hotels. This feature, while no doubt pleasant and instructive, yet on account of the crowded condition of the hotel where the convention was held created a great amount of discomfort, which detracted much from the pleasure of the gathering. Realizing this and with the knowledge that more manufacturers would be pleased to be represented at the convention, your Executive Committee decided on the, to them, new experiment of a Hardware exposition, and accordingly authorized the Exposition Committee, consisting of Messrs. Sherwood, Ferres and Foley, which was appointed for the purpose, to lease the building known as The Alhambra, and sublet space in it for exhibition purposes. That the Executive Committee acted wisely is evident from the fact that much more space was applied for than was at the committee's disposal. The thanks of this association are due to the Exposition Committee for the success of the enterprise. The members of the committee were called upon to give much time, labor and thought, but this was most cheerfully given, and the result is before you. The exposition promises to be a very interesting adjunct to the convention, and visits to it cannot fail to be interesting and instructive to the members and profitable to them and to the exhibitors. It would seem as though our manufacturing friends could display their wares and interest the merchants with much less expense, and more ease by means of such an exhibition than by any other method. The merchant comes unhampered by any details of his own business. He is in a receptive mood and can be shown and discuss the merits of goods without being interrupted, as he usually is in his own store. The same argument applies to the exhibitor, who can show and explain his wares to his customers, or possible customers, by means of samples at hand much more understandingly than by catalogues. Who can tell but that in the future such expositions as this may be looked upon as a necessity?

In his very able address delivered at the convention at Atlantic City last October President E. M. Bush of the National Retail Hardware Association touched upon a subject of the greatest importance to every Hardware merchant in the country. He appealed to the manufacturers to assist the retail merchants and their salesmen by furnishing them

WITH MORE INFORMATION REGARDING THEIR GOODS.

The maker of a Saw, a Knife or a Lock is fully conversant with the article he manufactures. He knows why a certain kind of steel or a brand of iron or a kind of wood is better adapted to the purpose than any other and why the article is made of this particular steel, iron or wood, how a mechanic can best use a tool to the best advantage; why not impart this information to the merchant and his clerk so they can understandingly describe their wares to their customers?

How can it be expected that a merchant with hundreds and thousands of different articles on his shelves can talk with knowledge and point out the merits of different articles when the only guide he has is the label on the package giving quantity, size, number and name of article? Why has not the manufacturer seen the necessity of imparting this knowledge to his customers before? Possibly because he has not looked at the matter from a merchant's standpoint. He may see the advantage of taking the suggestion offered by President Bush and acting on it; if he does not we ought to all collectively and individually see that it does not slip his mind.

Catalogues should be more explanatory regarding goods mentioned in their pages. There is no reason why goods should not be properly described, so that a merchant can readily understand wherein one article differs from the other. Many an expensive catalogue is rendered almost useless for

THE WANT OF NECESSARY INFORMATION.

A few weeks ago I was called upon by a manufacturer of Chucks who handed me his catalogue. I looked through it and reached two pages on each of which cuts exactly alike were used. There was no description whatever, excepting the numbers and list prices. The prices of one were much lower than the other, and upon inquiry I was told that the discount on the lower price Chuck was greater than on the higher priced one. I did not understand it, and accordingly asked for the reason and was told that the cheaper one was made of iron and lighter, while the other was of steel and heavier. I immediately called the gentleman's attention to the deficiency in his catalogue, which if descriptive might be of some use to his customer. He admitted the criticism was deserved, but said

HE HAD NOT THOUGHT DESCRIPTION NECESSARY.

This undoubtedly is the reason why many catalogues lack a very essential feature in their make-up. The manufacturer fully understands everything regarding his product and without giving the matter any further thought imagines that every merchant possesses the same knowledge, and consequently that which would make the book much more valuable and convenient, is omitted.

In my early Hardware days catalogues, price-lists and circulars were not nearly as plentiful as they are now, and consequently easily taken care of. It would seem as though the number of such publications had doubled within the last ten years, and it has become a very serious question how to provide place for them and how so to arrange them that they will be of use and any particular one easily found when wanted. It seems apparent that the only solution to this problem is in standard sizes.

This matter has been agitated before in other conventions, and has been considered and reported upon by committees without any appreciable result. We all continue to receive these publications printed in all imaginable lengths, widths and thicknesses and colors, in sheets, folders, pamphlets and books. If publishers only knew how much of this typographical art is thrown into waste paper baskets, because solely of the want of established standard sizes, it would undoubtedly hasten the day of some uniformity in this kind of literature. There is no such thing as providing suitable places now for catalogues and price-lists. As an illustration I offer this as an example: I recently had a case built in my office for bound catalogues, and was pleased with the new piece of furniture, when along came a catalogue just one-half inch larger than its predecessor and just one-quarter inch larger than the space between shelves. The result was that it was in the way everywhere, and finally laid aside where it may be entirely lost sight of.

The average Hardware store as a rule has not

ANY TOO MUCH ROOM TO DEVOTE TO LIBRARY PURPOSES,

and consequently it becomes very much of a conundrum to know what to do with the ever-increasing quantity of this printed matter. If the publishers would only take a sensible view of the situation and adopt standard sizes the matter would shape itself.

The single sheet if of a uniform size can be accommodated by filing in loose leaf binders, or in the numerous filing devices which now exist. The so-called folder is a nuisance. There is no way of filing it, and it should find its way into the waste basket as soon as received.

Of pamphlets there is no limit to the assortment. They vary in size from that of a business card to a door mat. It would be interesting to know if the publishers of some of these freaks expect to have them preserved any length of time. In these pamphlets, as in

JOHN B. FOLEY, SECRETARY.

many other things in life, a happy medium is desirable. It does not matter so much just what size these pamphlets are so long as they are of a uniform standard size. There can be no possible reason for this great diversity of size, except that nothing has been decided upon among manufacturers to accomplish this result, although various committees and conventions have had the matter placed before them.

THE TIME MAY COME WHEN DECISIVE ACTION WILL BE TAKEN.

It is certain that concerted action by the members of the National Retail Hardware Association would bring about a desired result.

In bound catalogues, while the great assortment as in the pamph'ets does not exist, yet there is no reason whatever why they should not be uniform as to size, except thickness, leaving out, of course, the few very large books which form a class by themselves.

Another criticism regarding catalogues is the carelessness of some firms issuing them

WITHOUT DATE OR NUMBER

to distinguish them from the preceding edition. It is beyond comprehension how business houses will spend large sums of money on catalogues and show such indifference in this one particular.

A suggestion here seems apropos regarding the issuing of a new catalogue. It ehould always be accompanied by a circular calling attention to any new goods represented, and giving the page on which these new goods can be found. The result would be that a merchant's attention would be given to the goods which otherwise he might pass by unnoticed. Changes in list prices in a new catalogue should also be announced on a similar circular.

Backs of bound catalogues should bear the name of the firm issuing it, the same as the title of a book would be expected to appear on its back. There are many bound catalogues deficient in this respect, making it necessary for the seeker after Hardware knowledge to unnecessarily waste time and patience and good nature in his search for information.

I suggest that our representatives to the National convention take these matters up, with a view of concerted action by the National as well as the several State Associations. This is offered not by any means in a fault-finding spirit, but as

PRESENTING THE MERCHANT'S SIDE OF THE QUESTION

hoping that at some day in the near future manufacturer and merchant may meet and adopt some system meeting the views of both.

I suggest that in the future the Committee on Legislation be continued in office until the adjournment of both the State Legislature and Congress, and that the secretary be instructed to have sent to each member of the committee the paper called "Merchants' Legis-

Digitized by Google

lative League Advocate" from January 1 to July 1. Each member of this committee would be expected to carefully examine each number of this publication and note any matters of interest to the members of our Association as merchants, and communicate with the chairman, calling his attention to the matter and giving their views, so that he can call the attention of the full committee and act jointly.

Considering the considerable expense incident to sending our full quota of delegates to the National Convention I would recommend that the number of delegates from this Association in the future be limited to two, and that they be the president and secretary. It is self-evident that these two officers can better represent this Association at the National convention, inasmuch as they are fully conversant with all the affairs of the Association, and by virtue of their knowledge of association matters can render better service to both State and National Association.

I submit for your consideration the advisability of the incorporation of this Association and would suggest that the matter be referred to the Committee on Organization to investigate and report at the convention in 1908.

A committee of three, consisting of John G. Ferres, of Johnstown, as chairman, W. D. Hollowell, of Penn Yan, and A. R. Grant of Syracuse, were appointed to consider the president's address and apportion its recommendations to the several committees. R. R. Williams, of *The Iron Age*, made an address touching the many conditions affecting the Hardware trade, dwelling on the sentimental side of the business as it touches the relations between merchants and customers and between the merchants themselves.

W. P. Foster, president of the Rochester Commercial Travelers' Mutual Benefit Association, made an address on "The New York State Retail Hardware Association from the Traveling Man's Point of View." The value of suggestion and criticism from a man who for twenty-five years has been in touch with the trade and who has had the faculty of discerning the weak places in the methods of some merchants, may readily be seen from the following extracts from his speech:

* * * *

I am sorry to say that the following bit of advice is one much needed in places: "Clean up." A clean, orderly place of business costs less to manage than one that is dirty and disorderly. The good influences radiating from a well kept place will bear fruit every year in the increase of sales and the greater efficiency of your employees. Clean up your stock and get rid of some of the antiquated goods on your shelves and make room for something more modern. I was called to inventory a stock of goods a few years ago and found on a shelf on the second floor $80 worth of coffin trimmings that had not been disturbed since 1862. Goods that are out of date are worth less every year that you keep them. So get them out of sight and sell at cost or less. It is like a tooth pulled to the average dealer to sell goods less than cost, but after it is over he feels better.

Have your store well lighted at night. Nothing is more attractive from the street than a well lighted store, and nothing is more dismal than a store with a few dirty, smoky lamps.

HAVE YOUR WINDOWS CLEAN AND WELL TRIMMED

with seasonable goods. See that your clerks are polite and obliging. Equip them with knowledge necessary for the intelligent conduct of your business.

Observation is a good teacher, but not all clerks in a Hardware store have their faculty of observation so trained that it will work automatically in every instance. A clerk needs help and should not be left to grope his way upward unaided. Frequently kindly counsel will not come amiss.

MISTAKES SHOULD BE POINTED OUT AND THEIR REMEDY SUGGESTED.

Above all, every employer himself should be to his clerk a shining example of industry, intelligent effort and absolute honesty in all things.

Now here is a statement calculated to make a merchant sit up and take notice, and the more he thinks the more he will feel like thinking until he has thought the question dry. What is the reason that last week when John Smith came in to buy a pair of skates that you did not sell him, but he went across the street and bought from the other fellow? What is the reason that yesterday your competitor had an ad in the local paper that filled his store to-day with customers, while your clerks were standing around chewing gum? I know what you will say. Maybe this or maybe that, but the biggest "maybe" is you are not as good a merchant as he is. Don't you know that it is harder work to think like "blazes" than it is to go out and black a stove. The most of us are inclined to shrink from looking our business fairly and squarely in the face, and then make plans to make "her hum."

IT IS A GOOD DEAL EASIER TO SIT ON THE COUNTER

than it is to write up a good ad. It is a good deal easier to empty a barrel of oil than it is to sit down and figure out how to become a better salesman. What I am trying to get at is that it is mighty hard work to be a "cracking" good merchant. It takes a whole lot of energy and push, and it takes it every day in the week. When you sit down and read good trade journals you have got to get the wheels in your head in motion if you get any good out of it.

Why is it that so many clerks and merchants do not exert themselves more in the art of salesmanship? They are respectful, courteous, polite, dignified, friendly. They answer questions with skill and knowledge and they are sincere in thinking that they have performed their duty to the utmost. But they do not. They are negative in their attitude and talk. They leave all the positive work and positive thinking to the prospective buyer, and therefore unless the person has a real and hungry, persistent, positive want he goes away from the store without purchasing and a sale is lost.

Study your goods, then the art of salesmanship, and finally

STUDY THAT WONDERFUL SUBJECT, HUMAN NATURE,

and how to sway and influence the members of the human family. I have a merchant in mind who has for his motto, "We have it, can get it, or it isn't made." No one can come into his store and ask for an article, be it ever so small, but that the goods are immediately forthcoming, or the remark that "we are just out, but will have it to-morrow," and he makes good his promise by ordering the goods by mail or express. He figures that a satisfied customer is one of the best assets a dealer can have, and he naturally expects to see him again when in want of goods.

There is a natural attraction in the big order, and merchants are too frequently tempted beyond the limits of good business policy to obtain it.

SOMETIMES THE MARGIN OF PROFIT IS CUT INTO,

or extravagant concession made. In fact, it sometimes seems as though any method is regarded as legitimate to obtain a nice, fat order. As a matter of fact the dozen or two little purchases that are so apt to be despised and frequently neglected are very apt to represent more profit, as well as a wider clientage, than the one order that is a dozen times as big.

It is the steady customer that pays in the end, even though his individual purchases fall within the list of despised small orders.

DON'T NEGLECT THE SMALL ORDER FOR THE BIG ONE.

Rather depend upon the little one for profit, and get as many of them as you can. The man who spends 25 cents a day with you at a good rate of profit will make you more money in a life-time than the one who once or twice in a dozen years gives you a $100 order, after frying every drop of fat out of it by the extra concessions he demands with it because of its importance.

WEDNESDAY SESSION.

The Wednesday meeting was given up to reports, election of officers, some routine business and a question box, which developed some interesting features. After some talk it was unanimously voted that manufacturers' exhibitions in connection with the Association meetings should be encouraged. The first important question announced by Chairman L. G. Mattison, of the Question Box Committee, was as to the methods of collecting outstanding accounts. A number of members detailed their experiences in this line, and others joined in the discussion by suggestion or question, and this part of the meeting proved most popular and interesting.

President Ernst explained that the serious illness of Secretary Foley prevented the presentation of the secretary's report, and an announcement of the condition of the Association's membership. The report of Treasurer F. E. Pelton showed a prosperous financial condition.

J. J. Douglas made the report for the Finance Committee and B. L. Andrews that of the delegates to the National Convention.

A few minor changes in the by-laws, following President Ernst's suggestion, were made upon the recommendation of the Committee on Constitution, headed by Chairman John E. Larrabee.

Giles H. Stillwell, president of the Syracuse Chamber of Commerce, spoke briefly as the representative of the city's association of business men, and expressed the hope that Syracuse be made the permanent place of meeting of the Association.

THURSDAY SESSION.

In the morning the Association was the guest of the Camillus Cutlery Co., at its works at Camillus, the members going out by special train. At the meeting in the afternoon a warm welcome was extended W. P. Bogardus, Mount Vernon, Ohio, former president of the National Retail Hardware Association, who was the first speaker. He made an interesting address.

President Ernst read a letter of regret from George H. Sargent, of Sargent & Co., New York, who was unable to be present because of illness, and who was on the programme for an address entitled "Looking Backward."

L. B. Elliott, of Rochester, spoke on

ADVERTISING IN RELATION TO THE HARDWARE DEALER.

His address was in part as follows:

* * * *

As to general publicity, the newspaper is the first and most important medium. I notice among the objects of your Association is "to place the business of the retail dealer upon such a basis as will enable him to meet the changed conditions of our business life." One of these changed conditions is the absolute necessity for newspaper advertising. The newspaper is the daily companion and source of information for the public. The people have become educated to desire more information and more general information than ever before, and this information can be obtained from the newspaper. An extensive employment of the newspaper by merchandising concerns for advertising purposes and the excellent information contained in their announcements for the guidance of the buying public

HAS CREATED A NEW CONDITION,

in that the public depends to a large extent for its information as to purchases upon the advertisements in the newspapers.

It pays to use liberal space in the newspaper. The public is going to judge of your business largely from the kind of an advertisement that you put forth. Liberal space gives an opportunity to speak of a number of articles, to get attractive and convincing display, to use attractive illustrations and to command position in the newspaper. A large advertisement is more readily seen and commands more attention. It also shows the public that you have faith in your own business. Liberal space alone, however, will not prove a paying investment. The matter that is used in the space is of even more importance.

ABSOLUTE TRUTHFULNESS AND SINCERITY

in the advertisement is the keynote of success. Make your advertising in keeping with the news spirit of the newspaper.

Have a story to tell, or else do not advertise. If the public finds in each of your announcements something of interest, real information, the public will continue to read your advertisements. If they are deceived once or twice after they have spent their time in reading your advertisement by finding that after all there is nothing of importance told there, the tendency will be to pass over your announcements from that time forward. Tell your story as briefly as possible, but tell it well.

* * * *

It pays to use good illustrations in newspaper advertising, and with the present methods of making illustrations these can be had at comparatively small cost.

The public is largely eye-minded. Impressions are

MORE QUICKLY RECEIVED THROUGH THE EYE

than through type matter. A good picture of an article will often sell more of them than any amount of type matter, and any good picture will serve to attract attention and fix the eye on the advertisement. Fancy pictures are of little use themselves. Illustrations showing the articles in actual use where practicable are the most satisfactory in making up a display advertisement. Do not try to put in too much matter, use good white space all around your type matter. The more easily the advertisement is read the more certain you are of having it read.

Change your advertisement every time it appears. Many dealers think that it is simply sufficient to keep the name before the public. If you will call to mind your circle of acquaintances, you will find that some of the best known names are known chiefly for unprogressiveness.

The insertion of a set announcement of any store tends to create in the minds of the public the impression that

THERE IS NOTHING NEW IN THAT STORE.

Then again the advertiser who puts before the public 365 different arguments in the year, telling about 365 different articles, has 365 more chances to interest the possible purchaser than the man who runs the same advertisement continuously.

The great drawback to progressive advertising in many retail stores is the lack of time or ability on the part of the proprietor to prepare the proper kind of advertisements and illustrations. Let me suggest that if there is no competent firm in your city that devotes itself especially to the preparation of advertising, select some young man from among the sales force and give this work over to him. He will take a great deal of interest in it as a rule, and will be continually striving to outdo your competitors in the advertising pages of the paper. With your assistance he will be able to prepare daily advertising matter that will be of real value.

W. M. PRATT'S ADDRESS.

This was given in our last issue, and was on the subject of "Tool Topics," and which was an able and thoughtful address.

There was some discussion as to the employment of collection agencies in collecting small accounts. The clubbing together of merchants to employ the same lawyer for collecting bills was advocated as the result of the experience of several members.

RESOLUTIONS.

Chairman F. E. Pelton of the Committee on Resolutions embodied in his report a resolution that the Association extend to Secretary J. B. Foley hearty sympathy and sincere hope of recovery, and "that much of the success of this convention is due to the careful preliminary work which he has done, and the courteous and faithful services he has rendered have been of vital interest to the Association since its formation."

A resolution expressed thanks to C. P. Sherwood for his labors at his stepping into the breach when Mr. Foley was stricken, and the sentiment was expressed that "We feel the success of the Hardware exposition is largely due to his untiring efforts and business management."

THE BANQUET.

The banquet was held at the Yates Hotel, with a very large and representative attendance, which included a goodly number of ladies. John G. Ferres was a graceful toastmaster, and other speakers were Hon. Theodore E. Hancock, Syracuse, ex-Attorney-General of New York; W. P. Bogardus, William M. Pratt and E. C. Neal, Buffalo. Marshall P. Wilder, the humorist, told amusing stories. The speakers' remarks were rich in humor, coupled with more serious topics. There was singing by the assembled guests, which added to the gayety of the evening. The banquet Committee consisted of John Hosey Bradish, L. G. Mattison, John B. Foley, W. E. Cook, F. E. Pelton, J. G. Ferres and Charles P. Sherwood.

EXHIBITS AND EXHIBITORS.

The exhibition by manufacturers and jobbers was a very representative one of the products which go to make up the stock of the Hardware merchant. The modern trend of the trade was strongly in evidence. The manufacturers of paints and kindred materials were much in evidence, recognizing that the Hardware merchant has come to consider paints and varnishes and the like as not only legitimate, but very profitable lines. Stoves, ranges and furnaces were equally well represented for the same reasons.

BICYCLE STEP LADDER CO.'S LITIGATION.

We have received the following, which is self-explanatory, from the Bicycle Step Ladder Co., Chicago, Ill.:

The United States Circuit Court of Appeals for the seventh circuit (Chicago) on February 8, 1907, handed down a decree finding the Victor and Bon-Ton ladders, in addition to the Columbia and Nox-em-all ladders previously passed upon, to infringe the Murray patent.

WHAT THE MURRAY PATENT COVERS.

The Murray patent, as interpreted by the opinion of this court of last appeal in patent cases, covers any store service ladder built upon the plan of sustaining the whole weight, practically, on rollers at or near its lower end and making use of a loose guide bearing at its upper end for the purpose of preventing the ladder from tipping over. The court has decided that plain hooks, hooks in combination with rollers or rollers with flanges which serve the purpose of hooks (as in the Coburn ladders) are all covered by the Murray patent.

HISTORY OF THE LITIGATION.

This suit was commenced in March, 1902, by E. M. Murray (The Bicycle Step Ladder Co.) against The Orr & Lockett Hardware Co., Chicago selling agent for the Coburn ladders. The case was defended from first to last by The Coburn Trolley Track Mfg. Co., making it in fact, if not in name, their case. The suit has been most thoroughly contested and has been three times before the United States Court of Appeals. In the first instance the court found the Murray patent valid and infringed and rendered an opinion in part as follows:

> "The Murray patent is a store ladder whose weight is wholly upon rollers upon the floor or base-shelf—the upper fastening being a loose one, by means of hooks intended solely to keep the ladder from tipping over. . . . . It differs from (the prior art patents cited) in that, practically, it runs on only one track, utilizing the balancing of the man's body to propel it laterally without friction." (This the court found to be "a new thought in the art of ladder making.")

In the second instance the court denied a petition for rehearing presented with an extensive argument, and in the third instance it found the Victor and Bon-Ton ladders made by the Coburn concern to be infringements. In its last opinion the court said in part, referring to these ladders:

> "Defendant does utilize the essential features of Murray's invention as we defined it" and "the changes from the Columbia type (the type previously found to infringe) are only colorable."

Injunctions of course will follow as speedily as possible and suits will be instituted against other infringers who fail to respect our rights. In the meantime we ask the public to respect our rights. We are sure that with the facts thus before it the law-abiding portion of the community will avoid buying infringing goods. To the other portion we would merely hint that the user of an infringing device is equally liable for damages with the maker or seller.

A "FOLLOW UP" SYSTEM.

Evidently one of the most dangerous things a man can do in America is to write to a manufacturer or his agent inquiring for a price. In illustration of this the *Engineering Times* quotes a letter which Mr. George H. Pedlar, Jr., a keen young Canadian merchant, says he sent to his agents the other day on the subject of following-up. "In our business," says Mr. Pedler, "a man may write for prices with the intention of ordering some kind of building materials right away, and for some unknown reasons his plans may be altered. He might have a death in his family, or sell his place and buy another, or for a hundred and one reasons change his plans, but the point is, that having once received an inquiry from a man, he should not be lost track of till you receive a definite understanding or order from him. Inquiries cost money. Every postcard you receive, saying 'Send catalogue and best prices, costs money—much more than you imagine—very much more; but it pays provided the inquiry is properly handled after it is received. It's all right for one to say that such and such a postal received is N. G., and calls for nothing more than a reply, and then to be passed up and forgotten. That's wrong. I have tried it myself, and was very much surprised later on to get an order from the same man, who in the beginning inquired in the tone of a schoolboy. There is no rule to follow except the correct one, of treating them all as if they were from the largest concern in the world. One is very apt to slight a reply to a man rated at nil, while giving minute attention to a man of position. Nevertheless, one is just as apt as the other to use some goods.

"A 'Follow Up' system is simple, and while involving some trouble—like anything else that is worth while—it pays without a doubt. If you have a card index, this is being written first with an idea of giving you some slight idea of the cost of each inquiry, and, second, with the idea of impressing you with the importance of following it up thoroughly. The most profitable business you can get is the business that comes in by mail. It is also the best, because you can write twenty letters a day at the expense and time of going personally to one man, and while the chances for orders solicited by mail are not to be compared with the chances of getting an order by personal solicitation, still the cost is not so great. The form in which letters are written is the basis of all successful mail order propositions. Every one agrees that the live business man avoids entirely the stereotyped form of business of fifty and even a dozen years ago. Don't say, 'Yours of the 6th inst., received, and in reply beg to say'; that's antiquated and does not serve the purpose. Throw it right into a man from the first word. Go right at your subject on the first line. Ninety-nine inquiries give you some clue as to what the man had in mind when writing, and if he does, go after that particular point on the jump. People are not interested now in anything that pertains to dead wood—they want the meat. Another thing. Don't trust to your memory. You may have the best memory of anybody in the world, but you will forget. Besides, it doesn't pay. A man to make a success of his business nowadays has enough to think of without cramming his head full of details. Whoever heard of the president of any company keeping his cash-book in his head? It could not be done and done correctly, neither can a 'Follow Up' system."

CONCLUSION OF IOWA RETAIL HARDWARE ASSN.

(See page 28.)

Resolved, That we appreciate the interest taken in our association work by the manufacturer, jobber and traveling salesmen, and fully realize that by their hospitality, good-fellowship and instructive methods this association has been assisted very much in making this meeting one of the most successful in the history of the association.

Resolved, That we, the Retail Dealers of the State of Iowa in convention assembled, respectfully petition the Thirty-second General Assembly of the State of Iowa to pass Senate Bill No. 196, known as "The Bulk Sale Bill," we believing said bill to be in the interests of the reputable retail dealer: and we recommend that the term "creditors" as used in the Bulk Sale bill be interpreted to mean only the direct creditors of the particular stock to be sold in bulk, by reason of said creditor having furnished either merchandise or money for said stock.

Whereas, There has been introduced in the present Legislature a bill known as the "Exemption Bill;" and

Whereas, We believe this is an honest bill and legislation that is justly due the retail merchants of Iowa: therefore, be it

Resolved, That this convention of retail Hardware dealers approve this bill, and the secretary be instructed to write the members of the Legislature, requesting them to give the bill their favorable consideration and support.

In an announcement made some time ago the association offered a series of three prizes, aggregating $25 in amount, for the best window display by members of the association. Photographs of these displays were directed to be sent to the convention for exhibition and judgment. From this collection the following exhibitors were awarded prizes: A. J. Hoffman, Murray; Marvin Bros., Grinnell; Miles Hardware Company, Mason City. Several of the remaining photographs received honorable mention.

On Thursday evening members of the association were entertained by the Des Moines Hardware Club, at a reception and theatrical programme given in Knights of Pythias Hall. The entertainment was admirably conducted, and much enjoyed by the large number of guests present.

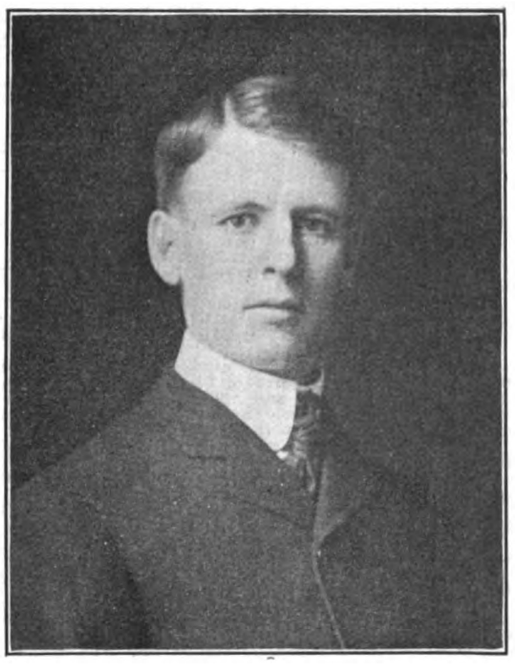
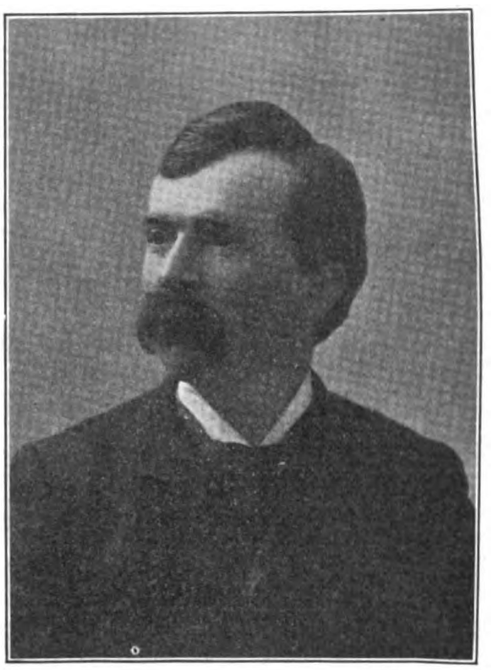
IOWA RETAIL HARDWARE ASSOCIATION



The Ninth Annual Convention of the Iowa Retail Hardware Association was given at Des Moines on February 19, 20, 21 and 22. The business meetings of the convention were held in the Auditorium of the Christian Church, Ninth and Pleasant Streets, while exhibits were displayed in the rooms of Shriners' Temple on the corner diagonally opposite. The remarkably large number of members in daily attendance at the regular session was easily the feature of the convention. With a seating capacity of over 450, the large Auditorium was on Wednesday and Thursday afternoons filled to overflowing, and the unusual spectacle of standing room only was presented.

After calling the meeting to order on Tuesday, President H. S. Vincent introduced Lucius Wilson, secretary of the Greater Des Moines Committee, who extended to the Iowa Retail Hardware Association a sincere and hearty welcome to the city.



In a few well chosen words President Vincent made due acknowledgment of the courtesy shown the Association, and expressed the wish that the hopes of the Greater Des Moines Club might be realized, and that a new Coliseum Building, suitable for the entertainment of conventions, might be the first fruit of their labors.

COMMITTEES.

The real work of the meeting then begun by the appointment of committees to act during the convention, which were named by the president as follows:

H. S. VINCENT.

A. R. SALE.

RESOLUTIONS: S. R. Miles, E. C. Moore, Mr. Moulton.
NOMINATIONS: P. C. DeVol, J. J. Sobolik, W. H. Mallard.
AUDITING: L. A. Gnam, Charles Griebling, L. R. Bailey.
PRESS: E. C. Barbour, L. Lindenburg, A. R. Sale.

"THE BUSINESS MAN IN POLITICS."

L. C. Abbott, Marshalltown, Iowa, read a paper full of practical advice on the "Business Man in Politics." Mr. Abbott was able to speak from personal experience, having served for a number of years on the aldermanic board of his home city, besides having held other positions of public trust.

STOVE DISPLAY.

The paper on "Stove Display," read by F. R. Currie, Mason City, proved to be of unusual interest and elicted prolonged discussion, in which a large number of the members took part. Extracts covering the principal features of this paper are given, as follows:

Realizing that the representation in this convention is from all sized stores and from all sized towns, I will endeavor to treat the subject of Stove Display in as comprehensive a manner as possible.

If there are any fundamental principles governing this subject they may be briefly summarized thus: Stoves should be well blackened, kept free from dust and dirt, as well as from miscellaneous Hardware merchandise, and the nickel put in place and polished well. Stoves should be arranged in classified groups, Oak Stoves, Base Burners, Ranges, and so on, all side by side throughout the line. I believe these are the fundamental rules for the displaying of Stoves, but we may add one other, and that is, the Stoves should be shown in as good light as possible.

We will begin with the conditions that confront the majority of Hardware dealers in the State of Iowa, namely, limited amount to help in the sales department and the fact that Stoves are generally displayed on the same floor with the general line of Hardware. Under these conditions you can begin with the fundamental principles laid down. My experience is that the best way of lining up the stoves is to arrange them in a double row, back to back, through the center of the store. This would apply of course particularly to stores of ordinary width in which there are no counters. You will then

HAVE AISLES OF GOOD WIDTH ON EACH SIDE OF THE STORE.

Use platforms not less than 9 inches in height and paint them a bright red: keep them well dusted and swept, the same as the floor and the shelving: and rest assured that the display will be detracted from if you use these platforms for Stove Castings and miscellaneous Hardware. In lining up your Stoves be sure to keep the classes in groups. This affords comparison as to size and makes the best impression; you will find it easier to lead up a customer from a small Stove which carries a low price to a large stove of higher price.

It is a good idea, as an aid to salesmanship, to have sectional pieces of Firebacks, Steel Ovens and other parts of the Stove to show your customer. I do not at all favor the system adopted by some of erecting platforms under the shelving at the side of the room.

WHILE THIS INCREASES THE FLOOR SPACE FOR THE DISPLAY OF STOVES it does not have the same clear-cut effect upon the purchaser, as do Stoves shown in the open, and arranged in the right manner. Of course where stores use counters running the entire length of the floor a different arrangement will be necessary. It also pays to change the location of stoves, or, rather, exchange location. Put your Ranges where the Cook Stoves are, and your Cook Stoves where the Heaters are. You will be surprised at the number of the people who will remark when they call at your store that you have been getting in new Stoves, when, perhaps, these very Stoves have been in another position on your floor for weeks.

I come now to the consideration of what I belive to be

THE "IDEAL WAY" OF DISPLAYING STOVES

namely, that of a separate Stove room or department. This will only apply to stores having two or more salesmen always available. In our own store it happens that the Stove room is in the basement, the front portion of which is used exclusively for a Stove display and salesroom. We chose the front part of the basement for several reasons. In the first place we had it: then it had a fair amount of light from the front: but most of all because the stairs to the basement were short and went down.

IT IS A TRAIT OF HUMAN NATURE

that people will go down a short pair of stairs more willingly than they will go up a long pair. Over the cement floor in this room we spread three of four coats of good floor Paint, put on a light pattern Steel Ceiling, plastered the walls and frescoed the entire walls and ceiling white. Platforms 12 inches high were placed on both sides of the room, with a double row down the center. Electric lights were freely distributed down each aisle, all controlled by an Electric Button. The platforms are painted red, the floor gray, and

A STRIP OF CARPET RUNS DOWN EACH AISLE.

If you can arrange a room of this discription, then follow the fundamental principles laid down above in the arrangement of your Stoves and you will have a most pleasing effect: the appearance of it all will create an impression upon the purchaser, and will not only back up the advertising, but will prove a first and last aid to the salesman.

Let me emphasize here a rule which will apply to all Stove departments, and I insist that you underscore it: *There should be nothing in the Store room but Stoves.*

We have been entreated time and again to put a display of Utensil's, or Enamel Ware, in this room, but it would be a most damaging thing, both in its effect upon the appearance of the room, and the greater fact that it would be a hindrance to a Stove salesman. When you take a Stove customer to a Stove room, as described above, you blot out everything else from his mind but the subject in hand—Stoves. The average customer does not buy a Stove often. He is not able to concentrate his mind upon this subject when there are other goods in the room that detract from its appearance, and also attract his attention. Lots of women, for the time being, would be more interested in a bright new Tea Pot, to take the place of the old one, with the lid gone and the handle loose: I say, she would be more attracted to this than the vital question of Stoves.

I hear one criticism from those who have not tried this scheme, and that is, that the every-day customer does not see your Stoves. My answer to this is that there is not a man or woman in your town, unless it be a very large one, who if they wish to buy a Stove would not go to a Hardware dealer for it. After two years' experience with the "ideal plan," as I choose to call it, I can emphatically state that the impression made upon the customer when he first enters the Stove room more than counteracts the loss you may antici-

Digitized by Google

pate from this source. But in addition we would advise that you have one or two Stoves on the main floor, which would suffice to call the attention of people to the fact that you have stoves for sale.

PRESIDENT VINCENT'S ANNUAL ADDRESS.

In his annual address, delivered at the opening of Tuesday's session, President H. S. Vincent expressed his warm appreciation of the loyal support given him by members during his term of office, and congratulated the association on its wonderful growth and its achievements. Noting the extent to which unfriendly and bitter competition has been removed by the closer contact and acquaintance afforded in these gatherings, Mr. Vincent continued, speaking in part as follows:

I wish to dwell upon this matter because I think it is one of the most important results that can come from association work. I refer to the personal side of competition in business. In coming to these conventions and meeting your competitor here you find that he is much the same kind of a man that you are. He is in the Hardware business to make money; and you should be in it for the same purpose. And anything that you can do to honorably further that aim should be done, and you should act with him in all matters tending to the building up of the Hardware business to that high plant to which it is entitled in the mercantile world of to-day. In picking out the leading business men of any city in the State, I think I can safely say that you will find the Hardwaremen in each and every instance close to the top of the list.

The insurance feature of our association work has been of the greatest assistance to us in obtaining new members and retaining those that we have. Since I have been in Des Moines this week I have a number of times heard the statement, "I am carrying all the insurance I can get from the Iowa Retail Hardware Association, and am sorry I can't get more." This statement is one we should all be proud of, and reflects great credit upon the association and its officers.

MUTUAL FIRE INSURANCE.

Addresses upon the subject of mutual fire insurance were made by C. A. Peck, Berlin, Wis., secretary of the Wisconsin Retail Hardware Association, and by S. R. Miles, Mason City, president of the Iowa Mutual Insurance Company in which facts and figures were freely given that prove the unquestioned security of these organizations, their economical expense ratio and low premium rates.

The Hon. J. A. Smith, Osage, representing the Lumbermen's Insurance Association, also gave a talk upon this subject, in which he told of the marvelous growth of that company, which in 13 years has accumulated a business that in round numbers amounts to $16,000,000

"INVENTORY, HOW TO TAKE."

A paper on "Inventory: How to Take," was read by Paul C. DeVol, Council Bluffs, Iowa, in which Mr. DeVol described the methods used for taking inventory in his own store. We present the following extracts:

* * * *

On January 15 we begin at the front end of our Builders' Hardware and Shelf Goods department, and count the number of articles in each broken package, placing a slip of paper on each article stating the quality, number, size and cost of same. Having thus disposed of broken packages we set two men to writing down and two to calling off the stock. If we had more men in our employ that were competent for this kind of work we could use as many crews of two men each as would be required to expedite the work. These slips should not be left too long on the shelves, as they are liable to get lost, making a recount necessary and occasioning omission from the invoice. In this connection I will say that you will find it advantageous to mark your goods to show the cost by the dozen instead of the piece. We formerly marked a part of our goods by the piece and it invariably made us trouble when we commenced to extend our invoice sheets, as we would have the quantity down by the piece and the price by the dozen, or *vice versa*. A double system of marking will cause confusion in extending invoice prices.

It is also very important that you get the stock down on your invoice in proper form. We try as far as possible to properly classify our goods on the invoice and avoid scattering them. We may wish to know how much we have invested in a certain class of goods, and this method enables us to figure by lists and discount to better advantage in getting the market prices. We use a loose leaf order sheet,

WITH THE SHEETS CONSECUTIVELY NUMBERED

similar to those used by the wholesalers, having a net price column, a list price column and a third column for the extensions.

Our shelving is constructed in sections, there being 20 in all. These we designate in our invoice sheet as upper section and lower section. For instance, we start with upper section No. 1, which contains all the full or unbroken packages, and when these goods are taken we go to lower section No. 1, which contains the broken packages; and we continue in this way through the entire 20 sections. The advantage of this method is that it enables us to readily refer to any article on our shelves from our invoice. It also familiarizes our clerks with the places for different kinds of goods, and they have no difficulty in properly putting away new goods on the shelves.

In taking down our invoice we put the net price of each article in the "Net" column in plain figures, and if we know there has been an appreciable change in price on these articles we price them in our cost mark. This enables us to readily refer to the price when extending the sheets, and

IF THE PRICE HAS CHANGED WE INVOICE THE ARTICLE AT MARKET PRICE.

We also mark such items with a blue pencil and after figuring the invoice all goods in our stock having this blue pencil mark are remarked. This method keeps us in touch with changes in the market price of our goods.

I wish to say here that retailers owe a great deal of their advancement in late years to the efforts being made by jobbers to keep them in touch with price changes, through the distribution of loose leaf catalogues with their accompanying discount sheets. We have loose leaf catalogues to-day that keep us within 30 to 60 days of the market, and you will find it a great help, in pricing up your inventory, to use these catalogues.

Goods sold by list and discount are put down in the "List" column on our sheets, and we figure the discount from the total list price. In case we wish to know

HOW MUCH MONEY WE HAVE INVESTED IN A CERTAIN CLASS OF GOODS

we start a new sheet, heading it with the name of the goods, and using as many sheets as may be required. By adding the footings of these sheets we get the amount invested in the goods so classified.

We try to keep our inventory in such shape that we can refer to it at any time and see just what quantity, sizes or number of an article we had in stock at the time of invoice. It is helpful in making future purchases, especially of Spring and Fall goods.

It is a great advantage to have your stock arranged right on your shelves. Do not misplace goods, or put them away on the shelves regardless of the permanent place provided for them. Have a place for everything and as far as possible,

KEEP ALL GOODS IN THEIR PROPER PLACE ON THE SHELVES.

In figuring your invoice use market prices as near as you can. Do not figure goods at the price you bought them at six months or so ago. Figure them at the present market and if you have bought cheaply it will show to your advantage on your invoice.

WINDOW DISPLAY.

No paper presented at the convention aroused more interest than was shown in the address on "Window Display," delivered by E. H. Simmons of the Simmons Hardware Co., St. Louis. Mr. Simmons, with the help of two experts from his own house, dressed the windows of the Garver Hardware Company, one of Des Moines' principal retail Hardware stores. The general plan as outlined in his discussion of this topic, was followed by Mr. Simmons in the arrangement of these windows.

SECRETARY SALE'S REPORT.

Secretary A. R. Sale's report was replete with records of the year's achievements, and, though full of optimistic hope for the future, sounded a warning to members of the danger that lies in over-confidence and content with present results. Relative to the gains made last year in membership, he said:

The Iowa Retail Hardware Association has added to its membership roll the past year 208 new names, or a gain of 41 per cent. on the number on the books at the opening of the eighth annual convention. This substantial growth has been made without any other aid than that of the usual efforts of the office solicitation by correspondence. To be more exact, we have on our books up to the date of this convention a total membership of 677. With members taken in at this meeting our total membership will probably be increased to 700.

In Mr. Sale's report as treasurer it was shown that the total of the association for the last fiscal year were $6341.14, the disbursements were $3445, leaving a balance of $2896.14.

The report of the Insurance Department showed the assets on January 1, 1907, to be $17,480.57; ratio of loss to gross receipts, 30 per cent.; ratio of expense to gross receipts, 20 per cent.; cash rebate for 1907, 35 per cent.; total insurance in force January 1, 1907, $1,564,290.

NEW OFFICERS.

The election of officers resulted in the choice of the following officials:

PRESIDENT, P. C. DeVol, Council Bluffs.

VICE-PRESIDENT, J. F. Doty, West Liberty.

SECRETARY AND TREASURER, A. R. Sale, Mason City.

DIRECTORS: E. C. Barbour, Fort Madison, First District; J. F. Doty, West Liberty, Second District; H. C. Chapin, Union, Third District; F. R. Currie, Mason City, Fourth District; L. C. Abbott, Marshalltown, Fifth District; F. P. Marvin, Grinnell, Sixth District; C. T. Gadd, Des Moines, Seventh District; C. H. Thomas, Kent, Eighth District; P. C. DeVol, Council Bluffs, Ninth District; H. C. Vincent, Fort Dodge, Tenth District; C. E. Hass, La Mars, Eleventh District.

EXECUTIVE COMMITTEE: F. R. Currie, Mason City; L. C. Abbott, Marshalltown.

SHELF DISPLAYS.

A paper prepared by J. P. Talcott, Williams, Iowa, on "Shelf Displays," was read by A. W. Ross of the same town.

Mr. Talcott discussed his subject from the standpoint of a village Hardwareman, and gave some practical pointers on the arrangement and display of goods in store.

"ELIMINATION OF PERSONAL ANTAGONISM IN LOCAL COMPETITION" was ably treated in a paper prepared by C. E. Swaine, Council Bluffs, which in his absence was read by Mr. Bailey and was as follows in part:

The direct outcome of personal antagonism between business men is business anarchy. Prices are cut to a bare margin of profit, then blind passion forgets itself and the margin is on the other side of the ledger. Goods are sold at an absolute loss, merely to get men inside the store and keep them out of the competitor's establishment. Contrast this with the results secured under what Ruskin calls "the laws of life"—government and co-operation. Personal animosities are swept aside, local competitors meet frequently to discuss ways and means for the advancement of the common good. A schedule of prices is arranged upon such staples as Nails, Wire, etc.—a fair price to the consumer, a living wage to clerks and workmen and a just profit to the retailer are guaranteed. Methods of taking inventory, window dressing or difficult problems of business management are discussed freely. Competitors feel more like men in such a healthy atmosphere of fraternity. As they go home in the evening their minds are upon measures of good, their step is livelier, their lungs breathe deeper and the world seems brighter. They have risen out of the mud and mire of personal antagonism.

Certainly he is but a counterfeit of a man who cannot meet his neighbors in a friendly way, who cannot look his business competitors squarely in the eye and gladly extend the hand of cordial good fellowship.

If you really think you have a mean competitor, one whom you believe to be the meanest man on earth—a price slasher and a business cut throat, here is your chance to prove your manhood. Perhaps the fault is not all on one side, perhaps your opinions are mutual and are the fruits of misunderstanding rather than of malice. Givie your competitor the benefit of the doubt; go to his place of business, talk matters over in a frank and open manner. In nine out of ten cases he will meet you half way. Cease the competition of personal antagonism; co-operate. It pays.

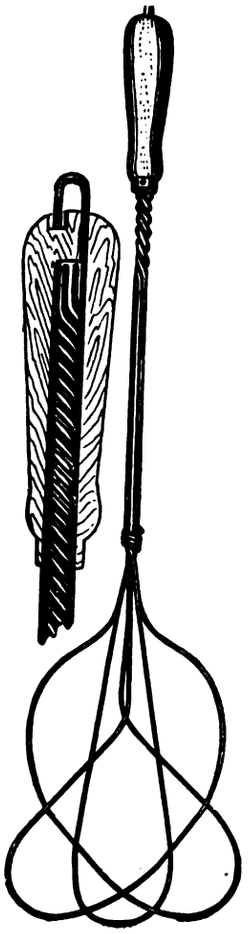
Now, I would not convey the idea that all competition is to be eliminated—far from it—for healthy competition is the life of trade, as well as is co-operation. Without proper competition business dies of dry rot. The idea I would bring, however, is that competition should rise above private animosities, that it should display itself not in reckless cutting of prices, but in efforts to attract the customer by better methods. Good advertising, taste in window decoration, well balanced stock, courtesy of employees and desire to please—these are but a few of the too often neglected phases of healthy competition.

But the elimination of personal antagonism in local competition is of importance not only from the standpoint of the immediate community involved. It also has a great significance in the development of our State association. If this organization is to reach its maximum of efficiency it must enlist in its ranks every retail Hardware dealer of the State. One in a community will not suffice—we need them all. We are at the present time fighting the catalogue houses and endeavoring to prevent legislation for a parcels post, to substitute such concerns for the local dealer. We are trying to put upon the statute books of Iowa a just exemption law one which will recognize the fact that the merchant is as much entitled to protection as is the man of salary. To accomplish these things we must present a united attack. With mutiny in the ranks, with personal antagonisms running rife among local competitors, our cause is lost. The Iowa Retail Hardware Dealers' Association asks, then, that its present members forget any past antagonisms they may have had with their fellow dealers, and that the men outside the organization be brought in.

RESOLUTIONS.

Among the resolutions adopted were the following:

(Concluded on page 26.)



Digitized by Google

LUFKIN RULE CO.'S PURCHASE.

The entire business of the Belcher Bros. Co., Irvington, N. J., has been bought outright by the Lufkin Rule Co., of Saginaw, Mich. The company were manufacturers of Maple and Boxwood Rules, Desk, Tailors' and Glaziers' Rules, Size Sticks for the shoe trade, Shrink Rules, Wantage Gauges and many others well known to the trade. In accordance with the New Jersey statutes, the late directors have resigned, and the business has been reorganized by the election of a new board of directors identified with the Lufkin Rule Co. Fred Buck, of Saginaw, is president; H. C. Hollis, New York, vice-president; Theodore Huss, Saginaw, treasurer; F. J. Sharp, New York, secretary; R. T. Wallace and S. B. McGee, Saginaw, and J. C. Drach, New York, are the board of directors. The plant at Irvington will be removed to Saginaw within a few months, and operated as a department of the Lufkin Rule Co.

"CLEANER" RUG AND CARPET BEATER.

Holt-Lyon Co., Tarrytown-on-Hudson, N. Y., are the manufacturers of the "Cleaner" Rug and Carpet Beater shown in the illustration herewith, which will be found very elastic, being made from the best furniture-spring steel. It has more weight, and is far more durable than rattan beaters. The "Cleaner" is used all the year round on rugs, furniture, clothing and carpets. It will beat them with half the usual labor, because its beater-head is made six inches wide, closely braided. Four wires, extending from beater nearly through handle, and twisted 1½ inches out of the handle, greatly stiffen it there, so that it does

"CLEANER" RUG AND CARPET BEATER.

not break off at the handle. Moreover, one wire is driven through, bent and driven back into the handle so it will not come off or turn around. The Holt-Lyon Co. are giving their Carpet Beaters wide publicity, and judging from the large sale these goods are enjoying, there is a profit for the aggressive Hardware merchant in handling them.

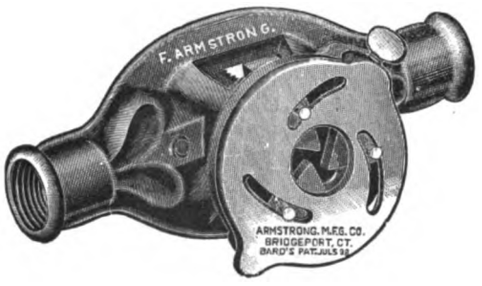
"With a snub-nosed Helen of Troy, my child, there would never have been a Trojan war."

"'My ideal,' she answered, 'is a man who would stand up against the whole, wide world—for a woman's sake.'"

USEEIT WATER COOLER.

The Consumers' Company, 35th and Butler Streets, Chicago, are the manufacturers of the Useeit Water Cooler, of which we give an illustration of the No. 1 Cooler, used with a 5-gallon bottle. Ice capacity, twenty pounds; height over all, sixty inches; occupying a floor space of twenty-one inches. Finished

USEEIT WATER COOLER.



in white enamel and aluminum bronze. In the manufacture of the Coolers they use the very best materials obtainable. The bottle holder is made of spun brass, lined on the inside with pure block tin, and is reinforced in such manner as to resist the pressure exerted by the weight of the bottle of water. Directly connected to the bottle holder is the pure block-tin coil, which connects the bottle with the faucet and through which the water passes to be cooled. The faucets are of the lever type and close automatically. They are made of brass, heavily nickel-plated, and tin-lined. The cooler body is made of extra heavy galvanized non-rusting iron with double walls, the space between the walls being filled with insulating material, which insures slow melting of the ice and prevents sweating. No. 1 Cooler has a siphon arrangement in the bottom of the cooler body by means of which the melted ice water is conveyed to the drip receptacle which rests on the cross-brace of the stands. The small coolers are provided with a drain-cock in the back for removing the ice meltage. The cooler stand is made of special tempered steel, finished in oxidized copper. The double cross-brace or spreader supporting the legs renders the stand perfectly rigid and firm. The legs are graceful and so shaped that they set squarely on the floor. The glass holder is fastened to the rim of the stand and is so arranged that it catches the waste water from the faucet and also the melted ice water from the ice chamber and conveys it to the drip receptacle. This drip receptacle is made of galvanized iron so enameled as to conform to the finish of the stand, and occupies no floor space, being set inside the stand on the cross-brace where it is free from the danger of being upset. The illustration shows a view of the cooler. The entire water supply remains in the easily removable and sterilizable glass container inverted on the top of the cooler, in plain sight of all. Leading from the glass water-container through the ice chamber, is a coil of pure block-tin pipe which cools the water instantaneously as it passes from the bottle to the drinking glass or cup This coil of pure solid tin pipe is guaranteed not to contain lead or other poisonous metals, is not affected by water, ice or atmospheric changes, and will not rust.

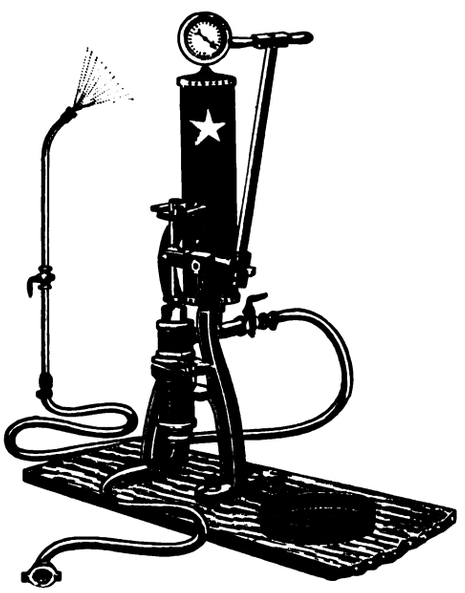
NEW GOODS AND SPECIALTIES

THE BARD ADJUSTABLE BUSHING.

The Armstrong Mfg. Co., Bridgeport, Conn., are offering the trade the Bard Adjustable Bushing, illustrated herewith. This Bushing is fitted with hardened jaws which are moved to and from center by means of a cam plate, and, by fastening the plate with the thumb screw, the jaws are firmly held in any desired



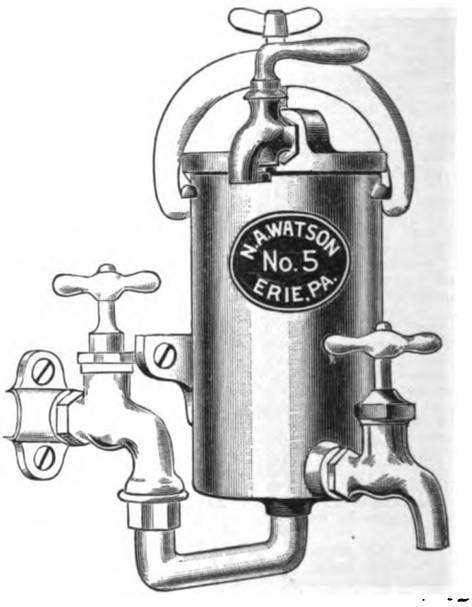
THE BARD ADJUSTABLE BUSHING.

position. The adjustable jaws make a perfect center for the pipe, fit closely around the pipe and insure the cutting of a straight thread. When necessary a crooked or drunken thread can be cut with this bushing as easily as with a ring bushing.

When once attached to the die stock it can always remain there. It does away with the necessity of carrying a number of loose ring bushings, and saves the time now lost in hunting for and changing the bushing for each size of pipe.

STAR WHITEWASHING AND SPRAYING MACHINE.

Star Brass Works, 152 Lake Street, Chicago, Ill., are the manufacturers of the Star Whitewashing and Spraying Machine, of which we give an illustration. This machine is of the simplest mechanical design possible, neatly and compactly built, without any complicated mechanism or any multiplicity of parts. While its actual weight is far less, still the materials used in its construction are superior and have greater strength than



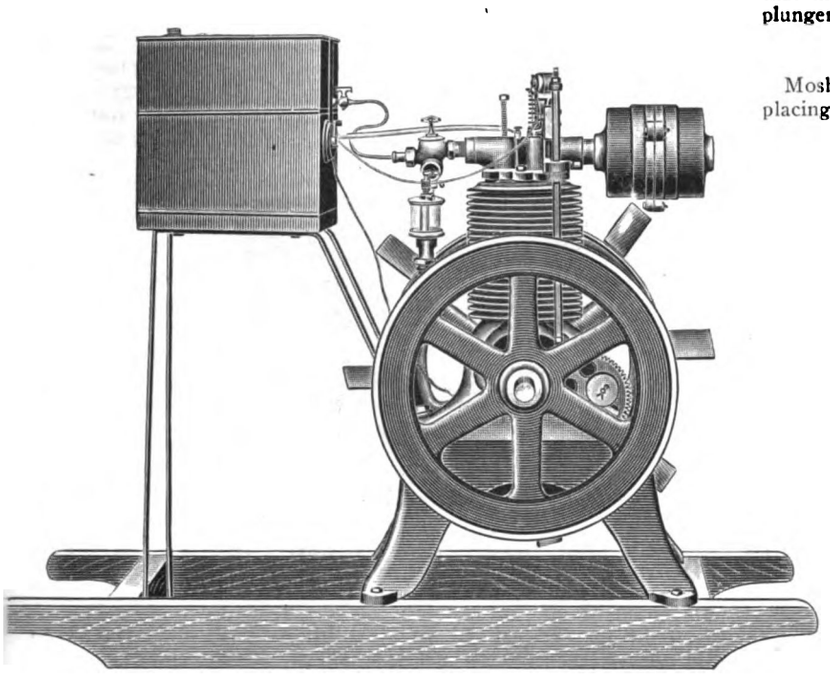
STAR WHITEWASHING AND SPRAYING MACHINE.

that in many cumbersome and awkward machines with complicated mechanism and numberless parts offered by others for similar service. The pumping motion with the leverage shown is of the easiest working character, allowing operators to do more and far superior work than is possible with many machines of other makes. The machine represented, which is their Style A, is recommended for those having a large amount of cleaning to do continuously or at short intervals, as its capacity is claimed to equal that of thirty men with brushes. It is furnished with an equipment as follows: Spray pipe complete with ¼-inch cock and spray nozzle; one extra spray tip; 200-pound pressure gauge; special galvanized sieve; follower wrench; ¾-inch discharge cock; one length of 1-inch suction hose and twenty feet of ½-inch Star special discharge hose. Its gross weight is 100 pounds, while its net weight is eighty pounds. The "A" Machine is mounted on a heavy cast-iron frame, and placed on a heavy wood platform on which the operator stands when working. Pump cylinders are made from heavy seamless brass tubing, provided with heavy cast phosphor-bronze cylinder heads. Air chambers on Style A Machines are made of heavy galvanized iron, provided with malleable bottoms and steel tops.

THE WATSON GERM-PROOF FILTER.

N. A. Watson, Erie, Pa., is the manufacturer of the Watson Germ-Proof Filter, which we illustrate herewith. The Natural Stone Filter is claimed to make the foulest water sparkling, wholesome and pure. It thoroughly removes from it all filth, microbes, bacteria and germ matter. These impurities are not absorbed by the stone. They never penetrate it, but are retained on the surface and can be readily removed by a brush, thus leaving the filter material perfectly clean. In the direc-

THE WATSON GERM-PROOF FILTER.



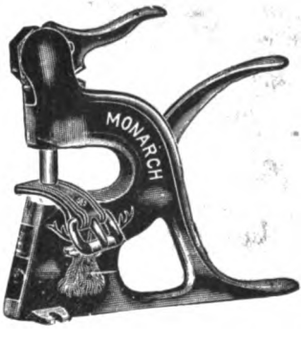
tions for cleaning, it is required to turn the handle on top to the left, then remove clamp and lift lid to which the stone is attached. Scrub stone clean with a brush, and when well scrubbed it will be as clean and the water will be as pure as when the stone was first put in use. Replace stone in filter, and place the clamp on top, and turn handle on top until it is screwed down tight on lid. This is necessary to have a tight joint. See that the rubber washer is in good shape to prevent leaking.

WHITE LILY GASOLINE ENGINE.

White Lily Washer Co., Davenport, Iowa, are the manufacturers of the White Lily Gasoline Engine, which they have manufactured realizing there was a large demand for a medium-priced gasoline engine, which, after experimenting for nearly two years, they are able to offer as the simplest and most economical air-cooled gasoline engine on the market. In the first place, it is claimed there are fewer parts in the White Lily Engine than in any other gasoline engine made, one of the distinctive features being the governor, it being made with only two moving parts. At the same time it is positive in its operation. They use the jump spark system of ignition, which, experience has taught them, is not only the best ignitor, but also the easiest to understand. The carbureter used is the simplest and most

Digitized by Google

durable that can be manufactured. The White Lily will develop full two horse power under all circumstances, and under the most favorable conditions will develop as high as two and three-fourths horse power actual brake test. It is claimed it will pump water and run a cream separator, churn and washing machine all at one time with perfect ease. It will run a two-horse power feed grinder, will saw wood and turn a grindstone. In short, it will supply two horse power to run any piece of machinery about the place. The White Lily is made in both water



THE WHITE LILY GASOLINE ENGINE.

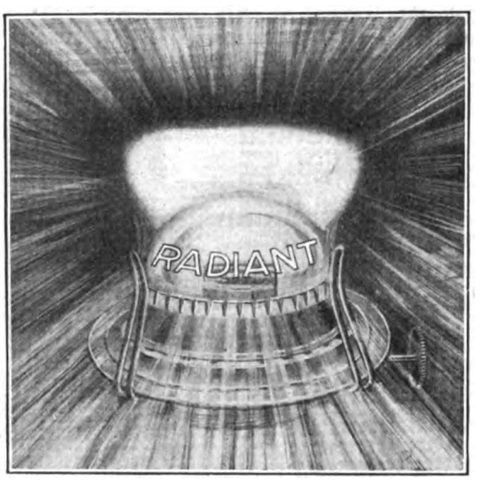
and air-cooled styles, but they recommend the air-cooled as the most practical. It saves the trouble of filling the engine with water every time it is used, and the danger of the water freezing and ruining the machine in the winter time. The engine is cooled entirely different from any other machine. Eight wings or fins on the rim of the fly wheel are used, and their cooling device is so perfect that they guarantee their engine to pull a heavy load full ten hours a day, and at any time the hand may be placed on the cylinder. All parts are interchangeable. Two very important parts of a gasoline engine are the spark plug and the batteries. Those they use are claimed to be the best that money can buy. The White Lily Gasoline Engine is absolutely safe, as it is claimed to be free from all danger of fire and it cannot explode. It occupies a floor space of only 18 x 22 inches, and the shipping weight is 325 pounds.

MONARCH RIVETING MACHINE.

Great Lakes Mfg. Co., Chicago, Ill., are the manufacturers of the Monarch Riveting Machine No. 1, a cut of which we present herewith. The machine in use is placed on a low counter or bench. The machine is held firmly with the hand, as this prevents the rivet being tipped from side to side before it comes in contact with the material. It is claimed the dealer will create much confidence as well as curiosity in the mind of his customer if he will put a rivet through a half-inch pine board or a piece of a nail-keg. Rivets slightly longer than the material should be used when the material is thick. After adjusting the Machine so the plunger will come in contact with the material, as shown in the illustration, one will be able to set the rivet with perfect ease by putting pressure on the long lever. The machine will set both tubular and slotted or split rivets perfectly. It is not necessary to force the plunger hard on to the material when adjusting the machine, only care should be taken that the flat face of the small lever sets flat on the arm of the plunger.

MONARCH RIVETING MACHINE.

THE "OIL RIGHT" OILER.



Mosher Sales Co., 32 St. Paul Street, Rochester, N. Y., are placing on the market the "Oil Right" Oiler, an illustration of which we give herewith, which is made from the finest grade of brass, and is claimed to be the only self-filling oiler on the market. To fill this Oiler the spout is depressed, forcing out the air and causing a vacuum. The end of the spout while so depressed is inserted in the oil and the oil is at once forced into the Oiler, taking the place of the air ejected. It is impossible to overfill this can, and therefore there is no waste of oil, and the Oiler cannot become smeared with oil. When oil is desired, it can be had in the usual way by the spring bottom, or if a quantity is desired, depressing the spout will regulate the quantity from a drop to a stream fifteen feet long. It is furnished with a nine-inch spout, bent or straight.

THE "OIL-RIGHT" OILER.

RADIANT GLASS CONE LAMP BURNER.

R. H. Maple Co., Dayton, Ohio, are placing upon the market the Radiant Glass Cone Lamp Burner, which is designed to avoid the annoyance necessary to keep clean the ordinary brass lamp burners. We give an illustration of the article herewith. It is made in two sections from tough, specially annealed glass, held free but in perfect position by a band so

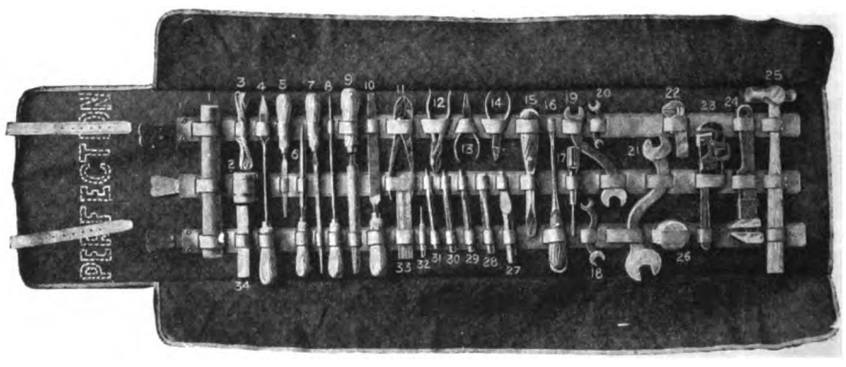
RADIANT GLASS CONE LAMP BURNER.

Digitized by Google

constructed as to allow ample expansion from heat without any resistance from band, and yet cannot get out of proper position nor come apart from handling, and is easily replaced if broken in careless hands. The shoulders on each side of cone fit snugly into recesses in band, absolutely insuring correct alignment of flame opening with wick tube. This is important. Glass cones may, however, get broken accidentally, and for such contingencies their construction provides for easy replacement. It lasts three times as long as an ordinary brass burner, being always clean, bright and odorless. Nothing but brass and glass is used in the construction of the Radiant Burner. No tin, steel or other cheap metal to rust.

SELF-SHINING STOVE LUSTA.

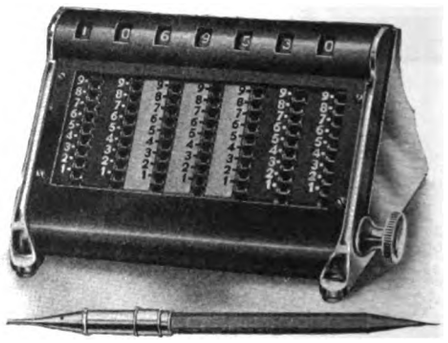
Crosby & Co., Detroit, Mich., are offering the trade the 6-5-4 Self-Shining Stove Lusta. It is a labor-saving substitute for stove polish, screen enamel and stove-pipe enamel. It shines itself, dries in ten minutes and is unaffected by grease, hot or cold water. It will not chip, wash or rub off, but should not be used on wood-burning stoves except to prevent rust. The main ingredient is made from a Java gum or hardened sap, which



SELF-SHINING STOVE LUSTA.

possesses peculiar and strong properties for the purpose for which the Stove Lusta is used. This compound is applied like paint with a small, flat brush. One application to a gas range is claimed to last for months. This Lusta is also a screen enamel, applicable as well for wood frames as to the wire mesh. It is so thin it cannot fill the mesh, prevents rust and makes an old screen like new. As a stove pipe enamel, it covers a large amount of surface for a small volume, and dries within ten minutes after application. The chemical properties in the Lusta will dissolve rust as readily as water dissolves salt.

THE "PERFECTION" KIT.



H. Channon Co., Chicago, Ill., are placing before the Hardware trade the "Perfection" Kit, which we illustrate herewith. It is a perfect assortment of high-grade tools complete in every detail, containing in addition to the essential tools, many that will be found of great value in emergencies and for general use. It consists of an assortment of thirty-four tools, handsomely mounted in a heavy brown duck case, with retaining straps and sewed throughout and indestructible. This is a kit that is recommended to the dealer that sells it as being one for whose customers the best is none too good. The list price is $20. They also make the "Reliance" Kit, consisting of twenty-nine tools, listed at $15, and the "Rural" Kit, consisting of twenty-two tools, at $10. These are similarly mounted.

THE "PERFECTION" KIT.

"GEM" AND "AUTOMATIC" ADDING MACHINES.

Automatic Adding Machine Co., 332 Broadway, New York, are the manufacturers of the "Gem" and "Automatic" Adding Machines, an illustration of which we give herewith. The "Gem" and "Automatic" are constructed of metal especially selected to meet the requirements of each separate part. They are mechanically perfect and mechanically incapable of adding up any amount other than the one registered. They do all the work, carrying all the totals automatically. This last feature makes them superior to all low-priced machines and puts them in the same class with the high-priced ones. They

"GEM" ADDING MACHINE.

are guaranteed by the manufacturers for two years, and are delivered free on trial, for they sell on their merits. The "Gem" is a compact machine, and may be carried in the pocket, or placed in the holder when used for desk work (see illustration.) Size, 3 by 4 inches; weight, 14 ounces; capacity, 9,999,999 or $99,999.99. It is operated by inserting a stylus opposite the required number, and drawing down the chain as far as it will go. The total appears at the top, separated from any other figures, where is is always in plain sight. The stylus fits over any pencil, and may be used to protect the point when carrying the pencil in the pocket. After adding one set of figures, the machine can be reset to zero instantaneously by turning the knob at the upper right-hand corner. The whole operation is mechanical, and consequently there is a feeling of certainty that relieves the operator's mind from all the strain of mental computation. A few minutes' practice leads to very rapid operation, and the saving of much valuable time and worry. The "Automatic" is the same as the "Gem," excepting that it has no resetting device, the resetting being accomplished by adding to each column enough to bring it to zero. This, while not so convenient as the "Gem," can be done very rapidly. Otherwise, the machines are identical.

Those beings only are fit for solitude who like nobody, are like nobody and are liked by nobody.—ZIMMERMAN.

"See what I got!" cried Bobby, a city-bred boy, as he came running in from the chicken coop, holding in his hand a china egg.

"O, go put it back!" exclamed Mabel, his six-year-old sister. "That's the egg the hen measures by"—*Judge*.

OHIO HARDWARE ASSOCIATION

The Thirteenth Annual Convention of the Ohio Hardware Association was held in Columbus Tuesday, Wednesday and Thursday, February 26, 27 and 28, when the largest attendance in the history of the Association was reported, it being the general opinion of the delegates that over 2,000 Hardwaremen were present. The regular sessions of the Convention were held in the Board of Trade Auditorium, while the exhibits in connection with the Association were shown in Memorial Hall, located on East Broad Street. The Association headquarters during the Convention were maintained in the lobby of the Southern Hotel. The meeting was an interesting and successful one throughout. Every arrangement was made for both the business and social side to carry it on successfully.

TUESDAY AFTERNOON SESSION.

The first session of the convention was called to order by President C. S. Johnson, of Barberton, at 2 P. M., in the Auditorium of the Columbus Board of Trade. Rev. Alfred E. Craig, of the Broad Street M. E. Church, was introduced and invoked the Divine blessing upon the proceedings. President Johnson introduced Andrew L. Harris, Governor of Ohio, who welcomed the assembled delegates in a brief speech. President Johnson stated that the city of Columbus, through John Y. Bassell, secretary of the Board of Trade, welcomed them to the city. W. P. Bogardus, former president of the National Retail Hardware Association, responded for the Association. Brief speeches were then made by National Secretary M. L. Corey, John F. Baker, of Dayton; H. C. Wiseman, of Springfield, and J. P. Duffy, of Greenville, president of the Ohio Hardware Dealers' Mutual Fire Insurance Company, and George M. Gray, of Coshocton, secretary and treasurer of the Ohio Hardware Dealers' Mutual Fire Insurance Company, and Mr. Chamberlin, of *The Iron Age*.

C. S. JOHNSON, PRESIDENT.

President Johnson then announced the following

CONVENTION COMMITTEES,

some of which have served the Association during the year, and others were appointed by President Johnson at this time.

AUDITING: J. L. Reid, Greenville; W. P. Bogardus, Mt. Vernon; J. E. Smith, Caldwell.

RESOLUTIONS: N. C. Alton, Lorain; W. R. Green, Waynesfield; James A. Bell, Roscoe; J. A. McCoppin, Hillsboro; George J. Hauke, Springfield; H. G. Leonard, Sebring.

QUESTION BOX: M. L. Corey, Argos, Ind.; Fred J. Hibbs, Bridgeport.

NOMINATING: George M. Gray, Coshocton; L. W. Loomis, Cuyahoga Falls; B. K. Herbster, Prospect; R. R. Jacobs, Waynesburg; John Henne, Youngstown.

GRIEVANCE: W. B. Martin, Mansfield; F. W. Ingalls, Bryan.

LAWS RELATIVE TO THE HARDWARE TRADE: H. A. Butsinpillar, Ironton; John Gross, Akron; W. A. Kennedy, Canton; D. R. Ballmer, Fostoria; P. E. Snyder, Blanchester; W. B. Martin, Mansfield; W. A. Carl, Shreve.

IN MEMORIAM: L. D. Boyer, Swanton; J. E. Davis, West Alexandria; Mr. Hemperley, Massillon; J. M. Weaver, Basil; Mr. Millar, Akron.

PRESS: John F. Baker, Dayton; M. E. Bidlack, Oakwood; F. A. Chamberlain, Harrisburg.

ENTERTAINMENT: Frank A. Bare, Mansfield; A. Boebinger, Cincinnati; T. C. Weir, Steubenville; J. R. Dickson, Columbus; J. F. Baker, Dayton.

RECEPTION: J. R. Dickson, Columbus; Adam Bretch, Dayton; John S. Spoerle, Hamilton.

EXHIBITS: W. L. Jacobs, Youngstown; J. R. Dickson, Columbus; William Crumrine, Salem.

J. C. Fuhr, Williamsburg, acted as sergeant-at-arms.

The convention then adjourned until 1:30 P. M. Wednesday, February 27.

WEDNESDAY SESSION.

The session was opened at 2 P. M. by the president, a large number of members attending. The minutes of the last annual meeting were read by Secretary Frank A. Bare, of Mansfield, and on motion were duly approved. The president's annual report was then delivered by President Johnson, which was in part as follows:

PRESIDENT'S ADDRESS.

One of the most serious problems that confronts this and other similar organizations to-day is the question of getting new members. However, I must say for our State organizations that this has been a very prosperous year. Our secretary has been rewarded in a partial way for the time and labor he has spent trying to increase the membership of Hardware dealers in this State. Out of about 1400 Hardware dealers, we have nearly 900 enrolled. We expect to leave this convention with a membership of 1,000 to 1,200. I believe there is more enthusiasm in this State to-day than at any time before in the history of this organization.

The Association idea is spreading all over this country. A great deal of our inspiration has been derived from a National Association and the publication of our National Bulletin,

EDITED BY ONE WHO UNDERSTANDS THE SITUATION

and devotes his entire time and best thought to the betterment of this and the other State Associations. A great source of pleasure to your officers has been

THE GOOD FELLOWSHIP OF THE TRAVELING FRATERNITY,

who have worked faithfully and well for us. The growth of our membership is attributed to the untiring efforts of one of the best secretaries found in any one of the State Associations. At this time I wish to call your attention to the most flattering victory for retail interests in the defeat of the Parcels Post bill, which was before Congress. And I think too much stress cannot be placed upon the fact that it was the retail Hardware dealers who have shown the Post Office Committee the great detriment it would work the retail interest of the United States to have this measure enacted into a law. We as members should congratulate ourselves if we had derived no other benefit last year from being a member of this or any other association of like kind than this one.

FRANK A. BARE, SECRETARY.

WE MUST PUSH THE GOOD WORK.

go forward and always keep our good brothers in Washington posted upon what is consistent with the retail trade of the United States, and not concentrate it in a few cities.

I wish to call your especial attention to our insurance department. The magnificent showing in their statement for the year will follow in their report. We must realize that the business methods of yesterday are not the methods of to-day. Constant changes are taking place, and as the individual tries to keep pace with this evolution and the conditions that follow

MAMMOTH COMBINATIONS OF CAPITAL AND BRAINS,

he must of necessity realize that the situation demands constant and determined efforts, aided by progressive thought. Do I hear some one ask, "What can this Association do against these combinations entrenched, as they are, behind untold wealth?" My answer is to keep digging and improve our opportunities as best we can, and results will follow.

When this Association was organized thirteen years ago with thirteen loyal, staunch men of character and determination, how little did they dream at that time that to-day we would have numbered in our ranks 1000 in this State, and the number of 10,000 in our National Association working for the betterment of the entire Hardware fraternity? With the same ratio of increase, what will we not be able to accomplish in the next thirteen years? Allow me to call your attention to some of the objects of the Association that will help to accomplish this increase.

1. To better the condition of the retail merchant.
2. To correct the evils that now exist.
3. To bring about better trade conditions.
4. To stop wholesalers from selling to consumers.
5. To encourage co-operation of manufacturers and jobbers.
6. To be honest with one another.
7. To encourage a more general reading of trade papers.

WE ARE LIVING IN A DAY OF UNPRECEDENTED PROSPERITY.

Crops, generally speaking, were bountiful the past year; railroads have reaped a harvest, and our manufacturing institutions are active.

(Continued on page 40.)

COLORADO RETAIL HARDWARE ASSOCIATION

The fifth annual convention of the Colorado Retail Hardware Association was held at the Albany Hotel, Denver, on February 13, 14 and 15. The opening session of the convention was held on the morning of the 13th, being called to order by the president, M. S. Whiteley, Boulder. The Wednesday afternoon session was graced by the presence of Governor Buchtel, who heartily welcomed the visiting merchants to Denver.

After making a few introductory remarks President Whiteley announced the following committees to serve during the convention. Resolutions: Messrs. Branson, Moys, Baumgardner; Auditing: Messrs. Barkley, Meservey, Jamieson; Nominations: Messrs. Harding, Spriesterbach, Ellis.

The report of the committee appointed to consider the merging of the Colorado Implement and Hardware associations was favorable to the carrying out of the proposed plan. A good deal of discussion followed the report, but it was finally decided to ratify the view expressed by the members of the committee.

"THE RETAIL JOBBER."

On the above subject F. C. Moys, Boulder, read an interesting paper from which we make the following extracts:

It is not my purpose to roast the jobbers for selling the consumer, but to offer for your careful thought a few facts which have struck me as typical of conditions as they exist to-day. Not for the purpose of stirring up strife and discussion, but rather the opposite that we may come to a better understanding and form a closer alliance with our friends, the jobbers, which will result in great mutual benefit. Not being in the Implement business, I am not conversant with conditions in that line, so do not expect my remarks to apply to such dealers, unless they happen to fit.

It is an unfortunate fact that in all lines I carry there is not, so far as I know, an exclusively jobbing house in the State. As I am not very familiar with such matters in the Colorado jobbing centers outside of Denver, what I say will be based on actual observation of conditions in Denver, and I presume they will apply fairly well to the other points.

Our Denver jobbers are the natural outgrowth of large and prosperous careers as retailers. The foundations of most of them were laid many years ago when their opening stocks were bullwhacked across the plains. These pioneers, who braved the dangers of the new West, started in a primitive fashion their small retail business, little dreaming of the enormous proportions to which they should expand by 1907. Many of the friends they made in those early days are still their customers, and it would be asking a great deal to expect the jobbers to decline to sell them in a retail way. The time will come, I hope, when of their own accord they will see the wisdom of hanging out signs, "We sell at wholesale only." But the time apparently is not yet ripe for such action.

I believe the Colorado jobbers could so arrange their prices that nearly all retailers would buy the bulk of their goods of them. The retailer could do the same business on much less capital, if he could get his goods near by, meet competition and make money. The jobbers by their retail prices practically dictate the retail prices of the State. No consumer of any size will pay any more than the Denver price with freight added.

Our jobber friends have said that on account of competition they were unable to give the retailers the protection they would like, but I have noticed that no matter how keen the competition Mr. Jobber never sells anything without a good margin for himself. It may be necessary from his point of view, to cut off the retailers' margin, most or all of it, but his own margin is always safe.

To illustrate I will name a few specific commodities from different lines of jobbers, but covering goods which are carried by most Colorado retail Hardware merchants.

Two-inch Black Pipe costs the jobber, in carloads, on present market, $10.54 per 100 feet. He sells it to the retailer or large consumer at $11.88 per 100 ft., thus giving him a profit of $1.34 per 100 ft., or 12.7 per cent. He sells it to the small consumer at $12.24 per 100 ft., with a profit of $1.70 per 100 ft., or 16⅛ per cent. His price to us being $11.88, the same as to the large consumer, we are shut out from selling such consumer at any profit. We can meet the jobbers' long retail price of $12.24 and make a profit of 36 cents per 100 ft., or 3 per cent.

Bar Iron, Mine Rails, Norway Iron, Corrugated Iron, and Sheet Steel are sold in Denver at just the same prices to retailer or consumer. Valves, Fittings, etc., are sold on a differential of about 5 to 10 per cent., while the jobber has a margin of 25 to 40 per cent.

I took an order recently for a bill of Belting at the price quoted my consumer by a Denver jobber, which was 65 off. When I asked the jobber for a price he informed me this Belt cost him 70 off and the best he could do for me was 67 and 2½, which he finally changed to 65 and 5. On this basis he made 11.1 per cent., as a jobber while I had 5 per cent., as a retailer.

A certain lubricant jobbed extensively in this State costs the jobber about $11.50. He sells it to the retailer at $16 and to consumers at $18 to $20. He makes a profit of about 40 per cent. on what he sells the retailer while the retailer can make only 12½ per cent., or possibly 25 per cent.

Steel Horse Shoes cost the jobber not more than $1.40 a keg base, and he sells them to the retailer at $5 and the consumer at 10 cents more. He has a margin of 60 cents, or 12.6 per cent., on what he sells the retailer, while the retailer makes 10 cents a keg, or 2 per cent.

Toe Calks, which cost the jobber less than $1.25 a box, he sells to the retailer at $1.55, with a margin of 30 cents a box or 24 per cent., while the consumer pays 5 cents a box more. If we pay the jobber $1.55 and meet his consumer's price of $1.60, we make 5 cents a box or a trifle over 3 per cent.

A Boulder party recently selected a line of Builders' Hardware in Denver, for which I obtained the order. I got a margin of 10 per cent., while I have reason to believe the jobber who handled it made 25 to 30 per cent.

OTHER SOURCES OF SUPPLY.

We feel, Mr. Jobber, that you can help us and in so doing help yourself. Do you wonder that the retailer buys his goods from other sources even at equal prices with yours, rather than patronize you who holds our noses to the grindstone in this manner?

You have it in your power to revolutionize trade conditions in this State without working a hardship on any one, but with actual benefit to all concerned. Will you do it?

Will you arrange your schedule of prices so that we can buy from you and sell at your retail price and make a reasonable margin? You know it costs us from 15 to 20 per cent., to pay expenses, while yours are probably not over 10. Think it over.

The reading of Mr. Moys' paper was followed by considerable discussion in which Messrs. Moore, Tritch, Abbott, Gutshall, Lovell, Branson, Whitney and Killin took part.

The Committee on Resolutions submitted the following report, which was adopted:

Anticipating the immediate merger of the Colorado Retail Hardware Association and the Colorado Implement Dealers' Association, we, your Committee on Resolutions, believe it expedient to recommend a resolution governing the future policy of the joint organization, for the protection of members of our Association, whether Hardware or Implement dealers, to secure what is due from the jobbers and manufacturers, and which has not at all times been observed; therefore be it

Resolved, That our officers shall negotiate with the jobbers and manufacturers who retail, with a view of obtaining protection and a more satisfactory differential than now exists between the jobbers' prices to retailers and those to consumers.

Your Committee on Resolutions does not deem it proper to press any recommendations upon the proposed new organization, but knowing your sentiments, we recommend that a vote of thanks be tendered to Denver jobbers, traveling men and manufacturing agents, for their very generous entertainment of us during this session; also the thanks of this Association are due to Governor Buchtel for his kind address of welcome; to the railroads for giving us reduced rates; to the Albany Hotel for making us special rates and for the many acts of courtesy extended us by the management; also to the jobbers and manufacturers for the very handsome exhibitions made, showing that they recognize that the members of this Association are the proper distributors of their wares.

Inasmuch as by unanimous consent this Association has decided to merge with the Colorado Implement Dealers' Association; be it

Resolved, It is the sense of this Association that it is the duty of every member of the Colorado Retail Hardware Association to become a member of the joint association.

Other resolutions were adopted in opposition to parcels post, and favoring the reclassification of second-class mail and one-cent postage.

JOINT MEETING.

On Friday morning a joint meeting of the Colorado Retail Hardware Association and the Colorado Implement Dealers' Association, which was also holding its annual convention, was held. It was called to order by Mr. Whiteley, president of the Hardware association. Mr. Unfug reported that both of the associations had favored the merging into one organization. He then read the constitution and by-laws for the new organization which had been prepared by a joint committee representing both associations. Some amendments were discussed and approved, and later the constitution and by-laws as a whole were adopted. The name of the enlarged association will be the Colorado Retail Hardware and Implement Association.

ELECTION OF OFFICERS.

The Nominating Committee reported the following officers for the ensuing year, who were unanimously elected:

President, T. M. Harding, Canon City.

Vice-President, E. Starley, Greeley.

Directors for one year, W. H. Clatworthy, Ft. Morgan; for two years, Geo. I. Coddington, Wellington.

After the convention adjourned, the Executive Board held a meeting and unanimously elected Adolph Unfug, Walsenburg, as secretary-treasurer of the new association.

OUR CANADIAN LETTER

TORONTO, February 5, 1907.

WESTERN CANADA RETAIL HARDWARE CONVENTION.

The third annual convention of the Retail Hardware Association of Western Canada was held at Winnipeg on February 12, a fair representation of about 40 delegates being on hand in spite of snow blockades on the railways. The address of President Falconer and report of Secretary McRobie contained considerable interesting data showing the progress of the Association and the good work it has accomplished for the Hardware trade. The latter suggested that local associations be formed by the dealers in Alberta and Saskatchewan in order to allow the members in those provinces to get more advantage from the Association membership.

Steps were taken towards forming a Dominion Association by appointing President Falconer and Secretary McRobie to act with President Humphries and Secretary Wrigley of the Ontario Association as a provisional executive to carry on the work of organizing the trade in all parts of Canada. As other provinces organize associations they will be asked to join. Nova Scotia and British Columbia are already partially organized.

A strong resolution was adopted condemning the proposed parcels post C. O. D., legislation referred to in HARDWARE of Feb. 10. Another resolution was also adopted approving of joint action being taken with the jobbers in the matter of reciprocal demurrage charges.

A year ago the association affiliated with the Retail Merchants Association and its officers formed part of a joint board. This board was abolished and the affiliation discontinued at this convention. In matters of general legislation, of course, the association will co-operate with the Retail Merchants Association, but in other matters the Western Association is now entirely independent except for its connection with the proposed Dominion Retail Hardware Association.

RETAIL ASSOCIATIONS DEFEAT PARCELS POST.

On February 14 the Postmaster-General announced in Parliament at Ontario that in view of the general opposition to his proposed parcels post C. O. D. regulations he would withdraw them. This was a great victory for the Ontario and Western Retail Hardware Associations, they being the only organized bodies in Canada to actively oppose the measures. Through the aid of *Hardware and Metal* and the *Dry Goods Review* thousands of retailers were induced to send letters of protest to the Postmaster-General and members of Parliament, these having the desired effect in heading off the game which the mail order houses were playing. A feature of the agitation was the almost absolute silence of the daily press on the subject, proving the value of the trade press and retail associations.

Another postal matter receiving attention just now is the abrogation of the postal convention with the United States Government by the Canadian Goverment in so far as second-class mail matter is concerned. The present arrangement is unsatisfactory to Canada as it carries thousands of tons of American papers mailed in the United States at 1 cent per pound and in return receives very little. Unless a new arrangement is arrived at or the present one extended, all United States papers will after May 7 next have to pay 8 cents per pound to be distributed in Canada. It is claimed that mail order publications, Sunday papers and cheap magazines are the ones which it is aimed to exclude but unless the publishers of trade newspapers take some action this class of papers may also be hit. *Hardware and Metal*, Toronto, has taken a strong stand in opposition to the exclusion of the American trade press from Canada.

JOBBERS OPPOSE ANTI-DUMPING LAW.

Peleg Howland, head of the well-known wholesale firm of H. S. Howland, Sons & Co., Toronto, in retiring from the presidency of the Toronto Board of Trade, delivered an able address in which he said:

"The attention of the Toronto Board of Trade Council has recently been called to the anti-dumping clause in the custom tariff, the application of which is being extended at the present session of Parliament. I cannot urge too strongly that the matter be thoroughly investigated. A regulation that restricts a merchant's rights to buy as cheap as his ability and capital will permit, and penalize him if he does exercise such ability by requiring, besides the regular duty, the payment in the shape of special duty of any concession he can obtain in price below what the authorities fix as the home value of the goods in the country of export up to fifteen per cent. of such home value, and compels the taking of such an oath as the following—'That no arrangement or understanding affecting the purchase price of the said goods has been or will be made or entered into between the said importer and the exporter, or by anyone on behalf of either of them, other than as shown in the said invoices, either by way of discount, rebate, salary, compensation or in any other manner whatsoever, which forms a part of the oath taken on the entry of goods for consumption—approaches too nearly to despotism, surely, to be borne by this community, and is besides calculated, as the oath suggests, to encourage fraud and dishonesty, and is not in the interest of the consumer. In my opinion, as a restriction on trade, no combination can compare with it. If the manufacturer requires more protection it should be afforded him in some less objectionable way."

BUSINESS CHANGES AND NEW STORES.

A $400,000 company has been formed in Montreal by a merger of the Starke Hardware Company with Seybold Sons & Company. Both of these houses had good jobbing business and the merger makes a strong concern.

Kilpatrick Bros. have opened a new Hardware store at London, Ont.

Mayor J. W. Smith, Regina, Sask., who recently sold the Smith & Ferguson retail business for $125,000, is to reorganize a $500,000 company and conduct a jobbing business at Regina.

The Peterboro Hardware Company, Peterboro, Ont., has been taken over by four young men who have grown up in the business.

Moore and Nunn are opening a new Hardware store at Lansdowne, Ont.

W. A. Hillhouse, Shelburne, Ont., has sold out to Button, Spilker & Co.

Chas. R. Banks, Peterboro, Ont., has opened a new sporting goods store.

W. Mitchell, Port Stanley, Ont., has sold his Hardware stock to H. M. Ellison.

The following merchants of Cartwright, Man., are amalgamated under style of The Merchants, Limited: Moore & Hills, general store; J. A. McKenzie, Hardware: F. & M. Macklin, Hardware; Cannon & Pickel, general store; L. H. Phillips, Hardware, and Wm. Gemmell, grocer. The new company is capitalized at $50,000 and will do business on a departmental store system in an endeavor to capture the large farmer trade now going to the mail-order houses.

The Philbin Specialty Co., Montreal, has been registered as Hardware merchants.

Stockwell and Perry, Hardware merchants, Estevan, Sask., have dissolved partnership.

Anderson & Thomas, Hardware merchants, Winnipeg, Man., have dissolved, and the business will be continued by J. E. Thomas.

Dreaney Bros., Hardware merchants of Cobalt, have opened a branch store at Englehart, Ont.

O. Landen and C. A. Whiting, Hardware merchants, Winnipeg, will hereafter be known as the Whiting Hardware Co.

Siemens & Wiele, Hardware merchants of Herbert, Sask., have dissolved partnership. Business will be carried on by G. P. Siemens.

The Brandon Hardware Company, Brandon, Man., has made application to the Manitoba Government for power to increase its capital stock to $150,000.

Hintz & Lynch, Hardware merchants of Vonda, Sask., have dissolved partnership.

Schwanz Bros., Hardware merchants, of Rocanville, Man., have dissolved partnership.

James & Hughes, Hardware merchants of Napinka, Man., have dissolved partnership.

The Hardware business belonging to the estate of Edward Crouter, Gladstone, Man., has been sold to W. H. Squair.

W. B. Shannon & Company, Hardware merchants, of Carberry, Man., are retiring from business.

Madole & Wilson, Hardware merchants, Napanee, Ont., have dissolved partnership. M. S. Madole continues.

Slimman Bros. have taken over the business of McLaughlin, Sturtbridge & Co., Hardware merchants, of Drayton, Ont.

(Concluded on page 37.)

RECENT TRADE PUBLICATIONS.

Oneida Community, Oneida, N. Y., and 395 Broadway, New York, have recently issued one of the handsomest catalogues which has ever come to our attention, bound in green with a highly artistic device on the front cover, embossed in silver, bearing the words "Community Silver." The catalogue in itself is a magnificent specimen of the bookmakers' art, and measures over 16 by 9 inches, containing about 50 page plates, illustrating in natural size the various styles of Flatware manufactured by this company, including Avalon, Flower-de-Luce, Classic, Windsor, Tipped, Fiddle and Plain Patterns, price lists accompanying the same. There are included in the contents several reproductions of handsome box sets in mahogany and quartered oak, as well as special sets. The half-tones are of the finest quality, bringing out in a striking way the soft tones and brilliancy of the silver, as well as the beauty of the several patterns. A large view of the home of the Community at Oneida is given and of the factory at Niagara Falls. The catalogue will be preserved as a valuable addition to the catalogue literature of the Hardware merchant.

Consolidated Mfg. Co., with general offices and factory at Dorr Street Station, Toledo, Ohio, have issued a booklet regarding their Yale-California Motor-Cycle for 1907, regarding which they say: "The perfection of the 1907 Yale-California Motorcycle is a story of steady and scientific evolution and improvement through years of exhaustive and practical experience. The season just ended has witnessed the most notable advance in motor-cycle construction recorded since the inception of the industry, and the Yale-California has unquestionably been the chief factor in that development. We have enjoyed an inestimable advantage over the manufacturers in the fact that ours is the only motor-cycle plant in America which builds its own motors and all other parts. The importance of this feature the most casual student of motor-cycle construction will readily understand. Practically all the doubt, uncertainty and danger is centered in the motor—if the motor is not right it is a foregone conclusion that the motor-cycle itself cannot be and will not be right. The builder who buys the motor outside his own factory is buying, at best, an experiment. He is entrusting to another man's judgment the most delicate and difficult feature of his machine. Motor-cycle construction should be above all else harmonious throughout. The relation of the parts is so close and vital that they must, metaphorically speaking, be built and assembled by one and the same head." Several half-tones are included, showing how the horse-power is tested, how the motor is timed, where the electroplating and shipping are done, the frontispiece being the motor-cycle itself.

Davenport Ladder Co., 408-412 Bridge Avenue, Davenport, Iowa, are distributing to the trade their catalogue and price list for 1907, showing a line of Trestle, Fruit Pickers', Painters', Fire, Roof, Step Extension and other Ladders. Their best ladders are made from New England Spruce, which is claimed to be lighter, tougher, more durable and in every way superior to any other wood for the purpose. Their Norway Pine Ladders are made from the best lumber to be had, and are cheap only in price. All Extension Ladders are made from selected stock and are fitted with heavy malleable iron fittings. The Company can furnish Trestle, Scaffold and Special Ladders of all sorts, and of any length, size and weight desired.

Union Mfg. & Specialty Co., 181-189 Pratt Street, Buffalo, N. Y., Catalogue B, illustrating and describing "Springfield" Bicycle Wrenches, Drop-Forged Fork Crowns, Seat-Post Clusters, Handle-Bar and Seat-Post Expanders, Union Foot-Power Grinders, Mann's "Hold-Fast" Screw-Drivers, Chicago Combination Fence Tool, Bolton Automatic Quick-Repair Tool, Fisher Tube Skates, Whitely Exercisers, and other specialties.

Troy Scale Co., Troy, N. Y. Price list and catalogue of Standard Scales and Weights. This Company are large manufacturers of Coal, Hay and Wagon Scales; Dormant Warehouse, Wool or Cotton, Salt Meat and Fish, Portable Platform, Union Counter, Grocers', Family, Tea, Platform Flour and Cattle Scales. This catalogue will be gladly sent upon application.

Continental Tool Co., Frankfort, N. Y. Catalogue "E" on Farm and Garden Tools, such as Hay, Manure, Spading, Header and Baling-Press Forks; Garden Mattocks, Hoes, Weeders, Tool Sets, Turf Edgers, Thistle and Dock Cutters, Rakes, Potato Hooks, etc. A line of Sidewalk Cleaners is also shown, and special attention is called to their line of Coke, Coal, Sluice and Beet Forks, which are all forged from best of steel, nicely finished and driven on XXX selected white ash handles.

Newhall Ship Chandlery Co., 186 Front Street, New York, have sent out three booklets on the subjects of Tackle Blocks, Awning Hardware and Marine Hardware. Catalogue No. 41 is devoted to Tackle Blocks, and includes Regular Iron and Rope Strapped Blocks, Wood Snatch Blocks, Special Strappings, Yacht Blocks, Painters', Hay, Cargo Hoisting, Iron Dock and Steel Blocks, Wire Rope Blocks, Sheaves, Bushings and Pulley Blocks, with price list. Catalogue No. 42 is given to Awning and Sailmakers' Hardware, and includes Sectional Frames, Slide Rods, Hinges, Arm Ends, Plates, Timbers, Crommets, Rings and Snaps. Their catalogue of Marine Hardware includes Anchors, Chain Bolts, Hooks, Braces, Boat Cleats, Hinges, Calking Mallets, Irons, Ship Scrapers, Belaying Pins, Ship Locks, Knobs, Bells, Side Lights, Windlasses, Compasses, Fog Horns, Bilge Pumps, Lamps, Sail Needles, Sailors' Palms, etc., etc.

Cortright Metal Roofing Co., Philadelphia and Chicago, have recently published a book entitled "Rightly Roofed Buildings," regarding Cortright Metal Roofing as rightly applied to buildings—a book full of interest to everybody that owns a house, or that may own one, or that helps others to make or obtain possession of one, or keep it in good condition. This book contains pictures of some of the finest buildings and some of the cosiest homes in America, and will be sent, carefully enclosed, and fully prepaid, to any one making application for the same.

Tower & Lyon Co., 95 Chambers Street, New York, manufacturers of Hardware Specialties, Fine Tools and Police Goods, have published a Pocket Tool List, which includes in its contents Chaplin's Improved Planes, Tower's Champion, Perfection and Pet Screw Drivers, Clark's Expansive Bits with two cutters; Lightning Auger Bits, Handy Bit Boxes, Whitney's Geared Hand Drills, Perfection Mitre Boxes, Saw Clamps, Keyhole or Compass Saws, Ready Pencil Attachments, Reissmann's Perfection Sand-Paper Holder, Tower's Unique Pocket Levels, Perfection Rule Gauges, Plumb Bobs, Brass Trammel Points, Combination Pliers, Cyclops Nail Pullers, Tower's Combination Engineers' Wrenches, Boardman's Combination Wrenches, Tower's Involute Wrenches, Stephens' Patent Vises, Snediker's Leg Vises, etc., etc.

Wright Wire Co., Palmer, Mass. Price list of Wire Rope, and including as well Plow Steel Ropes, Crucible Cast Steel Ropes, Iron Ropes, Galvanized Ropes, Flat Ropes, Towing or Mooring Hawsers, Hoisting Ropes, Regular, Flexible and Extra Flexible Suspension Bridge Cables, Robes for Tramways, and Cableways for transporting Coal, Ore, etc. Ropes for Elevators, Power Transmission, Street Railways, Mining, Logging, Standing and Running Rigging, Derricks and Dredgers, Tiller Ropes, Sash Cords, Galvanized Strand, Clothes Strand, Clothes Line. All kinds of Wire Rope Fittings and Appliances. Ordinary forms and sizes are always carried in stock, and special forms will be made to order promptly. Directions are given for splicing Wire Rope, and information regarding Wire Rope and its use. A price list of Wire Rope Fastenings is also given.

Milwaukee Tack Co., Milwaukee, Wis., have distributed to the trade their illustrated catalogue and price list, in which is described their lines of Carpet Tacks under the name of "Bonita," "Our Standard" and "Le Roy." These Tacks beside being put up in ¼ pound papers, are also put up in wooden barrels. This company also manufacture a line of Upholsterers', Bill Posters', Hide, Cheese Box, Basket and Berry Box, Trunk, Burlap, Gimp and Lace Tacks; also Clout, Trunk, Basket, Cigar Box, Chair, Canvas and Barrel Nails, as well as Linoleum Brads, Picture Frame Points and a large line of Shoe Nails. There will also be found in the catalogue Steel and Brass Escutcheon Pins, Barbed Roofing Nails and Staples, making it a very comprehensive catalogue on the subject in question.

UNIVERSAL
SCREEN DOOR CATCH

LIVE DEALERS WILL HAVE THEM
Lowest Priced LOCKING Screen Door Catch on the Market.

Easily put on. No mortising or cutting.
Holds door firmly shut when closed.

PUSHING DOOR RELEASES CATCH

If your jobber cannot supply them write us for list of those having them in stock.

MANUFACTURED ONLY BY
PECK, STOW & WILCOX COMPANY
CLEVELAND, OHIO, U. S. A. and
NEW YORK, U. S. A.

NEW HOME WASHER
Ball Bearing, No. 35.

This is not a Grindstone, Saw Mill, or Threshing Machine.

It is a Labor Saver, Worry Killer and Wonder Worker on Wash Day.

A MONEY MAKER for you, Mr. Dealer. ORDER NOW

This is THE WASHER and the season of the year to head off your MAIL ORDER competitor.

Ask your jobber or write us for George Washington booklet.

PATENTED
THE STANDARD MFG. CO.
SHELBY, O.

CANADIAN LETTER (Concluded.)

J. Henry & Son, Orono, Ont., have bought out their opposition, D. H. Walsh, and have taken over the stock.

F. A. Howard, for many years a member of the firm of Turnbull, Howard & Company, Hardware merchants, Brantford, Ont., has severed his connection with the firm, which will in future be conducted by W. R. Turnbull and E. B. Cutliffe.

B. Werner, Hardware merchant of Innerkip, has sold his business.

Young & McBurney, Wingham, Ont., have dissolved partnership, Mr. McBurney retiring.

Jelly & White, tinware and stoves, Shelburne, Ont., have dissolved partnership R. A. Jelly continuing.

T. Weir & Son, Minitonas, Man., Hardware and implement dealers, have dissolved.

James Sutherland, Moose Jaw, Sask., has sold his Hardware business to A. E. McKenzie.

HARDWARE TRADE HAPPENINGS.

The Standard Paint Co., have established a paint factory at St. Johns, N. F.

The Metallic Roofing Company, Toronto, are to enlarge their factory.

Benj. Moore & Company, New York, which recently took over the Francis Frost Company, Toronto, has taken possession of the new $30,000 plant at Toronto Junction.

The Manitoba Linseed Oil Mills, Winnipeg, has been incorporated with a capital of $200,000.

The Canada Arms and Rifle Sights Company, Toronto, has been incorporated with a share capital of $200,000.

The Canadian Rand Company has been incorporated with a capital stock of $500,000, for the purpose of taking over the Canadian Rand Drill Company's plant at Sherbrooke, Quebec.

The new silverware factory at Nigara Falls of the McGlashan, Clark Co., is now in operation.

The Stair Mfg. Co., Dartmouth, N. S., has increased its capital to $1,000,000. Their skate business will be amalgamated with the Dartmouth Roller Mills industry.

Thos. Lang Moffat, founder of the Moffat Stove Company, Weston, Ont., died on February 19, aged 70 years.

McMaster's Hardware store at Ridgetown, Ont., was destroyed by fire February 14. The loss will be over $13,000, with only $7,000 insurance.

Fire did $60,000 damage to the lead and paint works of the James Robertson Company, Montreal, on February 15.

A. F. Armstrong, of Dimock & Armstrong, Hardware merchants, Windsor, N. S., was re-elected mayor of that city in the recent elections in Nova Scotia.

The United States Horse Shoe Company, Erie, Pa., which was recently incorporated as the Manitoba Rolling Mill Company, with a capital of $100,000, will operate the Kirkwood Rolling Mills, at Winnipeg, Man.

The Standard Paint Co., of Canada have commenced manufacturing at their new plant at Highlands, Montreal.

Oak Point, Man.—Retailers are determined to fight the credit system and they have signed a hard and fast agreement to sell only for cash for one year from March 1st. Each dealer has paid in $300 as a guarantee of good faith. For the first breach of the agreement the fine is $50, for the second $100, and for the third, $150. Fines are to be devoted to charitable purposes.

A. Burdette Lee, president of the old firm of Rice Lewis & Son, Toronto, died of pneumonia on February 25. Mr. Lee was only 45 years of age and his sudden death was a shock to the trade. His father, A. B. Lee, senior, died only three years ago and a brother, Victor, only two years ago. Mr. Lee, senior, was president of the firm for many years.

A permit has been granted to the A. J. Burton Saw Co., Vancouver, for the erection of a $3,000 addition to its plant.

The International Portland Cement Co. have decided to duplicate their plant at Hull. The new capacity will be 4,500 barrels.

The Canada Screw Co., Hamilton, has been incorporated, with a Dominion charter, and a capital of $2,500,000. The incorporators are C. A. Birge, C. Alexander, F. H. Witton, J. O. Callaghan, W. F. Coote, C. S. Wilcox and Hon. Wm. Gibson.

The Canadian Oil Co., Toronto, have extended their plant at Petrolia and are enlarging their works at Toronto.

SURE!

Lady Customer (in baker's shop to shopgirl)—Are these buns to-day's, because what I bought yesterday weren't.

REVIEW OF THE MARKETS.

WIRE NAILS: There is an abundantly strong demand for Wire Nails and the mills are receiving the full benefit of it, putting them weeks and weeks behind their orders with shortages arising from scant supply of raw material in the shape of steel, with the customary scarcity of cars, which is also usual about this time of the year. Some of the outside mills have no hesitation in charging 10 cents per keg advance on regular prices for early delivery, the market being a strong one and prices unchanged. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent, discount for cash in 10 days.

Carloads to jobbers	$2.00
Carloads lots to retailers	2.05

New York.—Local business is looking up to some extent, although it still keeps light in the demand, and conditions are without change. New York quotations are as previously quoted:

To retailers, carloads on dock	$2.19
Less than carloads on dock	2.33
Small lots at store	2.30

CUT NAILS: The mills are in no shape to make prompt deliveries, so there is but little improvement in conditions. To ensure any immediate supply from the mills or jobbers, premiums on regular prices are demanded and obtained with ease. Stocks are by no means complete as to assortment in the manufacturers' or jobbers' hands. Quotations are as follows, f. o. b. Pittsburgh:

Carload lots to Jobbers	$2.05
Less than carloads to Jobbers	2.10
Less than carloads to Retailers	2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—The weather conditions, if nothing else, would make the demand locally anything but a brisk one. The jobbers' prices are on the basis of $2.30 for small lots from store.

BARB WIRE: There is a demand sufficiently large to find the stocks badly broken both at the mills and in the jobbers' hands. The mills with an excess of orders find it difficult to deliver promptly, so that premiums of a slight advance are being asked for speedy delivery. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: Though the mills in effect are straining every nerve, the demand is as heavy as ever, and they are still behind in their shipments. The jobbers are urging deliveries on account of stocks running low, and trade is exacting from the demand made upon them. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.85
Retailers, carloads	1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

AXES: Quotations of manufacturers to the best trade are said to be from 25 to 50 cents higher that at the opening of the season. The strengthening of the market doubtless follows the accumulation of orders by producers approaching nearer to their industrial capacity.

STOVE AND SINK BOLTS: A revised price-list on Stove and Sink Bolts has been adopted by agreement of the manufacturers, the changes representing a decided advance on certain sizes. It is stated that the ruling discounts on these lines remain unchanged.

BINDER TWINE: Quotations by different manufacturers vary slightly on some grades of Twine, but the following prices fairly represent the market, Chicago delivery, with ¼cent less in carload lots:

	Cents per Pound.
Sisal	9½ to 9⅝
Standard	9½ to 9⅝
Standard Manila	10¾
Manila (600 ft.)	12¼
Pure Manila	13¾ to 14

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	13¼ to 13½
B Quality Manila	12¼ to 12½
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8½ to 8¾
No. 1 Jute, ¼ and larger	8½ to 9
No. 2 Jute, ¼ and larger	8 to 8½

Less ¼ cent to the large trade.

LINSEED OIL: The following prices are quoted on "City" Raw Oil by the Dean Linseed Oil Co:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil .....70 cents per gallon.

THE CLEVELAND TRADE.

It is reported that the large consumers have balked on the price of pig iron and it is a move in the right direction. Twenty-dollar price is better than twenty-five on the way to ten. The brains of the captains of industry used to promote their own interests will do an important public service by compelling a halt before consumers begin to wait for lower prices. Coal, iron, copper, silver and gold mines are great sources of wealth, but brains excel them all in value. We are learning to prevent disease by sanitation, and sanity should prevent panics. Yellow fever may be a divine instrument but its mission is to cure the cause that produces it.

Panics too, may have their mission by teaching us to diagnose economic symptoms. It is believed that some headway is being made along this line. Combinations are being talked of among farmers to advance the prices of wheat and cotton, but the spirit of the times is against schemes and devices to control prices. The natural growth of a nation can be traced in its attempts to penalize, laying tribute on the public by monopoly in food and clothing. Since foreign demand fixes the price of both, by what is paid for the surplus, it will be futile. The "combine" business is not prospering in Ohio. Manufacturers are behind in filling orders with little hope of improvement, but as most jobbers prepared for this, stocks are in fair condition and trade is excellent.

There is a feeling that railroads are being persecuted by being prosecuted for open violations of the law, but as a deterrent it is justifiable. The communistic idea that the rich are immune from punishment may be modified by righteous administration. The example of lawlessness was contagious and compelled many who saw no other way to meet competition to do as others did. Vigilant prosecution is the only remedy, but caution may be commendable to prevent punishment to cure becoming vengeance. Reformers sometimes fall into demagogery that no legal indictment can reach and befoul the country more than the crimes they claim to detect. It is better, however, to have the power to persecute in the hands of the government than in the hands of corporations.

THE PITTSBURGH TRADE.

The first week of March shows an advance over the corresponding week of 1906 in sale of Hardware. Winter weather delays the call for spring goods but helps dispose of winter stock. The principal demand as yet is from the supply stores of mining and coal companies, which are buying freely because their employees are all at work.

Prices are firmly held at the new rates quoted since January 1st. We hear of no weakening in any department and manufacturers seem to have no trouble keeping their works busy at present prices.

We hear of little complaint regarding slow collections in some parts of the country, but this is not more serious than is usual at this time of year. The outlook is encouraging for a good Spring business. LOGAN-GREGG HARDWARE CO.

PLUME AND ATWOOD MFG. CO.'S INCREASE OF CAPITAL.

Plume & Atwood Mfg. Co., Waterbury, Conn., have been authorized by the Committee on Incorporations of the Connecticut Legislature to increase their capital from $1,000,000 to $3,000,000. The directors of the company are authorized to increase the amount of capital from time to time, until the maximum amount permitted is reached. It is expected that action will be taken in the matter at a meeting of the company's stockholders at an early date. The company manufacture largely brass and copper goods, operating factories in both Waterbury and Thomaston, Conn.

OREGON RETAIL HARDWARE AND IMPLEMENT ASSOCIATION.

The second annual meeting of the Oregon Hardware and Implement Association was held at Portland on the 13th and 14th ult. The meeting was an interesting and important one, and was well attended. The convention re-elected their former officers for the ensuing year, as follows: H. J. Altnow, Woodburg, president; F. E. Chambers, Eugene, vice-president; H. J. Goff, Forest Grove, secretary, and Frank Dayton, Portland, treasurer.

USURY—BANK—NEW YORK LAW.

The Appellate Division of the Supreme Court for the First Department held, in the case of Schlesinger, Receiver, vs. Kelly, that the usury statute of New York has been repealed by implication as far as State banks are concerned, not only where the bank itself has been a direct participator in a usurious transaction, but also where it is an innocent holder in due course of paper which in the hands of private parties would be void for usury in its inception.

NOTE—HOLDER—TRUSTEE—ALTERATION.

One subsection of the Virginia code provides that a holder in due course is one who takes a negotiable instrument when it is complete and regular on its face before maturity for value and without notice of any infirmity. Another subsection immediately following expressly provides that the holder of an instrument payable on demand negotiated an unreasonable length of time after maturity shall not be regarded as a holder in due course. The Supreme Court of Appeals of Virginia held, in the case of Trustees of American Bank of Orange vs. McComb, that as only one class was excepted by the class of bona fide holders under the second subsection, a trustee under a deed of trust for creditors was a holder in due course. In this case the defendant contended that the insertion of the words "payable with interest" constituted a material alteration. The note was partly written and partly printed, and the words in question were in the same handwriting as other written portions and were not interlined, but written on a blank space after the words "value received." The court held that the note was "complete and regular" within the meaning of the subsection defining a holder in due course.

EMPLOYER'S LIABILITY—DEFECT—REPAIR.

In the case of Andrecsik vs. The New Jersey Tube Company, decided by the New Jersey Court of Errors and Appeals, it appeared that the plaintiff in error, an employee of the defendant company, complained to the superintendent at ten o'clock in the forenoon that the machine upon which he was working was out of order. The defect was an obvious one. The superintendent said: "You go ahead with the work; we are overloaded with work, and noon hour I will fix this for you." The repair was not made at the noon hour. Nevertheless, the plaintiff resumed work upon the obviously defective machine and at three o'clock was injured by reason of the defect complained of. The court, in affirming a judgment against the plaintiff in error, held that he was properly nonsuited. The court said that the employee assumes not only the ordinary risks incidental to employment, but also all risks arising and becoming known to him during his service, but that the employer, by promising to amend the defect complained of as an inducement to the employee to continue, forthwith takes the risk from the employee and assumes it during the period for repair. Where, however, the agreement to repair is not indefinite but specific as to the time of its performance, if the promise is not performed within the time specified for its fulfillment, and the employee continues in the employment after a manifest breach of the employer's promise to repair, the assumption of risk by the employer ceases, and the employee reassumes the risk of subsequent injuries therefrom. The court held that in the case before it the promise to repair was definite and specific as to the time of performance, and that there was therefore no question for the jury as to a reasonable time for performance.

OHIO HARDWARE ASSOCIATION.

(Concluded from page 33.)

Every other interest seems to have enjoyed a larger degree of prosperity than the retail merchant. This is not as it should be. A country to be truly prosperous should see to it that all its interests are prosperous. Assist in educating your customers in building up their home towns. Endeavor to show them that you can serve them better than catalogue houses possibly can. Write your Member of Congress upon any question pertaining to your interests. One letter is worth more than a lengthy petition. Speak to your members of our State Legislature on State matters? Converse freely with our friends, the traveling men.

Frank A. Bare then presented his

SECRETARY'S REPORT,

from which we quote as follows:

There are many reasons why the Hardware merchants of Ohio are more thoroughly interested in association work now than ever before. Every officer of the Association has worked faithfully during the entire year. A great many Ohio Hardwaremen are deeply interested in the Association cause and willingly contribute to pushing the work during the entire year. The secretary has a list of workers to whom he appeals quite frequently, and the results have been very satisfactory. The traveling men have, as usual, been very loyal to us and have done much toward creating association enthusiasm.

CORRESPONDENCE.

There has been somewhat of a continuous performance as to letters since January 1. A large number of letters were written immediately after the Canton convention, and at intervals since, but from January 1 we have endeavored to impress upon the Hardware merchants of Ohio the fact that there would be a convention and exhibit held in Columbus, February 26 to 28.

The secretary has on his list the names of 500 traveling men who call on Ohio Hardware merchants. A letter has been sent to each of these traveling men every week since January 1. These gentlemen have done much to increase our membership by telling about the advantages of the Columbus convention. Some of the new members have given this as a direct reason for their deciding to send in an application for membership. A number of circular letters have been sent out to non-members setting forth the advantages of being a member of our organization.

In addition to this a large number of members have been asked to write to non-members in certain portions of the State, urging them to join us. The secretary has great faith in personal letters, and believes that the letters written by members to non-members have brought satisfactory results.

LEGISLATION.

The associations of the United States are doing much to prohibit adverse legislation. The Committee on Post Office and Post Roads did not report a single measure favoring catalogue house legislation. The catalogue houses sought to have an experimental Parcels Post established. They also tried to have third and fourth-class mail matter combined with a rate of eight cents a pound. An attempt was also made by them to enact a law that would make it easier to remit through the mails. One of the strongest influences brought to bear against such legislation was the opposition of the Hardware merchants of the United States through their respective associations and the National associations. The Ohio Hardware merchants were very loyal in entering protests with their Congressmen and United States Senators. Hundreds of protests were sent by merchants of this State to members of the Committee on Post Office and Post Roads.

OTHER REPORTS.

When called for at the proper time Treasurer C. C. Fouts, Middletown, and Financial Secretary A. L. Shearer rendered satisfactory reports, which were duly attested by the Auditing Committee.

An extended report for the Grievance Committee was read by W. B. Martin, Mansfield, who outlined in detail a number of cases which had been filed for the attention of the committee.

INSURANCE COMPANY'S ANNUAL MEETING.

The annual meeting of the stockholders of the Ohio Hardware Dealers' Mutual Fire Insurance Company was held Thursday, February 28. President J. P. Duffey, Greenville, called the meeting to order, and a temporary chairman and secretary were elected. The annual report of Secretary-Treasurer George M. Gray, Coshocton, was read and approved. It showed the company, which now insures residences as well as business property, to be in satisfactory financial condition.

C. B. Kyle, president of the West Virginia Retail Hardware Dealers' Association, addressed the convention in a few remarks. George P. Griffith, representative of the Michigan Retail Hardware Dealers' Association, spoke briefly, referring especially to the lightning-rod trade, in the course of which he said that this is beginning to prove a profitable line for the Hardwaremen of his State to take up, and recommended that the dealers give it attention. He said that in the State of Michigan the Hardware dealers would clean up $150,000 this year in the lightning-rod business.

E. M. Bush, Evansville, president of the National Retail Hardware Association, was then introduced by President Johnson. He was received with great applause. In the course of his remarks Mr. Bush said:

ADDRESS OF E. M. BUSH.

It is not your desire to hear, nor my intention to give to you, today, a talk on any but National Association topics, and I will refer to only a few of them, as your Programme Committee has arranged for the discussion of such a variety of important subjects and planned such interesting business sessions that my words could well be dispensed with. However, before going on with these National topics, I am prompted to

COMMEND THE EFFICIENT WORK OF YOUR STATE OFFICIALS

as evidenced by this large attendance and the intense interest manifested by every one here.

Our manufacturing and jobbing friends, judging by their numbers and their magnificent displays, are of the opinion that it is advantageous to them, as we know it is for ourselves, that they mix with this wide-awake, broad-gauged, enthusiastic assemblage of Hardware merchants and exhibit here their wares. One of the best features of this Association movement is this educational exhibit and this opportunity of fraternizing afforded manufacturer, jobber and retailer. Sales effected at the convention, itself, are perhaps not over great, but salesmen all testify that sales are more easily made among the trade after these conventions, especially in the introduction of new and improved articles.

THE SOUTH DAKOTA SUIT.

You probably have read Judge Carland's decision in the case of Montgomery, Ward & Co., against the South Dakota Retail Merchants' Association. This judge evidently believes that retail interests have some rights which mail order houses must respect. Though this decision is all in the retailer's favor, I recommend, still, methods of persuasion and reason rather than the use of the "big stick."

Knowing the manufacturers in our line of business to be broad-minded, just and honorable, when they understand and fully comprehend the situation in which the retailer has found himself, I believe they will cheerfully assist in remedying present trade conditions, of which the retailer has had the "hot end" for some years past. By Judge Carland's decision, there is a remedy to which appeal could be made as the last resort.

THE JOINT COMMITTEE.

The Wholesale and Retail Hardware Joint Committee held two meetings during the last year—one in Cleveland in June, and the other at Atlantic City in October. As a member of that committee it becomes me to be exceedingly modest in claims made for what it has accomplished. I believe, however, you will agree that the committee has done a lasting work, sure to be of great value to the wholesale and retail trade of the country.

Manufacturers and jobbers no longer ask, "What is a Catalogue House?" Over 600 Hardware manufacturers have agreed not to sell to these houses. Few now are the standard brands found in their catalogues, and with rare exceptions, most of them are so priced as to afford us a better profit in meeting their prices than formerly. I refer any who take issue with me regarding this, to the catalogues of the large Chicago houses published in the early part of 1903 and previous to that date. The Joint Committee has done good work, and its up to the merchant now to help himself by having an attractive, well assorted stock, well displayed and properly priced—the merits of his goods so thoroughly understood, and offered to his trade in such persuasive manner that customers cannot resist buying.

MUTUAL INSURANCE.

I suggest for your favorable consideration and patronage the National, Minnesota, Iowa, Wisconsin and Nebraska Mutual Hardware Fire Insurance Companies: your own insurance company needs no commendation from me, every one of them returning to you a very substantial proportion of your yearly premium—25 to 45 per cent.—proving economical and safe management. All these insurance companies are officered by successful and honest business men. Every claim is promptly settled and fully paid. Never has there been a charge of unfairness or injustice done in any settlement. As much cannot be said of all fire insurance companies. I believe much of the credit for the strength of our various State Associations are due to our mutuals.

THE QUESTION BOX.

M. L. Corey, the National Secretary, then took the platform to conduct the Question Box, among which were the following subjects:

1. Misleading Mail Order Advertisements in the So-called Religious and Fraternal Papers.
2. Selling for Cash and Following Up Collections.
3. Would It Be Better to Hold Our Meetings One Month Earlier?
4. Allied Lines.
5. How Can a Firm Make Money During the Dull Months—January and February?
6. How Can Manufacturers Best Assist Merchants to Sell Goods?
7. Badly Packed Shipments.
8. Recovering From Railroad Companies for Damaged Freight Shipments.
9. Handling Lightning Rods.
10. Net Prices vs. List and Discount.
11. Advertising a Retail Business.

The convention then adjourned until Thursday afternoon at 1:30.

OFFICERS FOR 1907.

On recommendation of the Nominating Committee the leading officers were all re-elected for the ensuing year. Four new names, however, were added to the Executive Committee to fill vacancies. The roster stands as follows:

PRESIDENT, C. S. Johnson, Barberton.
VICE-PRESIDENT, Frank W. Ingalls, Bryan.
FINANCIAL SECRETARY, A. L. Shearer, Dayton.
TREASURER, C. C. Fouts, Middletown.
SECRETARY, Frank A. Bare, Mansfield.
EXECUTIVE COMMITTEE (to fill vacancies): James McVicker, Jackson; D. O. Thompson, Cambridge; Mr. Marquardt, Shunk-Marquardt Hardware Company, Toledo; I. L. Loomis, Cuyahoga Falls.
DELEGATES TO NATIONAL CONVENTION: Frank A. Bare, Mansfield; John F. Baker, Dayton; W. P. Bogardus, Mt. Vernon.

Arrangements for entertainment of the members included the following: On Tuesday evening the members of the Association and their ladies were entertained at the High Street Theatre by the performance of the musical comedy "Wonderland." The whole house had been bought up for the occcasion, and the Hardwaremen thoroughly appreciated the event, the performance being a very enjoyable one. On Wednesday evening a complimentary minstrel concert was tendered to the Association by the jobbers and manufacturers of the city of Columbus in the Board of Trade Auditorium. The Euterpean Ladies' Chorus furnished the programme, and the attendance was large. The concert was a great success and thoroughly enjoyed. The visiting ladies under the escort of a committee of Columbus ladies were entertained at a matinee at Keith's Theatre on Wednesday afternoon.

In addition to the usual complimentary resolutions, the committee reported a number of others which were adopted:

PRESIDENT'S TERM RESTRICTED TO ONE YEAR.

The following special resolution was presented and passed:

Resolved, That from the date of this meeting of the Ohio Hardware Association, ending February 28, 1907, the official head, viz., the president of this Association, be elected for a term of service of one year as heretofore, but that said term be not extended into a second year of service as following the initial one.

COLUMBUS THE NEXT MEETING.

It was recognized early in the week that the facilities of Columbus are exceptional for accommodating a big convention and Hardware Show, while there is an added advantage in its fairly central location. Sentiment in favor of returning to the capital city next year steadily grew and when the motion was made at the closing session there was not a dissenting voice.

The majority of the jobbers who cover Ohio were represented at the convention, some of them by large delegations. Columbus Hardware Company occupied parlors at the Southern; Smith Bros. Hardware Company had a booth at the Hardware Show, and O. L. Davis of the company was the hard working chairman of the local Entertainment Committee. Toledo was represented by Standart-Simmons Hardware Company, whose exhibit is described elsewhere; Bostwick Braun Company, represented by M. H. Nusbaum, H. M. Kelsey, G. W. Corlett, George H. Floyd, H. A. Nusbaum, E. R. Hartman, W. J. Oberlin, Al. Allmendinger, A. E. Mantz, Fred. Rath, J. C. Peregoy, William Greiner, William Gano and F. W. Cox, and Stollberg Hardware Company, represented by Day Gordon, John Mandler and E. C. White. From Cleveland there were representatives of McIntosh Hardware Corporation, who entertained in a suite at the Southern; J. M. & L. A. Osborn Company, who had similar headquarters; W. Bingham Company, and George Worthington Company. Bindley Hardware Company, Pittsburgh, was represented by W. C. Clydesdale, L. F. Stoneburner and D. B. Baker; Logan-Gregg Hardware Company, Pittsburgh, by W. H. Parke and W. E. Alter, who distributed a dating stamp as a souvenir. Representatives of Hibbard, Spencer, Bartlett & Co. entertained at their headquarters at the Neil House.

MINNESOTA RETAIL HARDWARE ASSOCIATION

The Eleventh Annual Convention of the Minnesota Retail Hardware Association was held at St. Paul February 26, 27, 28 and March 1, the sessions being held at the Knights of Columbus Hall, while the headquarters of the convention were at the Ryan Hotel. Considerable space was devoted in the Ryan Hotel to the numerous Hardware exhibits which formed quite a feature of the convention, attracting numerous visitors as well as members of the Association.

TUESDAY SESSION.

The opening session was called to order by President Julius Schmidt, of Wabasha, at 2 P. M. After attending to some affairs of a preliminary character, the president appointed the following committees:

CONVENTION COMMITTEES.

RECEPTION: H. R. Schroeder, W. H. Tomlinson, George Schwirtz, B. F. Kernkamp, H. O. Roberts, J. H. Smith.
LEGISLATIVE: A. T. Stebbins, J. F. McGuire, Zeb Zimmerman.
PRESS: A. C. Hatch, J. F. McGuire, H. M. Clark.
GRIEVANCE: F. H. Retzlaff, Theo. Lystad, W. S. Davis.
RESOLUTIONS: D. H. Evans, W. B. Marr, Clem Schroeder.
AUDITING: F. Hunt, Jr., Thos. Callaghan, R. H. DeGroodt.
NOMINATIONS: A. T. Stebbins, H. M. Clark, W. H. Tomlinson, A. Marzolf, Anton Ebe, O. F. Olson, C. J. Stark, A. C. Hatch.

PRESIDENT'S ANNUAL ADDRESS.

The president then delivered his annual address, which in part was as follows:

Gentlemen: It is a great pleasure to me to welcome you to this our eleventh annual convention under such progressive and prosperous conditions as exist in our great State Association of Minnesota to-day. When we look back at the old year of 1906, with its earthquakes, floods, fire, railroad wrecks and other calamities which go to destroy life and property, we can congratulate ourselves that we live in such a lucky State as Minnesota, having escaped all the above calamities.

WE ARE STILL FACING SOME OF OUR OLD ENEMIES

in the business world. Some of them are still doing business at the old stand. But do not despair. Our Association work is having its effect. These large corporations are feeling it on every side; in some localities they have attacked small retail dealers, have made a personal fight, using every method that was dishonorable to hurt their trade. In South Dakota they have sued the Retail Merchants and Hardware Dealers' Association. But we have all heard Judge Carland's decision. The South Dakota Association got first blood. Let us congratulate the South Dakota Association for its success. Let us encourage them with our support in this fight for the retailer's rights.

They have also attacked our National Retail Hardware Association, started in as if they were going to rip the association to pieces. But when they found that the National Association

WAS BACKED BY ALL THE STATE ASSOCIATIONS,

and the State Associations by good, law-abiding, and loyal American citizens, as all Hardware retailers are, they have modified their attack. Gentlemen, your loyalty was shown and proven by the prompt and liberal response you made, when the call on you was made for help to create a defense fund, for which I kindly thank you. It was a great pleasure for me to report such a liberal amount to our National Association.

* * * *

This is a question which we must still watch with eager eyes. It has not yet become a law, but our enemies are always on the alert, so we will have to watch each movement and head off any action which may help the same from becoming a law. I would recommend the co-operation with other State Associations, such as the grocers, furniture dealers, and implement dealers, on such questions as legislation, taxation, collection of bad accounts, parcels post, freight rates and passenger rates.

This subject has been talked over more than any other question by dealers privately, in meetings of committees and in assemblies. But we have not yet found the right solution. Those of you who handle stoves have found before this that

A GREAT CHANGE HAS TAKEN PLACE

in regard to buying and selling stoves and meeting catalogue houses or manufacturers that sell direct to consumers.

Our old stove manufacturers with trade-marks tell us to talk quality, and then every so often they advance the price five per cent. The catalogue house comes with a decline in price, doubling that of the advance of the trade-mark manufacturer. So here you are, and what are you going to do about it. You meet the catalogue price, you will be money out.

The more losing business we do, the sooner we are at the end of our business rope.

The manufacturer offers us no relief or assistance, so it is up to us to get out of the stove business or try some other method of buying stoves, so that we can get a reasonable profit. It has been suggested that we try co-operative buying. As an experiment, let fifteen or twenty members of our Association along the same line of railroad, estimate their wants, and order from some manufacturer that will make the price.

This quality, patriotic talk of patronizing home merchants, does not have the effect. Sentiment does not go any more. You can talk and talk until you become black in the face. If you cannot meet catalogue house prices, you cannot sell the stoves. I speak from personal experience and from the experience of other old stove dealers with whom I have come in contact. Something must be done or the stove business will be taken from the retailer and go to the manufacturer who sells to the consumer direct.

SECRETARY'S REPORT.

After the president's address, Secretary M. S. Mathews of Minneapolis, read his annual report, which was in part as follows:

In presenting the usual report to this, the eleventh annual convention of the Minnesota Retail Hardware Association, it is very pleasant to be able to call your attention to the continued prosperity of and increase in membership of this organization. For four years, by virtue of Minnesota having the largest number of members enrolled, we have headed the list of Hardware Associations in the country. During the past year, however, Illinois has forged to the front with a membership now exceeding one thousand. This rapid growth in our neighboring State was largely owing to the effective work of the insurance solicitors employed by the Minnesota Insurance Company, and the obligation was very gracefully acknowledged in the Illinois resolutions at the convention held in Chicago a few days ago. The rapid growth of the older associations has proved to be an excellent stimulant to Hardware merchants in other States, and each year finds new State standing with us in the movement; all affiliating with the National Association and approximately ten thousand firms now enrolled.

The past year has not been all sunshine, for early in the Summer certain suits instituted against our National officers caused an appeal from them for financial assistance, to which prompt and liberal response was made by the said organizations all along the line.

* * * *

Shortly before the September meeting the secretary mailed forty-five letters to possible exhibitors at our convention, asking for a vote as to favoring a hall for exhibition purposes, controlled by the Association, or hotel exhibits, as is the present way of doing. Sixty-five per cent. of those whose judgment was sought, preferred to have the exhibits controlled by the Association. It is probable that before the next convention, plans will be adopted for carrying out this desire upon the part of exhibitors.

The financial statement made by the secretary showed receipts for the fiscal year of $2,748.04. Disbursements, $2,027.48, leaving a balance in the treasury of $720.56.

ORGANIZATION OF RETAILERS.

J. J. Ryan, secretary of the Minnesota Retail Grocers' and General Merchants' Association, delivered an address on "Organization of Retailers." He compared the relationship existing between merchants in country towns and cities to-day with the selfish policy of years gone by, saying that to-day merchants look upon each other with confidence, and aid and assist one another. Mr. Ryan's address was remarkably well received, and proved very interesting.

A. T. Stebbins, of Rochester, had charge of the Question Box, and invited the members to contribute. The following questions were asked through the Question Box and discussed by the members:

A. T. Stebbins himself answered all questions which stumped the other delegates. In addition to the questions already quoted these were asked:

Are present stove prices too high?
Does it pay to borrow money to discount bills?
How should we meet bargain and racket store competition?
Has anyone insured his book accounts and is it profitable?
How can retailers use the rural telephone at a profit?
Is it possible for the country dealer to sell stoves like the city stores on the installment plan of so much down and so much a week?
Should local merchants organize an association for the purpose of posting customers who do not pay their bills?
Does anyone weigh goods to check his freight bills and are they often found wanting?
What can be done when a manufacturer sells to a railway company and a railway company sells to its employees direct?
Does it pay to take old stoves in part payment for new ones?
Does it pay to make presents to customers?
Is it good policy to consult clerks when you mark goods?

ENTERTAINMENT.

On Tuesday evening the members were entertained by a "Smoker" at the Knights of Columbus Hall. There was a large attendance, and the occasion was rendered very enjoyable through the efforts of the Entertainment Committee. The chairman of the evening was J. F. McGuire, of St. Paul, and Snyder's Orchestra furnished the music. George T. Redington made a speech of welcome on behalf of St. Paul, which brought out an interesting response by A. T. Stebbins. State Senator S. D. Works spoke on "Trade Problems" and E. W. Randall on the forthcoming local semi-centennial exposition. Hon. D. W. Lawlor closed the speech-making of the evening by an address on "Minnesota."

WEDNESDAY SESSION.

When President Schmidt called the convention to order there were over 500 delegates present. The first speaker of the afternoon was Amos Marckel, of Perham, whose address on

HOW TO RUN A COUNTRY HARDWARE STORE

was in part as follows:

How should a country Hardware store be managed in order to get the best results, make the most money out of our capital invested, and hold the trade? I believe we get the best results by selling good goods at a reasonable price.

GET AWAY FROM YOUR HIGH PRICES,

such as you charged when the country was new. Remember we are living a progressive age, and the customer who comes in to your store is well posted as to the description and value of the articles he wishes to buy. I believe our high prices are responsible to a large extent for the catalogue house's prosperous condition to-day. Place yourself in the position of your customer. There are not many of us who want to buy our goods in New York; we prefer to buy nearer home if we can do as well or nearly so. My customer also prefers to buy at home, but objects to being held up.

The same thing applies to many of our jobbers, who fail to realize that

WE ARE LIVING IN AN AGE OF LOWER RETAIL PRICES.

They fail to recognize the fact that the farmer is well posted on prices, and we therefore often find our jobbers charging us more for goods than the catalogue houses quote them to the farmer. The time is here, Mr. Jobber, for you to act and assist the merchant in his fight with the catalogue houses. The catalogue house selects such goods as the jobbers have an arbitrary price on, and uses them for leaders. Take, for example, Hay Carriers, Pulleys, Hangers, Forks, etc.; the jobber charges us $3.50 for a common carrier, while the catalogue house names a price of $2.75 to the farmer. How can we dealers be expected to hold the Hay Carrier business under these circumstances? It may be claimed that the carrier offered at the low price to the farmer is an inferior one. But if you will read the description as given the farmer you will believe with him that there is no better carrier to be had. Again I say we are living in an age of low retail prices, and it is up to the jobbers to see that the merchant can get his goods at a price that will enable him to meet competition, and still earn a small margin of profit.

This is also an age of travel. Your customer gets away from home; he visits nice, clean, up-to-date stores; it is time, therefore, that we clean up our stores and get them in as nice shape as conditions will permit. There is no good reason why the Hardware store of to-day

SHOULD HAVE THE APPEARANCE OF A JUNK SHOP.

Don't be afraid of your goods rusting by having the floor scrubbed; they will not rust, for I have tried it. During spare moments take the goods from off the shelf, dust them up nicely and rearrange them so they will present a fresh appearance. We are not all able to move

Digitized by Google

our goods every thirty or sixty days, but are all able to keep the goods clean and sell them as the trade demands. If a customer comes into your store and asks for a Bread Raiser, and you get it from off the top shelf all covered with dust, it is likely to create the idea that you are high priced; that you do not buy goods enough to get a price that will enable you to sell at an up-to-date figure. In consequence the catalogue house again gets a share of your business, because you have not kept your store clean and up-to-date in appearance.

Following Mr. Marckel, S. Ziesler, of Chicago, spoke at considerable length in support of a paint law that will make it necessary to label all paints, pointing out some of the defects of the North Dakota measure, and pleading for a universal label that should be honest in its intentions. His speech was referred to the Legislative Committee.

I. A. Fleming, editor of *The Hardware Trade*, of Minneapolis, then addressed the convention in a short speech, in which he complimented the business men as developers of the country, charitable men and men on the outskirts of civilization upholding the country. He urged them to have confidence in each other, and to be square with themselves and each other. His remarks were interspersed with a few stories.

John Costello, of Kellogg, was the next speaker, and discussed the subject of

CASH VS. CREDIT.

Mr. Costello is one of the radical advocates of cash. He it was that inaugurated the Wabasha plan.

O. B. James, of Richland Centre, Wis., addressed the convention on "Advertising," illustrating the talk with many samples of his advertising methods.

THURSDAY SESSION.

MUTUAL FIRE INSURANCE.

The meeting on Thursday was largely given to the consideration of matters relating to fire insurance. It was shown by the secretary's insurance report that the Minnesota Hardware Dealers' Insurance Company now has $4,763,473 of insurance in force, and cash and negotiable assets in the treasury amounting to $97,466.75. The average loss ratio for the seven years of the company's existence has been 29 per cent., and that of expense 12 per cent.

Referring to the effect of insurance on credits it was stated that the leading wholesale merchants are requiring their field men to see that customers carry an adequate amount of insurance in solvent companies to protect their credit.

Hon. Thomas D. O'Brien, Insurance Commissioner of Minnesota, was next on the programme with an address on

INSURANCE.

Safety in insurance, he declared, lies chiefly in economical management. Nearly all companies collect enough money to pay losses, but the fault too often is found to be prodigality in expenditure. The great evil in insurance, as pointed out by the speaker, is a lack of community of interest between policyholders and the management. The Hardware Dealers' Insurance companies were commended as a safe and successful example of mutual fire insurance.

NEW OFFICERS.

On submission of the Nominating Committee's report the secretary was, on motion, ordered to cast the convention's unanimous ballot for the following officers, who were declared elected:

PRESIDENT, Julius Schmidt, Wabasha.
VICE-PRESIDENT, Amos Marckel, Perham.
SECRETARY, M. S. Mathews, Boston Block, Minneapolis.
TREASURER, H. H. Heydon, Chatfield.

E. H. Heins, Renville; N. T. Hauser, Franklin, and H. Smith, Minneapolis, were elected as members of the Executive Committee to fill the place of three retiring members.

Delegates chosen by the Executive Committee to represent the Association at the next annual meeting of the National Association, to be held in Boston, were as follows: Charles F. Ladner, J. F. McGuire, M. S. Mathews, Julius Schmidt, W. H. Tomlinson, Amos Marckel, E. H. Heins and H. Hauser.

FRIDAY SESSION.

The members of the Association held an executive session immediately on the opening of the afternoon session. Minneapolis was selected as the 1908 convention city, and the convention adjourned *sine die*.

♣

A Western paragraph writer says: "In a recent raid on a gambling den a man named Pizymuszallaskivich managed to escape. It is supposed he hung his name out of the window and slid down." Most people would rather try sliding down a good piece of barbed wire.

If every Congressman would find just one place where the government was being overcharged, as Victor Murdock did in the matter of the railroads carrying mail, and would use every effort to make public and correct the evil, we could afford to allow them to vote themselves another increase in salary. That is the kind of work private corporations pay so well for, and which our government needs so badly. Congressmen who realize they are sent to Washington for other purposes than finding a fresh government teat for themselves and friends to milk should be of great value to this country.

Medical Student—What did you operate on that man for?
Eminent Surgeon—Five hundred dollars.
"I mean, what did he have?"
"Five hundred dollars."—*Puck*.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED FEBRUARY 18, 1907.

421,407. MOLDING-PLANE. Richard Kreinberg, Jersey City, N. J.
421,420. JAWS OF BIT BRACES AND TOOL HOLDERS. William H. McCoy, Erving, Mass.
421,443. HOSE-WRENCH. John S. Smades, Springfield, Mo.
421,552. LIFTING-JACK. James B. Cleveland, and Arthur Cleveland, Lyons Farms, N. J.
421,598. PLIERS. Joseph Monto, Chelsea, Mass.

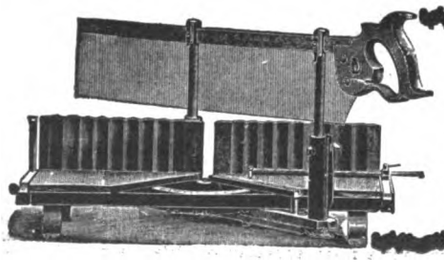
PATENTS ISSUED FEBRUARY 19, 1907.

844,412. PADLOCK. Frederick W. Schroeder, London, Eng.
844,414. HEDGE-TRIMMER. Peter F. Seabloom, Ormond, Fla.
844,421. FLEXIBLE STAY-BOLT. Benjamin E. D. Stafford, Pittsburgh, Pa.
844,422. NUT-LOCK. Arthur L. Strout, Bar Harbor, Me.
844,473. SOLDERING-IRON. William F. Ryan, Cincinnati, Ohio.
844,638. SAD-IRON. Alonzo A. Warner, New Britain, Conn.
844,656. WEATHER-STRIP. Frank J. Boehler, Republic, Ohio.
844,766. WASHING-MACHINE. William W. Allen, Dobbs Ferry, N. Y.

PATENTS EXPIRED FEBRUARY 25, 1907.

421,896. MACHINE FOR HOLDING AND SHARPENING INSERTIBLE SAW TEETH. H. Bergstrom, Big Wausaukee, Wis.
421,892. PIPE WRENCH. A. J. Barber and H. A. Tripp, Sodus, N. Y.
421,898. WASHING MACHINE. C. Bopp, Mount Joy, Pa.
421,966. PADLOCK. J. S. Peacock, Lancaster, Pa.
421,977. LOCK. J. Schade, Brooklyn, N. Y.
422,014. LIFTING JACK. C. P. Emerson, Yates Center, Kan.
422,026. STOVE. G. Marlow, Chicago, Ill.
422,144. WASHING MACHINE. L. J. Montgomery and C. P. Townsend, Broken Bow, Neb.

PATENTS ISSUED FEBRUARY 26, 1907.



845,173. HAND SAW JOINTER. Alpheus P. Hall, Graysville, Ill.
845,187. WRENCH. James MacLean, Boston, Mass.
845,206. DOOR HANGER AND TRACK THEREFOR. Otto F. Stoneburner, Zanesville, Ohio.
845,233. PICK. Frank S. Harrington, Newburgh, N. Y.
845,250. NUT LOCK. Evelyn M. Newman, Evanston, Ill.
845,265. AUTOMATIC AIR BRAKE COUPLING FOR RAILWAY CARS. Frank H. Rutherford, Chicago, Ill.
845,296. SAD IRON. William F. Fisher, New Britain, Conn.
845,318. VEGETABLE PEELING MACHINE. Joseph Redmond, New York, N. Y.
845,421. ICE CREAM DIPPER. Nick W. Kline, Longbeach, Cal.
845,667. ICE CREAM FREEZER. Albert F. Schmand, Bridgeport, Conn.

HARD GENUINE BABBITT.

As made by the inventor, Isaac Babbitt, genuine babbitt metal was a soft mixture and was really nothing but pewter. The mixture which he used was composed of 50 parts of tin, 5 parts of antimony and 1 part of copper. This mixture, while suitable for many uses, utterly fails to meet the requirements of others. Even the so-called standard mixture of the present time, which consists of 96 parts of tin, 8 parts of antimony, and 4 parts copper does not always serve the purpose.

A hard genuine babbitt which will give the best service that is possible to obtain, except in cases of severe pounding, is made of the following: Tin, 100 lbs.; antimony, 8 lbs.; copper, 8 lbs.

This mixture will stand hammering into the recess of the box and will wear without cracking.—*Brass World*.

GOODELL MITRE BOX

Made entirely of steel. No more breaking. Its quality, durability and improvements make it the most desirable box on the market.

Send for circular and prices. GOODELL MFG. CO., Greenfield, Mass.

INDIANA RETAIL HARDWARE ASSOCIATION

The Eighth Annual Convention of the Indiana Retail Hardware Association was held at Indianapolis on February 20, 21 and 22. There were present nearly 2,000 men connected with the trade, but the way the convention was handled left little to be desired. With a membership of between 600 and 700, the representation of the Association was a full one. The place of the meeting was in the largest room afforded in the Denison Hotel, which was crowded to overflowing at all sessions. The Hardware Show in connection with the convention occupied a hall some two blocks from the hotel, and was undoubtedly the finest that has been held in connection with any retail convention. Want of space in our columns prevents any detailed description of the elaborate and handsome booths that deserve a more complete recognition.

PRESIDENT'S ADDRESS.

The annual address of President Frame, delivered at the evening session, Tuesday afternoon, was in part as follows:

Our annual conventions have taken on the air of Hardware exhibitions. Your officers are pleased that their efforts in this line enable us to see and examine all the new things in Hardware and kindred lines. These exhibitions are great schools for us. Manufacturers and jobbers are represented here by beautiful displays of their goods and have men in charge who are the best of fellows—experts in their lines. You cannot talk with one of these men without learning something that will do you good. Let us spend as much time as we can among these exhibits and we will profit by it.

EX-PRESIDENT E. M. BUSH,
President National Retail Hardware Assn.

These prosperous times have increased the value of merchandise all along the line. Many of us have in our stores goods that were bought at less than they could be bought to-day. Let us not fail to take advantage of these market conditions and

MAKE OUR SELLING PRICES CONFORM TO WHAT THE GOODS WOULD COST

at the present time. It is easy money and it belongs to us; why not get it? We should follow the markets just as promptly as our jobbing friends, who do not wait until they buy again to change their selling prices, as so many of us are in the habit of doing.

Let us take advantage of these good times to educate our customers to settlement of their accounts at frequent intervals. Those of us who do business in smaller towns and have farmer customers are in the habit of letting our goods go out on charge accounts

WITH NO SPECIFIED TIME FOR PAYMENT.

Frequently these accounts run too long, and how often have we been compelled to lose discounts because our customer was not ready to settle with us when we needed the money? I believe this can be remedied by having your trade understand that a limited time only is given on charge accounts; say sixty days as the extreme limit, and insist upon a settlement at that time.

Tendencies are toward a nearer cash business, and we can all help toward that end if we will. You don't want a man's business if it is not profitable, and how many times have we sold goods on credit and waited so long for our money that the interest on the account was as much as our profit?

OUR GREATEST COMPETITORS GET THE MONEY IN ADVANCE,

and at the price we must sell our goods to meet their competition it is necessary that we get our money at the time of the sale, or within a stated period.

Our competitors are of many kinds, from the lumbermen who keep Builders' Hardware as a means of selling their lumber, to the racket store which buys a few staples in Hardware and sells them at a very low price to advertise his notions and other goods. To meet these conditions, which in no two towns are alike, I think

EVERYONE MUST WORK OUT HIS OWN SALVATION,

as the conditions that exist in your town are entirely different from what they are in others. You will pardon me if I get a little personal to illustrate what I mean by telling you how I do in my own business. In the first place, how could you expect a man to pay you more for an article than he could get it for over on the other street?

DISTINGUISHED GUESTS.

Representatives of three other State associations were present; C. F. Ladner, St. Cloud, representing the Minnesota Association; H. L. McNamara, Janesville, representing the Wisconsin Association, and S. R. Miles, Mason City, from the Iowa body. All three of the gentlemen are officers in their respective State Mutual Insurance Companies, and made informal addresses on this subject at the opening session. The gentlemen mentioned were again introduced at the executive session Wednesday, and responded briefly, Mr. Miles referring especially to matters relating to the National Association, of which he is first vice-president.

ADDRESS OF E. M. BUSH.

E. M. Bush, Evansville, ex-president of the Indiana Association and now president of the National Retail Hardware Association, delivered an address marked by characteristic comprehensiveness, clearness and force. Mr. Bush has from the start been identified with the joint Catalogue House Committee, and is at present its acting chairman. His remarks referred to various topics now commanding the interest of the trade.

CONVENTION COMMITTEES.

The following committees were appointed by President Frame and rendered efficient service. Their reports were carefully prepared and were given promptly when called for at the closing session of the convention:

LEGISLATION: Mr. Reichenbaugh, N. R. Stoner, Irving Reid, T. J. Lindley, W. H. Bruger, E. Anderson, E. B. Schenk.

RESOLUTIONS: James L. Fulton, Fred W. Batholomew, A. J. Baerteck, R. E. Horner.

GRIEVANCE: M. L. Lewis, N. H. Strong, A. H. Burkett.

AUDITING: John Steineck, W. H. Hatfield, George Weisland.

NOMINATING: M. M. Hamilton, M. W. Coates, Wm. A. Shipley.

THE OFFICERS FOR 1907.

In connection with the report of the Nominating Committee, a resolution was presented and passed increasing the salary of the secretary to $600 per year; $200 additional remuneration was voted to the secretary for his services during the past year. It was also decided, on recommendation of Mr. Corey, to divorce the offices of secretary and treasurer, inasmuch as the latter office is becoming one of increased responsibility, as a result of the growing financial strength of the association. The leading officers were all re-elected as follows:

PRESIDENT, Charles B. Frame, North Manchester.

FIRST VICE-PRESIDENT, W. B. Creed, New Albany.

SECOND VICE-PRESIDENT, Fred W. Bartholomew, Michigan City.

SECRETARY, M. L. Corey, Argos.

TREASURER, Charles E. Hall, Indianapolis.

EXECUTIVE COMMITTEE: C. E. Hall, Indianopolis; S. L. Ocker, Roan; M. W. Coates, Kokomo.

DELEGATES TO NATIONAL ASSOCIATION: S. E. Jones, Richmond; C. E. Hall, Indianapolis; J. L. Fulton, Portland; Albert De Prez, Shelbyville; M. M. Hamilton, Brownstown; Wm. A. Shipley, Lafayette; Charles B. Frame, North Manchester. Alternates; Elmer Nichols, Anderson; Louis Kinderman, Boonville; H. E. Grube, Plymouth.

REPORT OF SECRETARY COREY.

M. L. Corey, Argos, the efficient and popular secretary of the association and secretary also of the National Association, delivered an extended report, expressing his growing pride in the Indiana Association, the good it has done and the evils that it has corrected. As treasurer his report showed the finances to be in a most flourishing condition, with a rapidly accumulating balance in the bank. The following extracts are quoted from Mr. Corey's report:

There have been several complaints. Nearly all have been adjusted satisfactorily. There is a tendency on the part of some jobbers

TO SELL PARTIES NOT ENGAGED IN THE TRADE.

Upon following up such cases we frequently find that a commission has been allowed some dealer in an adjoining town. There may be times when such business is desirable, but we submit to you that its final result is demoralizing and unsatisfactory. If the jobbers or manufacturers in making such shipments would write the name of the firm through whom the sale is made on the shipping tag it would relieve them from the charge of selling direct.

Many of you have been annoyed and perhaps damaged during the last year by slow shipments. It is the custom nowadays to lay the blame on the railroads, and in nearly every State drastic legislation is being enacted. As business men we should give other interests the same consideration we ask for ourselves.

THE CONDITIONS TO-DAY ARE UNUSUAL.

Our transportation facilities are undoubtedly inadequate, and unable to move our enormous crops and products with the dispatch that modern business requirements demand; it certainly is the railroads' desire to move the greatest amount of freight possible, for their profits depend upon this: they are surely being hampered to some extent by the Interstate and Hepburn rate bills; many newspapers continually encourage antagonistic public sentiments, while socialistic advocates urge Government ownership. Too much regulating and restrictions will frighten capital and block the wheels of general progress. We earnestly condemn the high handed, dishonest, watered stock manipulation of some of the overpaid managers of our railroads, but underneath this lies a wonderful system of business enterprise, employing thousands of people, requiring the highest grade of intelligence and to whose service we often intrust our lives and commercial success. Under our plan of government

PUBLIC SENTIMENT WIELDS A CONTROLLING INFLUENCE

on every enterprise. The business man particularly should be fair and broad in considering these great questions. The transportation facilities must keep pace with our rapid growth and progress. Our ever increasing products must be moved quickly and cheaply. Railroads never can do this if we embarrass them with too much adverse legislation.

* * * *

The danger of injurious legislation has led us to seek a closer acquaintance with those who represent us in our State and National bodies. I have attended several conventions, and am sorry to find so few Hardwaremen present. I do not blame wou for declining

Digitized by Google

TO ENTER INTO THE HEAT OF POLITICAL DISCUSSIONS

during a campaign. It is not necessary to antagonize your customers by personal appeals to vote your ticket. But it is to your own advantage as retail merchants to send delegates to the conventions from your own ranks, selecting men of reputation and ability, who can learn the ropes, get acquainted with the leaders, and thereby exert an influence, when it comes to seeking or defeating future legislation.

You should have a voice in wording platforms, a vote in selecting candidates. These candidates seeking your favors are always willing to listen. If they are elected you can go to them and secure recognition that is not extended to the quiet "stay at home."

I would like to see more Hardwaremen in our Legislature, more merchants filling State official chairs. I believe such conditions would result in fewer scandals and more economical and honest government. It is not to our credit to stay at home when a convention is held, and then find fault with what is done. It is not good business to keep quiet or appear unconcerned when bills are being considered that would work an injury to our trade. It is always easier to defeat legislation than to get it repealed.

RETAIL HARDWARE ADVERTISING.

A most interesting and entertaining address on the subject of advertising a retail Hardware business was delivered by O. B. James, of Richland Center, Wis. Although extemporaneous in character his remarks were exceedingly witty and his points well made, while the examples he read of his own local advertisements directed against catalogue house competition were hugely enjoyed.

HARDWARE WINDOW DRESSING.

An address on "Hardware Window Dressing," delivered by W. L. Winning, who has originated weekly window dressing service in Indianapolis, contained suggestions of value to many of the members and was received with much interest.

THE QUESTION BOX.

On the conclusion of Mr. Winning's address there was an opening of the Question Box, the questions being of this character:

1. *Is It Advisable to Mark Prices on Articles Displayed in a Store Window?*
2. *The Hardware Man in Politics.*
3. *How Can Manufacturers and Jobbers Best Assist Retailers to Sell Their Goods?*
4. *What Is the Experience of the Trade in Selling Articles Advertised by the Manufacturers in General Periodicals?*
5. *How Can We Get Our Business Nearer to a Cash Basis?*
6. *Quantity Prices a Disturbing Factor.*
7. *Handling Implements, Paints, Vehicles, etc.*
8. *Efficient Help in the Store.*
9. *The Catalogue House Problem and Relations of Jobbers and Retailers.*
10. *Running Expenses Steadily Increasing.*

Several other questions bearing on the conduct of a Hardware business were discussed, and the meeting closed with a stirring address by H. E. Grube, Plymouth, on the subject, "What Should Be the Attitude of Retail Merchants Toward the Trusts and Trust-Made Goods?"

RESOLUTIONS.

Among the resolutions adopted, as reported by the committee, of which James L. Fulton was chairman, were the following:

Whereas, There is persistent agitation and effort in favor of establishing a parcels post system in the United States, and whereas, we recognize that social conditions, length of haul, scattered population and lack of monopoly in transportation renders certain to entail an enormous loss upon the Government; be it

Resolved, That we reaffirm our continued and unalterable and absolute opposition to any legislation seeking to establish a parcels carrying system in connection with the Post Office Department of the United States at this time or in this generation.

* * * *

Whereas, First-class mail matter furnishes approximately 80 per cent. of the revenue of the Post Office Department, and produces more than $100,000,000 of profit per year, while it supplies less than 14 per cent. of the tonnage:

Resolved, That a reduction from 2 cents to 1 cent for the stamp required on the ordinary letter would be advantageous to business interests and would be equitable to all.

* * * *

Whereas, The Hardware dealers mutual fire insurance companies have established their soundness, their usefulness and their economy beyond all question of doubt; be it

Resolved, That we reaffirm our loyalty and support and urge upon every member of this association and every Hardware dealer to take further advantage of the material saving effected by patronizing our mutual fire insurance companies, and by thus doing increase their stability and usefulness.

* * * *

Whereas, The exhibit feature of our annual convention has this year proved a great success in all regards and especially in its social and financial aspects; be it

Resolved, That we reaffirm our indorsement of the system, looking to further improvement in the organization of this feature, that every necessary facility may be afforded our friends the exhibitors; and be it further

Resolved, That we as a body hereby extend our thanks to the exhibitors for their loyal and ready co-operation as demonstrated in this convention.

* * * *

On Wednesday evening an enjoyable smoker was held in the convention hall at the Denison. Although ample entertainment had been provided the room was not large enough to accommodate the crowd who desire to attend. The music of the Indiana University Glee Club was much enjoyed, but the feature of the evening was the Hardware Saengerbund, conducted by E. B. Schenk, Mt. Vernon, and participated in by all.

At the closing session of the convention an impromptu address was made by Sharon E. Jones, of Richmond, who urged the members of the association to adopt the policy of making larger profits in their business, asserting that although the volume of business during the past year has been record breaking, profits have been relatively small as merchants have not taken advantage of advances in the market. Even jobbers, he declared, are outspokenly dissatisfied with the results of their year's business. Returns are not commensurate with the labor and effort expended and the capital invested. Hardwaremen, said Mr. Jones, must change their front and resolve to sell times like these they had better quit and go into some other business, goods at a profit, or not at all, for if they cannot make money in Mr. Jones' remarks were warmly indorsed by J. L. Fulton, of Portland, and others.

AFTER-COLLEGE GIRL'S COMPLAINT.

A lady was calling on some friends one summer afternoon. The talk buzzed along briskly, fans waved and the daughter of the house kept twitching uncomfortably, frowning and making little smothered exclamations of annoyance. Finally, with a sigh, she rose and left the room.

"Your daughter," said the visitor, seems to be suffering from the heat."

"No," said the hostess. "She is just back home from college and she is suffering from the family grammar."

DOING IT OVER.

"If I had it to do over again!" You have, so what's the use of wailing. Too many people think that life is only to be lived once and that a mistake once made can never be rectified. Every business day is to some extent a separate day, bringing with it its own opportunities and obligations. No one is ever excused from one of these because he made a failure of yesterday; no one's tomorrow is ever lived today.

Every period of time, whether a success or failure, takes nothing but experience into the future. True, the experience may be of such a nature as to be itself a burden; it cancels no future obligations. Every man's today is just as much a lifetime of duties as though yesterday had not been lived.

It is criminal to believe that we have failed, because our efforts of the past have been a failure. That idea has wrecked more business lives than perhaps any other. Our future has never been a failure until we have lived it and failed in it as a separate affair. Let us take this principle with us throughout the year. Today we are beginning a new business, in which we mean to succeed. If we succeeded yesterday that is no reason why we should not try it over again today. If we failed yesterday, should that failure count for more in today's business than yesterday's success would have counted?

Bear this fact in mind always, no failure, however crushing or far-reaching, can deprive us of the future excepting as we give it up voluntarily. We may mortgage it in various ways, use up our credit, our business standing; still, if we stand firmly to our places in the future that mortgage cannot be foreclosed until it is due, and we still have it in our hands to redeem our property.

The Famous HAMILTON RIFLES

Just the thing for target practice or hunting small game.

35 inches long. Barrel and Action 21¾ inches long. Take down. Bolt action model. Stock of Walnut. Beautifully finished in blue-black gun finish. Automatic action in loading and ejecting exploded shell. **Retail $3.00.**

MODEL NO. 19

Same as No. 23, combines simplicity, beauty of finish, strength and shooting power. Simple loading process. Extractor. Rapid and perfect action. Convenient take-down features. **Retail $2.00.**

MODEL 15

Same as No. 19, but with barrel 4 inches shorter. **Retail $1.50**

Model 23 The Great Favorite

Send for New Catalog.

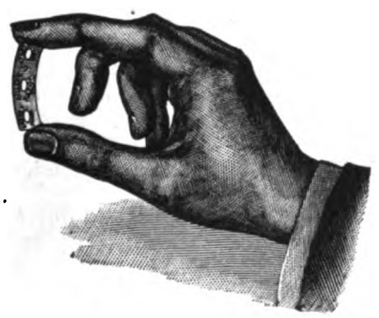
Gillette Safety Razor

NO STROPPING NO HONING

It Pleases Every User.

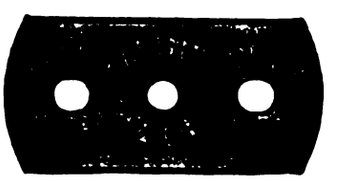
The Most Wonderful Selling Razor in the World

It pleases every customer, who in turn brings a new customer.



"The Gillette" sales are permanent, no shelf worn stock. It turns orders to money and profits.

"The Gillette" Blade is of Fine, Flexible, Wafer Steel that Shaves.



12 BLADES, 24 SHARP EDGES,

Every blade will give from 20 to 40 close, smooth, comfortable shaves.

Triple silver-plated set with 12 blades $5.00.
Quadruple gold-plated set with 12 blades $10.00.
Quadruple gold-plated set with 12 blades and monogram $12.00.
Standard combination set with shaving brush and soap in triple silver-plated holders $7.50.
Other combination sets in silver and gold, up to $50.00.

Standard packages of 10 blades with 20 sharp edges, for sale by all dealers, at the uniform price of 50 cents.

Sold by Leading Drug, Cutlery and Hardware Dealers.

We Supply all Dealers with Signs and Booklets.

Write us for facts, and for terms.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

Changes and Improvements.

Ephrata, Wash.—The Kelley-Hall Hardware Co. has succeeded to the business of Kelley & Cheffee.

Fairmont, Neb.—Glen Matteson has succeeded to the entire Hardware business of Witten & Matteson.

Fort Gibson, I. T.—Miller & Hurt have been succeeded in the Hardware business by V. L. Hurt.

Fort Worth, Tex.—The Nash Hardware Co. has increased its capital stock from $75,000 to $150,000.

Gadsden, Ala.—The Ewing Hardware Company will erect a three-story building on Broad Street. This company will also build a wholesale store and warehouse on Broad and Second Streets. Both buildings will be ready for occupancy by early Fall.

Giltner, Neb.—Douthrett & Co. have sold out their Hardware store to P. B. Pintevine.

Grinnell, Iowa.—L. C. Pierce has purchased the Hardware stock of George W. Stinitz.

Hendley, Neb.—F. L. Pielstick has sold his Hardware store to H. R. Marietta.

Holdrege, Neb.—Cranlund & Anderson have purchased the Hardware business of Hanlin & Ekberg.

Hopkins, Mo.—Mrs. M. C. Wray has sold the S. K. Wray Hardware Company's stock to the manager of that firm's business, O. H. Sayler, who took immediate possession of same. The business will be continued at the same place with Mr. Sayler in charge.

Hubbard, Iowa.—Granzow & Boeke have been succeeded in the Hardware business by C. F. Boeke.

Humphrey, Neb.—Arthur Bruening has purchased the Hardware store of H. J. Bruening.

Kenowa, I. T.—W. A. Hollifield has moved his stock of Hardware from Ada, I. T., to Kenowa, I. T.

Keswick, Iowa.—I. B. Crawford has purchased the Hardware store of R. L. Crawford.

Lake Odessa, Mich.—O. M. Bachelder has bought the stock of Hardware recently purchased by Slocum Bros. from Cheetham & Ringler and styled the East Side Hardware and Furniture Store.

Lebanon, Neb.—J. W. McClintock has sold out his Hardware business.

Marion, Neb.—H. L. Goodenburger has purchased the Hardware business of J. L. Sargent in Danbury.

McLouth, Kan.—Dick Bros. have purchased the Hardware store of William B. Andrews.

Mulberry, Ark.—House & Co. have sold their Hardware store to the George Shearer Hardware Co.

Murray, Neb.—Underwood & Pittman have succeeded to the Hardware business of L. B. Underwood.

Nashville, Tenn.—The partnership business of Craig & Shoffner, retail and wholesale Hardware, has been merged into a corporation and the charter for the company, which will continue under the old name, has been registered. The incorporators are John F. and Fred D. Craig, Sam D. Shoffner, John J. Dannaher and Eugene McSweeney. The company is now fitting up the three-story brick building at 232 Second Avenue, North, and will occupy its new quarters at once. In addition to a general wholesale and retail business the company will engage in the manufacture of Hardware specialties. A plant for the manufacture of screen goods is now being put in place.

Navina, Okla.—Campbell, Meskill & Co. have purchased the Hardware business of Peterson & Steinfeldt.

New Boston, Mo.—A. O. McKinney has purchased the Hardware and implement business of A. G. Anderson.

New London, Wis.—The Langesen Hardware Company of this city has sold its store at Welcome to William Bleck of Clintonville.

New Market, Iowa.—F. J. Rogers has sold an interest in his Hardware store to George S. Rogers.

Pierce, Neb.—H. J. Kloke will move his stock of Hardware from Pierce to Gregory, S. D.

Pierce, Neb.—Hough & Peters have sold their Hardware store to Peters & Buckendahl.

Plunk, Mo.—Haggard & Co. have succeeded to the Hardware business of C. A. Haggard.

Polk, Neb.—Tewell Bros. have moved their Hardware stock from Arborville, Neb., to Polk, Neb.

Powhatan, Kan.—N. P. Sprague has purchased the Hardware business of E. P. Buck.

Radcliff, Iowa.—Drake Bros. have sold their Hardware business to I. T. Nervig.

Red Oak, Iowa.—H. R. Christy has sold his Hardware business on the east side to J. F. Latimer, giving possession immediately.

Reger, Mo.—J. V. Rogers & Co. have sold their Hardware and implement business to C. E. Maggard & Son.

Richmond, Mo.—Walter T. Shoop has been succeeded in the Hardware business by Shoop & Smith.

Salem, Neb.—H. B. Glenn has sold out his Hardware store to J. L. Musgrove.

Schuyler, Neb.—The entire stock of McNally & Higgins Hardware Company has been moved to Richland and sold to John Smith, who has started a store at that place.

Scranton, Kan.—The Gilkeson Hardware Co. has sold its business to Borland Bros.

Seneca, Kan.—W. E. Young has sold his Hardware store to C. J. Haskett.

Shelby, Ohio.—Henry Morton, one of the founders of the Shelby Hardware Co., has sold his interest in that firm and tendered his resignation as manager of the firm. He will be succeeded as manager by Walter Helbert, who has been with the company since it was organized, coming to this city from Ashland.

Perry, Okla.—J. A. Cox has purchased an interest in the Hardware and implement business of G. W. Eby.

Philadelphia, Pa.—Charles J. Field's Sons, Hardware merchants, formerly at 633 Market Street and 624 Commerce Street, are temporarily occupying the building at 520 Commerce Street. The old building was found inadequate for the firm's increasing business, and they will erect a new one.

Pickering, Mo.—Frank Ewing has sold his Hardware store and stock to J. W. Wiley.

Piedmont, Kan.—Ed. C. Everett has sold his Hardware store to W. C. Roberts.

Port Angeles, Wash.—Gutenberg Bros. have been succeeded in the Hardware business by H. Gutenberg & Co.

Port Townsend, Wash.—Property of the Adams Hardware Company has been sold to Willis and G. H. Clark, Fred J. Bailey and W. J. Marshall. The last named will manage the business, his associates being prominent logging camp operators. The consideration given in documents filed gives the purchase price at $35,000.

Pt. Townsend, Wash.—The Olympia Hardware Co. has purchased the business of the Adams Hardware Co.

Randall, Kan.—J. R. Parker has been succeeded in business by the Parker & Westbrook Hardware Co.

Regina, Sask.—The Hardware business of Smith & Ferguson has been sold to Peart Bros. for the sum of $125,000. Included in the sale is the well-known Smith & Ferguson block, and the land on which it is built. The transfer of the business takes place on January 15 next. The Smith & Ferguson business was established in 1883, and is one of the oldest enterprises in the Saskatchewan capital.

Richmond, Mo.—A. B. Conrow has purchased the Hardware business of the Jess Childs Mercantile Co.

Rockford, Ill.—Alderman Joslin, as trustee of the Lundy Hardware Company, has sold the stock of the company to the Seventh Street Hardware Company.

Shelby, Neb.—Henry Schmid has succeeded to the entire Hardware business of Mercer & Schmid.

Shelton, Neb.—Gumprecht Bros. & Co. have succeeded J. B. Hodge & Co. and will carry shelf and heavy Hardware, stoves, tinware, sporting and athletic goods and general merchandise.

Sheridan, Wyo.—Webber & Ladd have been succeeded in the Hardware business by Ladd & Kneisel.

Spokane, Wash.—The Knudson-Winans Company, dealers in Hardware, house furnishing goods and farm implements, will soon occupy new quarters at 1802 and 1804 Sprague Avenue, where a modern store building is being fitted up for the company.

Summerfield, Kan.—H. R. Cole has purchased the business of the Summerfield Hardware & Implement Co.

Winlock, Wash.—Mutrie & McClure have succeeded to the Hardware business of Mutrie & Girvan.

Winnipeg, Man.—The J. H. Ashdown Hardware Co., Ltd., have, during the past year, increased the capacity of their wholesale warehouse on Bannatyne Avenue East to the extent of one-half the original size of the old building by adding two stories to the top of the entire building. This addition cost the company $27,000, and will give additional floor space of 17,500 square feet for storage of all kinds of Hardware in which the firm deals. The area of each floor is 135 feet long and 130 feet wide, and the two new stories have a height of 27 feet.

W. Stewartstown, N. H.—Charles Quimby has sold his Hardware business to Arthur Rodgers of Canaan, Vt.

Youngstown, Ohio.—The Stambaugh-Thompson Company will dispose of the most of the Morris Hardware Company's stock in the present building occupied by the Morris Company. What remains after a stated time will be moved to the Stambaugh building.

Savonburg, Kan.—Holmquist & Legergun have succeeded to the Hardware business of Richardson & Holmquist.

Sidney, Iowa.—T. W. Hutchinson has purchased the business of the T. J. Thompson Hardware & Implement Co.

South Amboy, N. J.—William Sexton, the Hardware dealer, of Broadway and First Street, has given up the business.

Spirit Lake, Iowa.—S. L. Pillsbury & Son have recently purchased Charles T. Chandler's half interest in the Chandler & Company's Hardware store, while Clarence Hill, the silent partner, retains his share.

Springfield, Ore.—The dissolution is reported of the Hardware firm of Stansbie & Walker, and Mr. Stansbie will continue alone.

Stephenville, Tex.—H. L. Snapp has sold his Hardware store to W. W. Moore.

Stockton, Mo.—Wrenn & Young have succeeded to the Hardware store of C. L. Wrenn.

Stuart, Neb.—H. W. Gallaher has succeeded to the Hardware business of Gallaher Bros.

Tacoma, Wash.—E. E. Elliott has purchased the interest of C. H. Morse in the C. H. Morse Hardware Co.

Tecumseh, Neb.—McDougal Bros., Hardware and furniture dealers here, will soon erect a 40 by 44 one-story brick addition to their store.

Walnut, Iowa.—William Boiler has purchased the Hardware store of H. W. Reiner.

Whiting, Kan.—Burkett & Banks have purchased the Hardware and implement business of Harry Marshall.

Somerville, N. J.—Thomas I. Honeyman has sold his Hardware business to J. A. Seltzer, of Tremont, Pa., who will take possession about March 1.

Springfield, Mo.—Hawkins Bros. have succeeded to the Hardware business of Kieffer Hawkins.

Tacoma, Wash.—E. P. O'Connor has purchased the interest of D. I. Sherrill in the South Tacoma Hardware Co.

Van Wert, Iowa.—O. V. L. Harper has succeeded to the Hardware business of Harper & Henry.

Vliets, Kan.—Scholtz & Son have sold their store to the Vliets Hardware Co.

Wallowa, Ore.—C. E. Hood has sold his Hardware stock to the Wallowa Mercantile Co.

Warrensburg, Mo.—Redford & Hohe have been succeeded in the Hardware business by Hohe Bros.

Waverly, Neb.—The L. A. Price Hardware Co. has purchased the business of C. C. Pennington & Co.

Westgate, Iowa.—J. R. Downing has sold his Hardware business and stock to F. W. Bartels & Son, and invoicing is in progress, at the completion of which formal transfer will be made.

West Winfield, N. Y.—The firm of Howells & Clark, Hardware merchants, has been dissolved by mutual consent, Mr. Howells retiring and Mr. Clark continuing the business.

Harrisburg, Pa.—The Harrisburg Hardware Co.'s store, located at 408 Market Street, will be moved on April 1, to No. 5 North Market Square.

Hemple, Mo.—T. B. Shannon has purchased the Hardware business of C. E. Watson.

Holdrege, Neb.—Hanlin & Ekberg have sold their Hardware store to Cranlund & Anderson.

Humboldt, Neb.—Skalak & Butch have succeeded to the Hardware business of Skalak & Son.

Kansas City, Mo.—The Miller-Flaigle Hardware Co. has been succeeded in business by the Flaigle Hardware Co.

Le Roy, Iowa.—E. A. Lockwood has sold his Hardware business to C. E. Bodley.

Manito, Ill.—J. S. Meigs has sold his interest in the Manito Hardware Co. to Jacob Graff, who with the other partner, Frank Rankin, will continue the business.

Marshall, Mich.—John Murphy, who was appointed to look after the interests of the creditors of the O'Leary Hardware Co., which went into bankruptcy, has sold the stock to William Bosley, a pioneer Hardware dealer of this city.

Middletown, N. Y.—On account of constantly increasing business Buck Bros., the West Main Street Hardware dealers, have found it necessary to enlarge their store, and, after May 1, they will take over the store at 26 West Main Street, adjoining the one occupied by them.

Moscow, Idaho.—C. F. Stork has sold his store to the Empire Hardware Co.

Ozona, Tex.—J. W. Henderson and Hugh Childress have sold the Ozona Hardware Company to a company composed of Chris Meinecke, the former manager, and George and Robert Metcalfe.

Perry, Okla.—C. W. Ebey has been succeeded in the Hardware business by Cox & Ebey.

Richmond, Mo.—Jess Child has sold his Hardware store to A. B. Conrow.

Richmond, Mo.—W. T. Shoop has been succeeded in the Hardware business by Shoop & Smith.

Salem, Neb.—H. B. Glenn has purchased the Hardware store of E. S. Davis.

Sand Point, Idaho.—Thomason Bros. have succeeded to the Hardware business of Thomason Bros. & Hansen.

San Francisco, Cal.—A petition has been filed by the Hardware firm of Baker & Hamilton for a change of name to Baker & Hamilton Company. It is stated that the purpose is to prepare for the transfer of the business to a new company to be known as Baker & Hamilton, which is to be organized by the directors of the old company. The new corporation will simply be a holding company for the stockholders of Baker & Hamilton.

Theresa, N. Y.—The Hardware firm of Westcott & Hoover has dissolved partnership. The junior member, Howard H. Hoover, has purchased the stock, which he is moving into the Hoover Block, next to the postoffice on Commercial Street, where he will for the present conduct the business.

Janesville, Wis.—Lowell Hardware Co. has changed its name to the Leonard-Underwood Co.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Andover, N. Y.—Platts Brothers has been incorporated to manufacture cutlery, capital, $50,000. Directors: C. W. Platts, J. A. Platts, and F. L. Platts, Andover.

Baltimore, M. D.—Articles of incorporation have been filed by the Maag-Wahmann Company, which is organized for the purpose of manufacturing cooking utensils and other sheet-metal goods. The Company has an authorized capital stock. The incorporators are August Maag, George H. Wahmann, Louis Rosenfield and James M. Decker and Mary Maag.

Camden, N. J.—Keystone Nut Lock Manufacturing Co., No. 419 Market St., has been incorporated; to manufacture nut locks, capital $200,000. Incorporators William M. Smith, M. J. Dain, Edward Bullet, as above.

Chicago, Ill.—Chicago Tack Co. has been incorporated for the purpose of manufacturing tacks, brads and nails; capital $40,000. Incorporators: A. W. Martin, O. N. Hutchinson, E. W. Hutchinson, Chicago.

Chillicothe, O.—The Scioto Tool Co. has filed application for a charter. The capital stock of the company is $10,000, and the incorporators are: David Auch, Dr. W. A. Hall, Quinby Climer, Albert Scholl, G. A. Miller and T. K. Wilson. The new company proposes to manufacture a spike puller and other kindred tools on which it will have patent control.

Detroit, Mich.—The Doyle Stove & Furnace Co., with a capitalization of $100,000, will begin the manufacture of heaters and gas burners. John Wirth, Francis J. Doyle and James E. Doyle are interested.

Galt, Ont.—The Galt Brass Mfg. Co., Ltd., has been incorporated to manufacture brass goods and plumbers supplies, with $40,000 capital, James Scott, B. F. Bennett and Angus Groff are provisional directors.

La Crosse, Wis.—La Crosse Hay Tool Co., capital stock, $100,000; incorporators, A. Hirscheimer, H. J. Hirscheimer, Frank E. Davis, F. R. Davis and B. F. Harber.

Lancaster, Pa.—The charter of the National Scale and Hardware Company has been received. The purpose of the company is to manufacture computing scales and Hardware specialties and sell the same. Their office will be in Lancaster. The directors and subscribers are Christian B. Esbenshade, Menheim township, and D. M. Rothenberger and William L. Kendig, Lancaster. Mr. Rothenberger is the treasurer. The capital stock is $125,000.

New Haven, Conn.—Articles of incorporation have been filed for the Johnson Manufacturing company which is to locate in this city. The capitalization of the new company is $25,000 and the incorporators are J. Willis Dowers, Henry L. Bradley and Albert W. Johnson, all of New Haven. The Johnson company is to manufacture Hardware novelties and is expected to employ fifty hands. A factory building will be erected as soon as a suitable site is found.

New York, N. Y.—Chesterfield Manufacturing Co. Manufacture tools, machines, apparatus, etc.: capital $30,000. Incorporators: W. F. Newton, F. E. Vossnack, T. Conyngton, New York city.

New York, N. Y.—Phillipson Valve Co., of New York, has been incorporated to manufacture valves, faucets, Hardware; capital $100,000. Incorporaters: E. Phillipson, New York city; H. Torchiani, Brooklyn; E. Bilhaber, Maywood, N. J.

Reading, Pa.—The Arnold Safety Razor Company has been incorporated, with a capitalization of $10,000. The incorporators named in the petition are Louis F. Kraemer, John H. Keppleman and Edward C. Nolan. The new concern is already equipping a plant in the new addition to the building of the Mutual Fire Insurance Company, at 16, 18 and 20 North Fifth street. The firm expects to be able to place the first goods on the market in a few weeks. The safety razor, which will be manufactured on a large scale, is the invention of Fred. H. Arnold, for many years connected with the Reading Hardware Works, and is protected by fourteen patents. The razor is regarded by the trade as an improvement and is compact in form, being put up something like an average size fountain pen.

Tacoma, Wash.—Articles of incorporation have been filed for the Ideal Wrench company, capital stock $100,000, the incorporators being Allen C. Mason, J. F. Wright and F. M. Harshberger. The objects of the incorporation are to enlarge in the manufacture and sales of wrenches.

Westport, Conn—A certificate of incorporation has been filed by G. W. Bradley's Sons, incorporated. The company will manufacture Hardware and machines with a capital of $32,000. The incorporators are Willard S. Adams, William G. Staples and Henry T. Lees, all of Westport.

Changes and Improvements.

Anderson, Ind.—The Anderson Tool company have bought the four-pound computing scale of the Dunn Bros., company and will soon commence on a large scale the manufacture and sale of the scales.

Castile, N. Y.—The Castile Chilled Plow Company has bought the business equipment of Monitor, North & Moyers of Lansing, Mich., and is negotiating for a site near the Erie station for this branch of the business. The plow company has been doing business at its present location for more than half a century.

Chattanooga, Tenn.—Work will be commenced within a short time upon improvements which when completed will amount to practically the rebuilding of the entire plant of the Chattanooga Implement and Manufacturing company. The first addition to be made to the plant will be the erection of a new power house, which will cost $8,000 or $10,000. Following the completion of this, additions to the other parts of the plant will be made, besides which all of the other portions of the factory will be remodeled. The various improvements will call for the expenditure of a large sum of money and when completed will give this company one of the handsomest and most up-to-date plants in the South.

Chicago, Ill.—The American Cutlery Company will build a new factory on the site of the one which was destroyed by fire in November. It will be located at 177 to 187 Mather street and will cost $150,000. The building will be six stories high, 42 by 150, and will be of mill construction.

Dayton, O.—The Dayton Keyless Lock Company, has increased its directorate from five to seven members. N. H. Brookins and J. M. Wehrley were chosen to fill the new offices. The officers are: President, Dr. J. M. Howell; Vice President, L. C. Walker; Secretary-Treasurer, G. F. Deal; General Manager, D. R. Miller.

Detroit, Mich.—The Chicago Pneumatic Tool Co., whose Detroit plant is at Second avenue and the railroad, has added one more to its chain of factories and removed a competitor. The Franklin Machine & Tool Co., formerly the Grant Tool Co., at Franklin, Penn., has been taken over, paid for with $200,000 in stock of the Pneumatic company. Modern machinery will be installed in the buildings, and the local air compressor plant installed there.

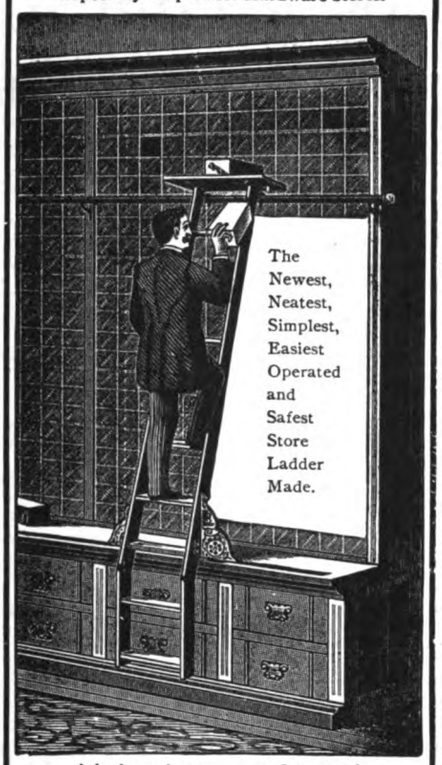
Franklin, Pa.—The buildings of the Franklin Machine and Tool Company, formerly the Grant Tool Company, have been sold to Charles H. Schwab, for the Chicago Pneumatic Tool Company. Two hundred thousand dollars in stock of the latter concern was the price paid. The buildings, which are the most modern in this section, will be used by the local air compressor plant of the Chicago company.

Pawtucket, R. I.—A brick addition 65 by 100, three stories and basement, is to be built to the factory of the J. M. Carpenter Tap & Die Co.

Port Chester, N. Y.—The Russell, Birdsall & Ward Bolt and Nut Company, has increased its capital stock from $2,200,000 to $2,300,000, enabling it to acquire the Cobb & Drew plant at Rock Falls, Ill.

Reading, Pa.—The Mount Penn Stove Works will enlarge by a 100-foot addition to the present spacious building.

Rock Island, Ill.—The Rock Island Tool Co., recently organized, has taken over the business of the Jacobson Machine Mfg. Co., Warren, Pa., and will manufacture a full line of vises and other tools. The company states that it expects to build next Fall. At present it is occupying temporary foundry and machine shops and is in the market for foundry equipment, machine tools, electric motors and power plant equipment. C. E. Shields, Rock Island, will be active in the management of the business.



Springfield, Mo.—The Woods - Evertz Stove company, has decided to enlarge its plant, with the addition of a new foundry. The company has purchased a lot adjoining their plant on Phelps avenue, and it is expected that the contract for the erection of an addition to their already large building will soon be awarded. The property has a frontage of 130 feet and is 320 feet deep. At present the company is manufacturing only the sheeting for the stoves, but when the foundry is completed stoves will be manufactured.

St. Louis, Mo.—A contract for the erection of a factory building for the Haynes-Langenberg Manufacturing Company, to be located on the north side of Forest Park boulevard, near Sarah street, has been signed. The building will be in the form of an "L," and will occupy a lot 80 by 140 feet. It will be two stories high, and will be equipped with machinery for the manufacture of kitchen ranges and similar articles. It will be completed early in the summer. The cost will be about $40,000.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boston, Mass.—Arthur L. Johnson Co. has been incorporated to deal in sporting goods etc., capital, $5,000. President Arthur L. Johnson, Medford, Mass.; treasurer Marshall C. Bauve, Winchester, Mass.

Buffalo, N. Y.—The Thomas Auto-Bi Co., has been incorporated to manufacture motor cycles and tricycles; capital, $30,000. Incorporators. C. E. Beckes, W. C. Chadeayne, J. W. Van Allen, Buffalo.

Chester, Pa.—Joseph Diamond and Jacob Friedkin are planning to open a new store for the sale of sporting goods and baseball equipment early in March.

Danville, Ill.—The Charter of the Danville Sporting Goods Co., has been placed on file. It is incorporated by Alberta Sawyer, O. R. Eader and F. P. Barnes, and its capital stock is $5,000.

Dayton, O.—The Nutting Machine Company, builders of special machinery, has been incorporated by Fred J. Nutting, Frank T. Huffman, Clifford Cunningham, Louis M. Schaeffer and Jesse S. Kepler. Special attention will be given to automobile machinery. The capital stock is $50,000.

Detroit, Mich.—A. G. Spalding & Bros. have leased a store at 254 Woodward street, which will be made a branch house and the distributing agency for their Michigan business. It is their intention to open up the new branch April 1. Richard Jackson, who has been in charge of the Michigan territory for a number of years, will manage the new store.

Freeport, Ill.—The Frazer Mercantile Company have opened a sporting goods store in the old postoffice block.

Fond du Lac, Wis.—E. A. Aismont has opened a new store at 78 South Macy street.

Norristown, Pa.—A new sporting goods store has been opened at 516 West Marshall street, by Samuel L. Rambo.

Montreal, Canada.—A complete sporting goods department has been opened by W. H. Scroggie, Ltd.

Old Town, Me.—Sebatis Shay and Newell Ranco, full-blooded Indians of the Penobscot tribe, under the firm name of Shay & Ranco, are preparing to erect a factory for the manufacture of canoe paddles and cant-dog stocks. The factory will be owned and run entirely by Indians.

St. James, Mo.—Gunstocks will be manufactured by the new factory which is being started by J. K. Barnes, formerly manager of Casebeer & Barnes, of Des Moines, Ia.

Trenton, N. J.—A new sporting goods store has been opened by E. S. Applegate & Company, under the management of Charles Leggett, of Bordentown, N. J.

Weymouth, Mass.—The Edmund S. Hunt & Sons Co., has been incorporated, at $5.000, by Edmund S. Hunt, Frederick F. Hunt, and Russell G. Hunt, for the manufacture of explosives.

Changes and Improvements.

Austin, Minn.—Archie Moreland has sold out to B. F. King.

Brooklyn, N. Y.—The Prospect Motor Mfg. Co., which has been producing the Simplex motor bicycle, has ceased the manufacture of that machine and henceforth will devote its energies to Peugeot motorcycles. J. J. McGuchin, the head of the company, made a trip to France last month and obtained the Peugeot agency for the United States. The machines will be imported in parts which will be assembled here and will be marketed as the Simplex-Peugeot.

Carrollton, Mo.—The Horizontal Swing Company has been reorganized by the election of the following officers: J. N. Tuley, president; Thomas Archibald, vice-president; E. R. Forlet, secretary; Bedford Hudson, treasurer; W. T. Plumb, manager. These with J. R. Robertson and Charles Wright compose the new board of directors.

Chicago, Ill.—The Egyptian Powder Co. has recently increased its capital stock from $150,000 to $200,000.

Cincinnati, Ohio.—Manager George W. Collins, of the Peters Arms and Sporting Goods Co., of Cincinnati, announces a complete reorganization of their business and their intention to start a campaign for the wholesale trade in that section.

Gloversville, N. Y.—The Consolidated Sporting Goods Company, which makes a specialty of baseball catchers' gloves, is planning a large addition to its present factory.

Hartford, Conn.—The Anglers Co., which has won a reputation in the production of fishing rods and tackle, after months of preparation has opened a commodious and luxurious store for the sale of fishing tackle and accessories of every description. A little later an unusually complete line of general sporting goods will be added. The Anglers Co. will use several floors, in addition to the large store, for the storage and display of goods. A unique feature of this "Sportsman's Shop" will be a handsomely fitted up room arranged as a Sportsman's Club where the sportsmen of the city and visitors may congregate. Wilbur R. Newsome is general manager of the enterprise and his ability, long experience and energy assure the success of the new Anglers Co. store.

Hartford, Conn.—The Billings & Spencer Co., the well-known drop forging concern of Hartford, Conn., have organized the Canadian Billings & Spencer, Ltd., capital $200,000, and have completed arrangements for the erection of a big plant at Welland, Ont., eight miles from Niagara Falls; it is expected that the plant will be completed and turning out B. & S. wrenches and other products early this Fall. The establishment of the Canadian branch, of which Fred C. Billings himself is president, means a more aggressive bid for the export trade of the world.

Kansas City, Mo.—The management of the buying department of the Schneider Arms Company has been assumed by Paul Clute, formerly assistant buyer of the sporting goods department of the Norvell-Shapleigh Hardware Company, of St. Louis.

Lachute, Quebec.—The ammunition plant of the Dominion Cartridge Company has been enlarged and much new machinery has been added in an effort to take care of its constantly increasing business.

Pendleton, Ore.—Frost & Bowman, sporting goods dealers, have secured additional floor space for the storage and display of their stock of bicycles, guns and accessories.

Scranton, Pa.—Curt and Adams, proprietors of the sporting goods store of Robinson & Adams, have been compelled, by a large increase in business, to seek a better location for their store. They have leased the entire first floor of the Masonic Building.

Seattle, Wash.—Seattle Sporting Goods Company have filed a certificate of increase of capital stock from $50,000 to $100,000.

Seattle, Wash.—The Seattle Sporting Goods Company has retired from the retail business to devote its entire time to the wholesale line. Manager Clewley has secured the two upper floors of the Norris Building, at 307 Third Avenue South, Seattle, where the firm is now in its new quarters.

South Bend, Ind.—The Worden Bucktail Mfg. Co. has been bought by Jacob Kuntz, who is now in possession. The firm manufactures all kinds of fishing tackle, and will be continued along the old lines by the new owner.

St. Louis, Mo.—A. E. Beasley, formerly connected with the Simmons Hardware Company of St. Louis, has formed a partnership with T. A. Divine, lately with the Winchester Repeating Arms Co., at Memphis. The firm has purchased the Bond Hardware Co., at 205 South Main Street, and will conduct it under the firm name of Beasley & Diivne Hardware Co.

Stoughton, Mass.—A. G. Spalding & Bros. recently purchased the golf ball factory of the Stoughton Rubber Company, and will operate the plant to its full capacity in the manufacture of golf balls in which they are large dealers.

Toledo, Ohio.—Work on the new nine-story concrete structure to be erected for the Bostwick-Braun Company has begun. Charles W. Hayes in charge of the sporting goods department of the company, states that the firm will allot five times the present space in the new building, which will have a floor space of over 350,000 square feet.

H & R
Greatest Revolver Value for the Money.

Mr. Dealer:
Do you know that the
H&R POLICE AUTOMATIC
Combines Safety and Efficiency
that cannot be found in any hammer revolver of other makes.

IT can be drawn from the pocket and fired with great rapidity because the hammer is sunk in the frame and CANNOT CATCH ON THE CLOTHING, nor be accidentally discharged, yet can be readily cocked for deliberate aim when desired. These safety features are not found in revolvers of other makes. Shells are automatically ejected—making it easy to reload. Made of the best materials, finely finished, and with proper care will last a lifetime, and gives perfect satisfaction to your customers. Write for catalog.

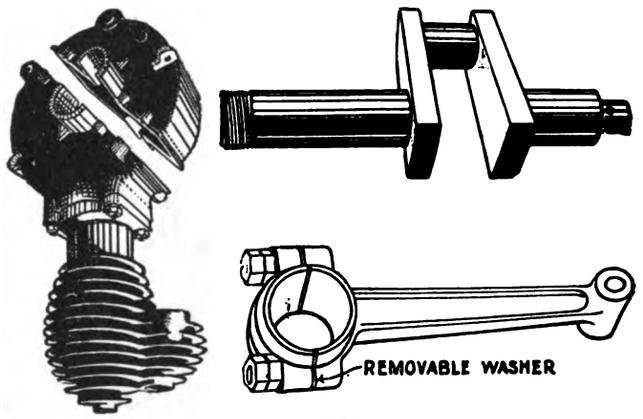
AUTOMOBILE SUNDRIES RECORD



THOMAS AUTO-BI MOTORCYCLE.

The Thomas Auto-Bi Co., Buffalo, N. Y., manufacturers of the famous Thomas Auto-Bi Motorcycle, are now putting on the market their 1907 machine known as Model No. 45. The Thomas machine, in addition to being the first successful American motorcycle, has always set the pace in practical improvements, tending towards the ideal machine. Many of the features, now generally accepted as indispensable to a good motorcycle, were first brought out by the Thomas people, and the

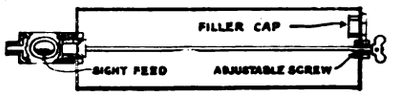
THOMAS AUTO-BI MOTORCYCLE.

1907 Thomas machine stands on the same level regarding the motorcycle trade as does the Thomas car in the auto trade. The aim of this company has been to build a machine that anybody could handle successfully. In order to do this, every unnecessary part has been dispensed with, and every part is made for the exact purpose to which it is put. We give below a brief description of some of the special features:

CYLINDER.

The cylinder and head is cast in one piece, with extra large cooling flanges of beautiful design, giving the cooling surfaces where they are needed. In addition, the unsightly draw bolts running along the side of the cylinder are dispensed with.

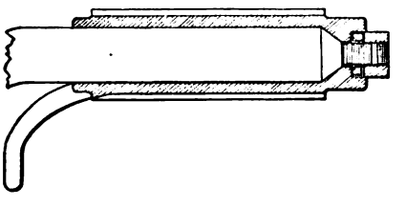
CRANK SHAFT.



It has been customary to make motorcycle crank shafts on what is called "the built up plan." This is a construction of three separate shafts bolted to two fly-wheels. On the Model No. 45 they use a one-piece crank shaft, turned from a drop forging, hardened and ground true. It is impossible to get this out of line, and in removing and replacing it is impossible to get it wrong.

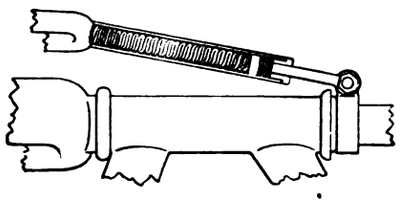
CONNECTING ROD.

Made of phosphor bronze; adjustable to take up wear if necessary.



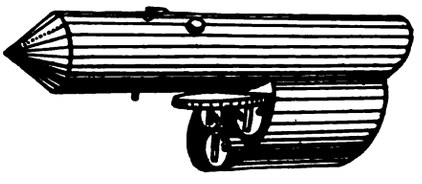
THOMAS CHAIN BELT DRIVE.

Consists of a continuous piece (about thirty feet long) of rawhide, specially prepared for the purpose, one-eighth inch thick and three-eighths inch wide, spirally wound around a three-sixteenth inch steel chain of special construction. Briefly, its advantages are as follows: It is perfectly flexible, due to the spiral winding, which gives it extra strong gripping ability on the pulleys. The tensile strain comes entirely on the leather, which acts simply as a buffer between two metals, the chain and pulley. The chain, being wrapped with leather, does not collect dirt and grit and consequently is practically indestructible.



OIL TANK.

The most important point in the care and operation of a motorcycle is in giving the motor sufficient oil in the proper manner. For the past three years the company have used substantially the same system, with perfect success, which they are now using on the Model No. 45. This device leaves nothing to chance, provided there is any oil in the tank. Oil may be fed gradually, drop by drop, or in large quantities at intervals.



CONTROL.

The grip control used on the Model No. 45 is an improved model of the same device they have used for the past three seasons, being simplified and strengthened. This is positively the only grip control which will not vary the speed of the motor while making sharp turns. It has a positive action. This control releases the compression on the motor by lifting the exhaust lever, thereby placing the entire control of the machine under the rider's right hand without removing it from the bar.

FRONT FORKS.

"Thomas Patent" Cushion Spring Truss, extra heavy, doing away with all vibration on handle-bars, caused by rough roads. All undue strains are absorbed in the cushion above the crown, thus taking the strain off the weakest point.

GASOLINE TANK.

Round form, torpedo point, built very strong, and by reason of circular form not apt to crack at joints. Capacity, six quarts. Needle valve is located in the bottom of the tank, doing away with all intermediate valves. Battery box is attached to and directly under the gasoline tank. Mileage capacity, 125 miles.

WIRE CONNECTIONS.

Every important wire connection is made with the Thomas special flexible wire. The use of these connections has removed all chance of annoyance, due to broken wire connections.

STOVE MANUFACTURERS' RECORD

GURNEY "400 SERIES" HOT WATER HEATERS.

The Gurney Heater Mfg. Co., Boston, Mass., direct attention to the following important features embodied in their "400 Series" Hot Water Heaters:

Large and effective heating surfaces exposed to the direct radiant heat of the fire, fully utilizing the gases and insuring efficiency and economy of fuel.

Round, deep firepots, insuring slow and perfect combustion of fuel, and maintenance of an even temperature for a considerable length of time without attention.

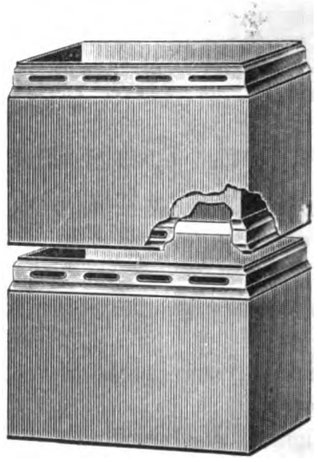
GURNEY "400 SERIES" HOT WATER HEATERS.

Connection of the sections by the use of taper push-nipples outside of fire lines, making the most permanent and indestructible water-joints, and reserving the whole interior of the boiler for fire surface.

Their Improved "Franklin" Grates, as used in this series, have ample air spaces, resulting in the most perfect combustion of the fuel and insure the utmost ease for effectively removing clinkers and ashes from the bottom of the fire. A clinker door is also provided. Coil holes are arranged in the firepots for the introduction of a coil over the fire when so desired for heating water for domestic use. Excellence of design, construction, and best quality of iron and workmanship, assure the greatest durability and efficiency in operation.

COLONIAL RUBY RANGE.

The South Erie Iron Works, Erie, Pa., are the manufacturers of the "Ruby" Ranges so well and favorably known among stove products. They have added to the assortment the Colonial Ruby Range, of which the accompanying cut shows this range fitted with reservoir and high shelf, with duplex or flat grate, and of



COLONIAL RUBY RANGE.

which they take especial pride in enumerating some of the constituent features, which are: Ornamental high shelf, Swinging tea-pot shelves, Nickeled top bands, Nickeled oven-door panel, Nickeled oven-door shelf, Nickeled stationary grate-shaker, Enameled reservoir, Heavy covers and cut centres, Largest oven in the market, Large bailed ash-pan, Large fire-box, Cemented top oven-plate, Duplex or flat grate, Full draw hearth, Heavy durable iron lining; also brick lining.

F. MEYER & BRO. CO.'S HANDY FURNACE PIPE.

F. Meyer & Bro. Co., Peoria, Ill., have made some changes in their Handy Furnace Pipe of which they notify us, as follows:

"We have changed the slip on our pipe; instead of having two tongues as formerly, which necessarily required two points of entrance, that had to fit at the same time, we now have but one

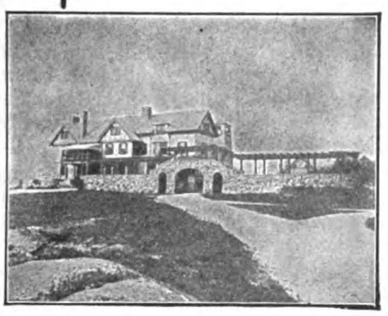
F. MEYER & BRO. CO.'S HANDY FURNACE PIPE.

point to enter. The one end being 5/8 inch larger than the other, it can practically be thrown together. Our slip now is 1¼ inches long, making it the longest used on any double wall pipe. This slip is so arranged, that by means of the two perpendicular sides fitting closely together, it makes an absolutely tight joint, and will not under any circumstances, come apart. The usual loss of time (time means money) and patience, is entirely obviated by the use of this pipe. We have also enlarged the area of all sizes of pipe, by reducing the air space between the two pipes. This insures a larger flow of heated air. We are now installing a lot of new machinery, and will be in a position to furnish any order, either large or small of these new goods, by not later than March 1st."

THE MONTROSS METAL SHINGLE CO.

There is a growing demand for galvanized shingles. Heretofore the objection to this form of roofing was that in the process of stamping, the galvanized coating cracked and scaled off, leaving the iron exposed, and corrosion would follow in a short time. However, this objection has been completely overcome by a prominent roofing concern, the Montross Metal Shingle Co. of Camden, N. J. After many experiments they have finally produced galvanized metal shingles which are first-class in every respect. The shingles manufactured by this firm are made of prime tin plates and galvanized after they are embossed and formed, thereby overcoming the above-mentioned fault of cracking and scaling. By this new method the Montross people are able to produce handsome and durable galvanized metal shingles, which require no attention, and which will practically last as long as the building itself. If you are interested in roofings, we believe it would be to your advantage to write for their illustrated catalogue.

♣



Robinson Furnace Co., 107-109 Lake Street, Chicago, Ill. Catalogue of Tubular Furnaces and Combination Heaters. In addition to the many fine half-tones illustrating these goods, several photographs are reproduced in which these furnaces have been installed. A line of Floor and Wall Registers is also manufactured by this company, as well as Sectional Wall Pipe and Fittings, Stack Heads and Elbows. Numerous testimonials are given throughout the catalogue.

♣

The Syracuse Stove Company, Syracuse, N. Y., in annual session elected the following Board of Directors: William T. Baker, Francis Kernan. Albert K. Hiscock, Thomas F. Baker, William S. Doolittle, Nicholas E. Devereaux and Joseph F. Kernan.

Profitable Heating

KELSEY HEATED, near Providence, R. I.

The Man Who Makes Money

in the heating business to-day is not the man who is selling any kind of a furnace at competition prices, but is the one who is striving to get the best kind of results, and sells his customers a heater that pleases them and brings him more business.

The day is gone by when heating contracts are secured simply by being the lowest bidder.

30,000 KELSEY

Warm Air Generators

have been sold since 1889—and every year because of the good results secured, the sales increase. Not only this, but the Kelsey System is being installed in the very finest class of residences, churches and schools, and are becoming so well known that Kelsey dealers everywhere are soliciting the best kind of heating work, and are securing contracts at prices not made to meet any kind of competition.

There's Only One Warm Air Generator

Why not write us about the Agency Proposition? 800 dealers are now selling.
It might pay you to act quickly.

THE RADIANT HOME STEEL RANGE.

Germer Stove Company, Erie, Pa., in introducing this fine steel range to the trade, call attention to the following points of merit:

In presenting this Steel Range to the trade, the manufacturers do so in full confidence that it is equaled by very few, and surpassed by absolutely no other range, irrespective of cost.

Material. The raw material is of the very best for the purpose known to manufacturers at the present time. The steel is of the very best obtainable. Wellsville, polished and of a heavy gauge. The rivets are of the best Norway Iron, hand driven.

Top. Latest design of key-plate top; heavy griddles, including one sectional; heavy interchangeable frames, with carefully ground bearings. Strongly anchored, so bulging is impossible.

THE RADIANT HOME STEEL RANGE.

Flues and Dampers. New direct-draft damper, operated from top of stove, and so arranged as to heat whole top, although damper is open. Full reservoir damper. Check damper in high shelf or closet pipe, also in broiler door. Draft dampers in ash pit door, also in left end plate. Flues are large and full-sheet; interlined with asbestos and cast strips, being less subject to moisture than sheet steel strips formerly used. Flue clean-out in place of easy access.

Pouch Feed and Broiler. The pouch feed gives an easy distribution of fuel over the entire fire surface, and is so constructed as to make a fine broiler. The door is of the lift style, allowing the fine ashes, which invariably lodge on the underside, to fall back into fire box instead of on to the floor, as in the swing door style.

Fire Box. The fire box is very spacious and equipped with solid iron linings, protected in rear by scientific ventilation, and on their face by corrugations. The linings are as near indestructible as possible to get. Wood extensions at ends of fire box admit the use of extra long wood.

Water Front. All water fronts are tested to a high pressure. Long experience with water fronts and their flue construction enables these manufacturers to produce one that is both a strong heater and powerful circulator.

Grates. The grates are of the universal duplex kind. In passing from coal to wood as fuel, no extra grate is required; but a half turn places the wood faces into position, forming an ideal grate for that fuel. The two bars are suspended in a patent flange, allowing either or both to be removed without disturbing the linings.

Ash Pit. The ash pit is especially large and commodious. Has large bailed ash pan, also ash lip, preventing ashes from falling out on to floor in removing pan.

Oven. The oven is broad, wide and deep; is aluminized with an aluminized rack. It is a very quick and even baker. The top oven plate is protected by a cast iron and cement covering. The bottom plate is thoroughly braced, so there is no possibility of buckling.

Oven Door. The oven door is nicely balanced, requiring only the weight of the hand to operate; closes with a double catch, holding the door snugly in place. The frame is very heavy, precluding the possibility of warpage. Unless otherwise ordered, this door will be equipped with the most reliable thermometer obtainable.

Reservoir. The reservoir is of cast iron, white enameled, and of large capacity. The covers are japanned and cover the entire reservoir. The complete reservoir casing is of cast iron. and the damper is a full one, so that no heat is lost or sheet flue destroyed when reservoir is used.

Nickel. All of the nickel plating is done by the manufacturers. No edge will be found cut through as in so much of the jobbed work. Where the liability of breakage is great, such as high closet brackets, bands, columns, draft register and range left end draft plate, pressed steel is substituted for cast iron.

High Shelves and Closets. Each size stove has its own shelf and closet. The brackets are full depth and made of pressed steel, so all breakage is avoided. All shelves and closets cover the full length of stove top.

NEW CATALOGUE OF LANDAY STEEL RANGES.

Landay Steel Range Co., St. Louis, Mo., manufacturers of the "Matchless" Steel Ranges, with factory at O'Fallon, Ill., have issued a handsome catalogue pertaining to their product, well printed on an excellent quality of paper. In an announcement to the trade, they state: "In getting out our line of Matchless Steel Ranges, while we realize that a range should be built more for service than for style, we have not lost sight of the fact that there is a growing demand from the masses for a steel range wherein workmanship, quality, economy and elegance are combined, and yet, be sold at a right price." The catalogue contains several illustrations of their Series Nos. 218, 318 and 3120. A statement of terms at which these ranges may be purchased is included in the catalogue, as well as information regarding shipments. The company call special attention to their Warrant, Guarantee and Security Bond, showing that the "Matchless" line is backed by the strongest guarantee bond ever issued. Several new style ranges are shown in a number of pages of addenda, showing those that have been added to their line since getting out their catalogue.

THE COMPLETE ROOF.

Did it ever occur to you that Cortright Metal Roofing is the only complete roof; the only self-contained roof?

You must add tin to either stone slates or wood shingles.

You must add solder to plain tin or copper.

You must add cement or asphalt to tiles.

You add nothing to Cortright Metal Roofing. It contains everything but the nails to fasten it on. Then again:

If you would have a stone slate roof, you must have an expert slater and an expert tinner.

If you would have a wood shingle roof, you must have a skilled workman—a hybrid roofer—half carpenter, and you must go again for the expert tinner.

If you would have a tile roof, you want another hybrid—part paver—but highly skilled.

That's two kinds of materials and two kinds of workmanship—and all kinds of apprehension for the future of the roof.

But, for Cortright Metal Roofing you only want a hammer. some nails, and practical mechanical knowledge.

Cortright Metal Roofing is not self-laying; but you can hardly go a mile in any direction, in a fairly-populated country, without rubbing against some one who can put it on, and make a better roof than the greatest roof expert in the world can make with stone slate, tiles, or plain tin. And, finally:

You pay for Cortright Metal Roofing only a moderate price. less than for either stone slate or tiles, and perhaps no more than for wood shingles.

Nothing to rust, nothing to rot, nothing to curl and split, nothing to leak. All you do is to be reasonable with a Cortright Roof—a little paint now and then.

WHITE MOUNTAIN FREEZERS

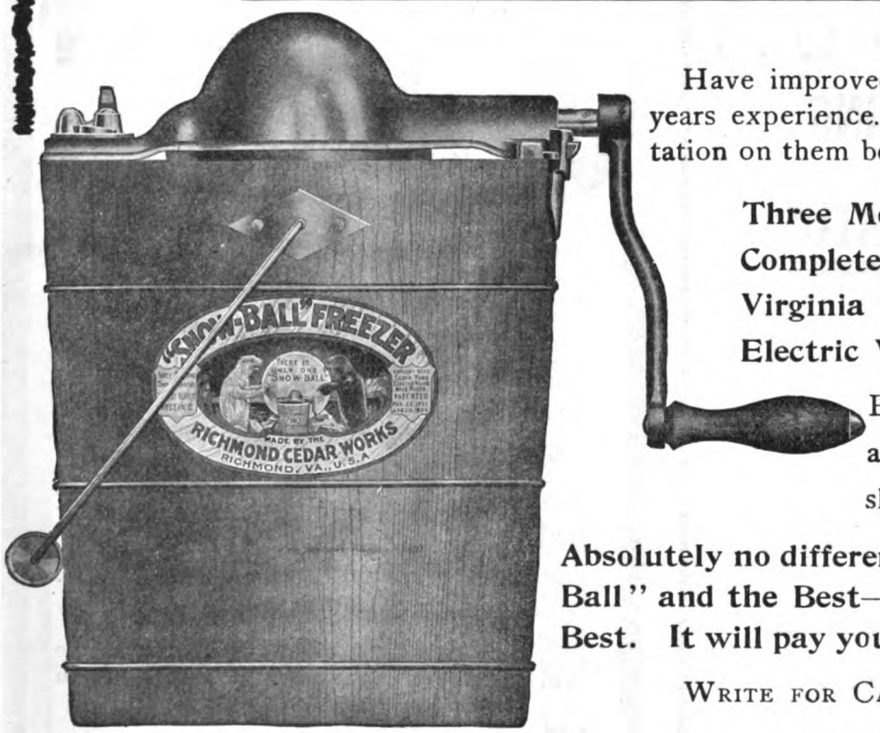
Head The List

of Freezers for 1907 because for 30 years they have enjoyed the enviable distinction of being first in quality---first in mechanical improvements and first in producing the best ice-cream.

The Secret

of their supremacy lies in **Their Construction.**

No other freezer is made like the White Mountain, with its Triple Motion—
Duplex Malleable Iron Beaters—
Durable, Water Proof Tubs—
Well made and perfect fitting parts.



Buy White Mountain Freezers

You'll find them easiest to sell. Leading Jobbers Everywhere recommend them.

The White Mountain Freezer Co.

NASHUA, N. H.

"SNOW-BALLS" FOR 1907

Have improved with age through our 38 years experience. You can stake your reputation on them because they have

Three Motions
Completely Encased Gearing
Virginia White Cedar Tubs
Electric Welded Wire Hoops

Every "Snow-Ball" will freeze a smooth, velvety cream in the shortest possible time.

Absolutely no difference between the "Snow-Ball" and the Best—The "Snow-Ball" is the Best. It will pay you to handle them.

PROGRESSIVE DEALERS

Always handle the best—The "EXCELSIOR CARPET STRETCHER and TACK HAMMER COMBINED" satisfies the most exacting customer. Housekeepers instantly recognize its merits as a time, labor and temper saving device, making sales easy. Light, Strong, Easily Operated, folds compactly, each in a neat box with instructions and fully WARRANTED. Teeth will not tear carpet. Stretcher locks in any position and can be instantly released for new setting without bother of backing up Tooth Bar, as with some others, or re-adjusting in any way. Stretches 16 inches of carpet each time set, more than any other. A Tack Hammer is part of the machine and therefore always at hand. NOT SOLD TO CATALOG HOUSES, hence a PROFITABLE specialty for the Dealer. Ask your Jobber for the "EXCELSIOR" and accept no other "just as good".

Made only by

PROMETHEUS

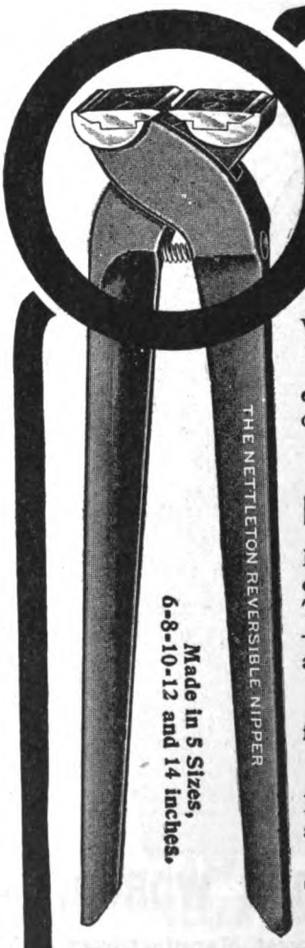
ELECTRIC COOKING and HEATING APPARATUS

For household or industrial purposes are creating a stir wherever introduced or used. Why? Because they differ in appearance in no way from utensils heated by gas or other me ns and are as simple to operate—in fact more simple—for

A FLEXIBLE ATTACHMENT CORD

attached to any lamp socket and connected with any "Prometheus" apparatus—Irons, Kettles, Stoves, Chafing Dishes, Water or Food Heaters, Radiators—will heat them in less time, at less cost and less labor than any other apparatus on the market. No Smoke, No Soot—No Danger from Fire or Explosion—But more profit.

You ought to carry this line this year. Ask us about it.



THE PROMETHEUS ELECTRIC CO.

236 East 43d St.

NEW YORK

ONE-HALF THE COST

and more—is saved by any mechanic buying the Nettleton Reversible Nipper.

Each "Nettleton" is equal to two nippers of any other make, for

THE NETTLETON REVERSIBLE NIPPER

has *two* fine cutting edges on *each* blade. Better still: The Nettleton is adjustable—reversible—interchangeable.

Costs you half the effort to sell it.

Talk Nettleton to the Nipper user in your town and watch them sell!

What is Roofing Tin?---How is it Made?

As a Property Owner or Architect did you ever ask these questions and receive a satisfactory reply?

We know there are many men who would like some definite information along these lines, and have, therefore, compiled a book entitled "FROM UNDERFOOT TO OVERHEAD" which carefully describes the process of making Roofing Tin from start to finish. The information it contains is invaluable to you if you are interested in building, and we will promptly send you a copy if you will write for it and mention this publication.

By using any of the Brands shown below you can procure the very best protection from the elements. These stencils appear in the corner of the sheet, and you will notice the amount of coating carried per box of 20x28-112 sheets is clearly shown. This protects you from substitution—a point which we believe you will fully appreciate.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

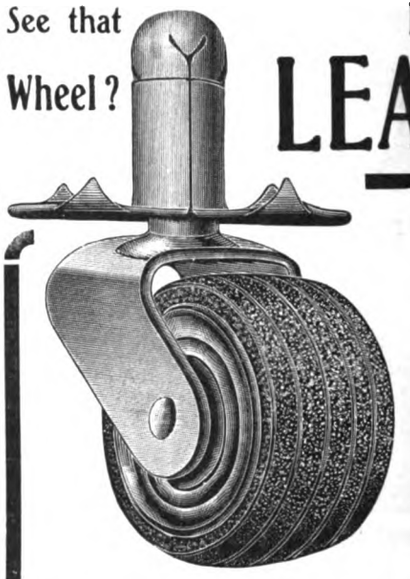
Here's Our **"Big Four"**

line of Mowers, in use in all parts of the world. Do you sell them? If not—send at once for "BIG FOUR BOOKLET" and prices. The reason they sell so well is because they are the

Genuine Philadelphia Mowers.



We make 17 styles hand mowers; 6½ inch to 12 inch wheels; 3 to 8 blades, and 5 styles horse Mowers.

Handle the Genuine Philadelphia Line of Mowers and you'll have plenty of repeat orders to keep you busy.

See that Wheel?

It's LEATHER

The **EASY TURNING, EASY ROLLING**

"FAULTLESS" CASTER

puts a new "spring" into the furniture.

It's so entirely different from any other that we call it **"THE CASTER THAT NEVER REFUSES TO TURN."** That's owing to our patent "Faultless" socket. It appeals to one's reason—that's why it's such a wonderful seller.

The FAULTLESS CASTER MFG. CO.

NEBRASKA CITY, NEB.

Quality Tells

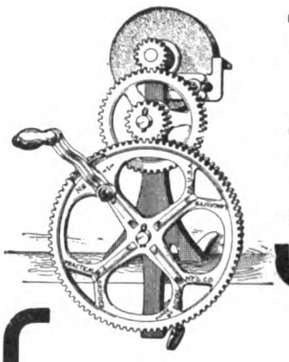
When Henry Disston was asked the question:

"What do you put in your saws?"

He replied:

"Good steel and honest work."

UPON THIS FOUNDATION IS BUILT



DISSTON QUALITY

"If you want a saw it is best to get one with a name on it that has a reputation. A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."

HENRY DISSTON & SONS., Inc.

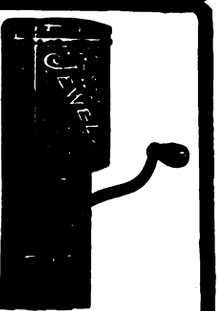
GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

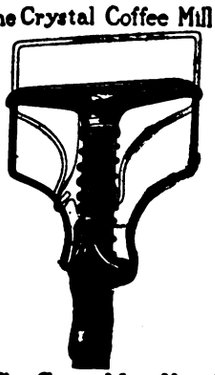
will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.



We show on this page four articles that are money-makers for the dealer.

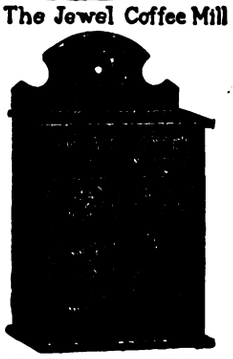
The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

PROGRESSIVE DEALERS

Always handle the best — The "EXCELSIOR CARPET STRETCHER and TACK HAMMER COMBINED" satisfies the most exacting customer. Housekeepers instantly recognize its merits as a time, labor and temper saving device, making sales easy. Light, Strong, Easily Operated, folds compactly, each in a neat box with instructions and fully WARRANTED. Teeth will not tear carpet. Stretcher locks in any position and can be instantly released for new setting without bother of backing up Tooth Bar, as with some others, or re-adjusting in any way. Stretches 16 inches of carpet each time set, more than any other. A Tack Hammer is part of the machine and therefore always at hand. NOT SOLD TO CATALOG HOUSES, hence a PROFITABLE specialty for the Dealer. Ask your Jobber for the "EXCELSIOR" and accept no other "just as good".

HARDWARE

COBB, WHYTE & LAEMMER CO.

The Cobb, Whyte & Laemmer Co., Chicago, Ill., has been incorporated with a capital stock of $30,000 to conduct a general Hardware business. The incorporators are C. J. Cobb, T. P. Whyte, J. E. Laemmer and George E. Noyes. About April first they will open a store at 45 South Clark Street. The first three gentlemen have been connected with the Orr & Lockett Hardware Co. for a number of years, while George E. Noyes has been connected with the Wells & Nellegar Co.

THOMAS AUTO-BI MOTORCYCLES.

The Thomas Auto-Bi Co. report the addition of $25,000.00 to their capital stock. This was made necessary by the constantly growing demand for the famous Thomas Auto-Bi motorcycle and accessories, and shows the growing tendency of the times as regards the motorcycle industry. Mr. Chadeayne, the secretary and treasurer of the Thomas Auto-Bi Co., is about to start on an extended tour of the Western States, to look after the interest of the Thomas Auto-Bi agents in that territory and renew old friendships made on his celebrated transcontinental motorcycle record trip.

GENEVA CUTLERY CO.

The Geneva Cutlery Co., Geneva, N. Y., report a state of great improvement at their works in Geneva in that they have approved the plans of their new brick building to be erected as soon as the weather permits. Size of building 100 by 50 feet. This building will increase office space, stock room, honing room and etching room.

The growth of the company has been very rapid during the past four years. Their factory capacity has been increased from about 25 dozen per day to 300 dozen per day. While they manufacture a large line of razors under their own brands, their specialty has always been contract work, that is, making special individual lines for their customers under their individual brands or trade-marks.

Their plant is unique in this way. They have the only force of skilled German workmen on this class of work in the country and as they use special Kyser-Ellison steel of the same grade as is used in Solingen shops, they are able to give their customers a line of razors that are in every way equal to the finest blades made in Germany, and they have the advantage of being able to make much more prompt deliveries than can be secured on import order under the best of conditions. Also, they are able to save their customers from five to twenty per cent. from the best import prices.

They regard it always a pleasure to submit samples or to send a representative direct from their plant to call upon a prospective customer. Samples from the trade are cheerfully duplicated and prices quoted on same without expense.

THE ROLLER SKATE INDUSTRY.

M. C. Henley, the well-known Roller Skate manufacturer of Richmond, Indiana, the original maker of these goods on a large scale, and who has made during the past twenty-eight years far more Roller Skates than all other skate manufacturers combined, reports an immense business for this season. The Henley plant, which is the largest factory in the world for the exclusive manufacture of roller skates, with a capacity of 2,000 pairs of skates each day, is working overtime to keep up with orders. Shipments have just been made to following prominent rinks and cities.

"The Stadium," Montreal, 1,000 pair; Luna Park, City Mexico, 250 pair; Latrobe Amusement Co., Latrobe and Blairsville, Pa., 1,000 pair; Louisville, Ky., 3,500 pair; Bishop Clay's Mammoth Rink, Lexington, Ky., 350 pair; Victoria Rink, Toronto, 600 pair; Lakeside Park Rink, Dayton, 800 pair; two rinks Johnstown, 1,000 pair; Pittsburgh, 1,000 pair; Meridian, Miss., 350 pair; Altoona, 500 pair; Jackson Rink, Jackson, Miss., 200 pair; Cataract Roller Rink and Riverway Rink, Niagara Falls, N. Y., 750 pair; Newark, 500 pair; 20 new rinks, within a radius of 100 miles of Pittsburgh, 10,000 pair.

Shipments have also been made during the past sixty days to not less than 200 other rinks requiring from 200 to 500 pair each, in addition to a large number of minor rinks all over the country. Although the season is advancing Mr. Henley reports a rapidly increasing demand for Roller Skates. Contracts have been made with numerous Amusement Parks to furnish Henley Skates for new rinks which will be opened and operated during the coming amusement season.

AUTOCYCLE IS LATEST IN POWER RUNABOUTS.

A two-passenger autocycle runabout has been designed to embody in one vehicle the speed, comfort and utility of the automobile, with the simplicity, lightness and cheapness of the bicycle. The body of the autocycle is carried upon a front steering and rear driving wheel placed tandem in the center line of the vehicle. Upon either side, connected by an axle, are smaller balance wheels which maintain the equilibrium of the vehicle, but ordinarily take little or no weight. By the use of a specially designed link check spring device these wheels remain at all times in contact with the roadway; they turn in unison with the front wheel, each at its proper angle in rounding a curve.

Power is obtained from a two-cylinder, air-cooled motor, developing six horse-power at 1,800 revolutions. Drive is direct by a belt from a pulley on the main shaft of the engine to a pulley upon the rear wheel. The motor equipment includes float feed carbureter, four dry-cell batteries, two coils, oil feed, and three-gallon gasoline tank containing fuel for 120 miles. The rear driving wheel revolves with an axle carrying a three-quarter elliptic spring, upon either side, supporting the extended arms of the chassis. Ball bearings are fitted in the revolving axle, and on the side opposite to the belt pulley is an expansion brake.

Steering is through an inclined column with the ordinary type of hand wheel. The steering head turns upon thrust ball bearings. Throttle and spark control is by means of levers, immediately under the steering wheel.

The body of the autocycle is of wood, the seat and back upholstered in machine-buffed leather. The total weight of the machine is 380 pounds.

SOUTH AMERICAN TRADE.

ARGENTINA.

Consul-General Alban G. Snyder calls attention to the fact that there is practically no direct trade communication between the United States and Buenos Aires, all American goods imported being sent by the way of England. Mr. Snyder shows the bad effects of this situation, and tells in his correspondence how necessary to its profitable continuance is an American line of steamers direct from this country, improving the shipping facilities between this country and Buenos Aires. He says further:

There is at this port an organized chamber of commerce which appears to be impartial in its attitude toward foreign countries, and where a few American technical and trade journals are to be found. Only members are admitted to this chamber of commerce at Buenos Aires. In the consulate-general a number of such publications are kept on file for the free use of the public.

In Buenos Aires there are about fifteen foreign banks, not one being American, and it is thought that the establishment of an up-to-date American banking house would greatly better the country's interests in Argentina. Much foreign capital is invested in Buenos Aires, mostly English, all railways, street-car lines, gas plants, etc., being owned and operated by English or German syndicates, and it is noted that English and German capital continues to be invested in such enterprises. There appears to be an equally good opportunity for the investment of American money.

With a view of extending American trade with Buenos Aires, and the Argentine Republic generally, it is suggested that American commercial houses be established and Spanish-speaking agents be sent with a view of ascertaining the needs of the people and building up a bona fide and permanent trade. This, together with good packing and good and fast transportation, would tend to improve the outlook for the sale of American goods. Trade with Buenos Aires may be materially increased if given sufficient attention. The following American merchandise would find a good market:

Watches, garden tools, haying tools, farm harness, metal bedsteads, carts and carriages, builders' Hardware, well-boring machinery, dairy goods—large demand, groceries and canned goods, leather, and all manufactures of; electrical appliances and supplies, stoves, especially all kinds of oil stoves; office furniture and office appliances, all kinds; machine tools and all classes of small machines, agricu'tural machinery—sales already very large, furniture, petroleum lamps, and American novelties; wall paper—market must be studied for designs and size, paints and varnishes, now imported from France and Italy.

MARCH 25, 1907

Editorial Trade Review

That the future will bear good tribute for the Hardware trade especially, we have only to notice the number of immigrants that are daily seeking these shores, prepared to cast their lot with us; and at the same time become familiar with the improved quality of these new arrivals, and realize the class is changing, and represent no longer the mass of people who, having been unsuccessful in their former pursuits are willing to try to better themselves in a new country; but they are workers, men who are willing with an insistent, indomitable pluck to settle in this broad land, and fight luck and destiny for an acknowedged livelihood, with all that it implies.

If supplies of every description were only readily obtainable from the manufacturers in the increased quantities demanded by the conditions of trade, only supplying the needs of the people and without speculation backing it up, everybody would be doing all he could, and the wheels of business activity would all be at work, with no enforced idleness anywhere; but, alas! what with the tardy delivery of raw material; the shortage in cars by the railroads; scarcity of labor, the additions to a growing working force that constantly demands new recruits to prepare for the future, the manufacturer finds the paths of his energies anything but a smooth one, and his promised and anticipated deliveries so far behind that the weeks lengthen into months, and the expectant jobber, with his incompleted stock, is in a state of disgust. Before they have filled the orders booked months ago, they find a fresh stock of orders assailing them, booked at higher prices. The field of our industry is in a healthful state, and one that will continue indefinitely as long as the population continues to grow according to the statistics of the immigration department.

As goods have not had any phenomenal advances in prices, with rare exceptions they have been the kind that permitted the sales at old prices of goods bought before the advance up to January first; it behooves the dealers, especially the retail, to mark up their stocks, and get all the advantages accruing from the prosperity inseparable from these busy times; and the retailers shouldn't be foolish enough to waste opportunities like this, but believe in the money-making chance it brings. Many a retailer finds to his sorrow that he is paying higher prices for many goods this Spring, which in the absence of a marking-up reduces his own profits from his customers materially; and when he foots up profits on increased sales the percentage is lessened, while the volume of trade is so much greater. A disappointment ensues, and he blames every one for what was laziness on his part—marking up stock to date; it is wisdom to do it, and not overdo it, too largely, for a "fifty per cent. and upwards" profit only affords the department-store a chance to be satisfied with a profit of twenty-five to forty per, and "take the dicker." Merchants are already believing that this year will eclipse any previous one in its volume of business, and if only the goods can be obtained at the outset, it can certainly become a record year.

DON'T FORGET.

That a good clerk never makes the same error twice, while an indifferent one does, and generally loses out.

That you don't need to tell of your ability, if you possess any. Those interested will find it out.

That the fellow who accomplishes most is the one who makes the least fuss about it.

That the man who is always complaining is the one with the frayed coat-binding and ragged shirt.

That it pays to smile all the time. "Smile and push" is the mighty good motto to stick to.

That the forgot-the-change habit is quite prevalent among a good many, and that a cash-register system promptly conducted eliminates it.

That the less some fellows have to do the less they do do.

That the man who sits down the minute the boss goes out is very often seen standing around waiting for a job.

That the one who has to be told what to do, when to do it, and how, is usually the fellow who thinks he knows it all.

That it's a good thing to learn to know the difference between what's yours and that which belongs to some one else.

That it is not volume of business alone that makes one prosperous. It's making each sale yield a margin of profit that counts.

That the clerk who obeys orders to the letter has the least cause for regret.

That it pays to do as you are told rather than argue the point about doing it some other way.

That a good many druggists haggle over a nickel and let many dollars slip through their fingers.

That he who smiles and walks away lives to smile another day.

That knowledge of the stock makes a clerk's service valuable, while he who has to ask is generally in the way.

A POINT FOR THE SEED TRADE.

Do not ignore the garden-seed trade if you have gardeners or country residents among your patrons. Aside from the fair degree of profit, they serve well to introduce you to the gardener and his Hardware wants just when he wants them. Seeds are a necessity to the farmer and gardener. He has to have them and never dreams of disputing the fact. With implements it is different; he may try to get along with the old ones, even though they are years behind the times and half worn out in the bargain. While he is laying in his seed supply, it is an easy matter usually to get him interested in good tools of his calling, whether he expects to buy or not. A negative mind is reasonably good soil to till until it becomes positive; it depends a good deal on the skill of the salesman whether the transition will be to positive refusal or to a purchase. So long as a man has not particularly considered a purchase, or at least has not concluded not to purchase, there is hope.

At least nine out of ten men who come up to the garden-seed counter come in one of the following conditions of mind. Either they have not thought particularly about purchasing new seeding or tillage tools, or else they have been considering it with some degree of desire. Whatever their conclusion with themselves, the chances are that with the need or the value of good tools staring them in the face, as it is doing when the seeds are being purchased, a favorable consideration of some article can be stirred up by the alert salesman.

Digitized by Google

There is no other time so favorable for selling goods as that time when their value comes home to the consumer through existing circumstances. That is just the sort of condition that faces the buyer of seeds; hence the seed counter, in addition to its own profits, is a most prolific source of producing that psychological moment every true salesman is so ready to turn to his own advantage.

DEFEATING THE CATALOGUE HOUSE.

A Titusville, Pa., dealer relates an experience with catalogue-house competition which not only illustrates how possible it often is for a wide-awake man to turn adverse circumstances to his own advantage, but ought to teach several lessons in meeting illegitimate competition besides.

One of his lines was a certain style cabinet of good quality and fair living price. An old customer of his house, after looking at his cabinet, one day informed him that he could get practically the same article $2 cheaper from a big mail-order concern and would place his order where he could do the best. As the home dealer's price, after deducting freight charges on the Chicago article, was still about $1 higher, the home man joined with his recreant customer in an experiment; they sent together for the cabinet, which was to be delivered to the store before being taken to its final owner's home.

On its arrival it was set up in the store beside the home merchant's cabinets and thoroughly compared at close range. No favors were shown, no questions asked, the purchaser was not interfered with in any way. After going over the two cabinets to his own satisfaction he said to the local merchant:

"If you will take this cabinet off my hands I will take one of yours and pay you the $2 more for it."

The merchant readily agreed; he had use for the mail-order article. He left it standing among his own cabinets, with the mail-order house price plainly marked upon it, his own being similarly marked at their regular price. He advertised both kinds in the local papers at the two prices. He showed the one as freely as the other. People came and looked at the two makes, some attracted by curiosity, some by the low-priced cabinet. After examining both thoroughly, they invariably took the higher-priced article, leaving the cheap one still on the merchant's hands. There was too much difference in the quality for even the chronic cheap bargainer to overlook. Still, if the same cabinet had been offered by some distant mail-order house, it would have proved attractive to some one who had no chance to examine it personally, and would undoubtedly have been sold several times over in the same length of time. When put in close comparison with staple goods, nobody wanted it at even the low price for which it was offered.

Still it proved a profitable investment for the merchant. It vindicated him with all who knew the circumstance. Its low price attracted people in to examine it and its low quality then insured a favorable opinion of the prices on the better grade goods. It furnished many a wholesome object lesson not only in cabinets, but in general catalogue-house quality to people who were contemplating sending away for other articles. It made people hesitate to purchase what they could not see, and doubtless kept many a dollar in the home trade that otherwise would have gone a-wandering.

It should not be forgotten, though, that this experiment had a very different effect than is frequently the case where a local dealer habitually carries a worthless line of goods for the cheap trade. In the latter case he identifies himself and his store with that sort of trashy, unreliable goods. In the case of the Titusville man, all who examined and discovered the quality of the article were made to understand that this was not one of the merchant's own line, but only a sample of the sort of stuff the catalogue houses were sending out which he had good-naturedly taken off the hands of a victim for demonstration purposes.

A very similar experience rewarded the investigations of an Erie Hardware dealer. One of his regular customers sent to a catalogue house for a stove of the same make and same style as one the Erie man was offering at considerably more money. As both were made by the same firm, it looked as though there was nothing to compare in this instance except the price. However, the merchant arranged with his ex-customer to have the stove delivered first at the Hardware store for a little investigation. On its arrival the stove was placed upon the scales and weighed. Then one was taken from the merchant's stock; one of the same make and number as the catalogue-house product was claimed to be. To all outward appearances the two stoves were identical, in brand, measurements, finish; but the scales told a different story. The lower-priced stove was enough lighter to a little more than make the difference, figuring the extra weight of the local dealer's stove at the regular price per pound of raw material. It was the old story of a stove manufacturer putting out two kinds of goods under one brand; the one to sell to the dealer and the other to help the catalogue-man gull the public with.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

BRICK BURNING—WHEN IT MAY BE ENJOINED AS A NUISANCE.

QUESTION: I am the owner of about forty acres of land where I live. About 500 feet from my house a firm has started a brick yard. They use coal in burning the bricks and the gas and fumes are killing my orchard and timber. What can I do about this?

REPLY.—The best thing to be done is to bring an action for an injunction and damages against the owners of the brick yard on the ground that it is a nuisance. Brick making is a useful and necessary employment and is not a nuisance per se. It may even produce some discomfort and injury and will not be enjoinable as a nuisance. There are also cases where the damage to one complaining is small and trifling and the damage to one causing the nuisance will be large in case it be enjoined, in which case an injunction will be denied. Much will depend upon the character of the place where the business is carried on. Much, too, will depend upon the extent of the damage. These are questions to be determined in each particular case, but the principle is clear that your neighbor has no right to so use his property as to cause you *material* annoyance, inconvenience or damage. If he does this the court of equity will intervene and enjoin him.

MINOR MUST RETURN WAGON.

QUESTION: I sold a wagon to a minor for $40. He still has the wagon, but says I cannot make him pay for it, because he is under 21. Can he keep the wagon and refuse to pay for it, or can I sue him?

REPLY: As he is a minor and the wagon is not what would ordinarily be called a necessary, he can successfully avoid his contract and refuse to pay the purchase price on the ground of infancy. But in order to do so he must return or offer to return the wagon which is in his possession. The defence of infancy is "a shield and not a sword." The law protects the minor from liability on his contracts by permitting him to disaffirm; he has no right to keep what he has received.

EFFECT OF RELEASING JOINT WRONGDOER.

QUESTION: A man was injured by a collision between two vehicles. The accident happened because of the combined carelessness of the drivers of both. Afterwards he accepted $50 from the owner of one of the carriages in settlement of all claims against him and gave him a release. Will this prevent him from collecting anything from the other?

REPLY: The rules as to the liability of persons who join in committing a wrong are well settled. The person injured may sue one, any or all of them, and may hold each responsible for the entire damage. But it is equally well settled that a release of one operates as a release of all. It follows that the person injured, having accepted one satisfaction for the injury, cannot recover anything against the other wrongdoer.

FRAUDULENT SALE—RIGHT TO RESCIND.

QUESTION: A firm of commission merchants induce a dealer to sell them a carload of produce, representing that they are solvent and that their credit is good. This representation is in fact false. They resell the produce in the open market before the dealer learns that they are bankrupt. Is there any way in which he can get back his produce?

REPLY: Ordinarily a person who is induced to sell goods to another by fraud, may either sue for damages or rescind the contract on learning of the fraud and get back the goods which he has delivered. But if the fraudulent vendee sold the goods to a third person who purchases them for value and without notice of the fraud, the right of the person defrauded to recover the goods is lost. He may still sue the fraudulent vendee for damages. But he cannot rescind the contract and get back the goods after they have once passed into the possession of an innocent party.

CONTRACT IN GENERAL RESTRAINT OF TRADE ILLEGAL.

QUESTION: A man sold out his business, stock, and good will for $1000 agreeing by the same contract never to carry on any competing business in the State of Massachusetts. The purchaser paid five hundred dollars on account of the agreement and took

Digitized by Google

possession of the property. He now refuses to pay the balance, alleging that the contract was illegal. Can he do so?

Reply: The purchaser is right. A contract in general restraint of trade is illegal in the State of Massachusetts. An illegal contract is void. No action can be brought to collect the balance of $500, because the consideration is in part illegal, and the promise cannot be enforced unless it rests upon a legal consideration. It seems a hard case for the seller, but such is the law.

SEMI-CENTENNIAL OF RICHARDS & CONOVER HARDWARE CO.

The semi-centennial of the founding of the Richards & Conover Hardware Co., of Kansas City, Mo., was celebrated on the fourth of March. From the humblest of beginnings the house has grown until it is now one of the greatest Hardware houses in the West, doing a business of over $3,000,000 per year. Their first store was opened to the public patronage on March 4, 1857, the day on which James Buchanan was inaugurated President of the United States. In 1862 W. E. Chamberlain moved a stock of goods from Kansas City to Leavenworth and formed a partnership with J. F. Richards. Four years later Mr. Richards bought Mr. Chamberlain out and continued in business alone until 1870, when Colonel John Conover, who had been in the Hardware business when the war broke out, and had returned from the war a few years previously, went into business with Mr. Richards, the firm being styled J. F. Richards & Co. This business relation has been maintained for thirty-seven years. In 1875 the Kansas City branch was established at 427 Delaware Street. In 1881 the firm name was changed to the Richards & Conover Hardware Company, and the building at the southeast corner of Fifth and Wyandotte Avenues, now occupied by the Pittsburgh Plate Glass Company, was erected and occupied by the firm. In 1884 the Leavenworth business was sold out and in 1902 the big six-story building at the northwest corner of Fifth and Wyandotte Avenues, now occupied by the firm, was erected. A branch was located in Oklahoma City last year. An interesting souvenir of this fifty years' history is a reproduction, just issued in commemoration of the event, of the original handbill printed when Mr. Richards went into business in Leavenworth fifty years ago. Kansas was then a Territory. The bill reads: "Hardware for Emigrants, Farmers, Miners and the Whole People of Kansas and Missouri at the New Three-Story Brick Building Corner of Third and Delaware Streets. Call at J. F. Richards' Pioneer Hardware Store and Agricultural Warehouse, Leavenworth, K. T." A number of old-fashioned cuts are shown, illustrating styles of Hardware and implements, many of which are no longer seen. Fifty years ago implements were handled by Hardware houses. Ox yokes of fine walnut wood, ox chains and ox shoes were some of the things sold then which are no longer sold.

AMERICAN CATALOGUES.

TONS ANNUALLY DESTROYED IN AUSTRALIA—REMEDIES SUGGESTED.

The following report from Special Agent Harry R. Burrill, written from Sydney, furnishes information about catalogues and other printed matter sent through the foreign mails which will be serviceable to business men. He writes:

Tons of American catalogues are destroyed every year by the customs authorities of Australia for the reason that business men here to whom they are addressed by manufacturers and exporters of the United States decline to pay the duty of 3d., or 6 cents in American money, per pound, assessed on them as advertising matter imported for distribution. This is a loss which can not be estimated in dollars and cents. Because of negligence or unfamiliarity with the tariff provisions of Australia these descriptive circulars, catalogues and price lists generally fail to reach their destination, and consequently all opportunity for trade which might be obtained through their perusal is lost. This useless waste of money, time and opportunity can easily be avoided if American exporters who desire to circularize the trade will discontinue their present methods and adopt a system that will insure prompt delivery and acceptance of their printed matter.

REMEDIAL MEASURES.

The following suggestions are made after conferences with the Comptroller General of Customs, the Postmaster-General, and the Collector of the port of Sydney, and may be relied on as the best remedy to be applied:

If the American exporter has his Australian mailing list in the home office he should carefully address the catalogues, and then by the same mail he should send to the Comptroller General of Customs, or the Postmaster-General, or the Comptroller of Customs at Sydney, Melbourne, Brisbane, Adelaide, Fremantle, or Hobart (Tasmania), as the case may be, a notification to the effect that he is sending to ——— by parcels post, via San Francisco or via London, ——— catalogues weighing ——— pounds and inclosing ——— (dollars and cents, or pounds, shillings and pence) in payment of duty.

The official receiving this communication, with preferably an international money order inclosed, will immediately notify the postoffice authorities, and the catalogues will be forwarded to their destination without delay. The printed matter should be carefully weighed before it leaves the home office, and the money order, draft or check sent to the Australian customs or postoffice official should amount to six cents a pound full weight. This is the English method, and it has given uniform satisfaction.

CATALOGUES MAY BE CONSIGNED.

Another plan which may be suggested is that the catalogues be consigned to a representative in one of the ports of Australia with instructions that they be mailed immediately on their arrival. Accompanying the letter of instructions should be a money order sufficient to cover the customs charges. In this connection it would be well for the exporters of the United States to bear in mind that the postal rates in the Commonwealth for printed matter of this description are, not exceeding two ounces, one cent; between two and four ounces, two cents; every additional four ounces or fraction thereof, one cent.

If an American manufacturer or exporter should desire to send out, in large quantities, catalogues or advertising matter coming under that head, it might be advisable for him to ship by freight from New York or San Francisco and consign the shipment to some house in Sydney which makes a specialty of wrapping and addressing. If this plan should be carried out the duty might be prepaid or the necessary papers, together with the amount of duty, payment for wrapping, addressing and posting, and the list of names and addresses should be mailed to the consignee. For the information and convenience of any exporter who may desire extensively to circularize the trade, and whose object might be defeated if it were necessary to make arrangements through a correspondence requiring at least two months, attention is directed to a firm at Sydney, whose name is on file with the Bureau of Manufactures. It has branches in all the principal cities of Australia and New Zealand. The general manager assured me that the Sydney office or any of the branches will attend to all landing charges, and wrap, address, stamp and mail the catalogues on receipt of the letter of instruction and the necessary remittance. The charge for wrapping and addressing would be 12s. 6d. or, approximately, $3.12 per 1,000 in American money.

FULL POSTAGE SHOULD BE PREPAID.

Great care should be taken to avoid short postage on Australian letters. Carelessness of this kind is a source of annoyance and no little expense to the business men of the Commonwealth, and they express opinions of such methods in no uncertain terms. They insist that there is no excuse for American houses making these errors, and, as an object lesson, point to the practice of several of the leading English shippers, who prevent mistakes of that kind by having special envelopes marked "Foreign Post" for their foreign correspondence.

Letters addressed to Australia require five cents for each half ounce or fraction thereof, and if this postage is not fully prepaid the addressee, under international postal regulations, is liable for the deficiency, and, in addition, a penalty of double the amount of the deficiency is exacted. Starting out an ounce letter for Australia with a two-cent stamp affixed makes it a rather expensive luxury for its recipient here, and as a rule the correspondence ends then and there. Carelessness of this kind has unquestionably been detrimental to the expansion of American trade in the Commonwealth.

American manufacturers and exporters should understand that a large majority of the Australian houses have a standing rule that they will not accept catalogues, circulars, or other advertising matter on which duty is charged. They do, however, accept sealed letters on which they are penalized for insufficient postage, but it is safe to say that such acceptance has not proved successful in promoting business transactions between the American houses and their Australian correspondents. By abandoning such practices and adopting the suggestions of those who are on the ground and are thoroughly in touch with the situation, the manufacturers and exporters of the United States will not only remove an obstacle to trade but will do away with an unmitigated nuisance.

NEW REGULATIONS IN EUROPE GOVERNING AUTOMOBILES.

The Kingdom of Saxony uses numbers alone for its different districts, these numbers being followed immediately by the numbers of the individual cars. The other States of Germany, the remaining grand duchies, duchies, principalities, and the three cities—Hamburg, Bremen and Lubeck—are designated by special letters, followed in every case by the number of the individual car.

NIGHT ILLUMINATION AND HEAVY DAMAGE LIABILITY.

New regulations have also been prescribed for the manner in

Digitized by Google

which the numbers are to be placed upon the car and particularly in regard to their illumination at night. The use of oil lamps on the side or in front of the number on the rear of the car is forbidden, and in some States only transparent lights are permitted, notably in Prussia, while in others the illumination of the number is permitted by the placing of an electric light above the number, which is, however, in no case allowed to obstruct the view. The shields bearing the numbers are all of a uniform prescribed size, and in every case they must be attached to the car, so as to clear the ground by about eighteen inches, the object of this regulation no doubt being to avoid the numbers becoming illegible by dust. Each car must carry the corresponding number in front, and both numbers bear a stamp from the police authorities, which are only placed on the glass or number-plate after the latter have been attached to the car and examined by the proper police authorities.

This easy means of identification of automobiles is a matter of great importance to the people of Germany, in that the owner is liable to such heavy damages for any injury to persons or property occasioned by his car. The extent of this liability may be illustrated by the fact that the courts have compelled owners in some cases where lives have been sacrificed not only to pay large indemnities to the widow or children, but in extreme cases to pay an annuity to minor children until such a time as they have reached an age when they can be considered self-supporting.

This condition makes liability insurance a necessity for the owner of an automobile, which has been provided for by the leading companies at reasonable rates, when the amount of liability is taken into consideration. The rates are based upon the size and horsepower of the automobile. For instance, an eight-horsepower car is insured for an indemnity of $9,520 for injury to a single person, $19,040 for two or more persons, together with an indemnity of $2,380 for property injured, at an annual cost of $16.18. This, in a way, is a special rate, as it is granted only to the members of the largest automobile and motor-cycle associations, whose doors are open to all respectable people upon the payment of an entrance fee of 71 cents and annual dues of $1.67. The rate for insurance to non-members of this association would be $34.75, but as other benefits are also derived from the association, the vast majority of automobile owners in Germany is naturally enrolled among its members.

"CRUCIBLES, THEIR CARE AND USE."

Joseph Dixon Crucible Co., Jersey City, N. J., have favored us with a copy of their new publication, entitled "Crucibles, Their Care and Use," which is the handsomest as well as the most comprehensive book ever published on the subject of graphite crucibles, which are also known as plumbago or black lead crucibles. It is a book which should be in the hands of everyone interested in the melting of the various metals. It should be placed in every public library and in the library of every college that has a mechanical department. The author of this very complete work is Mr. John A. Walker, vice-president, treasurer and general manager of the Joseph Dixon Crucible Company, Jersey City, N. J. Mr. Walker has been connected with the Joseph Dixon Crucible Company for forty years, and for thirty-nine has been an officer and director of the company and its general manager. He is thereby thoroughly fitted by his long years of experience in crucible making to be an authority on the subject as he certainly is. The purpose of the book is to instruct users of crucibles as to their proper use, and the dangers of abuse of crucibles. It tells what graphite is, and why crucibles are made of it. It tells why crucibles must be made of flake graphite. It tells why some crucibles are dark and others light, and the importance of that fact. It states that most crucibles are perfect when they reach the user, and that much of the trouble that comes is due to the fault of the user. It gives rules for annealing crucibles, and tells why all of them should be carefully followed. It tells why crucibles should be bought in quantities, it tells the use of tongs for handling crucibles and their misuse by careless melters. It tells of the proper shape of tongs and how they should be handled, and how the metal should be placed in the crucibles, and how the crucibles should be placed in the fire. The book fully describes the various fuels used in melting metals, and their effect on the crucibles. It speaks of the importance of perfect combustion. The book also carries much allied information. It gives the proportions of metal in commonly-used alloys. It tells the freezing, fusing and boiling points of various substances. It gives the specific gravity of various metals and other commodities. It gives the comparative value of fuels, and much other information of value in the foundry. The double-page center of the book carries one of the most vivid and realistic foundry scenes ever presented. The illustrations throughout the book are the highest specimens of photographic art, and the book in its entirety is a credit to its well-known author and to the printers, the Bartlett-Orr Press.

"HEATING BY STEAM AND WATER."

Plumbers' Trade Journal Publishing Co., 61 Beekman Street, New York, have recently published a practical treatise on the subject of House Heating, entitled "Heating by Steam and Water," specially written and compiled for them by Charles B. Thompson, and covering Improved Methods of Installing Heating Apparatus in the home, with short and accurate rules for computing radiation, heat losses, etc. Graphic charts are also given, showing boiler power and coal consumption, as well as data consisting of charts, illustrations and descriptions of how best to heat water for baths, swimming pools, etc., etc. Two hundred and sixty-eight original drawings are found within the contents. In the first part of the book are illustrated and described a number of examples of steam and water heating apparatus, which have been in actual operation for ten or fifteen years, and which may be considered as fair examples of good, average current practice. In the latter part of the book numerous examples of steam and water heating are shown, which some heating men may classify as "freaks," inasmuch as the pipe sizes employed are much smaller than those commonly used by the trade. The article on velocities of steam in pipes will be found very helpful to those who are not familiar with the subject, and the suggestion in regard to the priming of boilers and the intelligent use of small piping is worth many times the price of the book, which may be had for $3.00.

THE AMERICAN HARDWARE CORPORATION.

The annual meeting of the stockholders of the American Hardware Corporation, New Britain, Conn., was held at the office of P. & F. Corbin, on Tuesday, February 26, and resulted in the choice of the following directors:

Philip Corbin,	Howard S. Hart,
Charles M. Jarvis,	Sylvester C. Dunham,
Andrew J. Sloper,	Frederick P. Wilcox,
Charles H. Parsons,	Charles Miller,
Charles Glover,	Benjamin A. Hawley.

Benjamin A. Hawley, vice-president of the Russell & Erwin Mfg. Co., takes the place of George W. Corbin, on the board. The following officers were elected:

PRESIDENT, Philip Corbin.
FIRST VICE-PRESIDENT, Charles M. Jarvis.
SECOND VICE-PRESIDENT, Howard S. Hart.
TREASURER, Andrew J. Sloper.
ASSISTANT TREASURER, Charles H. Parsons.
SECRETARY, Charles E. Wetmore.
ASSISTANT SECRETARY, Charles B. Parsons.

The annual meetings of the various constituent companies composing the American Hardware Corporation were held on Monday, February 18th, and the following officers and directors were elected:

P. & F. CORBIN.

PRESIDENT, Philip Corbin.
FIRST VICE-PRESIDENT, Charles H. Parsons.
SECOND VICE-PRESIDENT AND TREASURER, Charles E. Wetmore.
ASSISTANT TREASURER, Edward L. Prior.
SECRETARY, Albert N. Abbe.
ASSISTANT SECRETARY, Charles B. Parsons.
DIRECTORS: Philip Corbin, Charles H. Parsons, Charles Glover, A. N. Abbe, Charles E. Wetmore, Charles M. Jarvis.

THE RUSSELL & ERWIN MFG. CO.

PRESIDENT, Howard S. Hart.
VICE-PRESIDENT, Benjamin A. Hawley.
TREASURER, Isaac D. Russell.
ASSISTANT TREASURER, Joel H. Van Newkirk.
SECRETARY, Theodore E. Smith.
DIRECTORS: Andrew J. Sloper, Frank L. Hungerford, Charles E. Mitchell, Howard S. Hart, Benjamin A. Hawley, Isaac D. Russell, Philip Corbin, Charles M. Jarvis, Joel H. Van Newkirk.

THE CORBIN SCREW CORPORATION.

PRESIDENT, Charles Glover.
VICE-PRESIDENT, Clarence A. Earl.
TREASURER, Theodore E. Smith.
SECRETARY, William J. Surre.
DIRECTORS: Philip Corbin, Charles M. Jarvis, Charles Glover, Howard S. Hart, Theodore E. Smith, Charles H. Parsons, Benjamin A. Hawley, Clarence A. Earl, W. J. Surre.

THE CORBIN CABINET LOCK CO.

PRESIDENT, Philip Corbin.
VICE-PRESIDENT AND TREASURER, C. H. Baldwin.
SECRETARY, W. H. Booth.
ASSISTANT SECRETARY, George L. Corbin.
DIRECTORS: Philip Corbin, W. H. Booth, C. H. Baldwin, George L. Corbin, Darius Miller, Charles Glover, Charles M. Jarvis.

THE CORBIN MOTOR VEHICLE CORPORATION.

PRESIDENT, H. S. Hart.
VICE-PRESIDENT AND TREASURER, Max S. Hart.
ASSISTANT TREASURER AND SECRETARY, B. B. Bassette.
DIRECTORS: Philip Corbin, Charles M. Jarvis, Howard S. Hart, Charles Glover, Paul P. Wilcox, Max S. Hart, Andrew J. Sloper, Robert C. Mitchell, B. B. Bassette.

S. R. DROESCHER'S REMOVAL.

S. R. Droescher, 79 Warren Street, New York, manufacturer and importer of Razors, Razor Hones, Oil Stones, etc., has leased the entire four-story building at 77 Warren Street, thereby largely increasing his facilities for the transaction of his growing business.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION

The tenth annual convention of the North Dakota Retail Hardware Association was held in the Bijou Theatre at Minot, Tuesday, Wednesday and Thursday, March 12, 13 and 14. Although this convention was postponed from February 5, 6 and 7 because of the exceptional severity of the Winter, there was a large attendance when President Emery called the meeting to order, which he did on Wednesday morning, March 13. He welcomed the delegates in a few remarks and introduced the Rev. N. E. Ellsworth, of Minot, who opened the convention with prayer. Mayor D. C. Greenleaf then delivered an address of welcome, to which President Emery replied. At the formal opening of the convention, the president delivered his annual address, in which he said in part:

PRESIDENT'S ANNUAL ADDRESS.

Let 1907 be what it may, 1906 will stand out as one of the greatest years in the development of the Northwest, and in this advancement North Dakota has taken a prominent part. Years like 1905 and 1906 show to us the great possibilities and the probabilities of North Dakota. Give us sunshine and rainfall in proportion to the strength of North Dakota soil and we will be too busy to even read the notices in the papers about the troubles of the Secretary of the Treasury and Wall Street. North Dakota is a producing State, and our market is the market of the world. In the development of a State no one factor plays a more prominent part than does the Hardware merchant.

A community can be pretty well sized up by the makeup of its Hardware store. Prosperous and up-to-date Hardware merchants

H. F. EMERY, *President.*

represent a prosperous community and it has well been said that "Hardware is the barometer of the times."

We have come together at this time that we may talk over and devise ways and means to further aid in holding personal greed (which shows its hand through corporations) in check and making it understand that the law of right must be obeyed. With prosperity showing on every hand, with orders pouring into the retail store, with tin shops full of work, with stoves to be blackened and times so good that we cannot find a "blacker," is it to be wondered at that so many merchants take so little interest in association work?

It is not the activity of the corporations, trusts, combinations and mail order houses that is to be feared, but the inactivity and deadness of the busy merchant and the quiet citizen. The tariff law when first enacted was a grand thing, but the prosperity and growth of this country was so great that the same good tariff was the means of starting some greedy institutions that have shown their willingness to take advantage of the help extended, and so my words to you in retiring, as your president for the last four years, are—be up and doing: help your Executive Committee, your incoming president and your secretary whenever you can, that we may be in the best of shape to stop the growth of the mail order business which has shown its hand in prosperous times and cannot but be a menace to trade unless checked when the high tide shall subside and when quietness follows, though it be for a short time, for history has proven that extra good times are followed by a lull in trade.

Let me remind you not to be impatient because we are not able to solve all the problems at once, but remember that great victories are won by fighting the battle of to-day and being ready and willing to take up the new questions of to-morrow.

CREDITS.

A discussion of the subject of Credits was a prominent feature of the convention. Those who made addresses were the following Creditmen, representing jobbing houses: F. L. Macomber, of Hibbard, Spencer, Bartlett & Co., Chicago; C. D. MacLaren, of Farwell, Ozmun, Kirk & Co., St. Paul; Mr. Hopkins, of Janney, Semple, Hill & Co., Minneapolis, and Mr. Burdick of the Hall-Robertson Hardware Co., Fargo. Messrs. MacLaren, Hopkins and Burdick touched on the topic somewhat briefly, but Mr. Macomber made the principal address, which was in part as follows:

This subject has many branches, but the particular phases of it in which you are most interested are those which find expression in your own counting rooms—that affect the expansion of your business and increase or decrease your profits.

I shall touch on retail credits only to say it is a science more studied and better understood by the men behind the counters of Hardware stores of this State than by myself.

In the wholesale Hardware business 99 per cent. of the business transactions are handled on credit. Perhaps two-thirds of the sales are discounted, but even where the settlement is made in ten days, credit comes into play and a proper basis for it should exist.

What are

THE ELEMENTS TO BE CONSIDERED

by the seller who thus, through faith in the buyer, parts with his property on credit terms? 1, Character; 2, capacity; 3, capital.

Neither one is under all circumstances indispensable, but in the ideal credit risk all three are present. They are important in the order in which I have named them. Rectitude of character—the unswerving purpose to deal honestly with all men, customers as well as creditors—is the best asset a merchant can have. The confidence it inspires brings and holds trade, and coupled with a moderate degree of capacity is an almost certain guaranty of success. Good character may be said to include temperate habits and agreeable manners. It cannot be claimed either by a drunkard, spendthrift or grouch. An ugly, over-reaching disposition is not an ear-mark of good character.

The capacity of a merchant is measured by his age, experience, education, business training, health, energy and general ability. The shortcomings of merchants in the payment of their debts are chiefly the result of inexperience. Some of the more frequent mistakes in business policies thus brought about are over-trading, capital, overstocking, extending too much credit, unwise credits, failure to secure sufficient profit, inadequate insurance, lack of punctuality in commercial obligations. In analyzing the financial statements of merchants it will usually be found that where one of these elements of weakness is present the others exist. The trader who thinks it unnecessary to give attention to his own obligations at their maturity trusts the consumer who settles only when compelled to. He is equally careless in buying and in figuring his profits. In the matter of insurance against fire he takes long chances, as his creditors frequently find to their sorrow.

That unquestioned character and a reputation for business capacity or ability are, in the estimation of the credit man, the prime requisites is apparent because in a number of our States, your own included, the exemption laws are so generous to a debtor that a fair sprinkling of the merchants cannot be forced to pay—if it is not their choice to do so. And yet, with few exceptions, these merchants of modest means find no difficulty in securing liberal lines of credit. The merchant may be poor, but with the reputation for right purposes, energy and good sense, he will, through the confidence inspired in him by others, command capital.

THE CHIEF SOURCE OF INFORMATION

upon which wholesale credits are based is, as every one knows, the mercantile agency reports. Some believe these reports are highly colored and distorted through the bias or prejudice of local investigators, but I do not think that this is often so. The mercantile agencies certainly realize that their clients want accurate information, and that the repute of and demand for their services cannot be great if any considerable percentage of their ratings are either grossly over or underestimated. Let it be said in their favor that if the credit seeker will not disclose his financial condition it is frequently impossible to secure the facts elsewhere.

People are more or less ostentatious in the display of their possessions. Barring the assessor, we don't care who knows about the assets, but as to the debts there is much secretiveness. Ordinarily the applicant for credit alone and none other can make a complete and accurate showing of these. Not even his banker is able to speak authoritatively as to his liabilities. It is for this reason that a financial statement made by the applicant himself for a mercantile agency or direct to the creditor is the best and safest source of information. Written and signed statements are preferred, because in expressing themselves in that manner they are more thorough and exact than when speaking orally.

It is natural for even honest men to overestimate their assets, and to underestimate their debts, and this tendency is more pronounced in verbal statements, but if the statement is in writing and signed and the maker of it, along with other assets, owns a good character, it is a fair and shining light pointing the pathway to be followed with safety by the creditor.

ADVERTISING THE STORE.

There was some discussion on store advertising methods, in the course of which J. A. Roell, of Minot, spoke as follows:

I think the best advertising is keeping the store up to date and goods clean, and having salesmen who are good judges of human nature to tell what a party wants and about what priced goods he should buy, and able to talk goods intelligently. Next to that is newspaper advertising—good, clean newspaper advertising, right to the point and always accompanied with prices. I don't think it pays to advertise anything in display unless you have a price on it. The price always talks. I know if I get a circular and don't see any price mentioned in it it is usually relegated to the waste basket. I judge that is the way with consumers, the way they would treat an advertisement in the newspapers. I don't know that I ever got any good results from advertising where I did not mention prices and I invariably use electrotypes. Jobbers and manufacturers will supply a man with any cuts he has a mind to ask for. There are other places where you can get cuts at a very nominal price, and I got several hundred a year ago from a house that makes a specialty of them, and in all my advertising I use the cuts and in this way I find I get results.

BORROWING MONEY TO DISCOUNT BILLS.

The question of the retail dealer borrowing money to discount his bills was then taken up. That it was advantageous to do so was pointed out by several merchants when the question was before the convention.

J. S. Cole, Lisbon, made the following remarks:

I would advise every retail dealer to discount his bills if possible, even if he has to borrow the money to do it, and if your credit is good enough to buy the goods on time your credit should be good enough at the bank to get the money to discount the bills. You all know thirty day goods are one per cent., and sixty day goods are two per cent. and Stoves and so forth, five per cent. In buying, if you can get any future dating, get it, and get all you can, and then go after the discount, and get all the discount you can. Every cent you can save in discount is that much profit on your goods.

Digitized by Google

Touching especially on the objection made by some merchants as to the difficulty of discounting small bills, President Emery said:

I have heard a great many merchants say that one of the disagreeable features of discounting was that there were so many little bills they could not discount as the discount would not amount to as much as the postage. I believe there is not a jobber who would not be willing to make a special arrangement with Hardwaremen to discount twice a month, so that you might accumulate these little bills and discount them all at one time, say on the 15th and 30th of the month. If there is any man who would like to discount his bills there is no doubt but what he will be given an opportunity.

THE QUESTION BOX.

The Question Box was given in charge of Mr. MacLaren, of St. Paul, who answered the following questions:

Does it pay the Hardwareman to handle five and ten cent goods?

Can every member do something to postpone action on the parcels post bill?

What is the proper way to greet catalogue-house customers who ask for credit?

Should a retailer patronize jobbers who supply customers with goods?

Why are trademark stove prices higher than the catalogue-house stoves?

Can a strictly Hardware store succeed under present conditions, or should we have a side line?

Are the expenses of retail Hardware business greater than the average merchant's estimate?

RESOLUTIONS.

Among the resolutions adopted were the following:

Resolved, That this Association is opposed to any legislation looking toward the establishment of a parcels-carrying system in connection with the Post Office Department of the country at this time.

Resolved, That we believe it would be advantageous and therefore we favor a reduction from two cents to one cent on ordinary letter postage.

Resolved, That the Association condemns the action of the different railroad companies in withdrawing their agreement giving the members reduced rates for the convention, and considers this act of theirs as most unbusinesslike.

Resolved, That we express our thanks to the entire jobbing interests of the country as well as to manufacturers of all the various products for the displays made and the interest manifested, and for sending representatives with papers treating on their various products and the different methods of conducting business.

Resolved, That we approve of the action of the several papers in refusing advertisements of concerns detrimental to the business interests of the convention

ELECTION OF OFFICERS.

The election of officers resulted in the choice of H. F. Emery, Fargo, for president, this being his fifth election. H. B. Allen, Fairmount, was chosen as first vice-president; J. A. Roell, Minot, as second vice-president, and N. Halverson, Aneta, as third vice-president. C. N. Barnes was re-elected secretary, as was also H. T. Helgesen, Milton, treasurer. S. T. Bostwick was elected a member of the Executive Committee. W. R. McIntosh, Bottineau, was chosen as delegate to the National Retail Hardware Convention in Boston in June.

Fargo was chosen as the scene of the 1908 convention.

THURSDAY MORNING SESSION.

Thursday was devoted to the discussion of paints and the paint law of North Dakota. Interesting and able addresses were made by well-known experts in this line. Dr. D. W. Thompson, of New York City, representing the National Lead Co., was the first speaker, his topic being "White Lead: Its Advantages as a Paint Pigment." Mr. Thompson made a long and interesting address, taking up the entire morning session. He spoke in part as follows:

DR. D. W. THOMPSON'S ADDRESS.

North Dakota has the good fortune of having successfully adopted, and successfully enforced, the measures which result in the sale in that State of pure medicines, pure foods and pure paints. In this North Dakota has taken the lead, and we may feel assured that the people of other States are glad to know that you have done so much for the honest manufacturer for the sale of merchandise within your borders. Not merely has North Dakota passed laws, but these laws have been enforced, and enforced fairly, with a due regard for the interests of the people of the State. If the spirit with which a law is enforced is a fair and equitable spirit, defects that may exist in that law may at times be overcome. In North Dakota the administration of these pure commodity laws has fortunately devolved upon a man who has, in every case, sought to carry them out in a spirit of fairness toward all concerned.

White lead is a paint pigment, and as a paint pigment it has been used since the beginning of the Christian era. We have spoken of white lead as a pigment: by this we would explain that all paints, properly so called, are mixtures of a liquid or vehicle and solid particles which we call the pigment. White lead is a chemical compound and when manufactured with care should contain about sixty-nine per cent. of carbonate of lead and thirty-one per cent. of hydrate of lead combined in a chemical union.

* * * *

LINSEED OIL.

There is, generally speaking, but one paint vehicle, and that is linseed oil. There are other materials used with linseed oil in paints such as turpentine and benzine, but these can be considered nothing more than auxiliators, as they evaporate entirely after the paint has been applied and simply enable the painter to get more nearly the result he desires. Linseed oil is to-day the paint vehicle, and while lots of attempts have been made to prepare other vehicles, nothing worth considering in a commercial sense has made its appearance. Starting then with linseed oil as the paint vehicle which we are compelled to use, and which we are fortunate enough to be able to use, the question arises, what paint is there which, by itself, can be used with linseed oil to form a good paint without the addition of any auxiliator? The answer is, that of white pigments white lead is the only pigment which has been successfully used in conjunction with linseed oil alone. This is not a theoretical statement, but a plain fact.

I do not mean to say that some painter has not at some time mixed zinc oxide and linseed oil, without other additions, and applied it, but that such a practice and such an application has not been successful commercially. Nor do I say that sublimed lead has not been mixed directly with linseed oil alone and applied by some painter, but simply that if this has been done it has not continuously been done in a commercial way so as to meet general painting purposes. The same is true in regard to lithopone, an admirable pigment in its way, but one that has not as yet been used alone with linseed oil in the production of a commercial paint, but whose use has been principally in connection with varnishes in the production of enamel paints.

And we do not say that if any one has been so foolish as to mix barytes alone with linseed oil he may not have applied this to some surface—but we do say that if anybody has done this he has not been successful in any attempt which he may have made to persuade the public into adopting his plan as a commercial proposition. And what is true of barytes is true of sulphate of lime, is true of carbonate of lime or whiting, is true of silica, silicate of magnesia, etc. The fact remains that, as we have stated, no white pigment other than white lead has been mixed with linseed oil alone to make a successful commercial paint.

ZINC OXIDE.

By way of illustration, it may be stated without fear of contradiction that zinc oxide cannot successfully be used with linseed oil alone for general painting purposes, for the reason that zinc oxide when thinned with linseed oil to a consistency proper for painting takes so much oil that when applied to a surface the particles of zinc are so far separated that they have lost considerably their covering or hiding power. On the other hand, when thinned to a consistency proper for painting, white lead has a covering or hiding power unequalled by any other white pigment.

* * * *

COVERING POWER.

A great deal has been written on the relative hiding or covering power of various white pigments, but a great deal of confusion has entered into most of these discussions. If we are to compare two paints for a hiding or covering power, let us bear in mind that these two paints may work entirely different as to the amounts that can be put on a certain definite surface in the hands of an intelligent painter. Thus, on very careful tests made by a very competent man, I have found that one paint, applied to a surface of about 200 square feet, spread at the rate of 1,000 square feet to the gallon; whereas another paint, applied by the same man, spread at the rate of 600 square feet to the gallon. From this it will be seen that the paint which spread only 600 square feet to the gallon would give a paint film very nearly twice as thick as that which spread at 1,000 square feet to the gallon, and consequently should have, other things being equal, a covering or hiding power nearly twice as great.

It is of the utmost importance, therefore, in comparing the covering power or hiding power of paints that they be spread at the same rate, or if not at the same rate, then it should be clearly explained what the rates were at which they were spread. Now we have no hesitancy in saying that white lead is the only commercially successful white pigment, which, when mixed with a consistency proper for painting, or to a consistency where the brush-marks flow out, has a high and satisfactory covering or hiding power. Thus, zinc oxide, when mixed with linseed oil, so as to have a covering power equal to white lead and spread at the same rate, cannot be applied to a surface so as to produce a satisfactory coating. Sublimed lead has the same general defect as zinc oxide, though to a less degree.

THURSDAY AFTERNOON SESSION.

The first speaker of the afternoon was Dr. Maximilian Toch, of Toch Bros., New York City, representing the Paint Grinders' Association of the United States. He gave a long and exhaustive discussion showing up the effects of corrosion of steel and iron, and spoke of the effect of salt water and atmospheric conditions. Those present thoroughly enjoyed his lecture, which was so full of information with which they were not familiar.

DR. TOCH'S ADDRESS.

was in part as follows:

Mixed paint as an article of commerce is distinctively American, and was first placed on sale about forty years ago, and owes its success to the demand created by the pioneers. There are a variety of materials which enter into the manufacture of mixed paints, the best known being white lead, for the reason that for nearly 2,000 years it stood alone, and zinc oxide, sublimed lead, zinc lead and lithopone have all appeared within fifty years, and they have come to stay.

Some forty years ago Dr. Breinig found, like all other observers, that white lead at the seashore did not wear well, but chalked and flaked, and on mixing lead with ground quartz he obtained a paint that lasted several years longer, and when repainting became necessary the surface presented was better adapted for the purpose.

Then this marks the advent of materials added to lead and zinc to give them life and quality, and

THESE MATERIALS WE CALL FILLERS

or inert extenders.

A large number of the natural pigments contain these fillers or inert extenders, such as ochre, sienna, bone black, iron oxides, umbers, mineral blacks, etc. Many of the chemical pigments contain them also, such as lithopone, venetian red, olive green, etc.

THE NORTH DAKOTA LAW.

The law of North Dakota as it stands to-day says that all paints must be made of nothing else than white lead, zinc, linseed oil, turpentine, Japan drier and pure colors. If any other ingredient is used, the paint must be labeled. It must be understood that I have no objection to white lead, for it possesses qualities which have made it very valuable to the painter, and these are its enormous hiding power or body and the ease with which it is applied. Nor have I anything against zinc, for I have always been a staunch advocate for its use, and I unhesitatingly make the statement that no paint maker in the world can keep his factory going without it.

Zinc has a great value, yet fifty years ago it had few friends and fewer users. Linseed oil and turpentine are staples in the trade, and of linseed oil it can truly be said that no substitute has been found for it in general house painting; yet I will show you that there are paints which are made in industrial quantities into which none of these materials enter nor into which zinc or lead or oil would be anything but a detriment.

I have not come here to speak against your law, although I am totally against it in the letter, but heartily with it in spirit. Your legislators have not proved that the so-called statutory pigments, lead and zinc, make the best paints, and allowing only such paints to be unlabeled as to composition they have cast an onus on other good paints, which is unjust and uncalled for. I believe that this law was only intended for white and light shades of paints, for no man or body of men could be so shortsighted as to expect that a black or a red or a brown or a green paint could be made of lead or zinc with the necessary tinting material.

LABEL ALL PAINTS.

If you want a law to protect your people against bad paints, then label them all and give no preference to any, for there is no chemist nor any paint manufacturer who can say a paint of given composition is the best. I have had more experience in making paint than all the experts in North Dakota, and I realize that this may be very little, yet when my firm obtains an order for bridge paint for South America, I make it totally different than I make bridge paint for Illinois.

* * * *

Twenty-five years ago any chemist would have been tarred and feathered had he advocated the use of seventy per cent. barytes in a mixed paint for the protection of steel, and yet in the new custom house of San Francisco, a place above all where permanency is required, the steel work is being painted with a mixture of thirty per cent. black, ten per cent zinc and seventy per cent. barytes, and if your legislature knows better, let it hide itself and tell them that they

Digitized by Google

are wrong, and to Washington together with its experts that your statutory paints are better. I could cite you endless cases, but I do not wish to outwear my welcome.

I have, of course, no sympathy with worthless paints or concoctions which masquerade under the name of paints. The mail-order house paints are not worthy of the name, and yet they can defy you by shipping their wares into this State in unbroken packages, and the honest maker has no recourse.

PROF. LADD'S ADDRESS.

Prof. E. F. Ladd, Commissioner of the Pure Paint Law of the State, was then introduced. Prof. Ladd prefaced his address by a distinct announcement that he still stood for the North Dakota law; that he had not made any changes or expressed any changes in his views in this regard. He also emphatically disproved any assertion that the drawer of the North Dakota paint measure was in any way influenced in the interest of any manufacturer, but worked solely in the interest of the people of North Dakota. He concluded his address as follows:

PAINT MANUFACTURERS DIFFER.

That paint manufacturers are not wholly agreed among themselves as to what substitute is best to be used is clearly indicated from the fact that one man believes silicates are the only proper material to be introduced as an inert constituent; others would use largely barytes; still others are using gypsum, or other forms of lime compounds, and there are some who it would seem have no preference. As the analysis of their paints would seem to indicate, they have at times used the product most convenient at hand.

It is not unlikely true that each of these constituents, under certain conditions, may have a useful place, and that paints may be used with satisfaction which are found to contain reasonable quantities of inert material, but to just what extent these are permissible, and under what conditions has not yet been fully worked out, and until such time has come it is improper, it seems to me, to do other than to require that their presence be made known.

We might go on with this discussion indefinitely without gaining any information, and until practical tests have been made to show to the public the value of these several paint constituents for various climatic conditions, for various classes of building materials, the public is justified in adhering to the recognized standard which has been accepted, and is still apparently accepted by the master painters of this country, as being possessed of the greatest value as a protective and decorative coat for the wooden structures which constitute our homes.

CATALOGUE HOUSE PAINTS.

Important work done as the result of the enactment of the paint law in North Dakota was to show somewhat the character of the paints sold by many of the catalogue houses. I need not go into detail with regard to these paints, but it may be said that not one of them is what it is represented to be.

All of these paints, together with those generally sold by the majority of department stores, show a similarity in composition, and in the majority of cases a similarity of physical properties, all of which indicate an exceedingly cheap paint, and often when purchased at any price prove dear to the users of the same.

The exposure which has come from the analyses of paints in North Dakota will ultimately result in good for every honest manufacturer; it will drive from the market many of the spurious products; it will educate the public to demand a better grade of paint, and to expect better work on the part of the painter. The experimental data which will be secured should prove of immense benefit to paint manufacturers, and we trust will enable the people to judge of the relative merits of those ingredients which are seeking a place for use in the preparation of mixed paints.

SPORTING GOODS FOR THE HARDWARE STORE.

By Fred A. Gannon

For Hardware retailers, sporting goods offer an attractive side line. There is a large and growing field for the sale of such goods, and there is precedent for Hardwaremen dealing in them; also there is practical proof of success in handling sporting goods offered by a number of Hardware dealers.

The field for the sale of sporting goods is large and growing, because Americans are the greatest sportsmen in the world, and now are giving more time, attention and money to sports than ever before. There have grown up in recent years hundreds of athletic clubs, hundreds of college gymnasiums, Y. M. C. A. gymnasiums and school athletic teams in the country, and the professionals of the diamond and the women's physical culture clubs must be added. This great interest in sports is having a marked influence for good on the race, so say authorities, such as Prof. G. Stanley Hall and others, and if it is having an influence on the race it surely must have an influence on trade.

There is precedent for the Hardwareman engaging in the sale of sporting goods, for it was "ye Hardwareman," who fitted out that gallant sport of "ye olden days," the knight errant, with sword and shield and lance, and other paraphernalia of the then popular sport.

There is present opportunity, too, for the Hardwareman to push sporting goods. Many Hardware dealers now carry stocks of guns, rifles and live sporting goods. Usually men who are interested in the sports of the field also are interested in the sports of the track, the diamond or the "gym" floor, and so there is a chance to interest them in new lines of sporting goods.

Iron dumb bells, one of the first and simplest articles used by athletes, and followers of physical culture, naturally are in the line of trade of the Hardwareman. Iron dumb bells are now being superseded by wooden bells, Indian clubs and many other articles. And if the Hardwareman has started in to sell goods to sportsmen, it is business for him to follow it up with the latest staple goods and novelties.

Boxing gloves, punching bags, basket-balls and other leather goods used in the sports are now sold by Hardware dealers and they tend to make the Hardwareman a leather man. Fencing foils, and even broadswords, and the paraphernalia of the fencing and sword contests are more in the Hardwareman's line. The number of men who enjoy a quiet boxing bout is surprisingly large. If this were England most every man would be a boxer, for the strenuous ruler of that country is reputed a boxer of high skill who is seldom out of practice. And not a few women like to "put on the mitts" or punch the bag. It was only the other day that a Philadelphia girl put a burglar to sleep with a straight arm blow, and, recently, a handsome white and gold punching bag was made up to order, through a New York firm, for a famous actress. The fad of the poster of the fencing girl has passed, but the fencing girl herself is as ready as ever to make the steel ring and to thrust swiftly at the heart.

There are many other sporting goods, which the Hardwareman carries, or might carry and they range from baseballs and croquet sets to auto supplies. Every man has to study his own trade, and to find out what it will buy. Some Hardwaremen have so built up their sporting goods trade that it is difficult to tell whether their stores are Hardware or sporting goods establishments. And the increased interest in sports everywhere promises to increase trade in sporting goods everywhere.

RECENT PUBLICATIONS.

Hartford Rubber Works Co., Hartford, Conn. Catalogue for 1907 of Hartford and Dunlop Tires for Bicycles, Carriages, Motor Cycles, Road Carts and Sulkies, with list prices, and instructions for ordering and mounting single-tube tires on rims. We quote from some very pertinent remarks regarding tires and their care, found within its pages:

"Frequently our customers complain that their tires 'leak at the lugs' and imagine that the latter have something to do with the air escaping. This is wrong, as the lugs have nothing whatever to do with the inner tube. When air escapes at these places it is only because the inner tube is punctured and the air penetrates the entire fabric, escaping at places offering the least resistance, and would naturally follow the lugs. If no lugs were used, it would escape just the same through surface cuts. As a vehicle is used in wet weather and is washed frequently, the cement in time fails to hold and the tire is then held in place by the lugs only. As soon as this is discovered the tire should be removed from the rim, the latter scoured bright, and the tire should then be replaced. Keep your tires well inflated; should they become punctured, either repair or have them repaired at once. We guarantee all tires made by us to be perfect in material and workmanship. We do not guarantee that they will not wear out in time, nor do we guarantee them against puncture. Tires should be used judiciously so as to prolong their life as much as possible."

Grippin Mfg. Co., Newark, New York, are distributing to the trade a series of circulars and folders regarding Grippin's Wood, Crack and Crevice Filler and Floor-Finishing Specialties. General information regarding the application of Grippin's Wood, Crack and Crevice Filler under all conditions will be found on every can. Any finish, wax, varnish, shellac, oil, stain, paint, etc., may be applied over this Filler with the best results; the Filler may also be applied over any finished surface and is easily colored to match any shade or color, by adding the required coloring matter. The light natural color of the Filler will match very closely all light natural woods and does not need coloring, except where the darker shades, like antique oak, black walnut, mahogany, etc., are desired. All new floors where a perfect filler and foundation are desired, should be first treated with this filler. It is perfectly transparent in the grain of the wood and will not discolor or injure the finest and most delicate woods. Many old floors that were considered absolutely useless with their large openings, slivers and checked surfaces, have been restored and placed in fine, serviceable condition by an application of Grippin's Wood, Crack and Crevice Filler. The average cost of treating floors with their Filler is from one-half to one cent per square foot, depending on the condition, etc. Where rugs are to be used in place of carpets an application of this Filler is indispensable. They do not recommend their filler for use on exterior porches or veranda floors, but for interior floors only. The company also manufacture durable finishes for floors and interior wood-work; also Gloss Stains, Hard Wax Polish and Varnilene, the last named being a substitute for varnish, and is recommended for renewing, restoring and polishing interior woodwork, furniture, pianos, floors, bicycles, etc.

RECENT TRADE PUBLICATIONS.

Buffalo Forge Co., Buffalo, N. Y., have issued their catalogue No. 77, which introduces in addition to their regular line of Buffalo Blacksmith Tools which have been on the market for several years, a number of entirely new machines as well as some changes and improvements in the older designs. They call special attention to their new Ball-Bearing Forges Nos. 240 and 260, their new No. 99 Hand Blower with the high-speed gear underneath the surface of an oil bath, and their Direct Drive Blower No. 306. These goods constitute their "Leaders for 1907."

Louden Machinery Co., Fairfield, Iowa. Catalogue "G" of Overhead Carriers, for farm, store, mill and factory. In a prefatory note the company say: "The Louden Overhead Carriers are the result of years of study and experince, and embody all the latest and best improvements. Originally designed for handling Feed, Litter and Manure, their use has been extended until it is becoming general on the Farm and Dairy as well as in the Store, Mill and Factory. "There is no harder, more slavish work on the farm than that of keeping barns, stables, and outhouses in proper condition and to meet this long needed want, we have invented and placed on the market a system of Carriers which can be used only for carrying light material, but also for heavy material of all kinds." A line of Milk Can Carriers is also shown, and a Combined Hoist and Carrier for hoisting and conveying water, feed, milk, ice, etc. A plan of installment is given as well as some plans of barns in various sections of the country in which the Louden outfit is in use. This catalogue will prove an interesting one, and will be gladly sent on request.

Belding-Hall Mfg. Co., Belding, Mich., and 213 Canal Street, New York, have recently distributed an illustrated catalogue of their "Edson" Porcelain Lined Refrigerators. The company in an introductory note say: "These refrigerators are made of quarter-sawed white oak, with heavy beveled panels, and trimmed with nickel lever locks and hinges. The ice chamber is lined with nickel; the ice racks are made of heavy galvanized iron, supported by heavy steel bands, riveted to the corrugated surface. The provision chamber is lined with heavy porcelain lining. We have had numerous inquiries from our trade for a genuine high grade porcelain lined refrigerator, and have spared no expense to produce an article that will be superior to any other on the market. If you are interested in a high-grade refrigerator we believe it will be to your interest to order a sample at once with a view to securing the agency. There is no doubt that these refrigerators will supersede the tile-lined refrigerators, as with the porcelain there is no sweating, no tiles to crack, no crevices to absorb impurities and odors. The porcelain lining being in one piece presents a smooth, even surface, easy to clean, no annoyance from breakage, and absolutely pure and healthful."

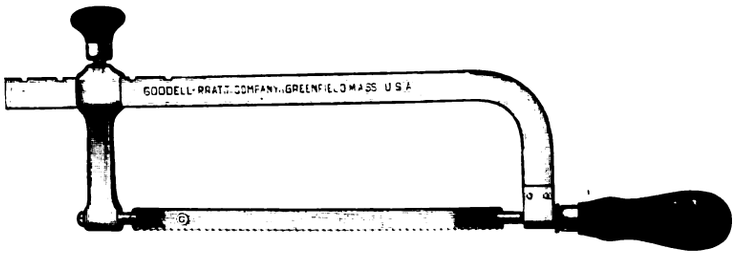
W. & B. Douglas, Middletown, Conn., and 83 John Street, New York. Booklet catalogue for 1907 of Pumps, including Cistern, Southern Yard, Pitcher, Anti-Freezing Lift, Force and Pipe Pumps; Windmill Outfits, Hydrants, etc. This price list cancels all former ones and is subject to change without notice. This company also issue a catalogue of Electric-driven Pumps. Regarding the advantages of Electric Pumps the company mention the following: "Aside from the fact that certain problems can be solved only by the use of electric pumps, there are other advantages which put them in direct competition with steam or other motive power. Some of these are: They can be started or stopped from a distance. An attendant is not required to watch them constantly. The volume of discharge is not affected by variations in the boiler pressure. There is no danger of "running away" if the suction or discharge pipes give out. In small units the electric pump is much more efficient than steam, and in large ones the efficiency is about equal. They will automatically maintain a constant level of either suction or discharge liquid, or constant pressure on tank. The power consumed can be accurately determined by means of a watt-meter, which will give actual cost of operation."

Chase Colvin, South Charleston, Ohio, manufacturer of the "Stay There" Steel Anchor Posts for wire fence, has favored us with circulars of this line of goods, and in addition, circulars regarding Steel Line Posts and Steel Farm Gates, which he has recently added to his product. These Anchor Posts are for use at ends, corners or gateways, with any kind of wire fence, and are made of steel angles, thoroughly anchored and braced in all directions. They may be set in concrete. It is being realized that it no longer pays to use wood posts, at least for anchor posts, on which so much depends in a wire fence, and are made of steel angles, thoroughly anchored and braced in all directions.

Small Bros., Dunham, Quebec, Canada. Catalogue of the Lightning Evaporators, Steel Arches and Furnaces intended especially for Maple Sugar Makers, and those interested in this product will find within its pages every requisite for the "sugar bush." Numerous testimonials are given from satisfied users. The company manufacture a large line of Buckets, Cans, Sap Spouts, Gathering and Storage Tanks, Sugaring-Off Arch and Pan, as well as Hog Troughs and Metal Roofing of all kinds. The catalogue is printed partly in English and partly in French.

Clark-Horrocks Co., 54-56 Genesee Street, Utica, N. Y. Catalogue of Fishing Tackle, Fishing Rods, Trout and Bass Flies and Artificial Bait. This catalogue is a complete one of its kind, containing 198 pages, and illustrating many new goods in the way of Rods as well as Lines, and Artificial Spoon Baits. Particular attention is called to their Special Combination Lancewood Bait Rod, which can be used either for boat or bait or fly, for casting or for brush fishing. It is a Rod that will hang well, and weigh right for all purposes. Their Combination Fly Rod is also a 1907 novelty, and is a three-piece detachable grasp, split bamboo fly rod, with extra tip, made from selected stock, closely wound in green silk, with English snake guides and their new detachable line guide on butt joint, with welted ferrules. This company are also the selling agents of the Mohawk Valley Line Co. This catalogue should be sent for by every dealer handling or contemplating the handling of sporting goods.

Clyde Cutlery Co., Clyde, Ohio, with export office in charge of the U. J. Ulery Co., 9 Warren Street, New York, have just issued their Catalogue No. 14. This Company are almost exclusively Butcher Knife manufacturers, and the contents of this catalogue include a very extensive assortment of this class of goods, as well as household knives. Their Clyde Household Carver Assortment is deserving of special mention, consisting of two knives each, with ebony, cocobola and boxwood handles, very highly polished blades, crocus finished swedge, through tang, brass rivets in handle, in dark leatherette-covered display case, beautifully lined in white. They also manufacture Steak, Sticking, Boning, Ribbing and Bread Knives, Ham and Beef Slicers, Fish and Chicken-Killing Knives, Sailors', Hunters', Paper-Hangers' and Tobacco Knives; also a large variety of Kitchen Knives for paring purposes, Steels, Cleavers, etc., etc. Notwithstanding the large addition built to their factory last year, which about doubled their capacity, they find business so brisk that they are kept more than busy in taking care of orders.



Fulton Machine & Vise Co. Lowville, N. Y. Catalogue "C" of Patent Vises adapted for the use of Machinists, Locomotive Works, Structural Iron Builders, Carriage, Gun, Sewing Machine and Furniture Manufacturers, Jewelers and Mechanics generally. Their Reed Vise is a universal, vertical and horizontal swivel vise, the jaws and both swivels being clamped and released with one operation of the lever. Therefore, there are no obstructions above the bench to interfere with the mechanic or any kind of work. The Reed Patent Vise has all the advantages of the regular Swivel Vises now on the market. It can be fastened at any angle, and when placed in any of its different positions it is guaranteed not to slip on any work for which the different styles and sizes are adapted. The contents include Fulton's Parallel Machinists' Vise, Fulton's Star Wood-Workers' Vise, Fulton's "Self-Locking" Malleable Pipe Vise, etc., with the price-list of extra parts.

NEW GOODS AND SPECIALTIES

HEAVY ADJUSTABLE HACK SAW FRAME NO. 69.

The Goodell-Pratt Company, Greenfield, Mass., are placing on the market a new Heavy Adjustable Hack Saw Frame, known as their No. 69, which they describe as a heavy and more rigid Adjustable Hack Saw Frame than any at present

HEAVY ADJUSTABLE HACK SAW FRAME NO. 69.

on the market, and which is shown in the accompanying cut. It is made from stock ¼ inch thick by ¾ inch wide, full polished and nickel-plated; so arranged that Blades can be faced four different ways, and adjustable for Blades from 8 to 12 inches.

It has also the feature of a Knob Handle, which acts as a rest or guide when the Frame is being used, and provides a mechanism by which the traveling arm is rigidly fastened in place. The makers claim that there is a demand for a tool of this character particularly in view of the very large amount of iron work being done at this time.

THE AUTMO TOOL CABINET.

The Autmo Tool Cabinet Co., Rochester, N. Y., are placing before the trade the Cabinet we illustrate in the engraving herewith, on which they have patents pending. This Cabinet contains almost everything that would be needed for rapid repair work, and being easily manipulated would recommend itself to

THE AUTMO TOOL CABINET.

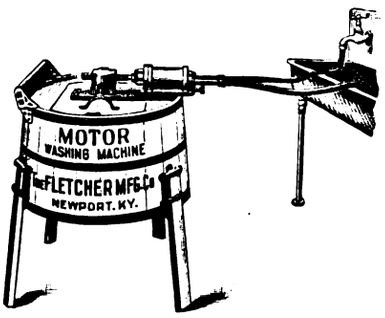
automobile owners and prove an acquisition to any garage not already in possession of the same. It has a full assortment of tools of every description, and being designed especially for portable use, may be rolled through any doorway, or can be taken to any part of the building. It can be made to remain stationary by throwing the lever on end of the Cabinet. It is made of the best quality of chestnut, natural finish. With a frame constructed from hard maple, it bids fair to last a lifetime.

This combines a swivel, a machinists' vise, off-set jaws and

THE AUTMO VISE.

pipe vise. The "Autmo" is claimed to be the best vise on the market for repair work, having in the off-set jaws milled cut-outs which grip any round stock or pipe up to two inches in diameter.

THE AUTMO ANVIL AND SURFACE PLATE.



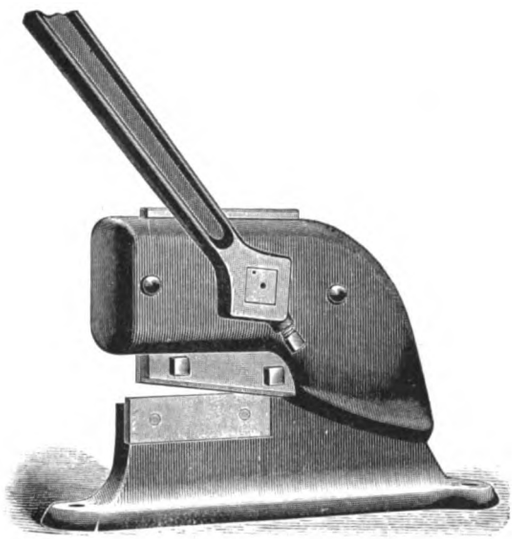
The Autmo Anvil does away with the breaking and damaging of the vise. The anvil, being made of cast steel and having a turned shoulder, allows it to be swiveled or taken out, so as to use plate singly.

THE FLETCHER MOTOR WASHING MACHINE.

The Fletcher Manufacturing Company, Newport, Kentucky, are placing on the market the "Fletcher" Motor Washing Machine, as illustrated in the accompanying cut. As will be noted this machine is driven with a small powerful Motor, instead of by the usual "hand power" method—making this kind of a machine quite an improvement over the old laborious methods of operating the different type of hand machines. The Motor of this machine is a very powerful cylinder type, 2½ inches in diameter, by 5 inches long, made of the best quality of brass castings, and heavy brass tubing. Each and every part is perfectly machined, and made sufficiently strong to withstand the wear and tear that a machine of this kind is subject to. To operate the Motor, the intake hose is connected with the water faucet—the water turned on, and you are ready for the wash. The water passes in through the hose, through the valves into the cylinder, driving the piston in either direction; the water then passes out again through the exhaust hose with each stroke of the piston. At the end of the piston rod is the rack, the teeth of which engage a small gear attached to the dasher shaft. As the piston and rack move in and out, the dasher is thus driven forward and then reversed. This dasher, inside the machine proper, washes the clothes by "agitation"—making them thoroughly clean—both the heavy garments and fine

Digitized by Google

fabrics, with no chance of injury to the garment. These Motor machines, it is claimed, will do the average family wash in just one-half the usual time required, and in most instances saves

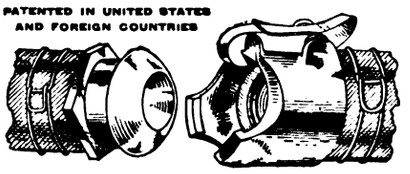


FLETCHER MOTOR WASHING MACHINE.

the need of "extra help" on wash day. In short this machine is a small edition of a "regular laundry" right in the home—easy and convenient to use, and can be picked up and set aside in some convenient place, when the wash is finished. To operate the machine it requires a water pressure of 35 to 45 lbs. to the square inch, and consumes but a very small amount of water for the ordinary wash. As an illustration of the cost of the water consumed, would say, in some of the larger cities where thousands of these machines are used, the Water Works Department make a rate of $2.00 per machine, per year, which is about four cents per week, a very small item when its advantages are considered. The housekeeper is very quick to see the great advantage in the use of a washing machine of this kind, making it a splendid selling proposition for the dealers. The Fletcher Manufacturing Company have built up a very large trade for these machines, and put them out with a very strong guarantee. They are retailed at a popular figure, giving the dealer a good margin of profit. Any inquiries sent to this concern will receive prompt attention.

FEDERAL BENCH SHEAR.

The Federal Bench Shear is a neat bench tool, strong, compact, well made and of good design and will cut sheets or bars not exceeding 3/32 inches thick, or even thicker if soft stock. This tool stands only eight inches high and weighs but thirty

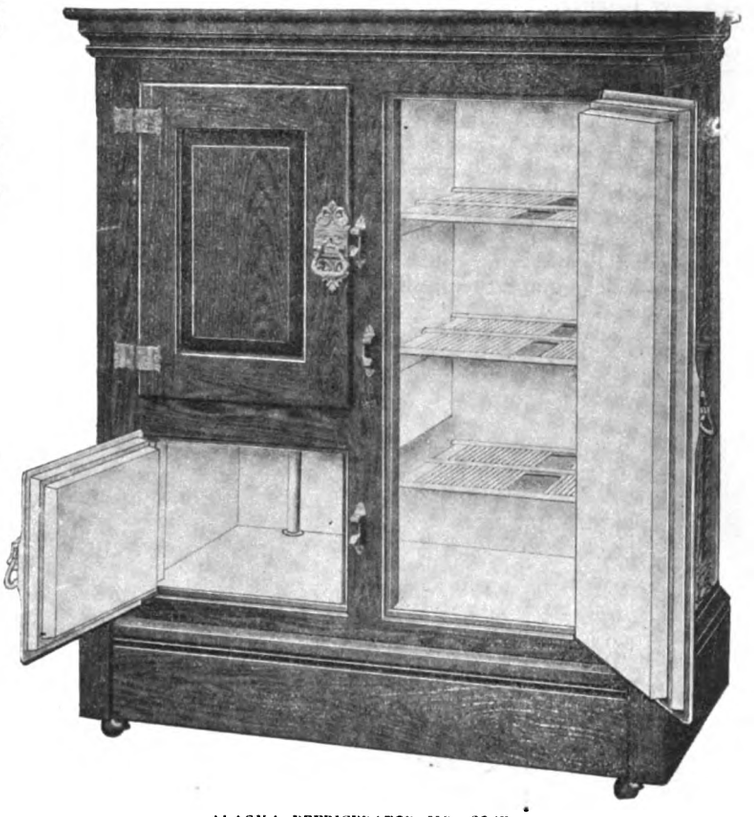


FEDERAL BENCH SHEAR.

pounds, and is one of a line of Hardware specialties manufactured for the Chandler & Farquhar Co., 36 Federal Street, Boston, Mass., which is sold in good quantities by retail dealers and jobbers throughout the country, and it is of sufficient importance to merit looking into.

THE THREADED SNAP HOSE COUPLING.

The Nelson & Morrison Mfg. Co., Boulder, Colo., are the manufacturers of a unique specialty called the Threaded Snap Hose Coupling, of which we give an illustration herewith. It is a supplementary coupling, intended to be placed between the hydrant and hose, between two pieces of hose or between the hose and nozzle of sprinkler, or any place where a quick and easy connection is desired. It is only necessary to screw the Snap Coupling parts on the old threaded parts already in use, and the coupling is complete. The Snap Hose Coupling consists of two parts: No. 1 on which is the locking-dog and No.



THREADED SNAP HOSE COUPLING.

2 with the cone-shaped head. No. 1 comes either interiorily threaded with ¾-inch threads or can be furnished with corrugated end to enter ½ or ¾-inch hose; No. 2 threaded with ¾-inch male threads, comes straight or bent in goose-neck shape; No. 2 is also made with corrugated end to fasten into ½ or ¾-inch hose. The secret of the tight joint—the water pressure acting on the thin lip of the washer. It is made so the cone-head of No. 2 will press sufficiently against the washer in No. 1 to make it tight when the water flows through without pressure and the harder the pressure the tighter the joint. The spring is not a point of weakness. It does not hold the coupling together but merely holds the locking-dog in place. Though its tension be entirely lost, the dog cannot be raised without putting it in tension. It is made of brass and will not rust.

ALASKA REFRIGERATOR NO. 234E.

The Alaska Refrigerator Co., Muskegon, Mich., are making a new line of side ice-chamber refrigerators for 1907, adopting their principle of Alaska Circulation to this line. It is made with porcelain lining, white enamel lining and zinc lining, there

ALASKA REFRIGERATOR NO. 234E.

being twenty-one sizes and styles. Their regular line of Alaska Refrigerators is made in almost endless variety, and their catalogues are complete.

PITTSBURGH AUTOMATIC VISE & TOOL CO., Pittsburgh, Pa., have remembered their friends in the trade with a series of blotters, on the front of which are descriptions of their "Pittsburgh" Double-Swivel Pipe Vises, with graphic illustrations in black and white, and intended to arrest the attention of the dealer into whose hands they fall by reason of their uniqueness.

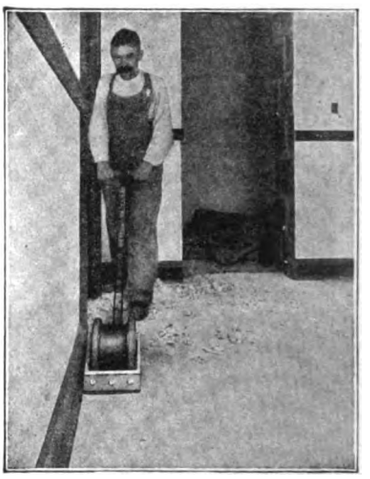
THE "LITTLE GIANT" FLOOR SCRAPER.

The Hurley Machine Co., of Chicago, New York and Toronto, have lately put upon the market a useful little machine which, from present indications, looks as though it would revolutionize the dressing of hardwood floors. Its name is the "Little Giant" Floor Scraper, and like all important inventions, it is based upon a scientific principle, the very simplicity of which marks its success. It does not require much effort to see the great saving to the contractor made possible by the use of this machine. It has proved so popular among the carpenters, contractors and builders throughout the country, that almost 7,000 are now in use and the capacity of their factories are taxed to the utmost to keep up with the rapidly increasing demand.

THE OLD METHOD OF SCRAPING FLOORS.

To point out the advantages of the "Little Giant" Floor Scraper is purely a matter of arithmetic. Under the old method of scraping floors, one man down on his knees, working hard, will scrape by hand about two squares or 200 feet of flooring in eight hours. The wage scale for this is from forty cents to fifty-five cents an hour, or from $3.20 to $4.40 for 200 square feet, which makes the cost from $1.60 to $2.20 per square. With a "Little Giant" Floor Scraper, one man standing up and moving freely and swiftly, will scrape at least 1,200 square feet of flooring in eight hours which, at the same wage scale, requires the cost of the work to from forty cents to fifty-five cents per square. It is claimed by those who have used the machine that it will do from one and a half to two times as much as above stated, but the manufacturers estimate very conservatively that it will save at least four men's work. Thus, it will be readily seen, that the machine pays for itself in a few days.



THE LITTLE GIANT METHOD OF DOING IT.

The "Little Giant" Floor Scraper is sold under the Hurley Machine Co. guarantee to do better, faster and cheaper work than by any other method. It is simple in construction and is built of the finest material, on the simplest possible lines. There is no mechanism of any kind to get out of order. It will last a life time. The machine is easily operated by one man with no other motive power. The principle of operation is similar to that of a hand scraper while the capacity for work is greatly increased and the work far superior. The knife is made of the finest steel. It scrapes the floor when the machine is pulled towards the operator and scrapes every inch of it—into the corners and along baseboards. A shaving about two inches wide and three feet long is removed with each stroke. All rollers of the machine are rubber-tired, protecting the floors. The handle is adjustable to height and length.

The company has been carrying on a rapidly increasing foreign business and has found it necessary lately to send a special representative, George E. Spaulding, abroad. Mr. Spaulding is the managing director of their French company, with offices at

No. 1 Rue de Laborde, Paris. The company is mailing to the trade a souvenir postal card on which is reproduced the famous painting by G. Caillebotte, entitled "Les Raboteurs de Parquet," which is hung in the Musee de Luxemburg. It shows three floor finishers stripped to the waist, on their hands and knees, laboriously scraping a floor. The purpose of the card is to call attention to the contrast between the old hand method, and the machine of to-day.

A NEW "FIVE CENTER."

Responding to a demand that will have a tendency to make the larger sizes kept in stock, the Kitchen Specialty Mfg. Co., Reading, Pa., have taken the smallest size of their assortment of perforated pot covers, recently noticed among the specialties in our columns, and made it a size that can be retailed at a profit for "five cents." They have found this to be a very popular price and it has nearly doubled their output of all sizes. It behooves the jobbers and retailers to inquire into this matter, as it is up to them now to fill a demand that will be found to exist wherever the change in price becomes known.

STEVENS TRADE AIDS HELP THE MERCHANT.

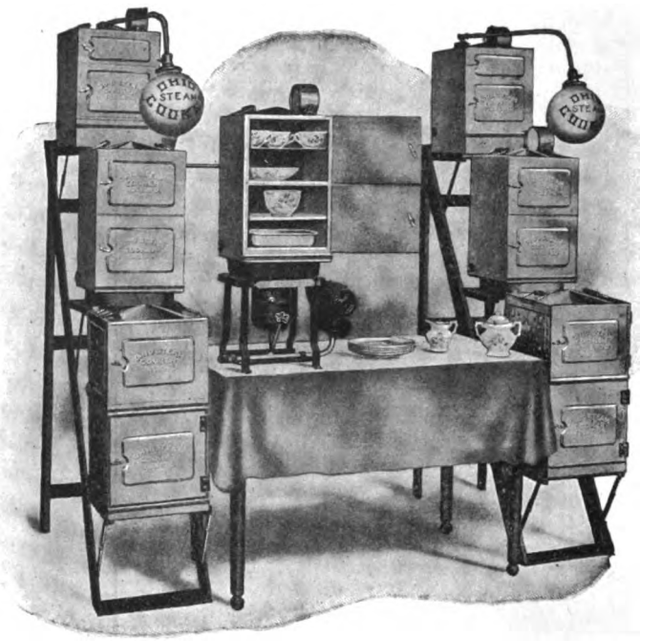
In connection with their department of publicity, which the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., foster and encourage to the fullest extent, they call attention to methods they have adopted of adding to their facilities that will permit the dealer to assist in this campaign of publicity through their advertising department, which we are pleased indeed to announce.

They have prepared for, and now inform the wholesale and retail Hardware and sporting goods merchants, that they have a varied and attractive supply of half-tone mortised advertising

STEVENS FOUR-INCH, SINGLE-COLUMN, MORTISED ADVERTISING CUT.

electrotypes on hand, featuring hunting scenes. These cuts are all half-page and full-page, regular magazine size, and especially appropriate to illustrate circulars or booklets printed on coated paper, pertaining to sporting goods, etc.

Up-to-date and progressive merchants could easily obtain, with slight effort, considerable additional business by circularizing their local sportsmen with attractive printed matter. Their half-tone electrotypes will be sent to any applicant free on demand, providing the merchant bears express charges, which are, of course, moderate, generally speaking.



For newspaper advertising, they have prepared a striking series of six four-inch, single-column mortised advertising cuts. These latter electros will also be supplied gratuitously to any Hardware or sporting goods merchant applying for same. They realize that a number of dealers handling the Stevens have neither the time nor inclination to prepare advertisements themselves. These merchants they will be glad to assist by furnishing copy they have originated in their Advertising Department. Their advertisements have proven effective wherever used, and would no doubt aid any retailer employing them.

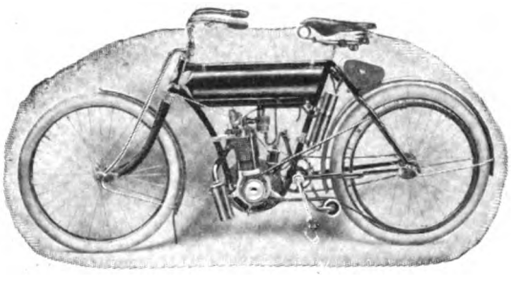
HERBICIDE, THE WEED DESTROYER.

The Reade Mfg. Co., 1023-27 Grand Street, Hoboken, N. J., and for many years of New York City, are offering to the Hardware trade this season their great preparation "Herbicide," which as an incomparable Weed Exterminator is an article of acknowledged merit, and meets the general demand for an effectual destroyer of every description of weeds, Canada thistles, poison ivy, dandelions, burdocks, etc., by a single application of Herbicide, which is death to obnoxious growths of all sorts in a few hours and keeps them killed for two years, as many recommendations from high-class sources sufficiently attest. Its application is easy, being in a liquid form, and only requiring to be mixed with water and applied with a watering-can or watering cart. Five gallons mixed with one hundred gallons of water will cover an area from one hundred and fifty to two hundred square yards, and will make a liquid which will effectually destroy all vegetable growths. When offered for sale for Hardware dealers, "Herbicide" is put up for the retail trade in cans at 50 cents, 80 cents and $1.50 each; also in kegs at $2.50 and $5.50 each, which is subject to a liberal discount to the Hardware trade. Descriptive circulars are supplied with each parcel of goods ordered.

THE OHIO COMBINATION STEAM COOKERS AND BAKERS.

The Ohio Cooker Co., 600-617 Jefferson Ave., Toledo, Ohio, are the originators of square steam cookers. They are the only ones making a cooker that will steam and bake at the same time over one burner. They also have a complete line of cookers that cook entirely by steam. They are advertising their cookers extensively in all the leading magazines in the country, and with an order of a dozen cookers they are furnishing every merchant a handsome electrical demonstration-stand for showing the different style cookers, as per accompanying illustration.

OHIO COOKER CO. ELECTRICAL DEMONSTRATION STAND.



With this display-stand located in a prominent position in the store the merchant can secure a great many orders for cookers. Every Hardware merchant should have a stock of cookers on hand to take care of the large demand that will be created this year in this line of goods. The cooker is really a household necessity, and it is especially valuable during the Spring and Summer where people are using oil, gas or gasoline stoves; they can cook an entire meal over one burner, and a dozen different kinds of food at the same time, without any intermingling of taste or odors.

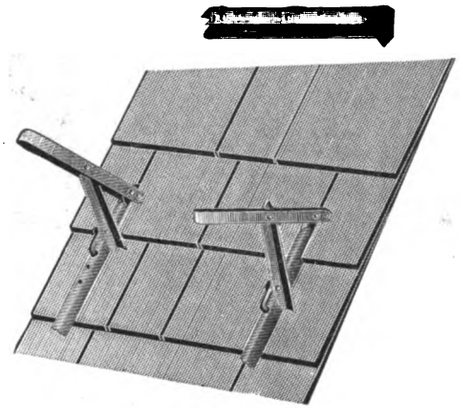
The O-HI-O has many advantages that are found in no other cooker, especially the steam condenser, which takes care of all the surplus steam and returning it to the water reservoir. The cooker will save an ordinary family at least $2.00 a month in the saving of time, fuel, labor and provisions.

The Company issues a very handsome 48 page catalogue, which they will be pleased to send to any merchant writing for same, together with price-list and discounts. Every up-to-date merchant should carry a stock of these cookers to supply the great demand that is being created for this article.

YALE-CALIFORNIA MOTOR-CYCLE FOR 1907.

The Consolidated Mfg. Co., Dorr Street Station, Toledo, Ohio, are the manufacturers of the Yale-California Motor-Cycle, of which we give an illustration herewith. The Yale-Califor-

YALE-CALIFORNIA MOTOR-CYCLE FOR 1907.



nia motor is of the 4-cycle type, 2¼-inch bore, 3-inch stroke, with fly-wheel on the outside of the crank-case developing two horsepower. The piston is extra long; with three special spring

Digitized by Google

rings. One piece nickel steel, forged crank shaft. Connecting rod drop-forged. Bearings special compound phosphor bronze. Crank-case, aluminum. Cylinder extra long, with special cooling surfaces on head and top of cylinder. Cylinder-head and cylinders are attached to crank case by three bolts, and copper asbestos gaskets are used, making an absolutely tight fit. Intake valve, atmospheric. Exhaust valve, mechanical. Both intake and exhaust valves are drop-forged from nickel-steel and ground in place. Both ports are large and permit of quick ingress and egress of gas. The exhaust and vibrator gears have wide face, carefully hardened, and are practically indestructible. The vibrator (patent applied for) is a new and valuable improvement in vibrators, their own special design and absolutely self-cleaning, with iridium contact points. It may be removed without disturbing the timing or any part of the motor. Extraordinary care is taken in elaborately testing out every motor used on the Yale-California. Each motor must develop the full two horsepower before leaving the factory.

ADJUSTABLE ROOFING BRACKET.

W. P. Griswold & Co., 37 John Street, Springfield, Mass., are placing on the market an Adjustable Roofing Bracket that cannot help meeting the approval of the trade, as it presents features of merit that are commendable. We give an illustration of the Bracket herewith. It is made of steel, is light in weight,

ADJUSTABLE ROOFING BRACKET.

and can be folded into small space for packing. It can be used for supporting stagings for shingling, repairing and painting roofs. It is claimed to be a positively safe staging support, without nailing; can be instantly placed in position, or removed; is adjustable to any angle, fitting roofs of any particular pitch. Can be absolutely locked to two or more shingles on the roof, and cannot be accidentally removed. The illustration represents three separate brackets. Those shown on the section of the roof are in position for use, and show the different angles to which it can be adjusted. The one at the top shows the bracket folded.

NATIONAL FREIGHT SERVICE ASSOCIATION.

A meeting was held in Richmond, Va., on the 7th inst, at which the National Freight Service Association was organized, the following being elected officers: President, T. Peyton Giles, Richmond; first vice-president, John Donnan of the W. S. Donnan Hardware Co., Richmond; second vice-president, Douglas Dalnam, New York. Executive Committee: John C. Freeman, chairman, Richmond; C. T. Johnson of the Dover Mfg. Co., Canal Dover, Ohio; V. H. Beckham, Seattle, Wash.; E. D. Taylor, Richmond; John Landstreet, Richmond. Legislative Committee: John S. Harwood, chairman, Richmond; S. P. Hastler, Chicago; W. C. Rice, Philadelphia.

The chief object of organization is to interest freight shippers and receivers throughout the United States in a systematic fight to secure better and quicker transportation facilities through legislation or otherwise, and nearly every great commercial and industrial body in the country was represented.

T. Peyton Giles, who has been active in inaugurating the movement, presided throughout the meeting, with John Donnan acting as secretary.

After Mr. Giles called the meeting to order and the roll of delegates was made up, Mr. Donnan made an address on the difficulties under which the shippers are laboring, and gave his ideas as how best to remedy these troubles. He said that conditions confronting the shippers in this country had been unbearable, and that the time had arrived when the subject should be given the best thought of merchants and manufacturers toward its solution. Mr. Donnan read letters showing the slow movement of freight in different sections, and said this meant the loss of hundreds of dollars to the merchants. He continued in part as follows:

If congestion is their (the railroads') excuse, let them explain why it is that they always manage to deliver promptly carloads of fruit from California, peaches from Georgia, watermelons from Florida, or any other class of goods of a perishable nature, for which they have to pay if spoiled, while Hardware, drugs, dry goods and other non-perishable freight are subject to such unreasonable delays.

The real cause of the delay is not congestion, lack of equipment, or that the freight trains do not make sufficiently fast time with the interstate shipments, while running, but the railroads hold goods an unreasonable time at the initial points before starting.

At every junction, division, terminal and transfer point of their own roads, shipments are held up; and again, when our goods reach transfer points on other roads, these delays are more aggravated than ever. This last and most serious delay is caused by jealousy of railroad systems, one toward the other, and by their attempt to thwart each other's business by each refusing to handle promptly shipments which originated on other systems.

The American Hardware Manufacturers' Association, National Hardware Association and Southern Hardware Jobbers' Association were among the Hardware organizations represented at the meeting.

IMPORTS AND EXPORTS OF COPPER.

The United States government, through the Department of Commerce and Labor, announces that the value of copper exported from this country during the calendar year 1906 was $84,728,400, while imports were worth $30,416,578, a total of $115,144,978. The total value of both movements in 1905 was $102,809,973, made up of $80,706,232 exports and $22,103,741 imports. The average value of the copper exported during the entire twelve months' period was $17.84 cents per pound. Imports during the year, totaling 176,558,390 pounds, formed the record amount brought into this country, increasing 16,000,000 over the previous year's takings. The following comparative statement of copper exports and imports by months for 1905 and 1906 is compiled from monthly returns (in pounds:)

	Exports		*Imports*	
	1906	1905	1906	1905
January	31,958,053	43,246,994	14,110,340	11,956,159
February	36,092,275	44,856,032	12,362,489	13,223,910
March	38,426,661	41,597,725	16,326,159	12,236,611
April	33,830,067	58,234,827	12,974,609	12,815,783
May	42,321,749	46,744,959	15,130,991	11,468,819
June	39,662,582	58,018,828	14,591,387	13,353,12:
July	40,520,290	37,901,361	15,296,099	12,195,807
August	46,789,702	48,942,284	12,578,745	10,692,522
September	34,964,157	46,954,409	13,776,177	18,703,558
October	39,245,144	35,156,328	18,718,000	15,519,438
November	36,738,984	31,565,859	15,693,716	15,110,744
December	34,139,354	41,688,013	14,999,778	13,283,913
Year	454,752,018	534,907,619	176,558,390	160,619,385

The rich have honors thrust upon them, while the poor strive for them in vain. The cook, out in Topeka, Kan., who inherited a half-million dollars from the Fair estate, is now referred to as a "chef."

The corporations of this country act like they had received their early education in a poker game, they run bluffs so easily. The American people are the kind which can be depended upon to call bluffs, however.

A Western paper says that it is the Bible which causes such small collections in the churches. It says "The Lord loveth a cheerful giver," and most men can give a nickel more cheerfully than they could a quarter.

There is a grain firm in Chicago by the name of Tearse & Noyes. It would be natural to expect their bids to all be short and loud.

The Dartmouth Rolling Mills, Dartmouth, N. S., are to put in a plant with which to manufacture wire nails.

C. C. Ballantyne, president of the Sherwin-Williams Manufacturing Co., Montreal, and G. W. Stephens, president of the Canadian Rubber Co., have been appointed Harbor Commissioners for Montreal.

ONLY ONE OTHER IN THIS COUNTRY.

The Worcester Pressed Steel Company, Worcester, Mass., have just installed a plant for "Autogenous" welding with the blow-pipe flame. This is the only welding plant of its kind in Worcester and the second in this country. The oxy-acetylene flame is the hottest flame known, having a temperature of 6,300 deg. f., or 2,700 deg. higher than the oxy-hydrogen flame. This, together with the facility of handling the blow pipe and the absolute control of the flame by the operator, gives this process an almost unlimited range of practical usefulness in metal industries.

The distinctive feature, which has done the most to make this welding process of wide commercial value, is the introduction of a substance called "Epurite." By bringing epurite in contact with water, chemically pure oxygen is as easily obtained as in uniting calcium carbide and water acetylene is liberated; the chemical reaction in each case being analogous.

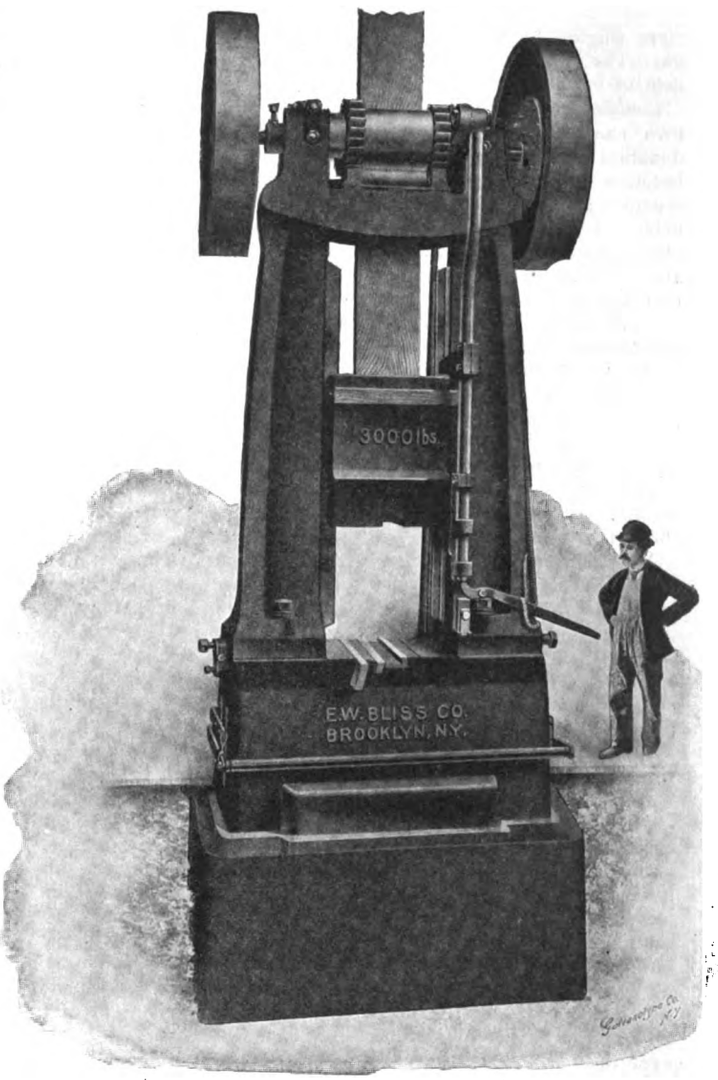
The company, following its progressive policy, quickly appreciated the practical value of adding this welding process to its modern equipment in the manufacture of high-class pressed steel parts for automobiles and bicycles and many special designs in deep drawing and cold forging, requiring skilled mechanics and the best machinery.

In this welding process, each gas is generated in a separate apparatus; conducted by separate pipes to the blow pipe; mixed near the point of combustion and used in nearly equal volumes at a pressure of from fifteen to one hundred and fifty pounds. In starting the blow pipe the acetylene is first turned on full; then the oxygen is added until the flame has only a single cone; an excess of acetylene produces two cones and a white color; an excess of oxygen is indicated by the flame assuming a violet tint. The point of intense heat in the flame is at the apex of the cone. In welding this is held about one-fourth inch from the metal to be welded. The oxygen and carbonic oxide generated protect the molten metal and also the flame cone from loss of heat. No flux is required to weld metals such as iron, steel and copper, but for alloys, viz., brass, etc., a little of boracic acid, moistened with water, is used simply to prevent the volatilized zinc from being deposited on the joint and destroying the weld. This process welds by fusion, forming a perfect metallic union of the parts. It is not brazing.

The company employ it in place of riveting and soldering and for other forms of metal construction not heretofore possible. Two sheets of metal may be welded by placing their edges in contact and following along the seam with a blow pipe. Tanks of almost any shape may be made by forming the body and ends separately and, in assembling, tracing the seams (joints butt and flush) with a blow pipe. The welding is so perfect that after finishing it is impossible to detect where the joints were made. To insure strength the joint is slightly overloaded, by melting a wire or rod of some material as metal to be welded, at the same time the edges are fused. The unfinished joint is stronger than the body of the metal and the finished joint is practically the same. This process is used in France for making frame joints in bicycles instead of brazing.

The Worcester Pressed Steel Company also use this process for cutting steel. Any shaped hole can be easily cut in steel plates up to six inches in thickness, as with a blow pipe, the operator can accomplish cutting feats impossible with a saw.

Twenty different sized nozzles are supplied for each blow pipe so the size and power of the flame can be varied at will, according to the thickness of the metal to be welded and in cutting, the frame is proportionately elongated by pressure to penetrate to the bottom of the cut. The intense heat is so localized that the kerf is practically the same as if a saw were used. Not only is this process adapted for making tanks, boilers, tubing, cylinders, pipe joints and angles, and for replacing brazing and riveting in many instances, but it effectively welds cast iron. In France this process is extensively used for welding automobile frames and other automobile and bicycle parts.



In the foundry this apparatus saves defective castings, in iron, brass, copper, etc., for the blow hole can be readily filled and broken castings welded as strongly as new. In repair work it is especially valuable and many expensive castings, forgings and machined parts may be saved from the junk pile by an hour's use of the blow pipe.

The company recently installed another large press for heavy automobile work (the largest of its kind ever built by E. W. Bliss Co.), brake drums, gear cases, hub flanges and caps, ball bearings, frame brackets, hood parts, steps and other parts of automobiles are now drawn seamless from pressed steel which were formerly made of cast steel and forged. With this additional equipment, the Worcester Pressed Steel Company are in a still better position to care for their customers' interests.

A LARGE BLISS DROP HAMMER.

One of the largest drop hammers ever built is that shown in the accompanying illustration. An idea of its size may be had from the fact that it is about four times the height of an average man from the top of the foundation to the top of the pulleys. The height of the drop above the floor level is 187 inches. The hammer is a steel forging, weighing 3,000 pounds, exclusive of the dies. The anvil weighs over 45,000 pounds, and is fitted with a forged steel sow held in place by a very large key. The uprights are 108 inches long and the hammer can be quickly adjusted for any height of fall up to nearly the figure mentioned.

The hammer was specially designed for forging automobile

A LARGE BLISS DROP HAMMER.

crank shafts and other similar work of large dimensions. To accommodate the various different pieces that are to be forged in this drop it was made with thirty-one inches from the front to the back of the die bed. All of the actuating parts are outside of the uprights, so as to leave all space between them available for dies.

The lifting rolls are of large diameter and are sufficiently wide to exert enough friction on the board to readily raise the heavy hammer. As will be seen, both pulleys are on the same shaft, which is integral with one of the rolls. The other roll is driven by two sets of steel gears, one on either side of the lifting board. This prevents a torsional strain, warping, or any uneven wear of the board. The forward roll works in an eccentric bearing, which brings it tight against the lifting board when the front lifting rod falls. The lifting rod is raised by the return of the hammer. Continuous or intermittent strokes may be had, as desired, by working the foot treadle.

The hammer is very accurately made, so that in the smaller sizes the finest watch dies could be operated in it, so perfect is the control which the operator has over the force of the blow.

The hammer has a total weight of about 70,000 pounds, and was built by the E. W. Bliss Co., 18 Adams Street, Brooklyn, N. Y.

POPULAR TALKS ON LAW

Copyrighted 1907, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

NO. II. CAPACITY OF MARRIED WOMEN TO MAKE CONTRACTS.

(States in alphabetical order before Kentucky already published.)

Kentucky: A married woman may be a sole trader and may be held for debts contracted in her business the same as if she were single. She may contract and sue and be sued as if single. The wife may bind her real estate for her own debt or the debt of her husband by mortgage, in which he must join.

Louisiana: A married woman may carry on business in her own name. Money or property other than that acquired by donation or inheritance that accrues to the wife after marriage becomes the community property of husband and wife. The separate property of the wife is not responsible for community debts. A married woman carrying on business may pledge herself in any manner relating to her trade. Her husband is bound also if there exist community property between them. A married woman, except a public merchant, cannot make any contract or bind herself in any way without the consent or assistance of her husband or of the court.

Maine: A married woman may become a merchant in her own name and be held for indebtedness contracted while carrying on the business the same as if she were single. She may own, manage, and convey her real property, sue and be sued, and transact business generally as if unmarried.

Maryland: A married woman may contract and engage in business as though unmarried. Her property is protected from the debts of her husband.

Massachusetts: A married woman may make contracts, engage in business, and so on, as fully as if she were a single woman. Contracts and suits between husband and wife, however, are not permitted. When doing business on her separate account there must be filed in the clerk's office of the city or town where she does such business a certificate setting forth her and her husband's names, the nature of the business, and the place and the name under which she proposes to carry it on. When the place or nature of the business is changed, a new certificate must be filed. If such certificate is not filed the husband may become liable for the debts.

Michigan: A married woman may take, hold, convey, and encumber real and personal property, and make contracts relating thereto, and may sue and be sued on such contracts, the same as if unmarried. She may engage in business as if unmarried, and be held in law for the debts she contracts. She cannot become a surety for nor form a partnership with her husband. She may mortgage her property to secure a debt of her husband or a third person. Her earnings, as a general rule, belong to the husband, but she may with his consent carry on business in her own name, in which case he has no control over the business or the profits.

Minnesota: A married woman may engage in business in her own name and is liable for its debts. She may make contracts in her own right. The husband must join in all conveyances of real estate.

Mississippi: A married woman has all the rights of a single woman. Husband and wife may sue each other. Neither can encumber his or her homestead without the joinder of the other.

Missouri: May engage in business in her own name and be held for its debts. A married woman's contracts will bind her, and she may sue and be sued as a single woman.

Montana: Married women have the same rights regarding property as have single women. A wife's property when specified in a list and recorded is not liable for the debts of her husband, except for necessary articles procured for herself or children under eighteen years of age. She may engage in business the same as if a single woman. Upon an application made to the court she may procure an order permitting her to become a sole trader. Upon procuring such an order she may engage in business in her own name, and the property used and acquired shall not be liable for her husband's debts. Such sole trader is not responsible for the maintenance of her children. Her husband is not responsible for the debts contracted in the carrying on of the business. He must not manage nor superintend the business.

Nebraska: May engage in business the same as if a single woman and be liable for its debts. A married woman may contract, bargain, sell and convey, sue and be sued, the same as if unmarried.

Nevada: May engage in business in her own name and be held for its debts. She must appeal to the district court of the county in which she resides for permission to carry on business in her own name and on her own account. A notice of her intention to make application for the permit must be published in a newspaper four weeks preceding her application; otherwise the property acquired through the business becomes community property controlled by the husband.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED MARCH 4, 1907.

422,361. Screw Nut. George H. Alton, Lynn, Mass.
422,487. Automatic Mop Wringer and Washer. Richard C. Anderson, Pawnee City, Neb.
422,493. Door Knob Attachment. Samuel H. Berrey, Providence, R. I.
422,516. Wrench. Omer P. Foote, Newark, Ohio.
422,520. Screw Driver. Oliver Z. Greene, Decatur, Ill.
422,526. Wrench. Frederick E. Heinig, Louisville, Ky.
422,552. Caster. John Toler, Newark, N. J.
422,662. Wrench. Joseph Tomlinson, Sr., Folsom, Cal.

PATENTS ISSUED MARCH 5, 1907.

845,857. Staple Puller and Fence Maker's Tool. H. Cottrell, Newark, N. J.
845,909. Lock and Latch Attachment. H. G. Voight, New Britain, Conn.
845,914. Door Hanger. G. Wideman, Aurora, Ill.
845,924. Wrench. W. C. Blee, Santa Ana, Cal.
845,968. Coffee Pot. H. M. Murry, Seligman, Mo.
845,978. Screw Driver Attachment. F. D. Rappelee, Green Bay, Wis.
846,061. Hand Saw Attachment. W. C. Sennett, Portland, Me.
846,168. Ink Well. D. A. Valentine, Oakland, Cal.
846,167. Washing Machine. L. D. Thornburgh, Morrison, Okla.

PATENTS EXPIRED MARCH 11, 1907.

422,899. Portable Stove or Furnace. F. Adams and U. J. Virgin, New Orleans, La.
422,950. Churn. A. B. Lang, Pierron, Ill.
422,952. Spring Hinge. N. Linsley, Freeport, Ill.
423,092. Ice Cream Freezer. L. Stevenson, Morristown, N. J.
423,137. Stove or Range. Wm. Doyle, Albany, N. Y.
423,377. Stove for Heating Soldering-Irons, &c. J. Davis, Boston, Mass.
423,379. Wash Board. S. Duryee, Falls Church, Va.
423,382. Fence Wire Tightener. J. M. Kelly, Kingston, Ind.

PATENTS ISSUED MARCH 12, 1907.

846,486. Ice Tool. G. Lepley, Tiffin, Ohio.
846,696. Ironing Board. E. C. Riedel, Ander, Tex.
846,699. Plate and Pan Lifter. A. L. Smith, Juniata Borough, Pa.
846,740. Wrench. M. Forder, Thief River Falls Minn.
846,762. Safety Lock. M. Specials, New York, N. Y.
846,763. Egg Beater. A. J. Thompson, Chicago, Ill.
846,765. Fruit and Vegetable Peeling Machine. W. Vogel, New York, N. Y.
846,821. Damper Actuating Device for Ranges, &c. I. Brooks, Pottstown, Pa.

PATENTS ISSUED MARCH 19, 1907.

847,348. Permutation Door Knob. J. C. Lyons, McComb, Miss.
847,351. Stove and Furnace. R. A. May, Akron, Ohio.
847,419. Pipe and Monkey Wrench. K. S. Little, Conover, N. C.
847,581. Wrench. J. E. Jenson, Minneota, Minn.
847,582. Hoop for Washboilers and the Like. S. A. Johnson, Lincoln, Neb.
847,587. Rock Drill. B. H. Locke, New York, N. Y.
847,596. Nut Wrench. A. L. McMurtry, New York, N. Y.
847,599. Means for Clamping and Filing Saws. C. H. Parks and R. S. Brown, New Britain, Conn.

OUR BRITISH LETTER.

London, March 8, 1907.

AN AMERICAN AGENCY UNDER NEW MANAGEMENT.

Probably among the whole of the manufacturers of the United States whose goods are handled in this country, none are better known than the Bissell Carpet Sweeper Company, whose sweepers are to be found in the shops and showrooms of almost every retail ironmonger of any note in the United Kingdom. And whenever any suggestion of enterprise or forward policy is noted among American manufacturers in this country, the English Hardwareman's thoughts turn naturally to the name of Bissell, which has been so long associated with schemes of enterprise and determined push and go. By constant advertisements and competitions which have been brought under the notice of retailers in every conceivable way, the Bissell sweeper has been forced under the notice of ironmongers; and the British public are accustomed to see the striking advertisements of these domestic machines in almost every magazine they take up. The successful introduction of Bissell sweepers in Great Britain and the continued success which has been meted out to the manufacturers of this well-known domestic contrivance, are due to the schemes originated by James Pollitt, the British manager of the firm, whose personality is well known to ironmongers all over Great Britain. James Pollitt is also known as being intimately connected with the Ironmongers' Association movement, of which he was one of the pioneers. The anouncement which was made a few days ago to the effect that James Pollitt had ceased to be connected with that famous American firm, came with great surprise to the Hardware trade, and the statements that the twenty years' labor which he had expended in the promotion of the Bissell Carpet Sweepers success in this country had come to an abrupt termination, caused no small stir in retail circles. The change announced included the statement that James Pollitt would in future be associated with the South British Trading Co., Ltd., of Wilson Street, London, E. C., of which J. Friedenstein was the founder; so that, although he ceases his connection with the Bissell Company, he will in future be associated with the sale of a number of American productions, and I have no hesitation in saying that the enterprise and energy which has so long marked his career will enable him to boom many other American domestic goods which have up to the present time not received the attention of the British public which they ought to do. My somewhat lengthy allusion to this matter would be incomplete without the announcement that the Bissell Carpet Sweeper Company has been placed under the able management of Markt & Co., of 6 City Road, E. C., which firm are no strangers to Bissell carpet sweepers, for they have in past years handled these popular machines on the Continent of Europe.

MOTORALITIES AND CYCLEALITIES.

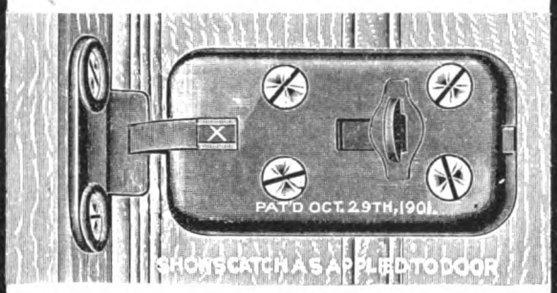
There seems to be a growing tendency in commercial circles to invent coined words, and although the British public is occasionally charged with adopting American ideas, the commercial men of this country sometimes go one better than their American cousins, and invent words, which although foreign in their appearance are expressive, and clearly denote their origin and meaning. The two words mentioned in the headline above, express clearly the variety of sundries which manufacturers are bringing under the notice of retailers in order to fill the requirements of motorists and the patrons of the wheel. I have on previous occasions and at this season in several years past drawn the attention of your readers to the growing trade in cycles and accessories, and to the tendency of the present generation of ironmongers to secure a share of the business which the ironmongers of twenty or thirty years ago neglected, and allowed to slip through their fingers. The country ironmonger recognizing that cycles, accessories, fittings and supplies connected with the use of the machines, that have now become almost a national method of locomotion, is forced to acknowledge that this trade embraces a number of goods which form some of the most important staples connected with the Hardware trade. Recent market reports from Coventry and cycle manufacturing districts point to the increasing sale of machines, to their almost universal use, and to the consequent steady business which is bound to follow, owing to the rapid march of events, which call for the adoption of new inventions in addition to the wear and tear of old machines, and their replacement by the purchase of new and improved machines and fittings. The motorcycle has also become a recognized feature upon the highroads of this country, and ironmongers who two or three years ago limited their trade to the less expensive wheels now consider their cycle department incomplete without at least one or two motorcycles. Perhaps one of the latest developments, commercially, connected with this industry has been the steady advance in the

ADOPTION OF CYCLE CARRIERS.

and the employment of these modern means for distribution of parcels and light goods which ironmongers have adopted in common with other tradesmen. So far but few ironmongers have attempted the sale of motor cars for pleasure, although the numerous sundries which may be classed under the general heading of motoralities are now recognized as lines which the average ironmonger can readily take up. Motor cars are constantly at the doors of village shopkeepers, their owners requiring petrol and the numerous sundries which ordinary wear and tear may necessitate, or still oftener, the outcome of some unexpected breakdown far away from home, making the motorist gladly welcome the aid of the country ironmonger or his workman. The large Shows of motors and cycles which have been held in this country overflow with numerous exhibits, and the capacities of the large halls in London where exhibitions are generally held are taxed to their utmost to provide scope for the proper display of these vehicles, which increase in variety year by year. So crowded was

THE LAST MOTOR SHOW HELD AT OLYMPIA,

in London, a few months ago, that it was found necessary to exclude commercial vehicles in future, and the promoters of the Motor Vehicle and Motor Boat Show, which is now being held in that large hall, are to be congratulated upon the gathering of commercial vehicles which they have got together. This exhibition was opened on March 7, by the Lord Mayor of London, and the first show of the kind held in this country has been marked with a most unexpected success. The general public, although not all interested in commercial vehicles, have flocked in considerable numbers to see this exhibition, and it has been most gratifying to note the interest they have taken in the vans, lorries and small parcel vans, many of which are so tastefully decorated and painted.



ASSOCIATION WORK.

The reports of the proceedings of American Hardware associations, which were published in your issue of February 25, were most interesting reading, and several British Hardwaremen under whose notice they have been brought have been forced to confess that there is more life and more intelligent activity displayed by members of American associations than by the majority of associations in this country. This admission of weakness is not pleasing to an Englishman, but your correspondent is forced to endorse the conclusion, especially when the reports show such steady advance on the breadth of the subjects grappled with. The advice given by W. M. Pratt, in his address on "Tool Topics" before the New York State Retail Hardware Association, contained many valuable hints, and the points raised applied to trading here, also. I was much interested in reading your report of the address by F. J. Vetsch at the South Dakota Association meeting. The statement that American traveling men have advanced in tone and quality during the last few years is a fact acknowledged by all, and the qualities they possess as salesmen are recognized all the world over. The plaintive cry made by W. V. Taylor at the meeting of Pennsylvania Retail Hardware Association, in which he mourns the need of local organization and points out how many of the local associations fail for the want of a leader, finds response on this side. I have to-day had placed in my hands a circular letter addressed to the members of one of our *leading* local associations asking for suggestions for a forthcoming meeting, stating that the secretary's agenda was almost bare. That I take it is an admission of the want of a leader—one who could organize, initiate and suggest subjects for discussion and find out real grievances to be redressed. I fear my letter has exceeded its allotted space, and therefore reserve any allusion to Spring trade and some new developments in British markets for the sale of American goods until my next.

WHAT MAKES A GOOD BOOKLET?

Here's a question too often left to take care of itself. It is usually conceded that both advertisements and follow-up letters ought to be written with an unusual amount of care and expert consideration, but the booklet is left to take care of itself and come out, pretty enough, perhaps, from a printer's standpoint, but quite poverty-stricken as to matter.

It is a pity. For the booklet must do a heavy part of the selling. The advertisement opens the prospect, the letter limelights the main points—but the booklet must roll up its sleeves and go to work on the task of creating sales-producing conviction in an absolutely thorough manner.

It is highly exasperating to a consumer who has been gracious enough to send for a booklet in order to get more information than the ad. contained to read through its pages and discover only meager information on the goods. Yet, it is also highly disastrous to the business. There are many booklets which are prepared in just this way—startlingly many.

Now, the primary object of a good booklet is to give the full advertising story a chance, without missing a point. The reader expects it. He would never open its cover if he didn't. He is not only prepared but perhaps anxious to learn about all the details before making up his mind to buy.

He wants them gone over, one by one, and, if necessary, amply illustrated and demonstrated. He wants to have no point left open—if there is, he is still that far off from buying, and may drop the matter. I have seen many booklets, which did not contain more than the advertisement. It is very poor business. If the ad. had been sufficient to sell the goods, the sale could be made without need of a booklet.

The arrangement of the copy is also important. The points ought to be summed up, there ought to be an opening general argument, and the arguments ought to come in the order of their importance. One of the greatest faults that can be found with most booklets is that they are diffuse and rambling. They begin anywhere, and they end anywhere, and they lap over. There is no clean-cut telling of the story from the right beginning and a logical order straight to the end.

A great many booklets begin wrong. They start with the history of the concern, or a general talk about their equipment—always with the house in full opening prominence.

Will it never be grasped that in all advertising the first thing of importance is the greatest gain to the intended consumer? If a booklet of firm history is to be gotten out, why not frankly label it such? Why give the reader a stone when he asks for bread?

Another great opening mistake is made by giving long paragraphs to a reference to the progress of the ages in that line of merchandise, or some other general talk which appeals more to the practical reason. It is a bad thing, because it wastes the valuable opening attention which ought to be gripped very practically and appealingly. The fault of confusion is also very common. The parts and aspects of the proposition are without sequence, and as a result the mind is annoyed at the lack of order in following the proposition.

Sometimes this is the fault of the printer, who is ambitious to arrange the matter to suit his own mechanical ideas of good work. A word about printing will not be amiss. I think that the best booklets I have ever seen, considering them from a business-getting point of view, have been the simplest ones in printing and form. Odd shapes and striking hues and stunning type effects may be all right for many businesses, but for the average one I am certain that simpler effects are more practical. The effect to strive for is simplicity of arrangement, so that it will be easy to read and understand. This principle is rock bottom and every kind of booklet must stand or split on it. But now to the character of the writing—the style. This is the greatest of all faults in booklets—the weary dryness, the lumbersome slowness, the exasperating obscurity and stilted coldness of the average booklet. We are all human, and even if our need be great we are not disposed to sit down and decipher and puzzle out things, or be bored by long sentences and sounding phrases. How many a good proposition utterly ignores its opportunity and sends out lifeless matter with not a speck of ginger or virile sales-making quality in it?

The booklet is a strong force in modern business-getting, and to make one count amid the thousands which circulate through the mails is thoroughly worth while expert effort and thought.—W. G. Nye in *Judicious Advertising*.

REVIEW OF THE MARKETS.

WIRE NAILS: Without there being much speculation in it, there is an extensive demand for Wire Nails as though every one was endeavoring to stock up. The fearful floods which Pittsburgh and vicinity have experienced have limited the output by some of the mills being compelled to close down. This will put deliveries out of commission, and so far there has been trouble enough arising from the shortage of cars, which has been worse than ever. The market is firm and in good condition, and prices remain stationary. Quotations are as follows, f. o. b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent, discount for cash in 10 days.

Carloads to jobbers	$2.00
Carload lots to retailers	2.05

New York. Between the light demand with which the season opens and the non-arrival of the jobbers' delayed stocks, assortments are all broken up and orders, wide in their requirements, are difficult to fill complete. Local prices are fairly well held, under prevailing conditions. New York quotations are as follows:

To retailers, carloads on dock	$2.19
Less than carloads on dock	2.33
Small lots at store	2.30

CUT NAILS: At the meeting that is scheduled to be held in Philadelphia to-morrow, it is anticipated that there will be an advance in prices. Difficulty in obtaining steel to work with indicates a sufficient reason, and the closing up of some of the mills on account of the floods in the Wheeling district for several days helps the belief. Premiums of 5 or 10 cents per keg are obtained for prompt shipment, which exerts an influence as well. Quotations are as follows, f. o. b. Pittsburgh:

Carload lots to jobbers	$2.05
Less than carloads to jobbers	2.10
Less than carloads to retailers	2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York. Fortunately, the demand is a moderate one, or the inability to fill orders from stock possibilities would render trade more difficult than usual. The jobbers' prices are on the basis of $2.30 for small lots from store.

BARB WIRE: In the face of a good demand, the scarcity of steel and shortage of cars are the reasons for the inability to supply it. Premiums above regular quotations are still being asked by some mills for prompt shipment. Quotations are as follows, f. o. b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: The havoc of the flood in the vicinity of Pittsburgh causing inconvenience for a number of days, has shortened the output of wire, and suspended shipments. Steel continues scarce and cars difficult to get, while the demand continues unusually good. Quotations are as follows. f. o. b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.85
Retailers, carloads	1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

WROUGHT SHELF BRACKETS: On Wrought Steel Shelf Brackets manufacturers have established a new base discount of 70 and 10 per cent., beyond which an extra 10 and 5 per cent., or slightly more, may be obtained by the retail trade.

BELLS: The manufacturers of Bells, on March 9, made a concerted advance of about 10 per cent. on these goods. The average price on Common Hand Bells is now represented in a general way by a discount of 50 per cent., Trip Gong Bells, 40 and 45 per cent. discount, and House Gongs, 33⅓ and 40 per cent. discount.

WROUGHT STEEL BUTTS: The following are the new base discounts on Wrought Steel Butts to which they were recently advanced:

	Discount.
Reversible and broad	70 and 5 %
Light reversible and light narrow	70 and 5 "
Loose joint narrow, light inside blind, &c	70 "
Back flaps, table and chest	65 "

Beyond these base discounts extras of from 10 and 10 per cent. to 10 and 10 and 10 per cent. may be obtained, according to the character of the trade and the size of the order.

STRAP AND T HINGES: An advance in Strap and T Hinges is represented by changes in base discounts, announced by leading manufacturers as follows:

Light Strap Hinges	60 %
Heavy Strap Hinges	65 "
Light T Hinges	55 "
Heavy T Hinges	45 "
Extra Heavy T Hinges	60 "
Hinge Hasps	40 "
Cor. Heavy Strap Hinges	65 "
Cor. Extra Heavy T Hinges	60 "

Beyond these base discounts are the usual extras of 10 and 5 to 10 and 10 per cent. to retail merchants.

WIRE CLOTH: Manufacturers of Wire Cloth have declared another advance of 5 cents per 100 sq. ft. to go into effect on April 1. The advance is doubtless made in the interest of the jobbers whose resale price should advance to $1.35 per 100 sq. ft. on the date mentioned. Hardware grade Cloth was advanced 15 cents to take effect at once.

POULTRY NETTING: An advance of 2½ per cent., to take effect immediately, was announced by leading manufacturers. The market may be represented in a general way by a quotation of 80 and 5 per cent. discount on Netting, galvanized after weaving, and 80 and 10 per cent. on that galvanized before weaving, thus retaining the 5 per cent. differential regularly observed between these two kinds of goods.

STOVE BOARDS: The price to the retail trade may be fairly represented by a discount of 50 per cent. on paper lined embossed and 40 per cent. on the balance of the line.

BINDER TWINE: Quotations by different manufacturers vary slightly on some grades of Twine, but the following prices fairly represent the market, Chicago delivery, with one-fourth cent less in carload lots:

	Cents per Pound
Sisal	9½ to 9⅝
Standard	9½ to 9⅝
Standard Manila	10¾
Manila (600 ft.)	12¼
Pure Manila	13¾ to 14

ROPE: The following prices may be said to represent the market:

	Cents per Pound
Pure Manila, 7-16 and larger	13¼ to 13½
B Quality Manila	12¼ to 12½
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8 to 8¼
No. 1 Jute, ¼ and larger	9
No. 2 Jute, ¼ and larger	8½

Less ¼ cent to the large trade.

LINSEED OIL: The following prices are quoted on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.

Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.

Calcutta Oil .....70 cents per gallon.

BICYCLES AGAIN SHOW POPULARITY.

Not in many years has there been such a demand upon manufacturers of bicycles and bicycle parts as at the present time, according to members of the Cycle Manufacturers' Association, and the Cycle Parts and Accessories Association. A couple of years ago certain manufacturers began to think that the bicycle was to be relegated to the scrap heap, and that the manufacturer would be obliged to go out of business.

The idea was quickly abandoned, when at the beginning of 1905 the West awoke to the fact that the wheel was the business man's friend, and the demand began to increase. Last year more than 500,000 wheels were built, and it is estimated that more than 750,000 will be turned out during 1907.

"Factories are unable to furnish the trade in the West, let alone the East," said J. S. Cox, secretary of the Cycle Manufacturers' Association. "The demand from that section of the country is greater than ever before. There will be more wheels in Indiana, Iowa, Kansas and Nebraska this year than in any three previous years."

ZELNICKER CRAYONS.

Zelnicker Crayon Works, St. Louis, Mo., are the manufacturers of high-grade Lumber Crayons, which are offered to the trade in eight colors, and in three grades, viz.: Hard, for dry lumber; Soft, for green lumber, and Indelible, for frozen lumber. These crayons are guaranteed not to wash or brush off, and being hydraulic-pressed, are claimed to last longer than similar crayons. This company also manufacture Genuine Soapstone crayons. These lines of goods afford a large margin of profit to the Hardware dealer because of their superior quality.

THE DAVENPORT TRADE.

Our sales this month so far are about one-third larger than they were in 1906. Of course, the profit is greater in proportion as we are realizing some advantage on advances that have occurred on many lines of Hardware. There is still some difficulty experienced in procuring goods, as some of the factories seem to be slow in shipping and the transportation companies are evidently over-worked. Money is not over-plentiful and commands a higher rate of interest than a year ago. There have been many changes in business methods and also in legislative enactments that, as yet, do not seem to be improvements. The prospects for a satisfactory Spring and Summer trade are good, unless some serious thing, like a general railroad strike, for instance, happens. Sickels, Preston & Nutting Co.

THE CLEVELAND TRADE.

February trade was excellent, and having passed the dull season, nothing but hard work can be expected. Advances in price continue, as hold-up on the price of Pig Iron is not a decline, and does not influence the price of manufactured goods. Trade is in fine condition; the only difficulty is in getting goods. In some lines the demand seems to exceed production, and the factories decline to enter orders for the future. Expense of doing business has increased twenty-five per cent., and there is not as much money being made as the appearance indicates. The rush suggests great prosperity and brings a demand for increased wages which scarcity of labor encourages. Most people in business think they are making money, but the January invoices have surprised a good many. The methods adopted by the large manufacturers prevent speculation, as orders are only accepted to be taken in sixty days, but it has proved beneficial to business since any balance not specified for, in the time designated, is cancelled, and the jobber is not compelled to cut prices to unload it. The business of the country was never so largely in the hands of capable men—in the large establishments experts are in command in each department, and this saves waste, and in that way serves the public; in fact, the great aggregate of good comes from effort to serve one's self. When a man shows ability to look after his own interest he is fit to serve the public. A good storekeeper makes a good alderman. The man who does more than he is hired to do, and earns more than he gets, is on the way up, and a goodly number of workmen know this, and it makes American workmen the best in the world.

Many of the convicts in the penitentiary and all the insane in the asylums think they are being persecuted by the public. The claim by the railroad officials that the public are persecuting the railroads are as senseless, but more harmful, because enough people believe it to cause a panic in Wall Street. Lawlessness has been so habitual that they may believe that it is interfering with their rights to compel them to obey the law. Fortunately the President is not easily scared, and the people outside of Wall Street will not be stampeded. Until these officials learn that the public have rights, and show a disposition to respect them, prosecutions will continue. Long endurance has created the determination to have a reckoning. The cry of persecution by these officials and by their representatives in Congress is a part of their campaign of defiance. The panic in stocks caused by their statements that they are being maliciously prosecuted by the Government they have named a "Roosevelt Panic," probably regarding it as a valuable asset. A disposition to obey the law will

Digitized by Google

be the only successful remedy, and it is likely to end in what will seem like prosecution of the officials, instead of fining the stockholders, if they elect to continue the contest. Imprisonment will be the final remedy.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. LOCKWOOD, *President.*

THE ALBANY TRADE.

The State Retail Conventions have passed into history for 1907, and the merchants are back to their respective fields of labor inspired by the renewing of old acquaintances, the sightseeing of new goods in the Hardware line, and the general good time marking these gatherings. Much good must come out of the discussions of the features pertaining to the Hardware business. We give as well as absorb new ideas of value by contact with those in the same line of business as ourselves, and we frequently find what "good fellows" these are in the trade, that before meeting we felt must be "hard propositions." It can safely be concluded that all are trying to fairly make out of their business fair compensation for energy and capital devoted to it, and this is a puzzle many times, as the added forms of competition are blossoming out on all sides. A great deal of help we believe comes from association work as now carried on by retailer, jobber and manufacturer, and the time may not be far distant when some of the salient features of competition may be so thoroughly investigated as to assure one that these may be curtailed somewhat if not entirely eliminated from our business.

The advance orders taken thus far this season have been heavy and indicate a feeling that the active demand for goods, which has marked the business for a year back, will continue right along. There is not much comfort in the announcements coming from some mills that they are six weeks in filling orders for some lines. One of the largest mills in the country coolly told us a few days since that they were up to the record-breaking delay of twenty-one to twenty-two weeks. Many goods "ready to ship" easily bring a premium in price except to "regular" customers, who depend quite wholly on the jobber for their supply of Hardware.

ALBANY HARDWARE & IRON CO.
CHARLES H. TURNER, *Pres.*

THE PHILADELPHIA TRADE.

Having been favored during the past week with some weather savoring of Spring, and with it numerous requests for immediate shipment of orders for material placed some time ago, we look for a decided improvement in volume of sales. We believe we have more orders on hand this year for Spring shipment than for many years past, and we see no reason why the demand should not continue to be good, as from information gained by a careful canvass of our trade in general, we find that stocks on hand in the retail stores throughout this section are not large, nor are they curtailing in any way on account of increased values which the jobber is compelled to secure, but if we have many recurrences of last week's slump in the stock market, we shall not feel so sanguine as at present. Prices seem to be running along more evenly, or in other words, advances are not coming in as rapidly as they were—most changes occurring being in an upward direction. Factories making seasonable goods seem to be loaded with orders almost beyond their capacity, so that it requires constant and vigorous urging on our part in an endeavor to have our customers' wants in their hands by the time they are needed. This may be considered a healthy condition in a sense, although not always satisfactory.

BIDDLE HARDWARE CO.

THE PITTSBURGH TRADE.

The second week of March finds the Hardware Jobbing business moving along at a steady gait and sales about the same as the corresponding period of 1906. Cold weather held on until the middle of the month preventing early calls for spring goods, but assuring more seasonable weather in latter part of the month. Notwithstanding previous advances, some goods continue to advance, the latest items being an additional 10% on strap and T Hinges and 50 cents each on single-barrel shot-guns. Low priced German Cutlery has advanced on the other side so that it now takes a higher rate of duty to import. This may result in cutting off importations, and this class of goods being made in our own country. Timorous merchants are watching the declining stock markets and wondering whether the turn in the tide has not arrived. If they will turn their eyes to the busy mills and mines of this vicinity, they will be reassured. Railroad earnings heavier than ever, steel mills with order books filled for six to nine months ahead and more coke ovens running than ever before. A few warm Spring days will put life into retail business and merchants who have been sitting around their stoves discussing political economy and the stock market will have no time for anything but waiting on customers. A recent decision of the Supreme Court of Pennsylvania makes effective the consolidation of the two cities of Pittsburgh and Allegheny. This makes our city sixth in population and gives it its proper place among the cities of the United States.

LOGAN-GREGG HARDWARE CO.

THE ST. PAUL TRADE.

We had many days of very severe cold weather during February with much snow, making it extremely hard for railroads to get their trains through and the farmer found it simply impossible to haul loads into his town. To illustrate, one of our salesmen made only seven towns in six weeks, and farmers suffered for fuel because of their inability to work their way through, but all of this is past and the sun shines and has already made inroads into the snow piles.

Considering these troubles, our trade has been excellent. The upward tendency of the market and the scarcity of goods is appreciated by the dealer and he does not hesitate to order for immediate and future wants. Past experience has taught the merchant that many goods are really worth a premium. We ourselves feel that higher prices are sure to rule as long as the demand exceeds the supply as it surely does at this time. The wise man buys early, has the goods shipped early and keeps his stock complete and full.

HACKETT, WALTHER, GATES HARDWARE CO.

THE DULUTH TRADE.

The Hardware business in the Northwest has been cut down very materially during the last three months, owing to the fact that the railroads have not been able to give us anything like good service. This has not only affected the freight shipments, but for weeks the passenger service was in such shape that our men could not travel, many of the branch lines being snow-bound for days at a time. Now that traffic has resumed, our volume of business is up to our expectations, and can see no reason why trade from now on should not be up to the usual volume for Spring business. Stocks in the hands of the retailers is not large, and with the opening of Spring the demand will be heavy. Dealers do not seem to realize the necessity of anticipating their wants, and while jobbers' stock has been complete up to the time, we look for a shortage in stocks, unless retailers anticipate their wants to some extent.

HARDWARE TRADE NOTES.

AMONG THE RETAILERS.

Frankford, Pa.—Hencock & Hokanson, architects, have plans nearly finished for a new building for the Miller Lock Company. It will measure 120 by 150 feet in dimensions. Part will be two stories and the remainder four stories high.

Harrisburg, Oregon.—J. C. Perin has purchased the interest of A. M. Pryor in the Hardware firm of Pryor & Hill.

Harveyville, Kan.—A. A. Denney has purchased an interest in the Hardware business of W. Thompson & Son.

Johnson, Neb.—C. A. Burke & Co. have sold their Hardware store to L. D. Murray.

Jonesboro, Ind.—C. O. Clamit has sold his interest in the Jackson Hardware store to Byron Jackson.

Kansas City, Mo.—The Bunting-Stone Hardware Co. has increased its capital stock to $50,000.

Kiel, Okla.—Hunck Bros. have succeeded to the Hardware business of McDonald & Hunck.

Knobnoster, Mo.—J. C. Porter has sold out his Hardware business to Foster & Koch.

La Tour, Mo.—J. H. Bert has sold out his Hardware business to E. J. Wright.

Lebanon, Neb.—J. W. McClintock has sold his Hardware store to E. R. Pearson.

London, Ohio.—J. W. Hume, having recently purchased the interest of J. F. Ganschow, of the Central Hardware and Furniture stores, the business will be continued under the firm name of Anderson & Hume.

Loomis, Neb.—Lawritson Bros. have been succeeded in the Hardware business by Mart Lawritson.

Loup City, Neb.—The Hayhurst-Galloway Hardware Co. has succeeded to the business of A. S. Hayhurst.

Manford, I. T.—The Manford Mercantile Co. has sold its Hardware store to Vanevans & Henton.

Marquette, Kan.—George C. Criggs has purchased the Hardware business of J. E. Hamilton.

McCool Junction, Neb.—The dissolution is reported of the Hardware firm of J. C. Marshall & Co.

McPherson, Kan.—I. A. Toevs has sold his interest in the Central Hardware Co. to E. E. Finkle.

Milton, Iowa.—The Jolley Hardware Co. has succeeded to the business of Jolley & Conrad.

Mokane, Mo.—Walker & Amos have succeeded to the Hardware business of Walker & Davis.

Montrose, Mo.—Utterson & Mohler have been succeeded in the Hardware business by Mohler & Dugan.

Moorland, Okla.—L. E. Lincoln has purchased the Hardware business of D. M. Crane.

Moundville, Mo.—W. A. McAllister has sold his Hardware and lumber business to W. J. Butterfield.

Mt. Moriah, Mo.—S. C. Carpenter has succeeded to the Hardware business of Carpenter & Melton.

Nelson, Neb.—McDermot & Devine have succeeded to the Hardware business of Case & McDermot.

North Yakima, Wash.—Nick Hartung has sold a half interest in the firm of the Hartung Hardware & Implement Company to A. W. Larsen.

Peabody, Kan.—The Irwin Hardware & Lumber Co. has sold out its business.

Pekin, Ill.—Ladd Gollon has bought the Hancock & Koerner Hardware store at 431-433 Court Street.

Pender, Neb.—The Edwards & Bradford Co. has purchased the Hardware store of C. Weideman.

Port Huron, Mich.—The T. S. & H. G. Lester Hardware stock has been purchased by Thomas Ward. The stock is being thoroughly overhauled and replenished. Mr. Ward will conduct a general Hardware business.

Post Falls, Idaho.—John Enders has purchased the Hardware stock of the Post Falls Mercantile Company.

Red Rock, Okla.—O. W. Lobdell has purchased a half interest in the Hardware store of J. S. McCormick.

Richmond, Va.—The Richmond Hardware Company has recently procured the large four-story building at Fourteenth and Cary Streets. This building is now being remodeled at considerable expense, and when the work is completed the Hardware company will move in, using the new building exclusively for wholesale business. This move has been found necessary by the officers and directors of the Richmond Hardware Company on account of their rapidly increasing business, their trade having lately outgrown the old quarters in 1316 East Main Street.

Rosalie, Neb.—W. W. Reed has purchased the Hardware store of Ford B. Barber.

Schenectady, N. Y.—Charles Paige, the Hardware merchant at 336 State Street, has announced that he will retire from business very soon.

Shelton, Neb.—Frank Turney has purchased the Hardware store of George Mortimer.

Shenandoah, Pa.—Arthur J. Millichap has purchased the Taggart interest in the Dunlap-Taggart Hardware Company and the firm will be known hereafter as the Dunlap Hardware Company.

Smithville, Mo.—Waller & Rice have been succeeded in the Hardware business by Waller & Williams.

Spokane, Wash.—W. P. Cunningham has removed his Hardware stock from Colton to Spokane.

Steilacoom, Wash.—J. F. Fowler has sold his Hardware business to J. M. Smith.

Sumner, Neb.—Yost & Moore have been succeeded in the Hardware business by D. J. Yost.

Syracuse, Neb.—J. M. Ellingsworth has sold has Hardware business to George Venter.

Wrightsville, Pa.—The annual meeting and election of the Wrightsville Hardware Company resulted in the election of the following directors: N. H. Coldwell, F. S. Crandall and E. S. Lee, of New York; M. G. Collins, of York, and R. S. Magee, of Wrightsville.

Tempe, Ariz.—The Arizona Hardware & Vehicle Co. has sold its business to the Tempe Hardware Co.

Tonkawa, Okla.—J. R. Ricks has purchased a half interest in the Hardware store of W. D. Scott.

Troy, Kan.—Minter & Culp Bros. have purchased the Hardware store of W. W. Minter.

Waverly, Mo.—J. O. Thompson has purchased the Hardware store of F. E. Johnson.

Westphalia, Kan.—Agnew & Agnew have succeeded to the Hardware business of Agnew & Orton.

Whitten, Iowa.—J. B. Myers has sold his Hardware store to Trumbull & Poole.

Wichita, Kan.—The Smythe Hardware Co. will sell out its store.

AMONG THE MANUFACTURERS.

St. Louis, Mo.—The Beck & Corbitt Iron Co., has bought the property and business of the Paddock-Hawley Iron Co., of that city, and as a result the New Paddock-Hawley Iron Co., Omaha, Neb., will abandon St. Louis, and will operate in Omaha as before. The Paddock-Hawley Iron Co. was bought last July by Baum Bros., of Omaha, who reincorporated in Nebraska under the name of the New Paddock-Hawley Iron Co. The absorption of the business by Beck & Corbitt involves more than $1,000,000, though the exact terms of the sale have not been made public. C. T. Brace, who has been in charge of the Paddock-Hawley interests in St. Louis has been elected vice president of the Beck & Corbitt Co. For the present Beck & Corbitt will continue to use the buildings occupied by the Paddock-Hawley concern, but it is the intention of the company to build an addition to the present buildings on Main street. The capital stock of the company will also likely be increased. The Beck & Corbitt Iron Co., is one of the oldest heavy Hardware houses in the west, having been in St. Louis 45 years.

Torrington, Conn.—At the annual meeting of the Hendey Machine company, manufacturers of special machinery and tools, important changes were effected in the official staff of the company. Frederick F. Fuessenich was elected president to succeed the late Henry J. Hendey. Mr. Fuessenich retains the office of treasurer, which he has held for some time. Charles H. Alford was promoted from secretary to vice-president and general manager, and Frederick N. McKenzie, who has been identified with the company for several years, was chosen secretary.

Warren, Pa.—The Jacobson Machine Company has closed a deal with the Rock Island Tool Company whereby the patent right on a vise is transferred. The Jacobson company secured $25,000 for the patent and materials for the manufacture of the vise.

Worcester, Mass.—The American Steel & Wire Co. has awarded the contract for a brick cable storage building, estimated to cost $20,000

Miscellaneous.

Harrisburg, Tenn.—At the annual meeting of the Royal Handle Manufacturing company, the following officers and directors were elected: Morris Hayatin, president; J. J. Mardis, vice president; M. D. Simmins, secretary and treasurer, who, with J. G. Grant and T. B. Steele, were elected directors.

AUTOMOBILE SUNDRIES RECORD

NEW YORK SPORTSMEN'S SHOW.

The Sportsmen's Show at Madison Square Garden, New York, from March 1st to 9th, was quite a success from the standpoint of attendance, the crowds being larger than ever before. It is stated now that next year's Show will last for three weeks in order to handle the crowd comfortably. The ground floor was given over to taxidermist displays, transportation and companies' exhibits, guides' headquarters and the large tank in the center was used for canoeing, tilting contests, fly casting and general water sports. The trade exhibits were all in the balcony and by far the most conspicuous for size and tasteful arrangement was that of the New York Sporting Goods Co., of 17 Warren Street, New York. Their stand was decorated in green and gold with a profusion of electric light effects and a complete line of camping, fishing, hunting and general outing goods was shown—Savage, Stevens and Remington Arms and Bristol Steel Rods were featured and much interest was taken in the display of the new Goodyear "Pneumatic" Base-Ball.

In the Bicycle line the Corbin Two-speed Coaster Brake and a complete assortment of Hudson Bicycles were shown. There is undoubtedly a great interest taken by the public in everything pertaining to camp life, as was attested by the crowds around the display of canoes made by E. M. White & Co., of Oldtown, Maine, and the "Gold Medal" cots, tables, chairs and other articles which add to the pleasure of an outing. Of the wholesale Sporting Goods distributers, the New York Sporting Goods Co. was the only one represented and there are many manufacturers and jobbers who were not represented who could avail themselves of this annual opportunity to advertise their goods.

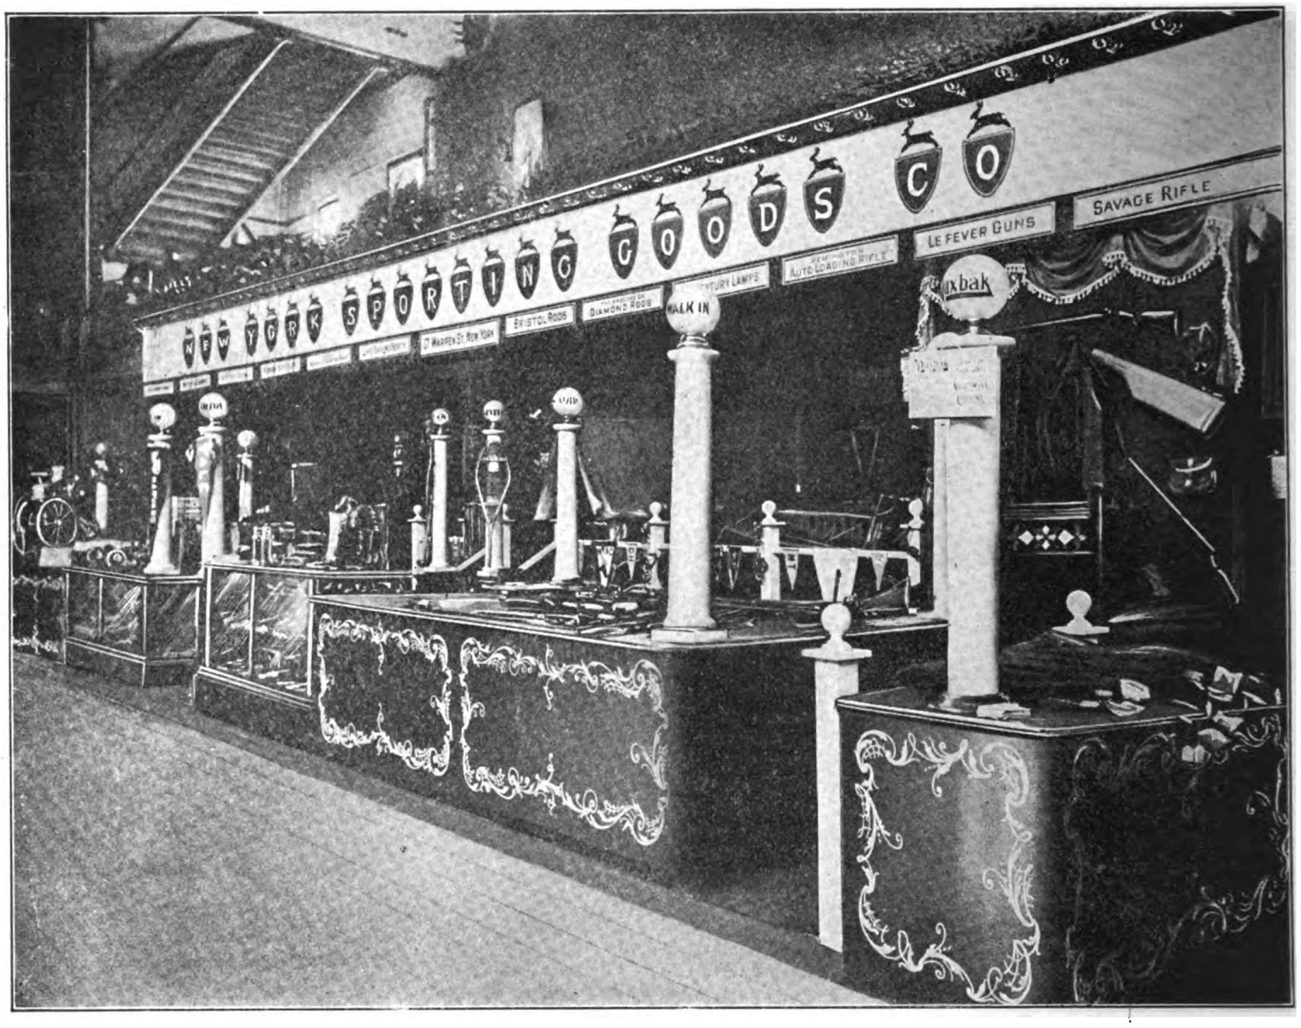

EXHIBIT OF N. Y. SPORTING GOODS CO. AT NEW YORK SPORTSMEN'S SHOW.

AUTOMOBILES, BICYCLES AND TRICYCLES.

In bulletin 66 the Census Bureau states that at the census of 1900 the manufacturer of automobiles in the United States was an industry so unimportant that it was not reported separately, being included under "carriages and wagons." The total value of automobiles and parts turned out in the census year was only $4,748,011. At the census of 1905, which covered the calendar year 1904, the output reached a value of $26,645,064, an increase since 1900 of 461.1 per cent. In 1900 the number of automobiles turned out by regular manufacturers was 3,723. At the census of 1905 the total output was 22,830. Of the 21,692 machines turned out by automobile factories, 18,699, or 86.2 per cent., were propelled by gasoline; 1,568, or 7.2 per cent., by steam, and 1,425, or 6.6 per cent, by electricity. The 1905 census of the manufacture of bicycles and tricycles discloses great decreases since 1900. The number of factories declined from 312 to 101, the capital invested, from $29,783,659 to $5,883,458; the number of wage earners, from 17,525 to 3,319, and the value of products, from $31,915,908 to $5,153,240. The number of chain bicycles turned out declined from 1,136,122 in 1900 to 246,304 at the census of 1905; chainless, from 32,929 to 4,077, and tricycles, from 26,110 to 4,063. The tricycles were almost entirely children's toys. Motor cycles increased from 159 to 2,436. At the census of 1905 there were twenty-eight establishments making motor cycles.

STOVE MANUFACTURERS' RECORD

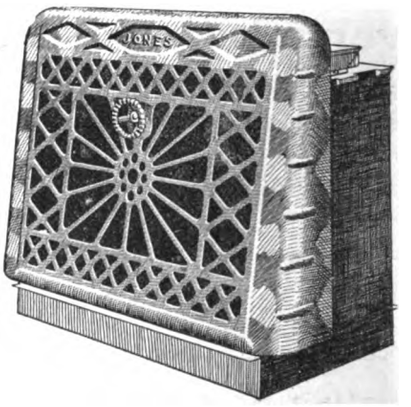
THE JONES SYSTEM OF WARM AIR HEATING.

United States Register Co., Ltd., Battle Creek, Mich., are offering the stove trade a valuable system of Warm Air Heating embodied in the following exemplification of its merits by the originator, A. O. Jones:

An improved warm-air heating system which has rendered modern furnace work less complicated—an ever increasing number of practical and perfectly working heating plants—make it impossible to describe a thoroughly tested and practical heating system; a system insuring the greatest amount of heat from a given quantity of fuel, and one enabling the operator to control the supply of warm air, directing it at will into the rooms to be heated, securing ventilation at a small expense and reducing the cost of installing warm-air furnaces, at the same time increasing their efficiency, is, in the writer's estimation, and in the face of rapidly disappearing prejudices, a system worthy of universal adoption.

The system under consideration differs from those in common use in that ventilation is secured in all rooms and the basement is not filled with warm-air pipes, but consists of the

THE JONES SYSTEM OF WARM AIR HEATING.

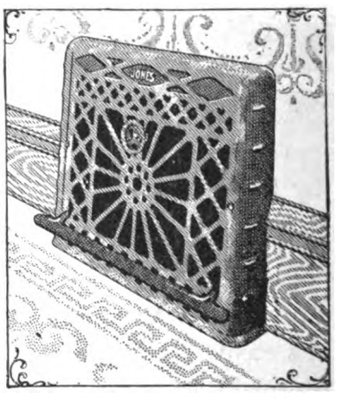


placing of any modern warm-air furnace of the correct size in an ordinary basement of reasonable height. The furnace to be centrally located and supplied with fresh air of an amount equal to at least 90 per cent. of the combined area of the basement pipes, and the warm-air chamber connected by one-half the number of warm-air pipes ordinarily used to improved warm-air registers placed in the wall of each room on the first floor, with a wall pipe continuing from the top of each register box to the rooms on the second floor, using for heating each two rooms—one on the first floor and one on the second—a basement pipe with capacity equal to the capacity to two pipes necessary for heating these two rooms separately. The manner of connecting the wall pipe to the top of the improved side-wall register is shown in the illustration; also the method of pipe construction in the basement.

The advantages to be gained are that ventilation is secured in all the rooms, as these registers are provided with a double metal box, arranged with an air space between the inner and outer casing and a ventilating opening, where air is drawn out of the rooms being heated and is conducted through the air space upwards, around the wall pipe—if single wall pipes are used—or through the space between the two castings of a double wall pipe when the latter are used.

The heat of the wall pipe causing an upward current insures a rapid movement of the foul air to a point in the attic directly above the registers, where it should be conducted through vent pipes to a chimney flue not used for any other purpose.

It will be seen that cellar air—as ordinarily used for protection when double wall pipes are used—is not allowed to enter the space between the two casings of the wall pipe, but, instead, air is drawn from the rooms; therefore, coal dust and fine ashes are not found escaping through the registers, as is sometimes the case with the systems that have been in use before the introduction of this system, which has been adopted by a great many furnace dealers who testify to the practicability of the system described.



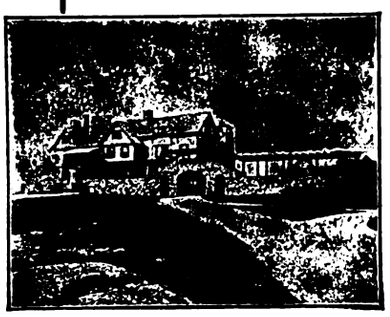
The advantages of being able to utilize all of the warm air from the furnace in the first floor rooms when the second floor rooms are not in use should not be overlooked, for as is well known—with the old plan of installation—the closing of the second floor registers or the dampers in the pipes leading to

REGISTER FOR FIRST FLOOR.

the second floor registers, does not increase the amount of air delivered to the first floor rooms, but simply causes the air to be overheated, which is very objectionable—often giving rise to the argument which is advanced regarding vitiated air. While with this improved system the full amount of the air supply is constantly moving, and when the second floor rooms are not in use the fire in the furnace must necessarily be checked and a larger amount of air is supplied at a lower temperature.

When the second floor rooms are in use the increasing velo-

REGISTER FOR SECOND FLOOR.



city of the air in the perpendicular or wall pipes makes it possible to heat rooms on the first floor located some distance from the furnace, which is difficult without the assistance of the suction caused by the wall pipe.

The reduced number of warm-air pipes in the basement makes it possible to connect the larger warm-air conductor at a point on the bonnet of the casings where it can run straight to the register. This makes angles unnecessary, excepting in rare cases, and as a straight line is the shortest distance between two given points, the least possible amount of piping is used with very few angles; therefore, the friction and radiation is reduced to a minimum, which means cooler basements and warmer living rooms, to say nothing of the reduction of cost in installation.

This system, therefore, renders modern furnace work less complicated, insures perfectly working warm-air heating plants, securing the greatest possible amount of warm air from a given quantity of fuel, reduces the cost of installing furnaces, and makes failure almost impossible.

Profitable Heating

KELSEY HEATED, near Providence, R. I.

The Man Who Makes Money

in the heating business to-day is not the man who is selling any kind of a furnace at competition prices, but is the one who is striving to get the best kind of results, and sells his customers a heater that pleases them and brings him more business.

The day is gone by when heating contracts are secured simply by being the lowest bidder.

30,000 KELSEY

Warm Air Generators

have been sold since 1889—and every year because of the good results secured, the sales increase. Not only this, but the Kelsey System is being installed in the very finest class of residences, churches and schools, and are becoming so well known that Kelsey dealers everywhere are soliciting the best kind of heating work, and are securing contracts at prices not made to meet any kind of competition.

There's Only One Warm Air Generator

Why not write us about the Agency Proposition?
800 dealers are now selling.
It might pay you to act quickly.

"MODERN RENOWN" STEEL RANGE.

The Independent Stove Co., Detroit, Mich., are the manufacturers of the Renown line of Steel Ranges, one of which, the "Modern Renown" we present an illustration of herewith.

"MODERN RENOWN" STEEL RANGE.

The two principal features on this Range are the Plain Surface Nickel and the ingenious device for raising the Pan Top, including covers and centers, over the fire-box. This device is extremely convenient for putting in fuel and for toasting or broiling, as it raises the entire top over the fire-box with one simple operation.

Plain surface nickel is something that the trade has demanded for years, but stove manufacturers, as a rule, have not seen fit to give it to them on account of the increased cost of production, for as a matter of fact nickeled castings that are heavily carved do not cost nearly as much as those with plain surface. With the latter every mar or scratch has to be obliterated before the castings are nickel-plated, otherwise they will show up in the finished product. One can readily understand that this nickel work is very easily kept clean and this is why the ladies in general like this finish.

This company has just recently increased its capital stock from $30,000 to $60,000, and it was decided to increase the Board of Directors from three to five, and William V. Robinson, president; Robert J. Waddell, vice-president and general manager; J. Edwin Ellis, secretary and treasurer, William Gerhauser and Edward Bland now comprise the Board of Directors.

"IHCO" ALL STEEL WARM AIR FURNACE.

The International Heater Co., Utica, N. Y., are the manufacturers of the "Ihco" All Steel Warm Air Furnace, of which we give a detailed description as follows:

The "Ihco" All Steel Furnace is constructed of the highest grade of steel suitable for the purpose and along well-defined lines. Care has been taken to proportion the different parts to obtain the best possible results from the fuel burned. In designing this furnace particular attention was given to making as few joints as possible inside the casing, and to make the necessary joints gas and dust tight. They have accomplished this, and have reduced to the minimum the liability of leakage of gas and soot. This heater will successfully burn soft or hard coal, wood, and in fact, any fuel desired.

"IHCO" ALL STEEL WARM AIR FURNACE.

This illustration shows a front exterior view of the heater without the casing.

The Dome. The shell which forms the dome or combustion chamber, fire-pot and ash-pit, is made of extra heavy steel plate, closely riveted; the head or top is made of the same material and gauge, and closely riveted to the shell.

The base of the heater is of cast iron, and forms the bottom of the ash-pit and is constructed in such a manner that the shell rests on a ledge or offset fully one inch above the ash-pit bottom, protecting the steel from contact with any moisture or ashes that may accumulate on the base, and thereby increasing the life of the steel at this point.

The ash-pit is formed by the base and bottom portion of the steel shell. It is of good height, and has a large door which is provided with draft door and slide.

This illustration shows a rear exterior view of the heater without casing. The radiator flues are broken away, the arrows indicating the course taken by the products of combustion from the dome through the flues to the smoke-pipe.

The grate used in this heater is their patent hollow-bar grate mounted in a frame and so arranged that the whole grate may be dumped to remove clinkers and to replace any bar independent of the others.

The fire-pot is formed by two rows of heavy fire-brick which line the shell, making a pot of sufficient depth to maintain as heavy a fire as may be desired, without coming in direct contact with the shell. These brick are supported by a cast iron ring securely fastened to the shell.

Whitewright, Mo.—Wilson Hardware Company; $15,000. Incorporators: F. H. Hartzog, J. A. Davies of Wolfe City, Tex.; J. W. Wilson of Whitewright.

Wilbur, Wash.—R. B. Hall of Spokane has opened a Hardware store in the Carpenter block in this city.

Changes and Improvements.

Abilene, Kan.—J. T. Pendergast has sold an interest in his Hardware store to J. M. Walters.

Adrian, Mo.—W. B. Switzer has sold his Hardware store to J. W. Maxey.

Alta Vista, Kan.—Wolgast & Schade have been succeeded in the Hardware business by A. H. Wolgast.

Anthony, Kan.—G. W. Young has purchased the Hardware store of J. F. Berger.

Arkansas City, Kan.—The Sturtz Hardware Co. has succeeded to the business of the Gilbert-Sturtz Hardware Co.

Ashland, Ohio.—Through mutual agreement the Union Hardware & Supply Co. has purchased the interest formerly held by E. E. Morr. The style of the firm will remain the same as before and J. R. Heichel has taken stock and an active interest in the new firm.

Ashtabula, Ohio.—J. G. Mitchell of the Crosby Hardware Company has purchased the Hardware store owned by the Conkey Brothers at Conneaut and has taken possession of his new holdings. The store will be operated in the future under the name of the Mitchell Hardware Company and the ultimate intention of Mr. Mitchell is to organize a stock company which will take over the store.

Attica, Kan.—Stout & Davis have sold their Hardware store to Crawford & Davis.

Autne, Kan.—D. A. Corhelson has purchased the Hardware store of Winkley Bros.

Barneston, Neb.—C. M. Groves has purchased the Hardware store of Cannell Bros.

Bartlesville, I. T.—R. H. Muzzy has succeeded to the Hardware and implement business of Berentz & Muzzy.

Bennington, Neb.—Aug. Witte has purchased the Hardware store of J. H. Siert.

Birmingham, Ala.—The Prowell Hardware Company will erect a seven-story, modern building on the site of its old building on First Avenue, near Nineteenth Street. The former building was destroyed by fire two or three months ago. The new building will cost about $100,000 and will be completed the last of July or the first of August. It will be the tallest building devoted to mercantile business in Birmingham.

Bristow, Neb.—G. W. Miller has purchased the Hardware store of H. & F. H. Cage.

Browning, Mo.—C. R. Campbell has purchased the Hardware and stove business of J. F. Reynolds & Co.

Butler, Mo.—Cable & Groves have sold their Hardware business to Chambers & Chambers.

Cairo, Neb.—John Peters has been succeeded in the Hardware business by Peters Bros.

Cedar Edge, Colo.—Byrd & Whitesell have sold their Hardware business to B. F. Elhart.

Central City, Ky.—The Gregson-Wallace Hardware Company has changed its name to the Gregson Hardware Company.

Ceresco, Neb.—Dahlstrom & Nelson have succeeded to the Hardware business of C. G. Dahlstrom & Son.

Clinton, Mo.—W. H. Stone has succeeded to the Hardware business of Sherty & Stone.

Cody, Neb.—The Barnes-Jarchow Co. has succeeded to the Hardware business of M. H. Barnes & Son.

Colfax, Wash.—Wm. Erickson & Son have purchased the business of the Kuhn Hardware Co.

Corvallis, Ore.—E. J. Veal has sold his Hardware business to Mellem & Pinkerton.

Council Hill, I. T.—W. L. Knouff has sold his business to the Council Hill Hardware Co.

Crescent, Okla.—R. S. Smith has succeeded to the Hardware business of Smith & Smith.

Cushing, Neb.—Andrew H. Jepson has purchased the Hardware business of F. R. Linderman.

Dayton, Wash.—J. C. Babbitt and C. W. Powers of the Hardware firm of Babbitt & Powers have sold their business to Sherman Galloway of Waitsburg.

Derby, Kan.—T. D. Wardell has succeeded to the Hardware business of Wardell & Swisher.

Dunkirk, N. Y.—D. D. Walker and S. B. Culver are the members of the firm which has just assumed the management and ownership of the former D. H. Griswold Hardware store in Lion Street. The new firm will remodel the store, putting in steel ceiling, modern shelving, cases, counters, show cases, etc., and will carry a complete line of Hardware, builders' supplies, house furnishings, and do a full line of tinning, sheet iron work, and heating.

Eldorado, Ohio.—The Hardware firm of Shewman & Billman has dissolved partnership and C. E. Shewman has assumed full ownership of the Hardware store.

Eugene, Ore.—F. J. Berger has been succeeded in business by the Berger-Bear Hardware Co.

Friend, Neb.—P. B. Wilson has purchased an interest in the Hardware business of T. W. O'Laughlin.

Glencoe, Okla.—F. Allen has sold his business to the Glencoe Hardware & Implement Co.

Govan, Wash.—H. B. Fletcher has purchased the Hardware store of Theo. Bodeau.

Greenwood, Mo.—D. S. Miller has purchased the Hardware store of J. T. Adams & Co.

Hagerstown, Ind.—John L. Replogle has sold his Hardware store to W. H. Stahr.

Kelly, Kan.—Haug & Strive have sold their Hardware store to Haskett & Horth.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Baltimore, Md.—The Ross Combination Drafting Tool Company has been incorporated to manufacture and dispose of patented inventions. Thomas S. Ross, Michael H. Noon, James J. Ellis, John J. Mahon and Walter R. Townsend are the incorporators. The authorized capital stock is $20,000.

Cahanna, Ohio.—The Waugh Machine Co. has recently been incorporated, with a capital stock of $12,000, and will engage in the manufacture of a mortising machine. The incorporators are Johnston S. Waugh, George F. Ebner, Leo Miller, David L. Stygler and Peter Swickard.

Cambridge, N. Y.—Lovejoy Company has been incorporated; agricultural implements; capital, $100,000. Directors—H. H. Lovejoy and L. H. Lovejoy, Cambridge; A. S. Rice, Troy.

Churubusco, Ind.—The stockholders of the new Fisk Mfg. Co., organized for the manufacture of ladders, lawn swings and churns, have met and elected the following directors: Val Brown, S. H. Ort, E. E. Gandy, Leo Isay, J. H. Greismar, Dr. J. H. Briggs and V. A. Geiger. The new company has filed papers and incorporated at $6,000.

Columbus, Ohio.—The Monarch Specialty Mfg. Co. has been incorporated with a capital stock of $300,000 to manufacture and sell plumbing and Hardware supplies, household specialties, water-lifts, stoves, motors, washing machines and other specialties and sell and nold real estate. The incorporators are C. K. Cunningham, Jr., Arthur C. P. Tyler, C. V. Ellis, A. S. Williams and W. J. Donahue. For the time being the company will continue the business of manufacturing stoves and other articles at the plant at 115 West Vine Street.

Cornwall-on-Hudson, N. Y.—The Barton & Spooner Co. has been incorporated to manufacture Hardware novelties, etc.; capital, $30,000. Incorporators, Henry L. Barton, Ralph P. Spooner, George S. Scutt, Cornwall-on-the-Hudson; Ely Moore, No. 121 Franklin Street, New York.

Evansville, Ind.—Articles of incorporation for the J. J. Groeninger Tinware manufactory have been filed. The capital stock is $5,000. The directors are J. J. Groeninger, F. J. Scholz, F. H. Groeninger, Mabel Scholz.

Fishkill Landing, N. Y.—Jaycox Mfg. Co. has been incorporated to manufacture Hardware, etc.; capital, $9,000. Incorporators: Edward L. Jaycox and John P. Davis, Fishkill Landing, N. Y.; George F. Farrell, New York, and others.

New York, N. Y.—Inter-State Brush Co. has been incorporated; capital, $30,000, and directors, A. J. Lawler, A. E. Lawler, Baltimore; L. H. Strouse, New York.

Norcross, Ga.—Among the latest manufacturing enterprises in this community is the Buchanan Plow and Implement Co., capital, $100,000. The officers are as follows: Edward F. Buchanan, of New York, president; C. O'Conner, of New York, vice-president; T. F. Walker, of Norcross, general manager; R. J. Lynch, of New York, auditor; W. R. Hunnicutt, of Norcross, secretary and treasurer. The company has erected a model plant here and is now engaged in turning out high-grade plows. Later in the season their facilities will be increased and they will turn out quantities of various implements used by the Southern farmer.

North Raynham, Mass.—The Specialty Nail Company is the name of a new corporation that is to manufacture shoe nails. The incorporators are: Albert R. White, president, Herbert C. Dean, treasurer, and these with A. Milot constitute the board of directors. The company has purchased the building of the Whitenton Pearl Works and will remove it to a lot near North Raynham station on the north side of the railroad. The capital stock is $10,000. Much of the work will be turned out by automatic machines. These machines have already been purchased. An addition will be made to the Pearl Works building. The shop will be put in operation as speedily as possible.

Oneonta, N. Y.—There has recently been incorporated the Oneonta Mfg. Co., with home offices in Oneonta and with a capital stock of $22,000, half of which has been issued, to manufacture a clever lawn mower sharpener that has been invented by John Chesebro of Oneonta Plains.

Plymouth, Mass.—Cobb & Drew, Inc., has been incorporated; tacks, nails, etc.; capital, $100,000. President, H. J. Seymour; treasurer, R. Holmes, Plymouth.

Rock Island, Ill.—The Rock Island Tool Company, one of the corporations recently formed through the instrumentality of the Rock Island Industrial Commission, is rapidly completing the arrangements for putting its plant into operation. The company, which is controlled by Rock Island capital, with a capital stock of $50,000, plans eventually to take a site in the new west end factory district, but temporarily will be operated with foundry in the former Thompson foundry on Twenty-fourth Street and machine shop in the Donaldson sawmill on Fourth Avenue.

Scarsdale, N. Y.—Phoenix Specialty Mfg. Co. has been incorporated to manufacture corrugated metal gaskets, metal washers; capital, $5,000. Incorporators—Alvin W. Wagenseller, No. 349 West 14th Street; Edward J. Rowe, No. 417 West 150th Street, both of New York; Remsen S. Voorhis, Yonkers, N. Y.

Taunton, Mass.—The Globe Mfg. Co., manufacturers of wire nails, has been incorporated in Massachusetts, with a capital stock of $25,000. J. Alfred Welch is president and treasurer, M. J. Lee, clerk, the two with J. H. Dobbs constituting the board of directors. The company has recently purchased some of the wire nail machines of the Taunton Rivet Co., Taunton, and has placed orders for several more. At the present time over sixty machines are being operated, manufacturing over 100 styles of nails for special purposes. It is the intention of the company to enlarge its capacity about one-half.

Waterbury, Conn.—A certificate of incorporation has been filed by the Chatfield & Chatfield Company, a company formed for the manufacture of machinery and tools. The capital is $40,000 and the incorporators are William F. and Mary F. Chatfield and Albert F. Sherwood.

Changes and Improvements.

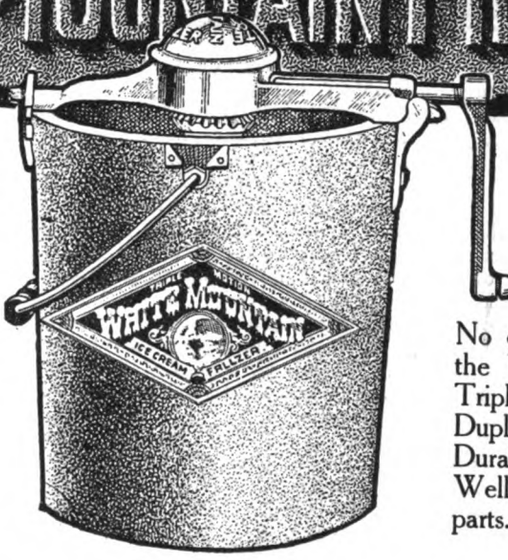
Boston, Mass.—The Gillette Safety Razor Co. is to make a large increase in its machine shop capacity. The company builds all of the machinery used in the manufacture of its product, which means an important department in itself. A building adjacent to the plant at South Boston has been purchased. It has three stories and basement, with 6,900 square feet to a floor. Considerable new equipment will be installed, including in addition to that of the present shop, the machine tools of the plant of the M. G. Gillette Co., Brooklyn, which have recently been purchased. It is presumed that this building will be adequate to the company's shop requirements for a year or so.

Braddock, Pa.—A petition for the dissolution of the Braddock Tool Company has been filed. The company had retired from business in 1904, and wished to wind up its affairs.

Branford, Conn.—It is reported that the Sears, Roebuck Company of Chicago are to purchase the Branford Lock Works, and run it in the future. An offer for the purchase of the property has been made and it will probably be accepted. The purchaser will ask for a right of way to the river front and it is said that this can be effected without much trouble. Mr. Noack, formerly superintendent of the old New York Lock Company, has been in Branford with a representative of the firm that contemplates a purchase of the plant.

Canandaigua, N. Y.—The announcement is made of the sale by Alexander Davidson, for some years past proprietor of the foundry formerly conducted by the Robinson Chilled Plow Company, of the plant and entire establishment to the Syracuse Chilled Plow Company, of Syracuse. There are no definite plans for the future, it is announced, but there is a likelihood that the concern will continue the local plant as a branch.

Chicago, Ill.—The American Cutlery Co. will erect a new six-story factory, 42 by 150 feet, on the site of the one which was recently destroyed by fire. The building which is to be located at Nos. 169 to 197 Mather Street, Chicago, will be of reinforced concrete construction and will cost $150,000.



Coldwater, Mich.—The Pratt Mfg. Co., engaged in the manufacture of cutters, is arranging to build extensive additions to its plant, by which it will acquire about 5,000 feet of floor space. The addition is to be three stories high.

Eau Claire, Wis.—The Clipper Chilled Plow Works of Elmira, N. Y., will be moved to this city. The plant will be run in connection with the Northwesten Steel & Iron Works, where the machinery will be installed upon its arrival here. The works will manufacture plows, harrows, cultivators and numerous other agricultural implements.

Findlay, Ohio.—Adams Bros.' foundry, one of the largest in this part of the State, is to have another department added to it in the form of a plow factory.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Atlanta, Ga.—Walthour & Hood is the style of a new jobbing firm which has commenced business here. It is composed of Palmer Walthour, who formerly was connected with the Alexander-Elyea Co., of Atlanta, and Mr. Hood, who previously was in the cycle trade in Columbus, Ga.

Brooklyn, N. Y.—Dark Circle Garage, to manufacture operatic and store vehicles; capital, $10,000. Incorporators: James A. Anderson, No. 233 East 21st Street; Frank D. Skeel, No. 58 East 25th Street, both of New York; Frank L. Haggerty, No. 922 Eighth Avenue, Brooklyn.

New York, N. Y.—John S. Leng's Son & Co., 33 Murray Street, has been converted into a $100,000 corporation under the laws of the State of New York. The incorporators named are: G. E. Relyea, New York City; J. H. Richards, Cranford, N. J.; R. H. Hance, West New Brighton; G. Hees, A. G. Cross, Brooklyn.

New York, N. Y.—"Sports, Ltd.," is the style of a new company which will shortly begin business on upper Broadway, selling bicycles, motorcycles, and a full line of supplies. A location in "Automobile Row" is now being sought. The company, which is being incorporated under New York laws with $10,000 capital, is fathered by P. R. Robinson, of the New York Sporting Goods Co., and D. P. Harris, both names being familiar to the trade in the jobbing line.

Portland, Me.—Bennett Mfg. Co. has been incorporated to manufacture toys of all kinds; capital, $50,000. President, H. B. Bennett; treasurer and clerk, Benjamin Thompson, both of Portland, Me.

Rochester, N. Y.—Forest & Malone; new firm at 10 Monroe Avenue.

Waco, Tex.—Holt Kodak and Sporting Goods Company; capital stock, $4,000. Incorporators, Peeler Williams, C. H. Hooper and J. W. Whitworth.

St. Louis, Mo.—At a recent meeting of the stockholders of the Geller, Ward & Hasner Hardware Co., it was voted to increase the capitalization from $100,000 to $200,000 and to enlarge the firm's sporting goods department materially. It is the company's intention to give over the entire South wall of their storeroom at 412-14 North Fourth Street, to the sporting goods department, thus increasing the display space of that department four-fold. The present lines carried by the firm will be increased and new lines will be added, in an effort to give the house as complete a line of goods as any house in the city can boast. Among the new lines will be gasoline launches and canoes, of which a complete line will be carried, while baseball, football and other athletic sports will be carried.

Changes and Improvements.

Akron, Ohio.—A meeting of the stockholders of the Diamond Rubber Company has been called to pass upon a proposed increase of the capital stock—from $3,500,000 to $4,000,000.

Bristol, Conn.—The Liberty Bell Co., which after disposing of its factory property to the New Departure Mfg. Co., went into the hands of a trustee, has made a formal offer of eighty per cent. to the creditors. Most of the creditors have accepted the tender. The concern's liabilities approximate $40,000, and its assets, made up of book accounts, are less than $36,000, which of course will shrink in the process of collection.

Buffalo, N. Y.—The Union Mfg. & Specialty Co. is about to change its corporate name to Charles E. Hall Co. The company manufactures chains and a number of cycle specialties.

Cleveland, Ohio.—The Standard Welding Co. are making ready to erect an immense addition to their plant. Among other things it will increase their production of tubing from 6,000,000 to 15,000,000 feet of tubing annually.

Hartford, Conn.—The Pope Mfg. Co. has again taken up motorcycles. Of course, the Pope people never wholly dropped them, but during the past two years they have not exploited them to an extent worthy of much notice. Last Fall, however, it was announced that they would seriously enter the field in time for the 1907 demand, but later the announcement was nullified by the statement that the Pope automobile interests had interfered with previous intentions. Within the last month, however, the motorcycle light has become so strong that the Pope Mfg. Co. has engaged H. B. Whitney, a motor engineer formerly connected with the Electric Vehicle Co., and who had previously designed a two-cylinder motorcycle, and he will devote himself exclusively to the development of a Pope power driven bicycle, which will not be ready for the market, however, until next Fall.

New York, N. Y.—The Bryte, Coates & Campbell Co., the San Francisco jobbers, have come East and established a New York branch, which temporarily will be located at 35 Warren Street. It will be in charge of H. A. Bryte, a member of the company.

Reading, Pa.—The conversion of the Reading Standard Cycle Mfg. Co., W. F. Remppis, proprietor, into the Reading Standard Co., a corporation of Pennsylvania, has been completed. The original outline of organization was carried out. The capital stock is $300,000, of which $100,000 is preferred. The working board of the new corporation was made up at a meeting on March 11, when the following officers were elected: D. F. Printz, president; D. P. Harris, vice-president; W. F. Remppis, treasurer; Harry Walburg, secretary.

Wareham, Mass.—W. G. Woodruff has reopened his store.

Miscellaneous.

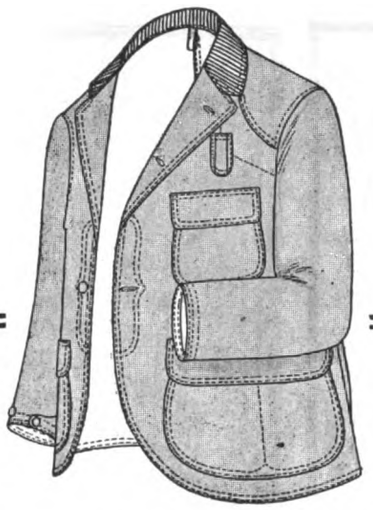
Batavia, N. Y.—Directors of the Baker Gun Company have elected the following officers: President and treasurer, Frederick M. Farwell; vice-president, Robert A. Maxwell; secretary and general superintendent, Daniel W. Tomlinson, Jr.

Sacramento, Cal.—The Kimball-Upson Company, one of the leading sporting goods firms on the Pacific Coast, recently celebrated its thirteenth anniversary. The company now occupies a large double store at 609-11 K Street, with over 12,000 square feet of floor space. The officers and directors of this company are as follows: M. N. Kimball, president; L. S. Upson, vice-president and manager; F. M. Newbert, secretary; M. C. Danis, treasurer, and D. E. Newbert.

INDIANA DEALERS ELECT LEADERS.

The Richmond (Ind.) Bicycle Dealers Association has elected the following officers for the 1907 term: President, W. M. Waking; vice-president, B. W. Thornton; secretary, Elmer S. Smith; assistant secretary, W. T. Bradway; treasurer, W. H. Dunning. The Association is one of the few remaining local trade organizations, and has done good work in its vicinity.

RUSSIAN DUTIES ADVANCED.



According to the provisions of the new Russian tariff which went into effect last spring, the duty on cycles having two wheels in 30 roubles each, or about $7.50. Cycles having three wheels are taxed 60 roubles each, or $15, and those having four wheels, 160 roubles or $40. Parts, except those which are specially restricted, are asserted at the rate of 40 roubles per pood, which is equivalent to something like $3.60 per pound.

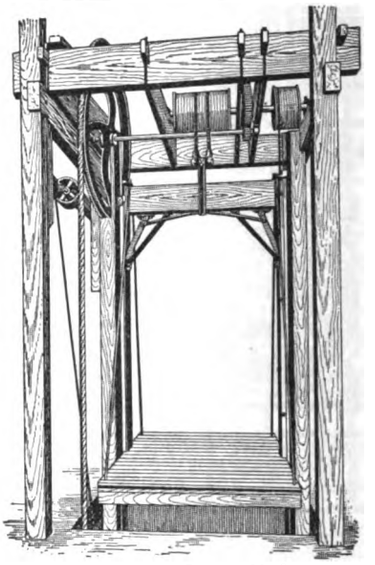
CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.



Put up in coils 300 feet each.
Patent Metal Reel Frame with each coil.
Straps made in four widths: ½, ⅝, ¾ and 1 inch.
Patented in all countries.

CARY MFG. CO,
19 & 21 Roosevelt Street, New York.
Cable Address: CARLEIO

Elevator Repair Bills
Reduced 25% by using
THE EATON & PRINCE

Center Lift Store Hoist

We Pay the Freight—You Install Elevator Yourself

We will ship this Elevator direct to you, freight paid and you can install it yourself without expense except the help of the average mechanic. This is an exceptional offer. Everyone knows that **EATON & PRINCE** means dependable Elevators. No other Elevator is quite as good because none is made with such infinite care. Send for Catalogue No. 57.

We are also extensive makers of Passenger and Freight Elevators, for direct and alternating current. Send for catalogue.

EATON & PRINCE COMPANY
70-76 MICHIGAN STREET, CHICAGO.

Pure and Absolutely Safe

Cooking Utensils are those which will **NOT SCALE OFF** like cheap enamel; **NOT SCORCH OR BURN** like light fry-pans and skillets; **NOT ABSORB GREASE OR FLAVORS** like Cast-Iron. In a word **"HYGIENIC"** is the condition and **"HEALTH"** the result when using

"NEVER-BREAK" STEEL SPIDERS, GRIDDLES AND KETTLES.

Look for the **BRAND**—it is what the signature is to a bank check—you can't expect the **GENUINE** from more than one.

THE AVERY STAMPING CO., Cleveland, O.
Sole Mfrs. of "NEVER-BREAK" GOODS.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.
